BOMBAY, CALCUTTA & LONDON.

VIEWS of BOMBAY

OLD and NEW

*A Photographic record
for more than 75 years*

An excellent souvenir of the first city of the Indian Empire. 42 beautifully reproduced photographs; not only of modern Bombay, as we know it, but the Bombay of Yesterday—Views which have vanished forever.

**Price Rs. 1-8.
V.P.P. Rs. 1-13.**

On sale at "The Times of India," Bombay, and all leading book-sellers.

The contents include pictures of Apollo Gate in 1862, Churchgate in 1863, the Esplanade and Harbour during 1865 and the Town Hall, before the days of Elphinstone Circle.

THE TIMES OF INDIA PRESS

Hornby Road,

BOMBAY.

“the Times of India Press?”

“Will you send a representative round, please? I’d like to talk about a printing job I’ve in mind. I saw some of your work the other day and was very impressed with the excellent standard of quality. And a friend told me that you’d plan the whole thing from beginning to end.....you’re quick on the job, too, I believe. Yes, sometime this afternoon will be all right.”

PREFACE

THE Editors have to thank many correspondents who during the past year have sent them suggestions for the improvement of this book. The Indian Year Book is intended above all to be a book of reference, and its completeness and convenience of arrangement must necessarily depend to a great extent on the part taken in its editing by the members of the public who most use it.

The help extended to the Editors by various officials, and more particularly by the Director of Information and Labour Intelligence, Bombay, and the Indian Commercial Intelligence Department, has again been readily given and is most gratefully acknowledged. Without such help it would be impossible to produce the Year Book with up-to-date statistics.

Suggestions for the improvement or correction of the Year Book may be sent to the Editors at any time, but those which reach them before January have a better chance of being adopted than later suggestions which only reach them after the work of revision has been partly completed.

The Times of India, Bombay,
April, 1936

An Indian Glossary.

ARKALI.—Excise of liquors and drugs.

ACHHUT.—Untouchable (Hindi) Asuddhar.

ACRFAGE CONTRIBUTION.—Contribution paid by holders of land irrigated by Government.

ADHIRAJ.—Supreme ruler, overlord, added to "Maharaja," &c, it means "paramount."

AFSAP.—A corruption of the English "officer."

AHIMSA.—Non violence.

AHLUWALLA.—Name of a princely family, resident at the village of Ahlu, near Lahore.

AIN.—A timber tree *TERMINALIA TOMENTOSA*.

AKALI.—Originally, a Sikh devotee, one of band founded by Guru Govind Singh (who died 1708) now, a member of the politico-religious army (*dal*) of reforming Sikhs.

AKHARA.—A Hindu school of gymnastics.

AKHUNDZADA.—Son of a Head Officer.

ALJAH.—(1) exalted rank.

ALIGHOL.—[Literally a Mahomedan circle. A kind of athletic club formed for purposes of self-defence.

ALI RAJA.—See king (Laccadives).

AM.—Mango.

AMIL.—A name given in Hind to educated members of the Lohana community, a Hindu caste consisting principally of bankers, clerks and minor officials.

AMIR (corruptly **EMIR**).—A Mohammedan Chief, often also a personal name.

AMMA.—A goddess, particularly Murlamma, goddess of small-pox, South India.

ANICUT.—A dam or weir across a river for irrigation purposes, Southern India.

ANJUMAN.—A communal gathering of Mahomedans.

APHUS.—Believed to be a corruption of ALPHONSE, the name of the best variety of Bombay mango.

ARZ, ARZI, ARZ-DASHT.—Written petition.

ASAF.—A minister.

ASPRISHYA.—Untouchable (Sanskrit).

AUS.—The early rice crop, Bengal, syn Ahu, Assam.

AVATAR.—An incarnation of Vishnu.

AYURVEDA.—Hindu science of Medicine.

BABA.—Lit. "Father," a respectful "Mr Irish "Your Honour."

BABU.—(1) A gentleman in Benwal, corresponding to Pant in the Deccan and Konkani. (2) Hence used by Anglo-Indians of a clerk or accountant. Strictly a 5th or still younger son of a Raja but often used of any son younger than the heir, whilst it has also grown into a term of address=Esquire. There are, however, one or two Rajas whose sons are known respectively as—1st, Kunwar; 2nd, Diwan; 3rd, Thakur, 4th, Lal; 5th Babu.

BABUL.—A common thorny tree, the bark of which is used for tanning, *ACACIA ARABICA*.

BADMASH.—A bad character; a rascal.

BAGR.—Tiger or Panther.

BAGHLA.—(1) A native boat (Buggalow), (2) The common pond heron or paddybird.

BAHADUR.—Lit. "brave" or "warrior", a title used by both Hindus and Mohammedans, often bestowed by Government, added to other titles, it increases their honour but alone it designates an inferior ruler.

BATRAGI.—A Hindu religious mendicant.

BAJRA OR BAJRI.—The bulrush millet, a common food-grain, *Pennisetum typhoides*; syn. cambu, Madras.

BAKHSHI.—A revenue officer or magistrate.

BAKHSHISH.—Cheri-meri (or Chiri-miri) Tip.

BAND.—A dam or embankment (Bund).

BANDAR.—Monkey.

BANYAN.—A species of fig-tree, *Ficus bengalensis*.

BARA SING.—Swamp deer.

BARSAT.—(1) A fall of rain, (2) the rainy season.

BARSATI.—Farcy (horse's disease).

BASTI.—(1) A village, or collection of huts. (2) A Jain temple, Kanara.

BATTA.—Lit. 'discount' and hence allowances by way of compensation.

BATTAK.—Duck.

BAWARCHI.—Cook in India, syn. Mistri, in Bombay only.

BAZAR.—(1) A street lined with shops, India proper; (2) a covered market, Burma.

BEGUM or **BEGAM.**—The feminine of "Nawab" combined in Bhopal as "Nawab Begum."

BER.—A thorny shrub bearing a fruit like a small plum, *Zizyphus jujuba*.

Note.—According to the Hunterian system of transliteration here adopted the vowels have the following values.—a either long as the a in 'father' or short as the a in 'cut,' e as the e in 'gain,' i either short as the i in 'bib,' or long as the ee in 'feel,' o as the o in 'bone,' u either short as the oo in 'good,' or long as the oo in 'boot,' ai as the i in 'mille,' au as the ou in 'grouse.' This is only a rough guide. The vowel values vary in different parts of India in a marked degree.

- BESAR.**—In Hindi (also Gujarati *Vesar*)—Woman's nose-ring.
- BEWAR.**—Name in Central Provinces for shifting cultivation in jungles and hill-sides; syn. *taungya*, Burma; *jhum*, North-Eastern India.

RISALDAR.—Commander of a troop of horses.

ROHI, ROZ.—Nilgai.

ROHU.—A kind of fish, *Labeo Rohita*.

ROTI.—Bread.

ROZA.—Muslim fast during Ramazan. Also Mausoleum (corruption of "rauza.")

RYOTWARI.—The system of tenure in which land revenue is imposed on the actual occupants of holdings.

SABHA.—Assembly, Meeting, Council, Congress.

SADHU.—A Hindu ascetic.

SADR, sudder.—Chief (adjective). Hence the headquarters of a District; formerly applied to the Appellate Courts.

SAFA JANG.—A long-handled battleaxe carried by Jat Sikhs.

SAFFLOWER.—A thistle which yields a yellow dye from its petals and oil from its seeds (*CARTHAMUS TINCTORIUS*), ver. kardai, kushanti.

SAHEB.—The native Hindu term used to or of a European ("Mr. Smith" would be mentioned as "Smith Saheb," and his wife "Smith Mem-Saheb," but in addressing it would be "Saheb," fem. "Saheba," without the name); occasionally appended to a title in the same way as "Bahadur," but inferior (=master.)

NAMIBZADA.—Son of a person of consequence
SAID, SAYID, SAIYID, SIDI, SYED, SYUD.—Various forms for a title adopted by those who claim direct male descent from Mohammed's grandson Husain.

SAL—A useful timber tree in Northern India,
SHOREA ROBUSTA.

SAMBAR.—A deer, *CERVUS UNI COLOR*; syn **SARAU.**

SAMITI.—Association, Union, Assembly.

SAN.—Bombay hemp, *CROTALARIA JUNCOSA.*

SANAD.—(1) A charter or grant, giving its name to a class of States in Central India held under a sanad, (2) any kind of deed of grants

SANGATHAN.—Literally tying together. A movement which aims at unity and the knowledge of the art of self-defence among Hindus. A movement to unify the Hindu Community against non-Hindu aggression. The Hindu counterpart of the Musalman "Tanzim" q. v

SANGRAM SAMITI—War Council in the present Civil Disobedience movement.

SANNYASI—A Hindu mendicant.

SARI.—A long piece of cloth worn by women.

SARANJAM.—Land held revenue free or on a reduced quit-rent in consideration of political services rendered by the holder's ancestors originally feudal tenure land for maintaining troops.

SARDAR (corrupted to **SIRDAR**).—A leading Government official, either civil or military, even a Grand Vizier. Nearly all the Punjab Barons bear this title. It and "Diwan" are like in value and used by both Hindus and Mohammedans. But Mohammedans only are "Wall," "Sultan," "Amir," "Mir," "Mirza," "Mian," and "Khan."

SARKAR.—(1) The Government; (2) a tract of territory under Muhammadan rule, corresponding roughly to a Division under British administration.

SARSURAH—An officer in charge of a Division in the Baroda State corresponding to Commissioner of British territories.

SATI.—Suicide by a widow, especially on the funeral pyre of her husband.

SAHUKAR, SAUKAR, SOWKAR.—Banker, dealer in money, exchange, etc.; money-lender.

SATYAGRAHA—(lit. Insistence on truth), passive resistance.

SATYAGRAHI—A passive resister, one who will follow the truth wherever it may lead.

SATTA.—Speculation.

SAUDAGAR.—Merchant

SAWAI.—A Hindu title implying a slight distinction (lit. one-fourth better than others).

SAWEWA.—A title borne by chiefs in the Shan States, Burma.

SEMAL or cotton tree.—A large forest tree with crimson flowers and pods containing a quantity of floss, **BOMBAX MALABARICUM.**

SEROW, SARAU.—A goat antelope, *NEMORHAEDUS RUBALINUS.*

SETH, SHETH.—Merchant, banker.

SETTLEMENT—(1) The preparation of a cadastral record and the fixing of the Government revenue from land; (2) the local inquiry made before Forest Reserves are created, (3) the financial arrangement between the Government of India and Local Governments

SHAHID.—A Musalman martyr.

SHAHZADA—Son of a King

SHAIKH or SHEIKH (Arabic)—A chief.

SHAMS-UL-ULAMA—A Mohammedan title denoting "learned."

SHAMSHER-JANG.—"Sword of Battle" (a title of the Maharaja of Travancore.)

SHANBEOG—See **PATWARI.**

SHASTRAS.—The religious law-books of the Hindus.

SHEGADI, seggaree, Shigri—A pan on 3 feet with live charcoal in it.

SHER—Tiger.

SHER, ser, seer.—A weight, or measure varying much in size in different parts of the country. The Railway seer is about 2 lbs.

SHETH, shethia.—A Hindu or Jain merchant.

SHIAS—Musalman who accept Ali as the lawful Khalif and successor of the prophet and deny the Khalifate of the first three Khalifs.

SHIGURAM—See **TONGA.**

SHISHAM or sissu—Blackwood. A valuable timber tree. **DALBERGIA SISSOO.**

SHRADDHA.—Annual Hindu ceremony of propitiating the manes.

SHRUTI.—Literally "heard". Vedas revealed to inspired Rishis.

SHROFF.—Banker.

SHUDDHI.—Literally purification. A movement started in Rajputana and Northern India for the reconversion to Hinduism of those, like the Malakana Rajputs, who, though Mahomedans for some generations, have retained many Hindu practices.

SIDI.—A variation of "Said." Generic name for negroes domiciled in the Bombay Presidency. Also applied by the French to the negroes in their Army.

SILLADAR.—A native trooper who furnishes his own horse and equipment.

SINDHIA.—See under "Gaekwar."

SMRITI.—Unrevealed Laws, as opposed to Shruti, revealed Vedas.

SOLA.—A water-plant with a valuable pith. **AESCHYNOMENE ASPERA.**

SONI, SONAR.—Goldsmith.

SOWAR.—A mounted soldier or constable.

SOWKAR—Merchant.

SWADESHI—Lit. Swa-one's own; desh=of country. There is actually a shade of difference between the two, the "Swa" emphasizing the preference against everything "par," foreign.

SRI OR **SHRI**.—Lit. fortune, beauty, a Sanskrit term used by Hindus in speaking of a person much respected (never addressed to him; nearly = "Esquire"); used also of divinities. The two forms of spelling are occasioned by the intermediate sound of the *s* (that of *s* in the German *Stadt*).

SRIJUT, **SRIYUT**.—Modern Hindu equivalent of "Mr."

STUPA or **tope**.—A Buddhist tumulus, usually of brick or stone, and more or less hemispherical, containing relics.

SURAB.—(1) A province under Mahomedan rule; (2) the officer in charge of a large tract in Baroda, corresponding to the Collector of a British District; (3) a group of Districts or Division, Hyderabad.

SUBAH DAR.—(1) The governor of a province under Mahomedan rule, (2) a native infantry officer in the Indian Army; (3) an official in Hyderabad corresponding to the Commissioner in British territory.

SUB-DIVISION.—A portion of a District in charge of a junior officer of the Indian Civil Service or a Deputy Collector.

SULTAN.—A King.

SUNNAT.—Traditional law followed by Sunnis.

SUNNIS.—Musalmans who accept the first four Khalifs as lawful successors of the Prophet.

SUPARI.—The fruit of the betel palm, *ARECA CATECHU*.

SUPERINTENDENT.—(1) The chief police officer in a District; (2) the official in charge of a hill station; (3) the official, usually of the Indian Medical Service, in charge of a Central Jail.

SURAJ, **SURYA**.—Sun.

SURTI.—Native of Surat, specially used of persons of the dhed caste who work as house servants of Europeans, and whose house speech is Gujarati. Also called "Lala" or "Lala."

SWAMI.—A Hindu religious ascetic. Also applied to Shankaracharyas, Mahants of Math, etc.

STOR, **sals**.—A groom.

SYED, **SYUD**.—More variations of "Said."

TABLIGH.—The Mahomedan conversion movement.

TABUT.—See **TAZIAH**.

TAHSIL.—A revenue sub-division of a District syn. taluka, Bombay; taluka, Madras and Mysore; township, Burma.

TAHSILDAR.—The officer in charge of a tahsil, syn. Mamladar, Bombay; township officer or myo-ok, Burma; Mukhtiarkar, Sind; Vahl-vatdar, Baroda. His duties are both executive and magisterial.

TAKAVI.—Loans made to agriculturists for seed, bullocks, or agricultural improvements. syn. tagai. Also "Tagavi" (M. "Tagai") Bombay.

TAKLI.—Small distaff for spinning yarn brought into fashion by Mr. Gandhi.

TAL.—Lake; Musical term.

TALAK.—Mahomedan term for divorce.

TALATI.—Village accountant.

TALAV, or **talao**.—A lake or tank.

TALUK, **taluka**.—The estate of a talukdar in Oudh, Gujarat and Kathiawar. A revenue sub-division of a District, in Bombay, Madras and Mysore; syn. tashil.

TALUKDAR.—A landholder with peculiar tenures in different parts of India. (1) An official in the Hyderabad State, corresponding to the Magistrate and Collector (First Talukdar) or Deputy Magistrates and Collectors (Second and Third Talukdars); (2) a landholder with a peculiar form of tenure in Gujarat.

TALPUR.—The name of a dynasty in Sind.

TAMAKHU, **TAMBAKU**.—Tobacco.

TAMASHA.—Entertainment, gala. In sarcastic sense, exhibition.

TAMBU.—Tent in the Bombay Presidency.

TAMTAM, **tuntum**.—A North Indian name for a light trap or cart.

TANK.—In Southern, Western, and Central India, a lake formed by damming up a valley, in Northern India, an excavation holding water.

TANZIM.—Literally "organization." A movement among the Mahomedans which aims at securing better education and a closer approach to unity among Mahomedans in India.

TAPEDAR.—See **PATWARI**.

TARAI.—A moist swampy tract; the term especially applied to the tract along the foot of the Himalayas.

TARI, **toddy**.—The sap of the date, palmyra, or coconut palm, used as a drink, either fresh or after fermentation. In Northern India the juice of the date is called *Sendhi*.

TASAR, **tussore**.—Wild silkworms, *ANTHRAEA PAPHIA*; also applied to the cloth made from their silk.

TALTI.—Brush woodfence or hurdle.

TAZIA.—Lath and paper models of the tombs of Hasan and Husain, carried in procession at the Muharram festival; syn. tabut, Marathi, dola.

TRAK.—A valuable timber tree in Southern and Western India and Burma, *TEOTONA GRANDIS*.

TELEGRAPHIC TRANSFERS.—See Council bills.

THAGI, **thuggee**.—Robbery after strangulation of the victim.

THAKUR.—(1) The modern equivalent of the caste name Kshattriya in some parts of Northern India; (2) a title of respect applied to Brahmins; (3) a petty chief; (4) a hill tribe in the Western Ghats.

THAMIN.—The brow-antlered deer, Burma *CERVUS ELDI*.

THANA.—Military or Police-Station hence the circle attached to it.

TID or TIR.—Locust.

TIKA.—(1) Ceremonial anointing on the forehead; (2) vaccination.

TIKA SAHIB.—Hair-apparent in several North Indian States.

TIKAM.—The English pickaxe (of which "pickaxe" is the common corruption. "Tikam" is derived in dictionaries from *Tikshna* = Sharp).

TIL.—An oilseed, *SESAMUM INDICUM*; also known as gingelly in Madras.

TILAK.—(Short *t*) the caste mark on the forehead among Hindus.

TINDAL, tandel.—A foreman, subordinate officer of a ship.

TIPAI, Teapoy.—A table with 3 legs, and hence used of any small European style table.

TITAR.—Partridge.

TOLA.—A weight equivalent to 180 grains (troy).

TONGA.—A one or two horsed vehicle with a covered top, *syn.* **SHIGRAM.**

TOTE.—The word invariably used by South Indian planters to describe their estates. It is derived from the Kanarese *thota* and similar words in Tamil and Malayalam meaning an estate.

TSINE.—Wild cattle found in Burma and to the southward, *BOS SONDAICUS* *syn.* **healing and banteng.**

TUMANDAR.—A Persian word denoting some office.

ULAMA, (Plural of Alim).—Mahomedan learned men.

UMARA.—Term implying the Nobles collectively. Plural of "Amir."

UMBAR.—A wild fig—(*FICUS GLOMERATA*).

UNEDWAR.—A hopeful person; one who works, without pay in the hope of gaining a situation; candidate.

UNIT.—A term in famine administration denoting one person relieved for one day.

URDU.—Hindustani language as spoken and written by Mussalmans opposed to Hindi, spoken and written by Hindus.

URIAL.—A wild sheep in North-Western India, *OVIS Vignei*.

URID, URID —A pulse, 'black grain' (*PHASEOLUS MUNGU*).

URUS.—Mahomedan fete held in connexion with celebration at the tomb of a saint.

USAR.—Soil made barren by saline effluence, Northern India.

USTAD.—Master, teacher, one skilled in any art or science.

UTHAMA.—Among Hindus, consolation visit paid on second or third day after the death of a person. Among Parsis, a religious ceremony held on the third day after the death of a person.

VAHIVATDAR.—Officer in charge of a revenue sub-division, with both executive and magisterial functions, Baroda; *syn.* **tahsildar.**

VAID or Baldya (is also a caste in Bengal).—A native doctor practising the Hindu system of medicine.

VAKIL.—(1) A class of legal practitioners; (2) an agent generally.

VEDA.—Revealed sacred books of Hindus.

VEDANTA.—The philosophy of the Upanishads.

VIHARA.—A Buddhist monastery.

VILLAGE.—Usually applied to a certain area demarcated by survey, corresponding roughly to the English parish.

VILLAGE UNION.—An area in which local affairs are administered by a small committee.

WAAZ.—Mahomedan sermon.

WADA or WADI.—(1) An enclosure with houses built round facing a centre yard; (2) private closed land near a village.

WAKF.—A Muhammadan religious or charitable endowment.

WALI.—Like "Sardar." The Governor of Khelat is so termed, whilst the Chiefs of Kabul are both "Wali" and "Mir."

WAO.—A step well.

WATAN.—A word of many senses. In Bombay Presidency used mostly of the land or cash allowance enjoyed by the person who performs some service useful for Government or to the village community.

WAZIR.—The chief minister at a Mahomedan court.

WET RATE.—The rate of revenue for land assured of irrigation.

WRITER.—South Indian equivalent of *babu*.

YAMA.—Hindu god of death.

YOGA.—A system of Hindu philosophy. Practice of breath control, etc., said to give supernatural powers.

YOGI.—A Hindu ascetic who follows the Yoga system, a cardinal part of which is that it confers complete control over bodily functions.

YUNANI.—Lit. Greek; the system of medicine practised by Mahomedans.

ZABARDAST.—Lit. "Upper hand," hence strong, oppressive.

ZABARDASTI.—Oppression.

ZAMINDAR.—A landholder.

ZAMINDARI.—(1) An estate; (2) the rights of a landholder, zamindar; (3) the system of tenure in which land revenue is imposed on an individual or community occupying the position of a landlord.

ZANANA.—Of women. Women's apartment, harem.

ZIARAT.—Pilgrimage Ziarat-gah, any shrine or tomb to which people go in pilgrimage.

ZIKR.—Commemorative prayer said at the tomb of the prophet or a Mahomedan saint.

ZILA.—A District.

ZOR-TALAM.—Tribute paid to Junagadh Darbar by numerous Kathiawar States.

ZULM, ZULUM.—Tyranny, Oppression.

Manners and Customs.

Next to the complexion of the people, which varies from fair to black, the tourist's attention in India is drawn by their dress and personal decoration. In its simplest form a Hindu's dress consists of a piece of cloth round the loins. Many an ascetic, who regards dress as a luxury, wears nothing more, and he would dispense with even so much if the police allowed him to. The Mahomedan always covers his legs, generally with trousers, sometimes with a piece of cloth tied round the waist and reaching to the ankles. Hill men and women, who at one time wore a few leaves before and behind and were totally innocent of clothing, do not appear to-day within the precincts of civilisation and will not meet the tourist's eye. Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes of the rich the child Krishna, with all the jewels on his person, is nude in his pictures and images.

Dress.—The next stage in the evolution of the Hindu dress brings the loin-cloth nearly down to the feet. On the Malabar coast, as in Burma, the ends are left loose in front. In the greater part of India, they are tucked up behind—a fashion which is supposed to bedeck the warrior, or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf thrown over the left shoulder, or round both the shoulders like a Roman toga. Under this garment is often worn a coat or a shirt. When an Indian appears in his full indigenous dress, he wears a long robe, reaching at least down to the calves: the sleeves may be wide, or long and sometimes puffed from the wrist to the elbow. Before Europeans introduced buttons, a coat was fastened by ribbons, and the fashion is not obsolete. The Mahomedan prefers to button his coat to the left, the Hindu to the right. A shawl is tied round the waist over the long coat, and serves as a belt, in which one may carry money or a weapon, if allowed. The greatest variety is shown in the head-dress. More than seventy shapes of caps, hats, and turbans, may be seen in the city of Bombay. In the Punjab and the United Provinces, in Bengal, in Burma and in Madras other varieties prevail. Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles; folded brims, projecting brims: long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the "parrot's beak" of the Maratha turban—all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head-covering whether the wearer is a Hindu, Mahomedan or Parsi, and whether he hails from Poona or Dharwar, Ahmedabad or Bhavnagar.

Fashion Variations.—Fashions often vary with climate and occupation. The Bombay fisherman may wear a short coat and a cap, and may carry a watch in his pocket; yet, as he must work for long hours in water, he does not cover his legs, but suspends only a coloured kerchief from his waist in front. The Pathar

of the cold north-west wears loose baggy trousers, a tall head-dress bending his stature and covers his ears with its folds as if to keep off cold. The poorer people in Bengal and Madras do not cover their heads, except when they work in the sun or must appear respectable. Many well-to-do Indians wear European dress at the present day, or a compromise between the Indian and European costumes; notably the Indian Christians and Parsis. Most Parsis however have retained their own head-dress, and many have not borrowed the European collar and cuffs. The majority of the people do not use shoes: those who can afford them wear sandals, slippers and shoes, and a few cover their feet with stockings and boots after the European fashion in public.

Women's Costumes.—The usual dress of a woman consists of a long piece of cloth tied round the waist, with folds in front, and one end brought over the shoulder or the head. The folds are sometimes drawn in and tucked up behind. In the greater part of India women wear a bodice: on the Malabar coast many do not, but merely throw a piece of cloth over the breast. In some communities petticoats, or drawers, or both are worn. Many Mussalman ladies wear gowns and scarfs over them. The vast majority of Mahomedan women are *aosha* and their dress and persons are hidden by a veil when they appear in public: a few converts from Hinduism have not borrowed the custom. In Northern India Hindu women have generally adopted the Mussalman practice of seclusion. In the Dekhan and in Southern India they have not.

As a rule the hair is daily oiled, combed, parted in the middle of the head, plaited and rolled into a chignon, by most women. Among high caste Hindu widows sometimes shave their heads in imitation of certain ascetics, or monks and nuns. Hindu men do not, as a rule, completely shave their heads, Mahomedans in most cases do. The former generally remove the hair from a part of the head in front, over the temples, and near the neck, and grow it in the centre, the quantity grown depending upon the fancy of the individual. Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Indian Christians. Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere where the Mahomedan influence was paramount in the past. Parsis and Christians follow their individual inclinations. Hindu ascetics, known as Sadhus or Bairagis as distinguished from Sanyasis, do not clip their hair, and generally coil the uncombed hair of the head into a crest, in imitation of the god Shiva.

Hindu women wear more ornaments than others of the corresponding grade in society. Ornaments bedeck the head, the ears, the nose, the neck, the arms, wrists, fingers, the waist until motherhood is attained, and by some even later—and the toes. Children wear anklets. Each community affects its peculiar ornaments, though imitation is not uncommon. Serpents with several heads, and flowers, like

the lotus, the rose, and the champaka, are among the most popular object of representation in gold or silver.

Caste Marks.—Caste marks constitute a mode of personal decoration peculiar to Hindus, especially of the higher castes. The simplest mark is a round spot on the forehead. It represents prosperity or joy, and is omitted in mourning and on fast-days. It may be red, or yellowish as when it is made with ground sandalwood paste. The worshippers of Vishnu draw a vertical line across the spot, and as Lakshmi is the goddess of prosperity, it is said to represent her. A more elaborate mark on the forehead has the shape of U or V, generally with the central line, sometimes without it, and represents Vishnu's foot. The worshippers of Shiva adopt horizontal lines, made with sandalwood paste or ashes. Some Vaishnavas stamp their temples, near the corners of the eyes, with figures of Vishnu's conch and disc. Other parts of the body are also similarly marked. The material used is a kind of yellowish clay. To smear the arms and the chest with sandalwood paste is a favourite kind of toilet, especially in the hot season. Beads of Tulsi or sacred Basil, and berries of Rudraksha *elaecarpus gunturus*, strung together are worn round their necks by Vaishnavas and Shaivas,

respectively. The Lingayats, a Shaiva sect suspend from their necks a metallic casket containing the Linga or phallus of their god. Bairagis, ascetics, besides wearing Rudraksha rosaries round their necks and matted hair, smear their bodies with ashes. Religious mendicants suspend from their necks figures of the gods in whose name they beg. Strings of cowries may also be seen round their necks. Muslim dervishes sometimes carry peacock's feathers.

Hindu women mark their foreheads with a red spot or horizontal line. High caste widows are forbidden to exhibit this sign of happiness, nor may they deck themselves with flowers or ornaments. Flowers are worn in the chignon. Hindu women smear their faces, arms, and feet sometimes with a paste of turmeric, so that they may shine like gold. The choice of the same colour for different purposes cannot always be explained in the same way. The red liquid with which the evil eye is averted may be a substitute for the blood of the animal slaughtered for the purpose in former times. In many other cases this colour has no such associations. The Muslim dervish affects green, the Sikh Akali is fond of blue, the Sanyasi adopts orange for his robe, and no reason can be assigned with any degree of certainty.

Indian Names.

The personal name of most Hindus denotes a material object, colour, or quality, an animal, a relationship, or a deity. The uneducated man, who cannot correctly pronounce long Sanskrit words, is content to call his child, father, brother, uncle, or mother, or sister, as the case may be. This practice survives among the higher classes as well. Appa Saheb, Anna Rao, Babaji, Papu Lal, Bhai Shankar, Tatacharya, Jijibhai, are names of this description, with honorific titles added. It is possible that in early society the belief in the re-birth of departed kinsmen lent popularity to this practice. Nothing could be more natural than to call a man white, black, or red; gold or silver; gem diamond, ruby, pearl, or merely a stone; small or tall, weak or strong; a lion, a snake, a parrot, or a dog; and to name a woman after a flower or a creeper. Thus, to take a few names from the epics, Pandu means white, and so does Arjuna; Krishna black; Bhuma terrible; Nakula a mongroose. Shunaka a dog; Shuka a parrot, Shringa a horn. Among the names prevalent at the present day Hira is a diamond; Ratna or Ratan a jewel; Sonu or Chinna gold; Velli or Belli, in the Dravidian languages, means white metal or silver. Men are often called after the days of the week on which they were born, and hence they bear the names of the seven heavenly bodies concerned. When they begin to assume the names of the Hindu deities, they practically enter upon a new stage of civilisation. It is doubtful whether the Animists ever venture to assume the names of the dreaded spirits worshipped by them. To pronounce the name

of a devil is to invite him to do harm. If the spirits sometimes bear the names of human beings the reason seems to be that they were originally human.

High-caste practices.—The high caste Hindu, on the other hand, believes that the more often the name of a deity is on his lips, the more merit he earns. Therefore he deliberately names his children after his gods and goddesses, so that he may have the opportunity of pronouncing the holy names as frequently as possible. These are also sonorous and picturesque. Shiva is happy; Vishnu is a pervader. Govinda is the cowed Krishna; Keshava has fine hair; Rama is a delighter; Lakshmana is lucky; Narayana produced the first living being on the primeval waters; Ganesha is the Lord of Shiva's hosts; Dinakara is the luminary that makes the day; Subrahmanya is a brother of Ganesha. Sita is a furrow; Savitri a ray of light; Tara a star; Radha prosperity; Rukmini is she of golden ornaments; Vinama of the glowing heart. Shiva and Vishnu has each got at least a thousand names, and they may be freely drawn upon and paraphrased in naming one's children; and the whole Hindu pantheon is as crowded as it is large.

Family names.—When a person rises in importance, he adds to his personal name a family or caste name. It was once the rule that the title Sharma might be added to a Brahman's name, Varma to a Kshatriya's, Gupta to a Vaishyas, and Dasa to a Shudra's. This rule is fairly well observed in the case of

the first two titles, but the meaning of the other two has changed. *Dasa* means a slave or servant, and the proudest Brahman cannot disdain to call himself the servant of some god. Thus, although *Kalidas*, the famous poet, was a *Shudra*, *Ramadass*, the famous guru of *Shivaji*, was a Brahmin. The *Vaishnavas* have made this fashion of calling oneself a servant of some god exceedingly popular, and in Western India high caste Hindus of this sect very commonly add *Das* to their names. The Brahmins of Southern India add *Aiyar* or *Aiyangar* to their names. *Shastri*, *Acharya*, *Bhat*, *Bhattacharya*, *Upadhyaya*, *Mukhopadhyaya*, changed in Bengal into *Mukerji*, are among the titles indicative of the Brahmanical profession of studying and teaching the sacred books. Among warlike classes, like the *Rajputs* and *Sikhs*, the title *Singh* (lion) has become more popular than the ancient *Varma*. The *Sindhi* *Mal*, as in *Gidumal*, means brave and has the same force. *Raja* changed into *Raya*, *Kao* and *Rai* was a political title, and is not confined to any caste. The Bengali family names, like *Bose* and *Ghose*, *Dutt* and *Mitra*, *Sen* and *Guha*, enable one to identify the caste of their bearers, because the caste of a family or clan cannot be changed. *Shet*, chief of a guild or a town, becomes *Chetty*, a *Vashya* title, in Southern India. *Mudaliyar* and *Nayudu*, meaning leaders, are titles which were assumed by castes of political importance under native rulers. *Nayar* and *Menon* are the titles of important castes in Malabar. *Ram*, *Lal*, *Nand*, *Chand*, are among the additions made to personal names in Northern India. Suffixes like *Ji*, as in *Ramji* or *Jamshedji*, the *Kanarese* *Appa*, the *Telugu* *Garu* the feminine *Bai* or *Devi*, are honorific. Prefixes like *Babu*, *Baba*, *Lala*, *Sodhi*, *Pandit*, *Raja*, and the *Burmese* *Maung* are also honorific.

Professional names.—Family names sometimes denote a profession. In some cases they might have been conferred by the old rulers. *Mehta*, *Kulkarni*, *Deshpande*, *Chitnavis*, *Mahalanavis* are the names of offices held in former times. One family name may mean a flour seller, another a cane-seller, and a third a liquor-seller. To insert the father's name between one's personal and the family name is a common practice in Western India. It is rare elsewhere. When a family comes from a certain place, the suffix '*kar*' or '*wallah*' is added to the name of the place and it makes a family surname in Western India. Thus we may have *Chiplunkars* and *Suratwallahs*, or without these affixes we may have *Bhavnagris*, *Malabaris* and *Bilimorias*, as among *Parsis*. Thus *Vasudev Pandurang Chiplunkar* would be a Hindu, whose personal name is *Vasudev*, his father's name *Pandurang*, and family name derived from the village of *Chiplun*, is *Chiplunkar*. In Southern India the village name precedes the personal name. The evolution of *Musalman* names follows the same lines as *Hindu* names. But *Muslims* have no god or goddesses, and their names are derived from their religious and secular history. These names and titles are often as long and picturesque as *Hindu* appellations. The agnomens *Baksh*, *Din*, *Ghulam*, *Khwaje*, *Fakir*, *Kazi*, *Munshi*, *Sheikh*, *Syed*, *Bugum*, *Bibi* and others, as well as honorific additions like *Khan* have meanings which throw light on *Muslim* customs and institutions. The *Parsis* also have no gods and goddesses, and their personal names are generally borrowed from their sacred and secular history. Their surnames frequently indicate a profession or a place, as in the case of *Hindus* in Western India *Bathwallah*, *Readymoney*, *Contractor*, *Saklatwallah*, *Adenwallah* and others like them are tell-tale names

Indian Art.

In India there has never been so marked a separation between what are now known as the *Fine Arts*, and those applied to Industry as was the case in Europe during the nineteenth century. As, however, *Industrial art* forms the subject of a special article in this book, the term *Indian Art* will here be confined to *Architecture*, *Sculpture* and *Painting*.

Historical.—The degree of proficiency attained in art by Indians prior to B.C. 250, can only be conjectured by their advancement in literature; and by the indirect evidences of indebtedness shown by the works of the historic period, to those which preceded them; or direct records of artistic work of an earlier date than B.C. 250 do not exist. The chief historic schools of architecture are as follows:—

Name.	Dates.	Locality of the best Examples.
Buddhist	.. B.C. 250—A.D. 750.	Ellora, Ajanta, Kail, Sanchi.
Jaina	.. A.D. 1000—1300.	Ellora, Mount Abu, Palitana.
Brahminical.	A.D. 530 to the present day.	Ellora, Elephanta, Orissa, Bhuvaneshwar, Dharwar.

Name	Dates	Locality of the best Examples.
Chalukyan	. A.D. 1000—1200.	Umer, Somnathpur, Ballur.
Dravidian	.. A.D. 1350—1750.	Ellora, Tanjore, Madura, Tinnevely.
Fathan	.. A.D. 1200—1550.	Delhi, Mandu, Jaunpore.

Buddhist Architecture is mainly exemplified by the rock-cut temples and monasteries found in Western India and in the *Topes* or sacred mounds. The interior decorations, and external facades of the former, and the rails and gates surrounding the latter point unmistakably to their being derived from wooden structures of an earlier period. The characteristic features of these temples are horse-shoe openings in the facades to admit light, and colonnades of pillars with richly ornamented caps in the interior halls. *Jaina Architecture* is found in its most highly developed form in the *Dilwara* temples at Mount Abu. The ground plan consists of a shrine for the god or saint; a porch, and an arcaded courtyard with niches

for images. The characteristic of the style is grace and lightness, with decorative carving covering the whole interior, executed with great elaboration and detail. Constructional methods suggest that original types in wood have been copied in marble.

Brahminical, Chalukyan and Dravidian styles differ little in essential plan, all having a shrine for the god, preceded by pillared porches. The outer forms vary. The northern Brahminical temples have a curved pyramidal roof to the shrines, which in the southern or Dravidian style are crowned by a horizontal system of storied towers, and each story, decreasing in size, is ornamental with a central coil and figures in high relief. The Chalukyan style is affected by its northern and southern neighbours, taking features from each without losing its own special characteristics of which the star-shaped plan of the shrine, with the five-fold bands of external ornament, is the principal feature. Pathan Architecture was introduced into India by the Mahomedan invasion of the thirteenth century. At old Delhi are fine examples in the Kutub Mosque and Minar. The characteristics of the style are severity of outline, which is sometimes combined with elaborate decoration due, it is stated, to the employment of Hindu craftsmen. The mosque and tombs at Ahmedabad already show Hindu influence; but purer examples are to be found at Jaunpore and Mandu. Indo-Saracenic Architecture reached the climax of its development during the reigns of the Moghul Emperors Akbar, Jehangir and Shah Jahan. It eclipsed in richness of material and refinement of taste the building efforts of previous periods, its crowning example being the Taj Mahal at Agra. The buildings erected during the Adil Shahi dynasty at Bijapur at a slightly later date, exhibit a certain Turkish influence, especially in the great tomb of Mahmoud. Though less refined and lacking the attraction of precious materials in their decoration, these splendid edifices are held in higher esteem by some critics than those of the Moghals, on account of their simplicity, grandeur and fine proportions. The era of great civil architecture in India was revived by the Mahomedan powers. Splendid palaces and fortresses were built at Madras, Delhi, Agra, Fathchpore-Sikri and Bijapur, and the example thus set was copied by the Hindu princes at Jalpur, Udaipur and elsewhere in India. The application of great architectural treatment, unequalled in extent elsewhere, is to be seen in the Ghats or steps enclosing lakes and on the banks of rivers. The most notable constructional contribution of the Mahomedans to Indian architecture was the introduction of the true arch and dome.

Sculpture.—The use of sculpture and painting in isolated works of art was practically non-existent in India until modern times. One or two reliefs and certain gigantic figures may be quoted as exceptions, but taken generally it may be stated that these arts were employed as the decorative adjuncts of architecture. No civil statuary, such as is now understood by the term, was executed; for no contemporary portrait figures, or busts in marble, or bronze, have come down to us from the ruins of ancient India, as they have from those of

Egypt, Greece and Rome. Sculpture has been used exclusively as the handmaid of religion, and to this fact may be attributed the stereotyped forms to which it became bound. The lavish use of sculpture on Indian temples often exceeds good taste, and mars the symmetry and dignity of their mass and outline, but for exuberance of imagination, industrious elaboration and vivid expression of movement, Indian sculpture is perhaps without its equal elsewhere in the world. The most impressive specimens are the earliest, found in the Buddhist and Brahminical cave temples of Ellora, Ajanta and Elephanta. The great Trimurthi in the last named of these temples ranks for mystery and expressive grandeur with the greatest masterpieces of art.

Painting.—Much of the carved stonework upon ancient Indian buildings was as in ancient Greece and then decorated with colour, but the only paintings, in the modern acceptation of the term, now existing, which were executed prior to the Moghul period, are those upon the walls of the cave temples at Ajanta, Bagh, and in Ceylon. These remarkable works were produced at intervals during the first 600 years of the Christian era. They exhibit all the finer characteristics of the best Indian sculpture, but with an added freedom of expression due to the more tractable vehicle employed. The Ajanta Caves remained hidden in the Deccan jungles for nearly twelve hundred years, until accidentally discovered in 1816. They are painted in a species of tempera; and when first brought to light were well preserved, but they have greatly deteriorated owing to the well meant, but misguided action of copyists, and the neglect of the authorities. The Nizam's Government have in recent years done a great deal towards the preservation and study of these mural paintings. The second period of Indian painting owed its origin to the introduction of Persian artists by the Moghul Emperor Akbar; and the establishment of the indigenous Moghul school was due to the encouragement and fostering care of his successors, Jehangir and Shah Jahar. Unlike the works of the Ajanta painters, which were designed upon a large scale, the pictures of the Moghul school were miniatures. They were executed in a species of opaque water-colour upon paper or vellum, resembling to some extent the illuminated missals produced by the monks in Europe during the middle ages. Some of the finest of the earlier specimens in India are of a religious character; this phase of development being closely allied to the art of the calligraphist. As its range extended, a remarkable school of portrait painters arose notable for restrained but extremely accurate drawing, keen insight into character, harmonious colour, fine decorative feeling, and extraordinary delicacy and finish in the painting of detail. The artists of a Hindu off-shoot of this movement, known as the Rajput school, were less fully endowed with the technical and purely aesthetic qualities than were the Moghul painters; but they brought to their work poetry and sentiment which are not to be found in that of the Mahomedans. The pictures of both branches of the Moghul school, although highly decorative in character, were not intended for exhibition upon the walls of rooms, according to

Western practice, and, when not used as illustrations or decorations to manuscript books, were preserved in portfolios.

Modern Painting.—As the reign of Shah Jahan exhibits the high tide of artistic development in India, so the reign of his successor Aurangzeb marks the period of its rapid decline. The causes of this are attributable to the absence of encouragement by this Emperor; to his long periods of absence from the court at Delhi or Agra, entailed by the continuous wars he waged in his efforts to bring the whole of the Peninsula under his rule; and partly to the fact of the school of Moghul painting becoming stereotyped in its practice. Foreign designers, painters and craftsmen who had been attracted to India by the great works carried out by Akbar, Jehangir and Shah Jahan left the country, and their places were taken by no successors. The indigenous artists left to themselves in the isolated courts of small Indian princes, or collected in schools in remote districts, employed themselves mainly upon repeating the works of a previous age, instead of seeking new motifs for artistic treatment. At the time when the British East India Company ceased to be only a guild of merchants and became a great administrative power in 1757, very little vitality survived in the ancient art of the country. During the century of its administrative history between the battle of Plassey and the Indian Mutiny, the "Company" was too fully occupied in fighting for its existence, extending its borders and setting the internal economy of its ever increasing territories, to be able to give much attention to conserving any remnant of artistic practice which had survived. Without any deliberate intention of introducing western art into the country, Greek and its derivative style of architecture were adopted for public and private buildings in Calcutta, Bombay and Madras because these were found to be more suitable for their purpose than buildings of indigenous pattern. The practical result was the same; for the Indian craftsmen employed upon their erection were confronted with styles affording no scope for the application of their traditional ornament and concerning which they had no knowledge or sympathy. As there were no sculptors in India capable of modelling or carving civil sculpture, the monuments to distinguish public servants were all imported from England; and the portraits, or other paintings which decorated the interior walls of the buildings, were furnished by European painters who visited India or by artists in England. Although a considerable amount of research work of a voluntary nature was done by Archaeologists, no official interest was taken in artistic education until the Government of India was transferred to the British Crown in 1859.

The Schools of Art then instituted throughout England in the 19th Century were imitated in India; and were attached to the educational system, which had been previously modelled upon a definitely European basis. The work of the Schools of Art in regard to industrial art is referred to elsewhere; and as several of them have confined their activities almost exclusively to this

branch of the subject it is sufficient to mention only the work of the Schools at Calcutta and Bombay in the present article. The Calcutta school, except for occasional experiments in the application of the graphic arts to lithography, engraving and stained glass, has become a school of painting and drawing. That at Bombay covers a wider field; for in addition to classes for modelling, painting and design it possesses a special school of architecture; and a range of technical workshops, in which instruction is given in the applied arts. It is in the principles underlying the instruction in painting that the schools at Calcutta and Bombay have taken almost diametrically opposite roads to reach the end they both have in view, namely, the revival of the art of painting in India by means of an indigenous school of Indian painters. Mr. Havell, who several years ago was the Principal of the Calcutta School, (he left India in 1907) banished from within its walls every vestige of European art, and claimed that the traditional art of India, in its old forms, is not dead, but merely sleeping or smothered by the blanket of European culture laid upon it for the last 150 years, and needed but to be released from this incubus to regain its pristine vigour.

Bombay School of Art.—The attitude towards the development of art in modern India taken by its successive Principals Messrs. Lockwood Kipling, Griffiths, Greenwood, and Cecil Burns, was on wider lines than that favoured by Mr. Havell. In general the view this School of Art has taken is that with European literature dominating the system under which the educated classes in India are trained and with European ideas, and science permeating the professional commercial, industrial, and political life of the country, it is not possible for modern artists in India to work on purely archaic models, and that to copy these would be as unprofitable as it would be for the artists of Europe to harness themselves to the conventions of the Greek and Roman sculptors or to those of the mediæval painters; that with European pictures, often of inferior quality illustrating every educational text book, and sold in the shops of every large city, it is essential for the proper education of art students that they should have before them the masterpieces of European art; and that, with the wide adoption of European styles of architecture in India, it is necessary for a school of art to possess the best examples of ornament applicable to the great historic styles, for the purpose of study and reference. There are certain basic principles common to the technique of all great art, such as fine and accurate drawing in its widest sense, composition and design, and the science of colour harmony.

Among the developments during Mr. Burns' administration were the founding of the Architectural School, the extension of drawing classes in the Government Schools, and the appointment of an Inspector of Drawing to inspect and report on the drawing classes in the schools. A Pottery Department was also started and was abolished in 1928. Mr. Burns retired in 1918 and was succeeded in 1919 by the present Director, Mr. W. E. Gladstone Solomon, K.I.H., R.B.C.

Mr. Solomon entirely reorganised the courses of study. The Life Classes which were organised at the end of 1919 have been pronounced by competent judges as well up to the level of the Life Classes of the European Schools of Art. But proficiency in technique forms only one side of the present system of training; for even in Europe, too much of the study from life is quite capable of negating its own object. In India, where the decorative instinct is inherent, and where the possibilities of freehand drawing are still understood, the danger of overdoing the Life Class is even more palpable. So side by side with these realistic aids to study, and at the same period, a class of Indian Decorative Painting was inaugurated in the Bombay School of Art on a basis of scholarships under the patronage of the Governor of Bombay (Lord Lloyd). As this class specialises in **Mural Painting** it has long been popularly known as the Class of Mural Painting. This class has executed the decorations for many public and private buildings, and painted the ceiling and panels of a specially constructed Indian Room which was exhibited at Wembley in 1924, and found a purchaser in England.

The School of Art has of late years enjoyed the patronage of successive Governors of Bombay and, largely due to the efforts of Sir Leslie Wilson, the Government of India inaugurated a competition of Indian Artists in 1927 for the decoration of wall spaces in the new buildings at New Delhi. The result of the Competition was notified in October 1928, when five artists of Bombay, and the Bombay and Lahore Schools of Art were commissioned to paint Mural Decorations in the new Secretariat buildings. The Bombay School undertook the decoration of Committee Room "A" (in the North Block) and the paintings, which were executed in oils on canvas, were finished, and successfully placed in position on the dome and walls by the middle of September 1929. These decorations were original compositions of life size figures, symbolising the main

periods of Indian Art, and the different branches of the Fine and Applied Arts. In April 1929, the Government of Bombay converted the Bombay School into a Department independent of the Director of Public Instruction, the Principal (Mr. W. E. Gladstone Solomon) being made Director. In October 1930 the latter organised an exhibition of the work of all Departments of this School of Art in India House, London. The Exhibition was very well patronised by the public and extremely well received by the art critics and the Press. Her Majesty the Queen Empress graciously patronised the exhibition and selected several of the paintings displayed.

Exhibition in London.—The India Society of London organised an Exhibition of Modern Indian Art in London, which was opened by H. H. the Duchess of York at the New Burlington Galleries on December 10, 1934. The most instructive feature of this Exhibition was that the representation of India was secured by means of Regional Committees which collected pictures and sculptures from their own districts. Thus the respective sections of the Exhibition devoted to Bombay and Bengal were compared, and the work from Western India received a most favourable welcome from most of the prominent art critics and journals in England. The Regional Committee of Bombay had selected a varied and fairly representative collection of paintings, sculpture, and architectural drawings. At the request of this Committee, the Government of Bombay deputed Mr. Gladstone Solomon to supervise, arrange, and catalogue the Bombay exhibits in London. The whole enterprise was a successful demonstration of the aims and ideals of the Bombay School of Painting, and since this Exhibition the long-standing controversy as to the Bombay methods of art training has completely collapsed though it is hardly to be expected that it will not occasionally reassert itself in sporadic outbursts hereafter.

Indian Architecture.

The architecture of India has proceeded on lines of its own, and its monuments are unique among those of the nations of the world. An ancient civilization, a natural bent on the part of the people towards religious fervour of the contemplative rather than of the fanatical sort, combined with the richness of the country in the sterner building materials—these are a few of the factors that contributed to making it what it was, while a stirring history gave it both variety and glamour. Indian architecture is a subject which at the best has been studied only imperfectly, and a really comprehensive treatise on it has yet to be written. The subject is a vast and varied one, and it may be such a treatise never will be written in the form of one work at any rate. The spirit of Indian art is foreign to the European and few can entirely understand it, while art criticism and analysis is a branch of study that the Indian has not as yet developed to its full extent.

Hitherto the best authority on the subject has been Fergusson, whose compendious work is that which will find most ready acceptance by the general reader. But Fergusson attempted the nearly impossible task of covering the ground in one volume of moderate dimensions, and it is sometimes held that he was a man of too purely European a culture, albeit wide and eclectic, to admit of sufficient depth of insight in this particular direction. Fergusson's classification by races and religions is, however, the one that has been generally accepted hitherto. He asserts that there is no stone architecture in India of an earlier date than two and a half centuries before the Christian era, and that "India owes the introduction of the use of stone for architectural purposes, as she does that of Buddhism as a state religion, to the great Asoka, who reigned B.C. 272 to 236."

Buddhist Work.

Fergusson's first architectural period is the Buddhist, of which the great tower at Sanchi with its famous Northern gateway is perhaps the most noted example. Then we have the Gandharan toposes and monasteries. Perhaps the examples of Buddhist architecture of greatest interest and most ready access to the general student are to be found in the Chaitya halls or rock-cut caves of Karli, Ajanta, Nasik, Ellora, and Kanheri. A point with relation to the Gandhara work may be alluded to in passing. This is the strong European tendency, variously recognized as Roman, Byzantine but most frequently as Greek, to be observed in the details. The foliage seen in the capitals of columns bears strong resemblance to the Greek acanthus, while the sculptures have a distinct trace of Greek influence, particularly in the treatment of drapery, but also of hair and facial expression. From this it has been a fairly common assumption amongst some authorities that Indian art owed much of its best to European influence, an assumption that is strenuously combated by others as will be pointed out later.

The architecture of the Jains comes next in order. Of this rich and beautiful style the most noted examples are perhaps the Dilwara temples near Mount Abu, and the unique "Tower of Victory" at Chittore.

Other Hindu Styles.

The Dravidian style is the generic title usually applied to the characteristic work of the Madras Presidency and the South of India. It is seen in many rock-cut temples as at Ellora, where the remarkable "Kylas" is an instance of a temple cut out of the solid rock, complete, not only with respect to its interior (as in the case of mere caves) but also as to its exterior. It is, as it were, a life-size model of a complete building or group of buildings, several hundred feet in length, not built, but sculptured in solid stone, an undertaking of vast and, to our modern ideas, unprofitable industry. The Pagoda of Tanjore, the temples at Srirangam, Chidambaram, Vellore, Vijayanagar, &c., and the palaces at Madura and Tanjore are among the best known examples of the style.

Amongst a vast number of Hindu temples the following may be mentioned as particularly worthy of study:—Those at Mukteswara and Bhuvanewar in Orissa, at Khajuraho, Bindrabun, Udaipur, Benares, Gwalior, &c. The palace of the Hindu Raja Man Singh at Gwalior is among the most beautiful architectural examples in India. So also are the palaces of Amber, Dattia, Uricha, Dig and Udaipur.

Indo-Saracenic.

Among all the periods and styles in India the characteristics of none are more easily recognizable than those of what is generally called the "Indo-Saracenic" which developed after the Mahomedan conquest. Under the new influences now brought to bear on it the architecture of India took on a fresh lease of activity and underwent remarkable modifications. The dome, not entirely an unknown feature hitherto, became a special object of

development, while the arch, at no time a favourite constructional form of the Hindu builders, was now forced on their attention by the predilections of the ruling class. The minaret also became a distinctive feature. The requirements of the new religion,—the mosque with its wide spaces to meet the needs of organized congregational acts of worship—gave opportunities for broad and spacious treatments that had hitherto been to some extent denied. The Moslem hatred of idolatry set a tabu on the use of sculptured representations of animate objects in the adornment of the buildings, and led to the development of other decorative forms. Great ingenuity came to be displayed in the use of pattern and of geometrical and foliated ornament. This Moslem trait further turned the attention of the builders to a greater extent than before to proportion, scale and mass as means of giving beauty, mere richness of sculptured surface and the æsthetic and symbolic interest of detail being no longer to be depended on to the same degree.

Agra and Delhi may be regarded as the principal centres of the Indo-Saracenic style—the former for the renowned Taj Mahal, for Akbar's deserted capital of Fatehpur Sikri, his tomb at Secundra, the Moti Masjid and palace buildings at the Agra fort. At Delhi we have the great Jumma Masjid, the Fort, the tombs of Humayun, Sudar Jung, &c., and the unique Quth Minar. Two other great centres may be mentioned, because in each there appeared certain strongly marked individualities that differentiated the varieties of the style there found from the variety seen at Delhi and Agra, as well as that of one from that to the other. These are Ahmedabad in Gujarat and Bijapur on the Dekhan, both in the Bombay Presidency.

At Ahmedabad with its neighbours Sirkhej and Champanir there seems to be less of a departure from the older Hindu forms, a tendency to adhere to the lintel and bracket rather than to have recourse to the arch, while the dome though constantly employed, was there never developed to its full extent as elsewhere, or carried to its logical structural conclusion. The Ahmedabad work is probably most famous for the extraordinary beauty of its stone "jali"—or pierced lattice-work, as in the palm tree windows of the Sidi Sayyid Masjid.

Bijapur.

The characteristics of the Bijapur variety of the style are equally striking. They are perhaps more distinctively Mahomedan than those of the Ahmedabad buildings in that here the dome is developed to a remarkable degree, indeed the tomb of Mahmud—the well-known "Gol Gumbaz"—is cited as showing the greatest space of floor in any building in the world roofed by a single dome, not even excepting the Pantheon. The lintel also was here practically discarded in favour of the arch. The Bijapur style shews a bold masculine quality and a largeness of structural conception that is unequalled elsewhere in India though in richness and delicacy it does not attempt to rival the work of the further North.

II. MODERN.

The modern architectural work of India divides itself sharply into two classes. There is first that of the indigenous Indian "master-builder" to be found chiefly in the Indian States, particularly those in Rajputana. Second there is that of British India, or of all those parts of the peninsula wherever Western ideas and methods have most strongly spread their influence, chiefly, in the case of architecture, through the medium of the Department of Public Works. The work of that department has been much animadverted upon as being all that building should not be, but, considering it has been produced by men of whom it was admittedly not the *metier*, and who were necessarily contending with lack of expert training on the one hand and with departmental methods on the other, it must be conceded that it can show many notable buildings. Of recent years there has been a tendency on the part of professional architects to turn their attention to India, and a number of these has even been drafted into the service of Government as the result of a policy initiated in Lord Curzon's Viceroyalty.

To the work of the indigenous "master-builder" public attention has of recent years been drawn with some insistence, and the suggestion has been pressed that efforts should be directed towards devising means for the preservation of what is pointed out—and now universally acknowledged—to be a remarkable survival—almost the only one left in the world—of "living art," but which is threatened with gradual extinction by reason of the spread of Western ideals and fashions. The matter assumed some years ago the form of a mild controversy centring round the question of the then much discussed project of the Government of India's new capital at Delhi. It was urged that this project should be utilised to give the required impetus to Indian art rather than that it should be made a means of fostering European art which needed no such encouragement at India's expense. The advocates of this view appear for the most part to have been adherents of the "Indigenous Indian" school of archaeologists already mentioned, and to have based their ideas on their own reading of

the past. They still muster a considerable following not only amongst the artistic public of England and India, but even within the Government services. Their opponents, holding what appears to be the more official view both as to archaeology and art, have pointed to the "death" of all the arts of the past in other countries as an indication of a natural law, and deprecate as waste of energy all efforts to resist this law, or to institute what they have termed "another futile revival"! The British in India, they contend, should do as did the ancient Romans in every country on which they planted their conquering foot. As those were wont to replace indigenous art with that of Rome, so should we set our seal of conquest permanently on India by the erection of examples of the best of British art. This is the view which, as we have indicated, appears to have obtained for the moment the more influential hearing, and the task of designing and directing the construction of the principal buildings in the new Capital was accordingly entrusted jointly to two famous British architects, neither of whom can be unduly influenced by either past or recent architectural practice so far as India is concerned. The building of New Delhi is perhaps too recent an event for the passing of a definite verdict. The work of Sir Edwin Lutyens and Sir Herbert Baker abides the judgment of posterity. If that work has had its severe critics, it has also received the commendation of many.

The controversy of East and West, however vital to the interests of the country's architecture, is too purely technical for its merits to be estimated by the general reader or discussed here. Its chief claim on our attention lies in the fact that it affords an added interest to the tourist, who may see the fruits of both schools of thought in the modern buildings of British India as well as examples of the "master builders" work in nearly every native town and bazaar. The town of Lashkar in Gwalior State may be cited as peculiarly rich in instances of picturesque modern Indian street architecture, while at Jaipur, Udaipur, Benares, etc., this class of work may be studied in many different forms both civil and religious.

Industrial Arts.

The ancient industrial arts of India formed two distinct groups. The first included those allied to, and dependent upon, architecture; the second comprises those applied to articles devoted to religious ritual; military weapons and trappings, domestic accessories and to personal adornment.

The articles of the first group were intended for some fixed and definite position, and the style of their design and the character of their workmanship were dictated by that of the building with which they were incorporated. Those of the second group were movable, and the range of their design was less constricted and their workmanship was more varied

Examples of work in both groups are so numerous, and the arts comprise such a diversity of application, that only a cursory survey can be attempted within the limits of a short review. Although the design and treatment differ in the two groups, the materials used were often the same. These materials cover a very wide range but space only permits of reference to work applied to the four materials upon which the Indian craftsman's skill has been most extensively displayed. These are stone, wood, metal and textiles.

Before dealing separately with each of these materials a few words upon the principal Indian styles are necessary. The two distinctive styles

are Hindu and Mahomedan. The former may be termed indigenous, dating as it does from remote antiquity; the latter was a variation of the great Arabian style, which was brought into India in the fourteenth century, and has since developed features essentially Indian in character. The art of both Hindus and Mahomedans is based upon religion and the requirements of religious ritual. The obvious expression of this is shown in the different motifs used for their ornament. In Hindu art all natural forms are accepted and employed for decorative purposes; but in that of the Mahomedans, nearly all natural forms are rejected and forbidden. The basis of Mahomedan decoration is therefore mainly geometrical. In each of them, racial characteristics are strikingly exhibited. The keynote of Hindu work is exuberance, imagination and poetry; that of Mahomedan, reticence, intellect and good taste. The Hindus are lavish, and often undiscriminating in their employment of ornament; the Mahomedans use more restraint.

Stone Work.—Carved stone work is the principal form of decoration employed in Hindu temples. In variety and scope it ranges, from the massive figures in the Buddhist and Brahminical Cave Temples, and the detached sculpture of the temples of Southern India, to the delicately incised reliefs and elaborately fretted ornament of the Jain temples at Mount Abu. A curious fact in relation to Hindu work is that priority of date appears to have no relation to artistic development. It is not possible to trace, as in the case of Greek, Roman and Mediæval craftwork, the regular progressive steps from art in its primitive state to its culminating point and its subsequent decay. Styles in India seem to spring into existence fully developed; the earlier examples often exhibiting finer craftsmanship than those of a later date. There can be little doubt that stone carving in India was simply the application of the wood carvers' art to another material.

The stone carving on Mahomedan buildings except where Hindu carvers have been allowed a free hand, is much more restrained than that on Hindu temples. The fact that geometrical forms were almost exclusively used dictated lower relief and greater refinement in the carving; while the innate good taste of the designers prompted them to concentrate the ornament upon certain prominent features, where its effect was heightened by the simplicity of the rest of the building. The invention displayed in working out geometrical patterns for work screens, inlay, and other ornamental details appears to be inexhaustible; while wonderful decorative use has been made of Arabic and Persian lettering in panels and their framing. To obtain a rich effect the Hindus relied upon the play of light and shade upon broken surfaces, the Mahomedans to attain the same end used precious materials: veneering the surfaces of their buildings with polished marble which they decorated with patterns of mosaic composed of jade, agate, onyx and other costly stones. Although the art of inlaying and working in hard stones was of Italian origin, it proved to be one eminently suited to the genius of the Indian craftsman; and many wonderful examples of their skill in the form of book rests, tab-

les, thrones, footstools, vases and sword handles are extant to show the height of proficiency they attained.

Wood Work.—With a fine range of timbers suitable for the purpose, wood has played a great part in the construction and decoration of Indian buildings. Unfortunately, much of the ancient woodwork has been destroyed by the action of the climate and the teeming insectivorous life of India; and that which escaped these enemies was wiped out by fire and the sword. It is therefore only possible to conjecture the height of artistic development these buildings and their decorations displayed by the copies in stone which have been preserved. Few if any examples of a date earlier than the sixteenth century are to be found. Many of these, and specimens of a later date to be seen in towns and cities throughout the country, are masterpieces of design and craftsmanship. The carved timber fronts and inner courtyards of houses in Ahmedabad, Nasik, and other parts of Western India are notable for their picture-queeness and beauty the structural beams, the overhanging balconies, with their screens and supporting brackets, being carved in a manner which unites richness of effect with good taste and propriety. Of furniture, as the term is now understood, few examples were in use in India before Europeans introduced their own fashions. These were confined to small tables and stools, book rests, clothes chests and screens, the designs of which conformed somewhat closely to the architectural style of the period. Many of these were decorated with inlays of coloured woods, ivory and metal; while in some cases the wooden basis was entirely plated with copper, brass or silver. In Southern India, where close grained sandalwood is grown, jewel cases and boxes are enriched with carving executed with the attention to detail and the finish generally associated with the carving of ivory. Coloured lac was freely used to decorate many articles of furniture, especially those turned on the lathe; and rich colour effects were obtained in this, perhaps the most distinctive and typically Indian development of decoration as applied to woodwork.

Metal Work.—With the exception of weaving, the metal working industry employed and still employs the greatest number of artistic craftsmen in India. Copper and brass have always been the two metals most widely used for domestic purposes by Mahomedans and Hindus. The shapes of many of these humble vessels are among the most beautiful to be found in the country. They exhibit that sense of variety and touch of personality which are only given by the work of the human hand; and the shapes are those which grow naturally from the working of the material with the simplest implements. In the technical treatment of brass and copper Indian craftsmen have shown a taste and skill unsurpassed by those of other nations, except in the department of fine casting. In this, and in the working of gold and silver, a higher standard of technical and constructive exactness has been reached by the metal workers of Europe and Japan. It may be taken as an axiom that the more beautiful the shape of an article is, and this especially

applies to metal work, the less need exists for the decoration of its surface. It is equally true that the highest test of craftsmanship is the production of a perfect article without any decoration. The reason being that the slightest technical fault is apparent on a plain surface, but can be hidden or disguised of one which is covered with ornament. The goldsmiths and silversmiths of India were extremely skilful and industrious, but judged by this test their works often exhibit a lack of care and exactness in the structural portion and a completely satisfactory example of perfectly plain work from the hands of the gold and silversmiths of India is rarely to be met with. Much of the excessive and often inappropriate ornamentation of the articles that they produced owed its application as much to the necessity of hiding defective construction as it did to any purely decorative purpose.

Textiles.—The textile industry is the widest in extent in India and is that in which her craftsmen have shown their highest achievements. Other countries, east and west of India have produced work equal at least in stone, wood, and metal; but none has ever matched that of her weavers in cotton and wool, or excelled them in the weaving of silken fabrics. Some of the products of the looms of Bengal are marvels of technical skill and

perfect taste, while the plum bloom quality of the old Cashmere shawls is an artistic achievement which places them in a class by themselves. Weaving being essentially a process of repetition, was the first to which machinery was applied, and modern science has brought power loom weaving to such a state of perfection that filaments of a substance finer even than those of Dacca, which astonished our ancestors, are now produced in the mills of Lancashire. But for beauty of surface and variety of texture no machine-made fabrics have ever equalled the finest handwork of the weavers of India. Many of the most beautiful varieties of Indian textile work have disappeared, killed by the competition of the power loom. In other branches of art as applied to textiles India does not hold so pre-eminent a position as in that of weaving. The printed silks and calicoes of the seventeenth and eighteenth centuries deservedly held a high place in the estimation of Western nations, whose craftsmen learnt many valuable lessons from the technical skill, and artistic taste they display. Nothing approaching the tapestries made in Europe in the middle ages has been produced in India. The nearest approach to these is in carpets and rugs. This art was introduced from Persia; but Indian craftsmen have never succeeded in equalling the finest work of their instructors either in colour or design.

Archæology.

The ancient monuments of India are as varied as they are numerous. Until a few years ago, the earliest known were the brick and stone erections of the Maurya period, a group of mounds at Lauriya Nandangarh, illustrative of the Vedic funeral customs and assignable roughly to the 7th or 8th century B.C., and some rough stone walls at the ancient city of Rajagriha of about the same period. The absence of structures of an earlier period was then supposed to be due to the fact that all previous architecture had been of wood and had completely perished. The recent excavations, however, at Mohenjo-daro, in Sind and at Harappa in the Punjab, have completely revolutionised ideas on this subject and proved that as far back as the 3rd or 4th millennium B.C. and probably much earlier still, India was in possession of a highly developed civilization with large and populous cities, well built houses, temples and public buildings of brick and many other amenities enjoyed at that period by the peoples of Mesopotamia and Egypt. Both at Mohenjo-daro and Harappa there are the remains of some 5 or 6 cities superimposed one upon the ruins of another.

The structures that have so far been exposed at Mohenjo-daro belong to the three latest cities on the site. Those of the third or earliest are the best in style; those of the first the poorest. Most of the structures are dwelling houses or shops, but there are others which appear to have been temples and one—of particularly massive proportions—is a large bath, surrounded by faneated galleries and halls. All were built of well burnt brick and most of them were of two or more storeys with staircases giving access to the upper rooms. In and around the ruins have been found many minor antiquities

including gold and silver jewellery, engraved seals of stone and ivory and paste copper implements and vessels, terracotta figurines and toys, shell ornaments and potteries both painted and plain.

These discoveries establish the existence in Sind and the Punjab during the 4th and 3rd millennia B.C. of a highly developed city life, and the presence, in many of the houses, of wells and bathrooms as well as an elaborate drainage system betoken a social condition of the citizens at least equal to that found in Sumer and superior to that prevailing in contemporary Babylonia and Egypt. The inhabitants of these cities lived largely no doubt by agriculture and it is a point of interest that the specimens of wheat found at Mohenjo-daro resemble the common variety grown in the Punjab to-day. Besides bread, their food appears to have included beef, mutton, and pork, the flesh of tortoises, turtles and gharial, fresh fish from the Indus and dried fish from the sea coast. Among their domesticated animals were the humped Indian bull, the buffalo, a short horned bull, the sheep, pig, dog and elephant. Besides gold and silver they used copper, tin, bronze and lead; they were familiar with the arts of spinning and weaving and with the cultivation of cotton and had attained a high degree of proficiency in the jeweller's and potter's arts.

Monumental Pillars.—The monuments which have come down to us from the Maurya period, include, besides the caves to be referred to below, the wooden palisade (4th century B.C.) which surrounded the ancient city of Pataliputra (modern Patna), and of which a large section has been exposed, the rock and pillar

edicts of Asoka (C. 250 B.C.), the remains of a large pillared hall constructed by the same emperor at Pataliputra, a number of brick stupas and a monolithic rail which originally surmounted an Asoka *stupa* at Sarnath near Benares. Altogether thirteen pillars of Asoka are known besides the Elephant capital of a 14th at Sankisa and a fragment of a 15th at Benares. Ten of them bear his inscriptions. Of these the Lauriya-Nandangarh column in the Champaran District, Tirhut, is practically uninjured. The capital of each column, like the shaft, was monolithic, and comprised three members, viz., a Persepolitan bell, abacus, and crowning sculpture in the round. By far the best capital of Asoka's time was that exhumed at Sarnath near Benares. The four lions standing back to back on the abacus are carved with extraordinary precision and accuracy, and originally supported a wheel symbolizing the law of piety preached by the Buddha. Several pieces of this wheel were found and are now preserved in the Archæological Museum at Sarnath. Of the post-Asokan period one pillar (B.C. 150) stands to the north-east of Benagar in the Gwalior State, another in front of the cave of Karli (A.D. 70), and a third at Eran in Central Provinces belonging to the 5th Century A.D. All those are of stone, but there is one of iron also. It is near the Qutb Minar at Delhi, and an inscription on it speaks of its having been erected by a king called Chandra identified with Chandragupta II. (A.D. 375, 413) of the Gupta dynasty. It is wonderful "to find the Hindus at that age forging a bar of iron larger than any that have been forged ever in Europe to a very late date, and not frequently even now." Pillars of later style are found all over the country, especially in the Madras Presidency. No less than twenty exist in the South Kanara District. A particularly elegant example faces a Jaina temple at Mudabidri, not far from Mangalore. An interesting discovery was lately made concerning the Iron Pillar at Dhar, Central India. The Pillar is like that at New Delhi, one of those large sized products of ancient Indian metal workers which have excited the admiration of modern metallurgists. The Pillar is now broken in three pieces, measuring together more than 43 feet in length, and there is reason to believe that a fourth piece 7 feet long has disappeared. The date and purpose of the Pillar were uncertain until a recent discovery which is of an inscription of the time of the Parumara King Bhaja of Dhar, A.D. 1018-60, fragments of which were found in a Dhar mosque which occupies the site of a grammar school established by that King. This is held to fix the period when the pillar was made.

Topes.—*Stupas*, known as *dagabas* in Ceylon and commonly called *Topes* in North India, were constructed either for the safe custody of relics hidden in a chamber often near the base or to mark the scene of notable events in Buddhist or Jaina legends. Though we know that the ancient Jains built *stupas*, no specimen of Jaina *stupas* is now extant. A notable structure of this kind which existed until recent times, was the Jaina *stupa* which stood on the Kankali Tila site at Muttra and yielded a large number of Jaina sculptures now deposited in the Provincial Museum at Lucknow. Of those belonging to the Buddhists, the great *Tope* of Sanchi in Bhopal is the most intact and entire

of its class. It consists of a low circular drum supporting a hemispherical dome of less diameter. Round the drum is an open passage for circumambulation, and the whole is enclosed by a massive stone railing with lofty gates facing the cardinal points. The gates are essentially wooden in character, and are carved, inside and out, with elaborate sculptures. The original *stupa*, which was of brick and not more than half the present dimensions, was apparently erected by Asoka at the same time as his lion-crowned pillar near the south gate, but as Sir John Marshall's recent explorations have conclusively shown, its outer casing of stone, the railing and the gateways were at least 150 and 200 years later, respectively. Other famous Buddhist *stupas* that have been found are those of Sarnath, Bharhut between Allahabad and Jubbulpore, Amravati in the Madras Presidency, and Piprahwa on the Nepalese frontier. The *tope* proper at Bharhut has entirely disappeared, having been utilised for building villages, and what remained of the rail has been removed to the Calcutta Museum. The bas-reliefs on this rail which contain short inscriptions and thus enable one to identify the scenes sculptured with the *Jatakas* or Birth Stories of the Buddha give it a unique value. The *stupa* at Amravati also no longer exists, and portions of its rail, which is unsurpassed in point of elaboration and artistic merit, are now in the British and Madras Museums. The *stupa* at Piprahwa was opened by Mr. W. C. Peppe in 1898, and a steatite or soap-stone reliquary with an inscription on it was unearthed. The inscription, according to many scholars, speaks of the relics being of the Buddha himself and enshrined by his kinsmen, the Sakyas. If this interpretation is correct, we have here one of the *stupas* that were erected over the ashes of Buddha immediately after his demise.

Caves.—Of the rock excavations which are one of the wonders of India, nine-tenths belong to Western India. The most important groups of caves are situated in Bhaja, Bedsa, Karli, Kanheri, Junnar, and Nasik in the Bombay Presidency, Ellora and Ajanta in Nizam's Dominions, Barabar and Nagarjuni 16 miles north of Gaya, and Udayagiri and Khandagiri 20 miles from Cuttack in Orissa. The caves belong to the three principal sects into which ancient India was divided, viz., the Buddhists, Hindus and Jains. The earliest caves so far discovered are those of Barabar and Nagarjuni which were excavated by Asoka and his grandson Dasaratha, and dedicated to Ajivikas, a naked sect founded by Mankhalli putra Gosala. The next earliest caves are those of Bhaja, Pitalkhora and cave No. 9 at Ajanta and No. 19 at Nasik. They have been assigned to 200 B.C. by Fergusson and Dr. Burgess. But there is good reason to suppose from Sir John Marshall's recent researches and from epigraphic considerations that they are considerably more modern. The Buddhist caves are of two types—the *chaityas* or chapel caves and *vikaras* or monasteries for the residence of monks. The first are with vaulted roofs and horse-shoe shaped windows over the entrance and have interiors consisting of a nave and side aisles with a small *stupa* at the inner circular end. They are thus remarkably similar to Christian basilicas. The second class consist of a half surrounded by a number of cells. In the later

riharas there was a sanctum in the centre of the back wall containing a large image of Buddha. Hardly a *chaitya* is found without one or more *riharas* adjoining it. Of the Hindu cave temples that at Elephanta near Bombay is perhaps the most frequented. It is dedicated to Siva and is not earlier than the 7th century A.D. But by far the most renowned cave-temple of the Hindus is that known as Kailasa at Ellora. It is on the model of a complete structural temple but carved out of solid rock. It also is dedicated to Siva and was excavated by the Rashtrakuta king, Krishna I, (A. D. 768), who may still be seen in the paintings in the ceilings of the upper porch of the main shrine. Of the Jaina caves the earliest are at Khandagiri and Udayagiri; those of the mediæval type, in Indra Sabha at Ellora; and those of the latest period, at Anka in Nasik. The ceilings of many of these caves were once adorned with fresco paintings. Perhaps, the best preserved among these are those at Ajanta, which were executed at various periods between 350-650 A.D. and have elicited high praise as works of art.

Gandhara Monuments.—On the north-west frontier of India, anciently known as Gandhara, are found a class of remains, ruined monasteries and buried *stupas*, among which we notice for the first time representations of Buddha and the Buddhist pantheon. The free use of Corinthian capitals, friezes of nude Eroses bearing a long garland, winged Atlantes without number, and a host of individual motifs clearly establish the influence of Hellenistic art. The mound at Peshawar, locally known as Shah-j-k-i-Dheri, which was explored in 1909, brought to light several interesting sculptures of this school together with a reliquary casket, the most remarkable bronze object of the Gandhara period. The inscription on the casket left no doubt as to the mound being the *stupa* raised over a portion of the relics of Buddha by the Indo Scythian king Kanishka. They were presented by Lord Minto's Government to the Buddhists of Buria and are now enshrined at Mandalay. To about the same age belong the *stupas* at Manikvala in the Punjab opened by Ranjit Singh's French Generals, Ventura and Court, in 1830. Some of them contained coins of Kanishka. There was brought to light at Taxila during the winter of 1932-33 what proved to be the largest monastery so far unearthed in north-west India. In it there was an inscription dated in the year 134 of an unspecified era and roughly corresponding with the year 76 A.D. The record is regarded as important because of the assistance it gives in dating Gandhara sculptures in various parts.

Structural Temples.—Of this class the earliest examples are the Varaha temple at Deogarh, District Jhansi, another temple at Sanchi, the brick temples at Bhitaragan in the district of Cawnpore and the temples at Tigowa, Nachna, Eran and Bhumara all of which belong to the Gupta period and a later one at Tigowa in the Central Provinces. In South India we have two more examples *viz.*, Tad Khan and Durga temples at Alhole in Bijapur, the latter of which cannot be later than the eighth century A.D. The only common characteristic is flat roofs without spires of any kind. In other respects they are entirely different and already here we mark the beginning of the two styles, Indo-

Aryan and Dravidian, whose differences become more and more pronounced from the 7th century onwards. In the Indo-Aryan style, the most prominent ones tend to the perpendicular, and in the Dravidian to the horizontal. The salient feature of the former again is the curvilinear steeple and of the latter, the pyramidal tower. The most notable examples of the first kind are to be found among the temples of Ghubaneswar in Orissa, Khajuraho in Bundelkhand, Asia in Jodhpur, and Dilwara on Mount Abu. One of the best known groups in the Dravidian style is that of the Mamallapuram Rathas, or 'Seven Pagodas,' on the seashore to the south of Madras. They are each hewn out of a block of granite, and are rather models of temples than *raths*. They are the earliest examples of typical Dravidian architecture, and belong to the 7th century. To the same age has to be assigned the temple of Kailasa-rath at Conjeeveram, and to the following century some of the temples at Alhole and Pattadakal of the Bijapur District, Bombay Presidency, and the monolithic temple of Kailasa at Ellora, referred to above. Of the later Dravidian style the great temple at Tanjore and the Srirangam temple near Trichinopoly are the best examples.

Intermediate between these two main styles comes the architecture of the Deccan, called Chalukyan by Fergusson. In this style the plan becomes polygonal and star-shaped instead of quadrangular; and the high-storied spire is converted into a low pyramid in which the horizontal treatment of the Dravidian is combined with the perpendicular of the Indo-Aryan. Some fine examples of this type exist at Dambal, Ratthali, Tiliwalli and Hangal in Dharwar, Bombay Presidency, and at Itagi and Warangal in Nizam's Dominions. But it is in Mysore among the temples at Halebidu, Belur, and Somnathpur that the style is found in its full perfection.

Inscriptions.—We now come to inscriptions, of which numbers have been brought to light in India. They have been engraved on varieties of materials, but principally on stone and copper. The earliest of these are found incised in two distinct kinds of alphabet, known as Brahmi and Kharoshthi, the latter being confined to the north-west of India. The Brahmi was read from left to right, and from it have been evolved all the modern vernacular scripts of India. The Kharoshthi was written from right to left, and was a modified form of the ancient Aramaic alphabet introduced into the Punjab during the period of the Persian domination in the 5th century B.C. It was prevalent up to the 4th century A.D., and was supplanted by the Brahmi. The earliest dateable inscriptions are the celebrated edicts of Asoka to which a reference has been made above. One group of these has been engraved on rocks, and another on pillars. They have been found from Shahbazgarhi 40 miles north-east of Peshawar to Nighva in the Nepal Tarai, from Girnar in Kathiawar to Dhauli in Orissa, from Kalsi in the Lower Himalayas to Siddapur in Mysore, showing by the way the vast extent of territory held by him. The reference in his Rock Edicts to the five contemporary Greek Princes, Antiochus II. of Syria, Ptolemy Philadelphus, and so forth is exceedingly interesting, and fixes B.C. 269 as the date of his coronation. His

Rummindei pillar inscription, again, discovered in Nepal Tarai, now settles, beyond all doubt, the birth-place of Buddha which was for long disputed. Another noteworthy record is the inscription of the Benagar pillar. The pillar had been known for a long time but Sir John Marshall was the first to notice the inscription on it. It records the erection of this column, which was a Garuda pillar, in honour of the god Vasudeva by one Hellodoros, son of Dion, who is described as an envoy of King Antialcidas of Taxila. Hellodoros is herein called a *Bhagavata*, which shows that though a Greek he had become a Hindu and presumably a Vaishnava. Another inscription worth noticing and especially in this connection is that of Cave No. 10 at Nasik. The donor of this cave, Ushavadata, who calls himself a Saka and was thus an Indo-Scythian, is therein spoken of as having granted three hundred thousand kine and sixteen villages to gods and Brahmans and as having annually fed one hundred thousand Brahmans. Here is another instance of a foreigner having embraced Hinduism. Thus for the political, social, economical and religious history of India at the different periods the inscriptions are invaluable records, and are the only light but for which we are 'forlorn and blind.'

Saracenic Architecture—This begins in India with the 13th century after the permanent occupation of the Muhammadans. Their first mosques were constructed of the materials of Hindu and Jain temples, and sometimes with comparatively slight alterations. The mosque called *Ashar-din-ka-jompra* at Ajmer and that near the Qutb Minar are instances of this kind. The Muhammadan architecture of India varied at different periods and under the various dynasties, imperial and local. The early Pathan architecture of Delhi was massive and at the same time was characterised by elaborate richness of ornamentation. The Qutb Minar and tombs of Alauddin and Ala-ud-din Khilji are typical examples. Of the Sharqi style we have three mosques in Jaunpur with several tombs. At Mandu in the Dhar State, a third form of Saracenic architecture sprang up, and we have here the Jamai Masjid, Hoshang's tomb, Jahaz Mahal and Hindola Mahal as the most notable instances of the secular and

ecclesiastical styles of the Malwa Pathans. The Muhammadans of Bengal again developed their own style, and Pandua, Malda, and Gaur team with the ruins of the buildings of this type, the important of which are the Adina Masjid of Sikandar Shak, the Ekhlaki mosque, Kadam Kasul Masjid, and so forth. The Bahmani dynasty of Gulbarga and Bidar were also great builders, and adorned their capitals with important buildings. The most striking of these is the great mosque of Gulbarga, which differs from all mosques in India in having the whole central area covered over so that what in others would be an open court is here roofed by sixty-three small domes. "Of the various forms which the Saracenic architecture assumed," says Fergusson, "that of Ahmedabad may probably be considered to be the most elegant." (It is notable for its carved stone work; and the work of the perforated stone windows in Sidi Sayyid's mosque, the carved niches of the minars of many other mosques, the sculptured *Mihrabs* and domed and paneled roofs is so exquisite that it will rival anything of the sort executed elsewhere at any period. No other style is so essentially Hindu. In complete contrast with this was the form of architecture employed by the Adil Shahi dynasty of Bijapur. There is here relatively little trace of Hindu forms or details. The principal buildings now left at Bijapur are the Jamai Masjid, Qagan Mahal, Mihtar Mahal, Ibrahim Rauza and mosque and the Gol Gumbaz. Like their predecessors, the Pathans of Delhi, the Moghuls were a great building race. Their style first began to evolve itself during the reign of Akbar in a combination of Hindu and Muhammadan features. Noteworthy among the emperor's buildings are the tomb of Humayun, and the palaces at Fatehpur Sikri and Agra. Of Jahangir's time his mosque at Lahore and the tomb of I'timad-ud-daula are the most typical structures. "The force and originality of the style gave way under Shah Jahan to a delicate elegance and refinement of detail." And it was during his reign that the most splendid of the Moghul tombs, the Taj Mahal at Agra, the tomb of his wife Mumtaz Mahal, was constructed. The Moti Masjid in Agra Fort is another surpassingly pure and elegant monument of his time.

Indian Time.

For many years Indian time was in a state of chaotic confusion. What was called Madras or Railway time was kept on all the railways and each great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed to the Local Governments, and through them to all local bodies, a long letter which reviewed the situation and made suggestions for the future. The essential points in this letter are indicated below.

"In India we have already a standard time which is very generally, though by no means universally, recognised. It is the Madras local time, which is kept on all railway and telegraph

lines throughout India and which is 5h 21m. 10s. in advance of Greenwich. Similarly, Rangoon local time is used upon the railways and telegraphs of Burma, and is 6h. 24m. 47s. ahead of Greenwich. But neither of these standards bears a simple and easily remembered relation to Greenwich time.

"The Government of India have several times been addressed by Scientific Societies, both in India and in England, and urged to fall into line with the rest of the civilised world. And now the Royal Society has once more returned to the attack. The Committee of that Society which advises the Government of India upon matters connected with its observatories, writes—'The Committee think that a change from Madras time to that corresponding to a longitude exactly 5½ hours east of Greenwich would be an improve-

ment upon the existing arrangements; but that for international scientific purposes the hourly zone system, making the time 5 hours in advance of Greenwich in the west, and 6 hours in advance in the east of India would be preferable.

"Now if India were connected with Europe by a continuous series of civilised nations with their continuous railway systems, all of which had adopted the European hour-zone system, it would be imperative upon India to conform and to adopt the second suggestion. But as she is not, and as she is as much isolated by uncivilised States as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated colonies and to adopt the first suggestion.

"It is suggested that this will be the better solution. There are obvious objections to drawing an arbitrary line right across the richest and most populous portions of India, and so as to bisect all the main lines of communication, and keeping times differing by an hour on opposite sides of that line. India has become accustomed to a uniform standard in the Madras time of the railways; and the substitution for it of a double standard would appear to be a retrograde step; while it would, in all probability, be strongly opposed by the railway authorities. Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike, and it is certain that the double standard would puzzle the latter greatly; while by emphasising the fact that railway differed from local time, it might postpone or even altogether prevent the acceptance of the former instead of the latter by people generally over a large part of India. The one great advantage which the second possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour whereas under the latter it will even exceed an hour in the extreme cases of Karachi and Quetta. But this inconvenience is believed to be smaller than that of keeping two different times on the Indian system of railways and telegraphs.

"It is proposed, therefore, to put on all the railway and telegraph clocks in India by 8m 50s. They would then represent a time 5½ hours faster than that of Greenwich, which would be known as **Indian Standard Time** and the difference between standard and local time at the places mentioned below would be approximately as follows, the figures representing minutes, and F. and S. meaning that the standard time is in advance of or behind local

time respectively.—Dibrugarh 51 S., Shillong 38 S., Calcutta 24 S., Allahabad 2 F., Madras 9 F., Lahore 33 F., Bombay 39 F., Peshawar 44 F., Karachi 62 F., Quetta 62 F.

"This standard time would be as much as 54 and 55 minutes behind local time at Mandalay and Rangoon, respectively, and since the railway system of Burma is not connected with that of India, and already keeps a time of its own, namely, Rangoon local time, it is not suggested that Indian Standard Time should be adopted in Burma. It is proposed, however, that instead of using Rangoon Standard Time as at present, which is 6h. 24m. 47s. in advance of Greenwich, a Burma Standard Time should be adopted on all the Burmese railways and telegraphs, which would be one hour in advance of Indian Standard Time, or 6½ hours ahead of Greenwich, and would correspond with 97° 30' E. longitude. The change would bring Burma time into simple relation both with European and with Indian time, and would (among other things) simplify telegraphic communication with other countries.

"Standard time will thus have been fixed for railways and telegraphs for the whole of the Indian Empire. Its general adoption for all purposes, while eminently advisable, is a matter which must be left to the local community in each case."

It is difficult to recall, without a sense of bewilderment, the reception of this proposal by various local bodies. To read now the fears that were entertained if Standard Time was adopted is a study in the possibilities of human error. The Government scheme left local bodies to decide whether or not they would adopt it. Calcutta decided to retain its own local time, and to-day Calcutta time is still twenty-four minutes in advance of Standard Time. In Bombay the first reception of the proposal was hostile, but on reconsideration the Chamber of Commerce decided in favour of it and so did the Municipality. Subsequently the opposing element in the Municipality brought in a side resolution by which the Municipal clocks were put at Bombay time which is thirty-one minutes behind Standard Time. On the 1st January 1906 all the railway and telegraph clocks in India were put at Indian Standard Time, in Burma the Burma Standard Time became universal. Calcutta retains its former Calcutta time, but in Bombay local time is retained only in the clocks which are maintained by the Municipality and in the establishments of some orthodox Hindus. Elsewhere Standard Time is universal.

TIDAL CONSTANTS.

The approximate standard time of High Water may be found by adding to, or subtracting from, the time of High Water at London Bridge, given in the calendar, the corrections given as below:—

			R.	M.			R.	M.

Coinage, Weights and Measures

As the currency of India is based upon the rupee, statements with regard to money are generally expressed in rupees, nor has it been found possible in all cases to add a conversion into sterling. Down to about 1873 the gold value of the rupee (containing 165 grains of pure silver) was approximately equal to 2s., or one-tenth of a £, and for that period it is easy to convert rupees into sterling by striking off the final cipher (Rs. 1,000=£100). But after 1873, owing to the depreciation of silver as compared with gold throughout the world, there came a serious and progressive fall in the exchange, until at one time the gold value of the rupee dropped as low as 1s. In order to provide a remedy for the heavy loss caused to the Government of India in respect of its gold payments to be made in England, and also to relieve foreign trade and finance from the inconvenience due to constant and unforeseen fluctuations in exchange, it was resolved in 1893 to close the mints to the free coinage of silver, and thus force up the value of the rupee by restricting the circulation. The intention was to raise the exchange value of the rupee to 1s. 4d., and then introduce a gold standard at the rate of Rs. 15=£1. From 1899 onwards the value of the rupee was maintained, with insignificant fluctuations, at the proposed rate of 1s. 4d. until February 1920 when the recommendation of the Committee appointed in the previous year that the rupee should be linked with gold and not with sterling at 2s. instead of 1s. 4d. was adopted. This was followed by great fluctuations. (See article on Currency System).

Notation.—Another matter in connection with the expression of money statements in terms of rupees requires to be explained. The method of numerical notation in India differs from that which prevails throughout Europe. Large numbers are not punctuated in hundreds of thousands and millions, but in lakhs and crores. A **lakh** is one hundred thousand (written out as 1,00,000), and a **crore** is one hundred lakhs or ten millions (written out as 1,00,00,000). Consequently, according to the exchange value of the rupee, a lakh of rupees (Rs. 1,00,000) may be read as the equivalent of £10,000 before 1873, and as the equivalent of (about) £6,667 after 1899, while a crore of rupees (Rs. 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 1873, and as the equivalent of (about) £666,667 after 1899. With the rupee at 1s. 6d. a lakh is equivalent to £7,500 and a crore is equivalent to £750,000.

Coinage.—Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both Indians and Europeans. The anna was formerly reckoned as 1d., it may now be considered as exactly corresponding to 1d. the anna is again sub-divided into 12 pils.

Weights.—The various systems of weights used in India combine uniformity of scale with immense variations in the weights of units.

The scales used generally throughout Northern India and less commonly in Madras and standardized in Bombay Presidency under the Bombay Weights and Measures Act, 1932, may be thus expressed as one maund=40 seers, one seer=80 tolas. The actual weight of seer varies greatly from district to district and even from village to village in India except in Bombay Presidency. In the standard system the tola is of 180 grains, and seer thus weighs 2,057 lbs. and the maund 82.28 lbs. This standard is also used in official reports.

Retail.—For calculating retail prices, the universal custom in India is to express them in terms of seers to the rupee. Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quantity to be obtained for the same amount of money. In other words, prices in India are quantity prices, not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight perplexing to an English reader. It may, however, be mentioned that quantity prices are not altogether unknown in England especially at small shops where pennyworths of many groceries can be bought. Eggs, likewise, are commonly sold at a varying number for the shilling. If it be desired to convert quantity prices from Indian into English denominations without having recourse to money prices (which would often be misleading), the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb., and that the value of the rupee remains constant at 1s. 4d. 1 seer per rupee=(about) 3 lb. for 2s., 2 seers per rupee=(about) 6 lb. for 2s., and so on.

The name of the unit for square measurement in India generally is the *bigha*, which varies greatly in different parts of the country. But areas have been expressed in this work either in square miles or in acres.

Proposed Reforms.—Indian weights and measures have never been settled upon an organised basis suitable for commerce and trade characteristic of the modern age. They vary from town to town and village to village in a way that could only work satisfactorily so long as the dealings of towns and villages were self-contained and before roads and railways opened up trade between one and the other. If we take, for instance, the maund denomination of weight common all over India, we shall find that in a given city there are nearly as many maunds as there are articles to weigh. If we consider the maund as between district and district the state of affairs is worse. Thus in the United Provinces alone, the maund of sugar weighs 48½ seers in Cawnpore, 40 in Muttra, 72½ in Gorakhpur, 40 in Agra, 50 in Moradabad, 43½ in Saharanpur, 50 in Bareilly, 46 in Fyzabad, 48½ in Shahjehanpur, 51 in Goshungunge. The maund varies throughout all India from the Bengal or railway maund of 82-2/7 lbs to the Factory maund of 74 lbs. 10 oz. 11 drs., the Bombay maund of 28 lbs. which apparently answers to the Forest Department maund in use at the

Fuel Depot, and the Madras maund, which some authorities estimate at 25 lbs. and others at 24 lbs. and so on.

Committees of Inquiry.—These are merely typical instances which are multiplied indefinitely. There are variations of every detail of weights and measures in every part of India. The losses to trade arising from the confusion and the trouble which this state of things causes are heavy. Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform. The Supreme and Provincial Governments have made various attempts during 40 years past to solve the problem of universal units of weights and measures and commerce and trade have agitated about the question for the past century. The Indian railways and Government departments adopted a standard tola (180 grains), seer (80 tolas) and maund (40 seers) and it was hoped that this would act as a successful "lead" which would gradually be followed by trade throughout the empire, but the expectation has not been realised.

The Government of India considered the whole question in consultation with the provincial Governments in 1890-1894 and various special steps have at different times been taken in different parts of India. The Government of Bombay appointed a committee in 1911 to make proposals for reform for the Bombay Presidency. Their final report has not been published, but they presented in 1912 an *ad interim* report which has been issued for public discussion. In brief, it points out the practical impossibility of proceeding by compulsory measures affecting the whole of India. The Committee stated that over the greater part of the Bombay Presidency a standard of weights and measures would be heartily welcome by the people. They thought that legislation compulsorily applied over large areas subject to many diverse conditions of trade and social life would not result in bringing about the desired reform so successfully as a "lead" supplied by local legislation based on practical experience. The want of coherence, *savoir faire*, or the means of co-operation among the people at large pointed to this conclusion. The Committee pointed out that a good example of the results that will follow a good lead is apparent in the East Khandesh District of the Presidency, where the District Officer, Mr. Simcox, gradually, during the course of three years, induced the people to adopt throughout the district uniform weights and measures, the unit of weight in this case being a tola of 180 grains. But the committee abstained from recommending that the same weights and measures should be adopted over the whole Presidency, preferring that a new system started in any area should be as nearly as possible similar to the best system already prevailing there.

Committee of 1915.—The whole problem was again brought under special consideration by the Government of India in October, 1915, when the following committee was appointed to inquire into the entire subject anew —

Mr. C. A. Silberrad (*President*).

Mr. A. Y. G. Campbell.

Mr. Bustomji Fardoonji.

This Committee reported, in August 1916, in favour of a uniform system of weights to be adopted in India based on the 180 grain tola. The report says:—Of all such systems there is no doubt that the most widespread and best known is that known as the Bengal or Indian Railway weights. The introduction of this system involves a more or less considerable change of system in parts of the United Provinces (Gorakhpur, Bareilly and neighbouring areas), practically the whole of Madras, parts of the Punjab (rural portions of Amritsar and neighbouring districts), of Bombay (South Bombay, Bombay city and Gujarat), and the North-West Frontier Province. Burma has at present a separate system of its own which the committee think it should be permitted to retain. The systems recommended are:—

FOR INDIA

8 kha-khas	= 1 chawal
8 chawals	= 1 ratti
8 rattis	= 1 masha
12 mashes or 4 tanks	= 1 tola
5 tolas	= 1 chatak
16 chataks	= 1 seer
40 seers	= 1 maund

FOR BURMA

2 small ywes	= 1 large ywe
4 large ywes	= 1 pe
2 pes	= 1 mu
5 pes or $2\frac{1}{2}$ mus	= 1 mat
1 mat	= 1 ngamu
2 ngamus	= 1 tikal [wiss.]
100 tikals	= 1 pelktha or

The tola is the tola of 180 grains, equal to the rupee weight. The viss has recently been fixed at 3 60 lbs. or 140 tolas.

Government Action.—The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they again, for the present and subject to the restrictions imposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think advisable to standardise dry and liquid measures of capacity within their provinces. Similarly, they announced their decision not to adopt all-India standards of length or area.

As regards weights they decided in favour of the standard mentioned under the heading "Weights", near the commencement of this article, this having been recommended by a majority of the Weights and Measures Committee and having received the unanimous support of the Local Governments. At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that "if subsequently, opinion develops strongly in favour of the Imperial standardisation of weights, the Government of India will be prepared to undertake such legislation, but at present they consider that any such step would be premature.

Provincial Government Action.—Amongst the various Provincial Governments in India, Bombay Government is the only one which has taken action to standardize the weights and measures, etc., used in trade in the Presidency.

The Peoples of India.

It is essential to bear in mind, when dealing with the people of India, that it is a continent rather than a country. Nowhere is the complex character of Indians more clearly exemplified than in the physical type of its inhabitants. No one would confuse the main types, such as Gurkhas, Pathans, Sikhs, Rajputs, Burmans, Nagas, Tamils, etc., nor does it take long to carry the differentiation much farther. The typical inhabitants of India—the Dravidians—differ altogether from those of Northern Asia, and more nearly resemble the tribes of Malaya, Sumatra and Madagascar. Whatever may be their origin, it is certain that they have settled in the country for countless ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by successive hordes of invaders, including Aryans, Scythians, Pathans and Moghals, and in the North-East by Mongoloid tribes allied to those of Burma, which is India only in a modern political sense. Between these foreign elements and the pure Dravidians is borderland where the contiguous races have intermingled.

The people of the Indian Empire are divided by Sir Henry Risley (*Caste, Tribe and Race, Indian Census Report, 1901*; the *Gazetteer of India, Ethnology and Caste, Volume I, Chapter 6*) into seven main physical types. There would be eight if the Andamanese were included, but this tiny group of Negritos may be disregarded.

The Turko-Iranian, represented by the Baloch, Brahui and Afghans of Baluchistan and the North-West Frontier Province. Probably formed by a fusion of Turkiand Persian elements, in which the former predominate. Stature above mean; complexion fair; eyes mostly dark but occasionally grey; hair on face plentiful; head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The Indo-Aryan occupying the Punjab, Rajputana, and Kashmir, and having as its characteristic members the Rajputs, Khattris, and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India. The stature is mostly tall; complexion fair; eyes dark; hair on face plentiful, head long; nose narrow, and prominent but not specially long.

The Scytho-Dravidian, comprising the Maratha Brahmans, the Kunbis, and the Coorgs of Western India. Probably formed by a mixture of Scythian and Dravidian elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lower orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight; in the lower Dravidian elements are more pronounced.

The Aryo-Dravidian or Hindustani, found in the United Provinces, in parts of Rajputana and in Bihar and represented in its upper strata by the Hindustani Brahman and in its

lower by the Chamar. Probably the result of the intermixture, in varying proportions, of the Indo-Aryan and Dravidian types. The head-form is long with a tendency to medium; the complexion varies from lightish brown to black; the nose ranges from medium to broad, being always broader than among the Indo-Aryans; the stature is lower than in the latter group and usually below the average according to the scale. The higher representatives of this type approach the Indo-Aryans, while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. The distinctive feature of the type, the character which gives the real clue to its origin and stamps the Aryo-Dravidian as racially different from the Indo-Aryan is to be found in the proportions of the nose.

The Mongolo-Dravidian, or Bengal type of Lower Bengal and Orissa, comprising the Bengal Brahmans and Kayasthas, the Mahomedans of Eastern Bengal, and other groups peculiar to this part of India. Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad; complexion dark; hair on face usually plentiful; stature medium; nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its ecological habitat the type extends to the Himalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa; the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal.

The Mongoloid type of the Himalayas, Nepal, Assam, and Burma, represented by the Kanets of Lahul and Kulu; the Lepchas of Darjeeling and Sikkim the Limbus, Murrms and Gurungs of Nepal; the Bodo of Assam; and the Burmese. The head is broad; complexion dark, with a yellow tinge; hair on face scanty; stature short or below average; nose fine to broad, face characteristically flat; eyelids often oblique.

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chota Nagpur. Its most characteristic representatives are the Panjays of Malabar and the Santals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Scythian, and Mongoloid elements. In typical specimens the stature is short or below mean; the complexion very dark, approaching black; hair plentiful, with an occasional tendency to curl; eyes dark; head long; nose very broad, sometimes depressed at the root, but not so as to make the face appear flat. This race, the most primitive of the Indian types, occupies the oldest geological formation in India, the medley of forest clad ranges, terraced plateau, and undulating plains which stretch roughly speaking, from the Vindhya to Cape

Comorin. On the east and the west of the peninsular area the domain of the Dravidian is continuous with the Ghats, while further north it reaches on one side to the Aravallis, and on the other to the Rajmahal Hills. Where the original characteristics have been unchanged by contact with Indo-Aryan or Mongoloid people, the type is remarkably uniform and distinctive. Labour is the birthright of the pure Dravidian, whether hoeing tea in Assam, the Duars, of Ceylon, cutting rice in the swamps of Eastern Bengal or doing scavenger's work in the streets of Calcutta, Rangoon and Singapore, he is recognizable at a glance by his black skin, his squat figure, and the negro-like proportion of his nose. In the upper strata of the vast social

deposit which is here treated as Dravidian these typical characteristics tend to thin and disappear, but even among them traces of the original stock survive in varying degrees.

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an ethnographic map. They melt into each other insensibly, and although at the close of a day's journey from one ethnic tract to another, an observer whose attention had been directed to the subject would realise clearly enough that the physical characteristics of the people had undergone an appreciable change, he would certainly be unable to say at what particular stage in his progress the transformation had taken place.

TOWN AND COUNTRY.

The progress of urbanisation in India—if there has been any progress at all—has been very slow during the past thirty years, the whole increase being a little more than one per cent. The percentage of the urban population to the total is only 11, which however shows an increase of 0.8 per cent since the last census, due partly to the natural increase of the pre-existing urban population and partly to migration from rural areas. The percentage of urban population ranges from 3.4 in Assam to 22.6 in Bombay which is the most urbanised of the major provinces. Compared to this, the urban population in France is 49 per cent, in Northern

Ireland 50.8 per cent, in Canada 53.7 per cent, in the U.S.A. 56.2 per cent and in England and Wales 80 per cent.

The greatest degree of growth has been in the number of towns with a population of from 20,000 to 50,000, the total population of which is now nearly double that of towns of 50,000 to 100,000. All classes of towns have increased in population, except those with populations of between 5,000 and 10,000 and those having under 5,000. Thus the large industrial and semi-industrial towns have benefitted at the expense of the smaller towns.

DISTRIBUTION OF POPULATION IN GROUPS OF TOWNS ACCORDING TO SIZE AND IN RURAL TERRITORY

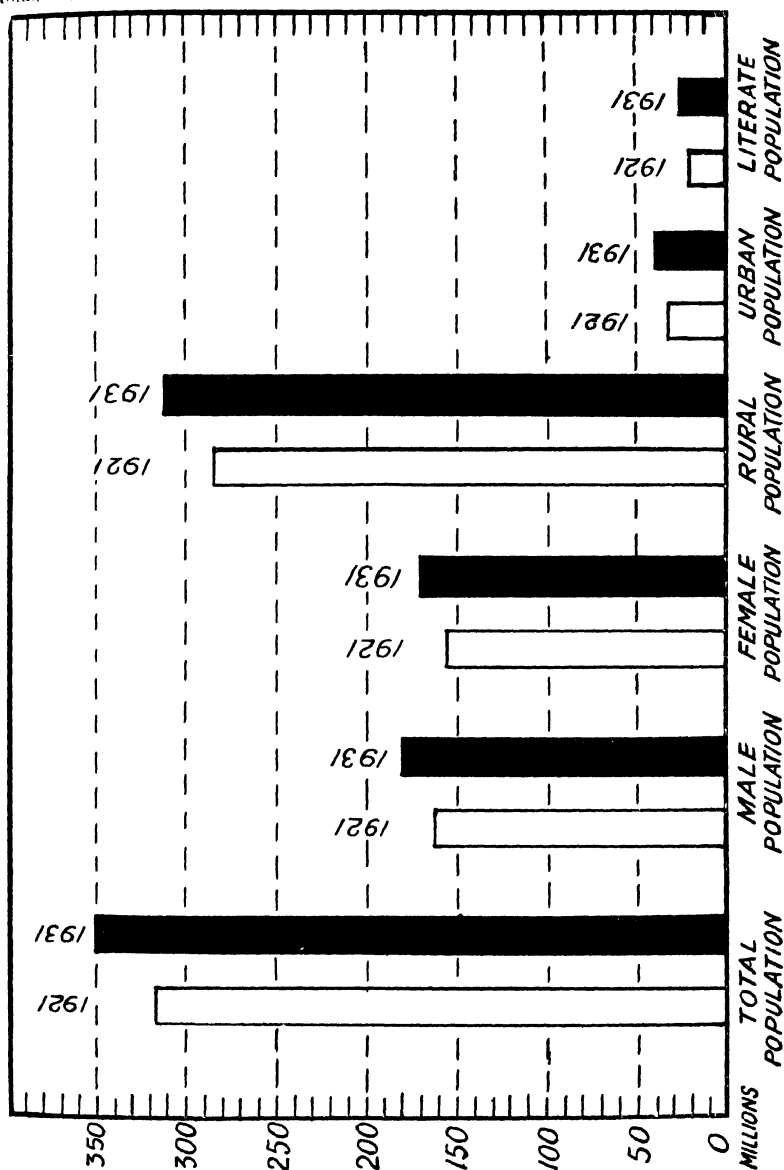

Class of Places	1931		1921		Percentage of total Population				
	Places	Population	Places	Population	'31	'21	'11	'01	'91
Total Population	699,406	352,837,778	687,981	318,942,480	100	100	100	100	100

Towns having 5,000 to 10,000	987	6,992,832	885	6,223,011	2	2	1.9	2	2.1
Towns having under 5,000	674	2,205,760	691	2,333,129	6	7	6	6	6

Migration.—Of the population of the Indian Empire only 730,546 were enumerated as born in other parts of the world. Of these 595,078 are of Asiatic birth, 118,089 of European birth and 17,379 others. The emigration from India is approximately 2.5 million, the balance of migration being against India.

Nearly all of these migrants are resident in other parts of the British Empire. There are about 165,500 Indians in the Union of South Africa, of whom 142,979 are found in Natal. There are 26,759 in Kenya, the other overseas Indian communities in order of size are Mauri-

tius 268,870, Trinidad and Tobago 138,667, British Guiana 130,510, Fiji 75,117 and much smaller numbers in Tanganyika, Jamaica, Zanzibar, Uganda and Hong Kong. There are about 11,000 Indians scattered in numbers of under 2,000 in various other parts of the British Empire and probably about 9,000 in the British Isles. The total number of Indians in the Empire outside India is 2,300,000. Outside the Empire there are about 100,000 Indians, 25,000 in the Dutch East Indies, 35,000 in Dutch Guiana, 7,500 in Madagascar and smaller numbers in Portuguese East Africa, the U.S.A., Persia, Iraq and other countries.

The Chart below gives at a glance the changes in India's population in the decade 1921-31—the total, sex, urban rural and literacy.

RELIGIONS.

The subject of religion is severely controversial in India, where often it is coloured by politics and racialism. As the Year Book aims at being impartial, all disputed inferences are excluded. As a matter of fact, Dr. Hutton, the Commissioner for the latest census, refers to an excess of zeal on the part of all parties to register as many adherents as possible in view of the possibility of a communal franchise based on the census returns. "So high did feeling run over the return of religion in the Punjab", he says, "that disputes as to whether a man was *Adi Dharmi* (Adherent of the original reli-

gion) or Sikh added to a number of affrays and at least to one homicide. Speaking broadly, of every hundred persons in the Indian Empire 68 are Hindus, 22 Mahomedans, 3 Buddhists, 8 follow the religion of their tribes, one is a Christian and one a Sikh. Of the remaining 2 one is equally likely to be a Buddhist or a Christian, and the other most probably a Jain, much less probably a Parsi and just as possibly either a Jew, a Brahmo, or a holder of indefinite beliefs. The enumerated totals of the Indian religious are set out in the following table —

Religion.	Actual number in 1921. (000's omitted.)	Proportion per 10,000 of population in 1921.	Variation per cent. (Increase + Decrease—). 1911-1921.
Hindu	239,195	6,824	+10.4
Arya	468	15	+92.1
Sikh	4,336	124	+33.9
Jain	1,252	36	+6.2
Buddhist	12,787	365	+10.5
Iranian (Zoroastrian (Parsi))	110	3	+7.8
Musalman	77,678	2,216	+13
Christian	6,297	179	+32.5
Jew	24	1	+10.9
Primitive (Tribal)	8,280	236	-15.3
Miscellaneous (Minor Religions and religions not returned)	571	16	+3,072.6

A feature of the above table is easily the large increase in the number of those returned as "miscellaneous". This is explained by the fact that the latest census grouped all those who returned their religion as *Adi-Hindu*, *Adi-Dravida*, etc., under "miscellaneous".

The Hindus largely predominate in the centre and south of India, and in the Madras Presidency they are no less than 88 per cent. of the population. Hindus are in the majority in Assam, Bihar and Orissa. In the United Provinces, the Central India tracts, Rajputana and Bombay. Muhammadans monopolize the North-West Frontier Province, Baluchistan and Kashmir and are considerably in excess in the Punjab and Eastern Bengal and Sind. They form about 32 per cent. of the population of Assam, 15 per cent. in the United Provinces and 10 per cent. in Hyderabad. The Buddhists are almost entirely confined to Burma where they are 84 per cent. of the population. The Sikhs are localized in the Punjab and the Jains in Rajputana, Ajmer-Merwara and the neighbouring States. Those who were classed as following Tribal Religions are chiefly found in Bihar and Orissa, the Central Provinces and Assam, but Bengal,

Burma, Madras, Rajputana, Central India and Hyderabad also returned a considerable number under this head. More than half of the total number of Christians reside in South India including the Hyderabad State. The remainder are scattered over the continent, the larger numbers being returned in the Punjab, the United Provinces, Bengal, Bihar and Orissa, Burma, Bombay and Assam. The Parsis and Jews are chiefly residents of the Bombay Presidency.

Christians.—The Christian community now numbers just 6½ millions of persons in India or 1.79 per cent of the population. This constitutes an increase of 32.5 per cent over the last census of which 20 per cent is ascribed to conversions during the decade 1921-31. Nearly 60 per cent of Christians are returned from the Madras Presidency and its States, and the community can claim 35 persons in every 1,000 of the population of the British districts of Madras and as large a proportion as 27 per cent in Cochin and 31.5 per cent in Travancore. Elsewhere the Christians are scattered over the larger Provinces and States of India, the Punjab and Bihar and Orissa.

MAIN STATISTICS OF THE INDIAN EMPIRE.

The Census of India was taken on the night of February 24th in Burma and on that of 26th in India. The total population of India as thus ascertained is 352,837,778, viz., British Territory 271,526,933 and Indian States 81,310,845 giving an increase of 24,870,742 in British Territory and 9,224,566 in Indian States.

The following table shows the percentage of variation in the country's population at the

last two censuses and in the last 50 years—

—	1921 to 1931.	1911 to 1921.	1881 to 1931.
Whole India ..	+10.6	+1.2	+39.0
Provinces ..	+10.0	+1.3	+36.8
States ..	+12.8	+1.0	+46.6

* Variation calculated from 1901-1931.

† Variation calculated from 1891-1931.

POPULATION OF PRINCIPAL TOWNS

It is claimed that the city of Calcutta contains 35,000 more inhabitants than Bombay which is the next largest city in India. There are nearly twice as many inhabitants in Calcutta proper as there are in Madras and almost three times as many as there are in Rangoon. Alone of the large cities of India, Bombay record a decrease in population since the 1921 census.

Lahore which has expanded to more than half as large again as it was in 1921 has increased its population by actually a larger number during the decade than Calcutta. The same is true of Delhi and Madras which increased by 47 per cent and 22 per cent, over their population of 1921. On the other hand, although the increase of 119,470 in the population of Calcutta during the last decade is greater than has been recorded in any of the other cities the percentage increase amounts to only 11 as compared with 21.5 in Karachi, 15.9 in Rangoon, 14.5 in Ahmedabad and 14.2 in Lucknow. Taking the suburban areas into account the population of Calcutta is 1,485,582 of which 1,196,784 are to be found in the city proper included in the municipal area.

‡ 1891-1931.

AGE AND SEX.

The table below shows the age distribution of 10,000 males and females of the Indian population by 10-yearly age groups at the last two censuses:—

Age-group.	1931.		1921.		Age-group.	1931.		1921.	
	Males	Fe-males.	Males	Fe-males.		Males	Fe-males.	Males.	Fe-males
0—10 ..	2,802	2,889	2,673	2,810	40—50 ..	968	891	1,013	967
10—20 ..	2,086	2,062	2,087	1,896	50—60 ..	561	545	619	606
20—30 ..	1,768	1,856	1,640	1,766	60—70 ..	269	281	347	377
30—40 ..	1,431	1,351	1,461	1,398	70 and over.	115	125	160	180
					Mean age .	23 2	22 8	24 8	24.7

The mean age in India is only 23.02, as against 30.6 in England and Wales. The rate of infant mortality in India in the decade 1921-31 shows an appreciable reduction on the rate of the previous decade, even if allowance

be made for the heavy mortality of the influenza years. It is in the towns that the highest infantile mortality is found. The table below shows the rates from 1925 to 1930 for presidency towns and certain provincial capitals.

INFANTILE MORTALITY RATES PER 1,000 LIVE-BIRTHS DURING.

City	1925.	1926.	1927.	1928	1929.	1930.
Bombay	357	255	316	314	301	298
Calcutta . . .	326	372	340	276	259	268
Madras	279	282	240	289	259	246
Rangoon	352	320	294	341	321	278
Lucknow	260	287	256	301	269	329
Lahore	222	241	201	204	214	187
Nagpur	258	302	254	299	291	270
Delhi	183	238	201	210	259	199

Special causes contribute to the high mortality of infants in India.

Owing to the custom of early marriage, cohabitation and child-birth commonly take place before the woman is physically mature and this, combined with the primitive and insanitary methods of midwifery, seriously affects the health and vitality of the mother and through her of the child. If the child survives the pre-natal and natal chances of congenital debility and the risks of child-birth, it is exposed to the dangers of death in the early months of life from diarrhoea or dysentery. According to the Executive Health Officer of Bombay city, by far the greater number of infantile deaths are due to infantile debility and malformation, including premature birth, respiratory diseases coming next, then convulsions, then diarrhoea and enteritis.

Sex Ratio.—The figures of the population of India by sexes, as recorded by the latest census, show a further continuation of the steady fall in the proportion of females to males that

has been going on since the beginning of this century. This shortage of females is characteristic of the population of India as compared to that of most European countries. The female infant is definitely better equipped by nature for survival than the male, but in India the advantage she has at birth is probably neutralised in infancy by comparative neglect and in adolescence by the strain of bearing children too early and too often. A good deal of recent work on sex ratios has tended to the view that an increase in masculinity is an indication of declining population, but this is not the case in India as a whole. The all-India ratio is 901 females per 1,000 males for Muslims and 951 females per 1,000 males for Hindus. The only provinces in which there is actually an excess of women over men are Madras and Bihar and Orissa, though the Central Provinces can be added if Berar be excluded. Where females are in excess, the excess is still most marked in the lower castes and does not always extend to the higher. Among the aboriginal tribes, however, the numbers of the two sexes are approximately equal.

Marriage.—The subject of polygamy has been discussed fully in the report of 1911. Both Hindus and Muhammadans are allowed more wives than one, Muhammadans being nominally restricted to four. As a matter of practice polygamy is comparatively rare owing to domestic and economic reasons and has little effect on the statistics. The custom of polyandry is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India. It is also practised among many of the lower castes and aboriginal tribes. Its effect is reflected in the statistics of a few small communities such as the Buddhists of Kashmir where the proportion of married women to married men is exceptionally low, but otherwise the custom is of sociological rather than of statistical interest.

The table below shows the percentage for each sex of married persons who are under the age of 15 years.

Number per 1,000 of total married who are under 15 years.

Provinces, etc	Males.	Females.
India ..	65 7	157 3

Sikhs	26 9	74 6
Christians	15 4	43 3

Widows and Remarriage.—Infant marriage naturally involves infant widowhood, a feature of no significance where remarriage is allowed, but of serious importance where it is not. Widows among Hindus numbered just under two millions in 1931, but the general ratio of widows has decreased as compared with 1921. In the 1921 census there were 175 widows in every 1,000 females, a figure which had fallen in 1931 to 155. It is, however, Jains and

Hindus who place an effective ban on widow remarriage, and in both these communities the total ratio of widows has fallen; Jain widows in 1931 were 253 per 1,000 females, but in 1931 only 221, and the 1921 figure of 191 widows in every 1,000 Hindu females has fallen to 169 in 1931. On the other hand, there has already been a very remarkable increase in child widows particularly under the age of 5 years, which can be attributed to the rush of marriages anticipatory to the Child Marriage Restraint Act, a rush which it is to be feared will contribute large numbers of young widows to the figures of the 1941 census unless there is before then a very pronounced change of attitude towards widow remarriage in Hindu society generally. In every thousand Hindu women there are still 169 widowed, 22 of whom are under thirty years of age and over a quarter of those under 20. In spite of reformist movements, to popularise widow remarriages, they are still uncommon enough to attract attention in Indian papers whenever they take place.

Proportion of widows in the population per 1,000 of all religions.

SOCIAL AND ECONOMIC CONDITIONS.

Literacy.—The number of persons in India literate in the sense of being able to write a letter and read the reply.

Literacy, in the sense of ability to write a letter and to read the answer to it, has grown enormously in the past fifty years, although it is at present not very high in comparison with countries in the west. Ninety-five out of every 1,000 of the population are now literate, as against 82 ten years ago and less than 40 half a century ago. Burma leads the provinces in the matter of literacy; for in that province literacy, even if not of a very high order, is a habit, traditional in both sexes and all classes, both boys and girls being taught in the monasteries of which almost every Burman village has at least one. Cochin, Travancore and Baroda follow Burma in the order of literacy. Cochin State, in spite of a very rapid growth

in population and in spite of having started with a very high ratio, has been able to do more than keep pace with that growth.

Literacy is much more prevalent in towns than in the country, as both the need for, and the opportunities of, acquiring it are greater. An analysis of the population of the cities shows that 348 out of 1,000 males and 149 out of 1,000 females are literate, while the corresponding figures for literacy in English in towns are 1,473 males and 434 females.

The country taken as a whole, female literacy is comparatively absent in India proper except in Kerala. Cochin State has more than one literate female to every two literate males and Travancore only a little less, while Malabar has nearly one to every three, Coorg a little less than one to every three, Baroda a little fewer and Mysore one to every five. Besides the

difficulty, still felt very strongly in most provinces, of getting good women teachers, one of the most serious obstacles to the spread of female education is the early age of marriage, which causes girls to be taken from school before they have reached even the standard of the primary school leaving certificate.

Treated in communal or religious groups, the greatest progress has been made by Sikhs, Jains, Muslims and Hindus, in that order, but the leading literate communities are the Parsis, Jews, Burmans, Jains and Christians. The following table analyses the position of the Indian communities in respect of literacy —

Religion.	Number per 1,000 who are literate.
All religions (India)	95
Hindus	84
Sikhs	91
Jains	353
Buddhists	90
Zoroastrians (Parsis)	791
Muslims	64
Christians	279
Jews	416
Tribal	7
Others	19

hundred and twelve out of every 10,000 males and 28 out of every 10,000 females are literate in English, and both sexes taken together 123 out of 10,000. Viewed in relation to the various religions and communities, the figures are as follow —

Religion.	Number per 10,000 aged 5 and overs who are literate in English
All religions (India)	123
Hindus	113
Sikhs	151
Jains	306
Buddhists	119
Zoroastrians (Parsis)	5,041
Muslims	92
Christians	919
Jews	2,636
Tribal	4
Others	28

Territorially, Cochin State leads in literacy in English with 307 per 10,000; Coorg follows with 238, Bengal (211) and Travancore (158) coming next.

English Language.—Literacy in English language is still less in India and is confined mostly to the town-dwelling population. Two

Languages.—In the whole Indian Empire 225 languages were returned at the census, dialects, as has been previously explained, not having been separately considered.

The principal languages are given in the following statement —

Language.	Total number of speakers (000's omitted)				Number per 10,000, of total population.	
	1931		1921.		Males.	Females.
	Males.	Females.	Males.	Females.

Malayalam	4,633	4,605	3,736	3,762	257	271
Lahnda (or Western Punjabi)	4,603	3,963	3,050	2,602	255	273

The necessity of a common medium of conversation and intercourse, which has given rise to bi-lingualism and the consequent displacement of tribal languages, has formed the subject of a considerable amount of discussion and suggestion during the last decade and a good deal has been written on the possibility of a *lingua franca* for India. The combined speakers of Eastern and Western Hindi considerably exceed in number the strength of any other individual language in India, and if we add to these two languages Bihari and Rajasthani, which so resemble Hindi as to be frequently returned under that name in the census schedules, we get well over 100 millions of speakers of tongues which have some considerable affinities and cover a very large area of northern and

central India. In their pure forms these four languages may be scientifically distinct; but this is not the popular view. There is a common element in the main languages of northern and central India which renders their speakers, without any great conscious change in their speech, mutually intelligible to one another, and this common basis already forms an approach to a *lingua franca* over a large part of India.

Infirmities.—These are classes under four main heads—insanity, deaf-mutism, blindness and leprosy. The appended statement shows the number of persons suffering from each infirmity at each of the last six censuses and the proportion per hundred thousand of the population:—

Infirmity.	NUMBER AFFLICTED WITH RATIO PER HUNDRED THOUSAND OF THE POPULATION.					
	—	1921.	1911.	1901.	1891.	1881.
Insane	120,304	88,305	81,006	66,205	74,279	81,132
	34	28	26	23	27	35
Deaf-mutes	230,895	189,644	199,891	153,168	196,861	197,215
	66	60	64	52	75	86
Blind	601,370	479,637	443,653	3 ⁺ ,104	458,968	526,748
	172	152	142	121	167	229
Lepers	147,911	102,513	109,094	97,340	124,244	131,968
	42	32	35	33	46	57
TOTAL ..		860,099	833,644	670,817	856,252	937,063
		272	267	229	315	407

There had been a continuous decline in the total number as well as in the proportion of persons recorded as afflicted up to 1901. This fall has been ascribed partly to a progressive improvement in the accuracy of the diagnosis and partly to an actual decrease in the prevalence of the infirmities, owing to the improvement in the material condition of the people to better sanitation and (especially in the case of blindness) to the increasing number of cures effected with the aid of modern medical and surgical science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe famines must have been a considerable factor in the decline shown at that census, but the method of compilation adopted in 1901 and in the previous census was defective, and, certainly in 1901, many of the persons afflicted must have escaped notice in the course of tabulation. Compared with the year 1891, there was a slight decrease in the total number of persons recorded as afflicted in 1911, the proportion per hundred thousand persons falling from 315 to 267. The increase in ratio as well as in numbers since then is attributed to increased accuracy of enumeration.

Occupation.—It is a well known fact that the majority of the people in India live on agriculture. The latest census puts down the number of those engaged in the exploitation of animals and vegetation at 103,300,000, while those engaged in industry number 15,400,000. Thus about 67 per cent of the country's workers are employed in the former and 10 per cent. in the latter. This does not, however, mean that all the 103 millions are land-owners. Rights in land in India are complicated and involved to a degree, incredible to persons familiar only with the simpler tenures of western Europe.

Between the man who cultivates land and the man who nominally owns it there are often a number of intermediate holders of some interest or other in the produce of the land. If a comparison is made between the area of land under crops and the number of agriculturists actually engaged in cultivation in British India, it is that for each agriculturist there are 2.9 acres of cropped land of which 0.65 of an acre is irrigated. The cultivation of special crops occupies under two per cent. of the populations concerned in pasture and agriculture, the greater part of whom are engaged in the production of tea. Forestry employs fewer than special cultivation.

In recent years there has been an increase in the number of people living on the production and transmission of physical force, that is, heat, light, electricity, motive power, etc. Silk spinning and weaving, manufacture of chemical products, and the manufacture of tobacco have proved more popular than before. Transport by road has attracted more men, while the use of water for internal transport has decreased, harbours being used more freely for external transport by sea. About five million persons are engaged in organised industry.

It is noteworthy that less than one million people, who man, the army, the Navy, the air force, the police, the services, etc., manage the administration of this vast country; in other words, 850 odd millions are ruled by one million servants of the state.

There has of late been increasing unemployment, especially among the educated classes. An attempt to include these in the last census has not met with success, but it is significant that graduates of Madras University join the police department on Rs. 10 per mensem and are held fortunate in getting even that.

The Government of India.

The impulse which drove the British to India was not conquest but trade. The Government of India represents the slow evolution from conditions established to meet trading requirements. On September 24, 1599, a few years before the death of Queen Elizabeth and Akbar, the merchants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorporation. The Government of this Company in England was vested in a Governor with a General Court of Proprietors and a Court of Directors. The factories and affairs of the Company on the East and West Coasts of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort St. George), Bombay and Calcutta (Fort William), by a President or Governor and a Council consisting of the senior servants of the Company. The three "Presidencies" were independent of each other and subordinate only to the Directors in England.

Territorial Responsibility Assumed.

The collapse of government in India consequent on the decay of Moghul power and the intrigues of the French on the East Coast forced the officers of the Company to assume territorial responsibility in spite of their own desires and the insistent orders of the Directors. Step by step the Company became first the dominant, then the paramount power in India. In these changed circumstances the system of government by mutually independent and unwieldy councils of the merchants at the Presidency towns gave rise to grave abuses. Parliament intervened, and under the Regulating Act of 1773, a Governor-General and four councillors were appointed to administer the Presidency of Fort William (Bengal), and the supremacy of that Presidency over Madras and Bombay was for the first time established. The subordinate Presidencies were forbidden to wage war or make treaties without the previous consent of the Governor-General of Bengal in Council, except in cases of imminent necessity. Pitt's Act of 1784, which established the Board of Control in England, vested the administration of each of the three Presidencies in a Governor and three councillors, including the Commander-in-Chief of the Presidency Army. The control of the Governor-General-in-Council was somewhat extended, as it was again by the Charter Act of 1793. Under the Charter Act of 1833 the Company was compelled to close its commercial business

and it became a political and administrative body holding its territories in trust for the Crown. The same Act vested the direction of the entire civil and military administration and sole power of legislation in the Governor-General-in-Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments. After the Mutiny, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown. This Act made no important change in the administration in India, but the Governor-General, as representing the Crown, became known as the Viceroy. The Governor-General is the sole representative of the Crown in India; he is assisted by a Council, composed of high officials, each of whom is responsible for a special department of the administration.

Functions of Government.

The functions of the Government in India are perhaps the most extensive of any great administration in the world. It claims a share in the produce of the land and in the Punjab and Bombay it has restricted the alienation of land from agriculturists to non-agriculturists. It undertakes the management of landed estates where the proprietor is disqualified. In times of famine it undertakes relief work and other remedial measures on a great scale. It manages a vast forest property and is the principal manufacturer of salt and opium. It owns the bulk of the railways of the country, and directly manages a considerable portion of them; it has constructed and maintains most of the important irrigation works; it owns and manages the post and telegraph systems; it has the monopoly of the Note issue, and it alone can set the mints in motion. It lends money to municipalities, rural boards, and agriculturists and occasionally to owners of historic estates. It controls the sale of liquor and intoxicating drugs and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate character. The Government has also close relations with the Indian States which collectively cover more than one-third of the whole area of India and comprise more than one-fifth of its population. The distribution of these great functions between the Government of India and the provincial administrations has fluctuated and was definitely regulated by the Reform Act of 1919.

THE REFORMS OF 1919.

Great changes were made in the system of government in British India by the Government of India Act, 1919, which, together with the rules framed under it—almost as important in their provisions as the Act itself—came into general operation in January 1921. The Act was the outcome of an inquiry conducted in India in the winter of 1917-18 by the Secretary of State (Mr. Montagu) and the Viceroy

(Lord Chelmsford), the results of which were embodied in their Report on Indian Constitutional Reform issued in the spring of 1918. The recommendations in this report were supplemented by those of two Committees which toured in India in the winter of 1918-19, and which issued their Reports in the spring of 1919. A third Committee was appointed during the latter year to make recommendations for the

modification of the system of administration of Indian affairs in the United Kingdom, and issued their Report while the Government of India Bill was under examination by a Joint Select Committee of both Houses of Parliament. The Joint Select Committee in their turn issued an exhaustive Report on the Bill, which was passed in a form practically identical with that recommended by the Joint Committee, and received the Royal Assent on the 23rd December 1919.

The Divisions.—British India for administrative purposes is divided into 15 provinces, each with its separate Local Government or administration. In ten of the provinces—the three Presidencies of Madras, Bombay and Bengal, the United Provinces of Agra and Oudh, the Punjab, Bihar and Orissa, the Central Provinces, Burma, Assam and the North West Frontier Province—the Local Government consists of a Governor, an Executive Council of not more than four members, and two or more Ministers. Burma, which was excluded from the original scheme, was brought into line with it in 1922. An Act of Parliament was passed, constituting Burma a Governor's Province, with a Governor, an Executive Council and Ministers and a Legislative Council elected on a very democratic franchise, which gave the vote to women. The remaining provinces were then, inclusive of the N. W. Frontier Province, directly administered by Chief Commissioners, who are technically mere agents of the Central Government of India. No change was made by the Act of 1919 in the system of administration in these six minor provinces but the Frontier Province was, after the Burma precedent, made a Major Province in 1932.

Dyarchy.—In ten nine provinces the executive Government is a dual organism which owes its unity to the Governor. One half of the organism consists of the Governor and his executive Council, all of whom are appointed by the King. This body is responsible for the administration of those subjects which are "reserved." The other half of the executive organism is the Governor acting with the advice of Ministers who are appointed by him, hold office during his pleasure, and must be elected members of the Provincial Legislative Council. To the Governor acting with Ministers is entrusted the administration of "transferred" subjects.

The Object.—The framers of the Act of 1919 had a twofold object in view. Their primary object was to devise a plan which would render possible the introduction by successive stages of a system of responsible government in British India in modification of the previous system under which the Governments in India both central and provincial, received their mandates from the British Parliament acting through the Secretary of State for India, the Cabinet Minister responsible to Parliament for the administration of Indian affairs.

The Provinces.—Starting from the premise that it was in the provinces that the first substantial steps must be taken towards the development of a system of responsible government the framers of the Act of 1919 provided

for a statutory demarcation of the functions to be exercised by the Government of India and the Provincial Governments respectively, in their administrative capacity. No attempt was made in this connection to limit the field open to the Indian Legislature, which still retains a concurrent (though not an overriding) power of legislation for the affairs of the provinces in general and of individual provinces; but the rules under the Act provide specifically for the exercise of this right in certain specified provincial matters, and the theory upon which the Act proceeds assumes that a convention will be established and rigorously observed which will confine intervention by the Indian Legislature in provincial affairs to matters so specified.

Finance.—The "revenues of India"—or, rather, their sources—are definitely divided between the Central and Provincial Governments; the Provincial Governments have now almost complete control over the administration of their "allocated" revenues, they have power to supplement them by raising loans on the security of these revenues, and their right, subject in certain cases to the Governor-General's sanction, to initiate new taxation measures is formally recognised.

It was found impossible to devise any scheme of allocation of revenues between the Central and Provincial Governments which did not leave the former with a deficit. This deficit is to be met in part by an annual contribution from seven of the eight Governors' provinces, the province of Bihar and Orissa, owing to the comparative exiguousness and inelasticity of its own revenues, having been exempted from this contribution. The aggregate sum thus due from the provinces to the Government of India at the outset was Rs. 983 lakhs, of which Madras contributed Rs. 348 lakhs, the United Provinces Rs. 240 lakhs, the Punjab Rs. 175 lakhs, and the other four provinces sums ranging from Rs. 15 lakhs to Rs. 64 lakhs. The annual contribution was in no case to be subject to increase in the future, and if reduction of the aggregate were found possible by the Government of India, reductions were to be made in fixed proportions from the quota of the several provinces. The Provincial contributions were gradually foregone and finally extinguished by the Government of India in the years of its successive annual prosperity Budgets before the commencement of the world wide economic depression in 1929.

Responsibility.—The first steps towards responsibility were to transform the Provincial Legislative Council into a body of sufficient size and with a sufficiently large elected majority (which the Act fixes at 70 per cent. as a minimum) to represent adequately public opinion in the province, and to create an electorate. The first franchise rules gave the vote to about 5,000,000 of the adult male population, and have enabled the Legislative Council of any "Governor's province" to extend to the franchise women.

The following table shows the strength and composition of each of the Provincial Councils:—

Province.	Elected.	Nominated and <i>ex-officio</i> .		Total.
		Officials.	Non-officials.	
Madras	25	23	6	127
Bombay	86	20	5	111
Bengal	113	20	6	139
United Provinces	100	18	5	123
Punjab	71	16	6	98
Bihar and Orissa	76	18	9	103
Central Provinces	53	10	5	68
Assam	39	9	5	53
Burma	78	13	8	101
North-West Frontier Province	28	7	5	40

The figures for officials in this table are maxima in every case, and where less than the maximum number of officials is nominated to any Council, the number of nominated non-officials must be increased in proportion; e.g., if there are only 16 officials (nominated and *ex-officio*) on the United Provinces Council, there must be seven nominated non-officials. The official members who have seats *ex-officio* are the members of the Executive Council, who are at present four in number, the statutory maximum in Madras, Bombay, and Bengal, three in Bihar and Orissa, and two in each of the remaining provinces. These Executive Councils contain an equal

number of Indian and British members except in Bihar and Orissa where two of the three members are British officials.

Electorates.—The electorates in each province are arranged for the most part on a basis which is designed to give separate representation to the various races, communities, and special interests into which the diverse elements of the Indian population naturally range themselves. Although there are minor variations from province to province, a table showing their character in one province (Bengal) will give a sufficiently clear idea of the general position.

Class of Electorate.	No. of Electorates of this Class.	No. of Members returnable by Electorates of this Class.
Non-Muhammadian	42	46
Muhammadian	34	39
European	3	5
Anglo-Indian (in the technical sense of persons of mixed European and Asiatic descent).	1	2
Landholders	5	5
University	1	1
Commerce and Industry	8	15
Total	94	113

Of the 94 constituencies in Bengal, all but nine (those representing the University and Commerce and Industry) are arranged on a territorial basis, i.e., each constituency consists of a group of electors, having the prescribed qualifications which entitle them to a vote in a constituency of that class, who inhabit a particular area. The normal area for a "Muhammadian" or "non-Muhammadian" constituency is a district (or where districts are large and populous, half a district) in the case of rural constituencies, and, in the case of urban constituencies, a group of adjacent municipal towns. Some large towns form urban constituencies by themselves, and the City of Calcutta provides eight separate constituencies, six "non-Muhammadian" and two "Muhammadian", the latter, of course, being coterminous with the former.

Throughout the electoral rules there runs a general classification of the various kinds of constituencies into two broad categories, those

which are designed to represent special interests such as Landholders, Universities, Planters or Commerce being described as "special" constituencies, and those which are based on a racial distinction—Muhammadian, European, Sikh, etc.—being known as "general" constituencies.

Voters' Qualifications.—The qualifications for electors (and consequently for candidates) vary in detail from province to province, chiefly on account of variations in the laws and regulations which form the basis of assessment of income or property values. Generally speaking, both in rural and urban areas the franchise is based on a property qualification as measured by the payment of a prescribed minimum of land revenue or of its equivalent, or of income tax, or of municipal taxes, but in all provinces retired, pensioned or discharged officers and men of the regular army are entitled to the vote, irrespective of the amount of their income or property.

POWERS OF PROVINCIAL LEGISLATIVE COUNCILS.

In origin the legislative authority in British India was a meeting of the Governor-General (or, in the case of the Presidencies of Madras and Bombay, of the Governor) with his Executive Council, "for the purpose of legislation." When met for this purpose there were added to the Executive Council certain "additional members," at first very few in number, and those few all nominated by the Governor-General or the Governor, as the case might be. A Council so constituted had originally no powers or duties beyond those immediately arising out of the discussion of the particular legislative measure which at the time was engaging its attention, and its functions were confined strictly to the discussion and enactment of legislative measures. In course of time the number of "additional" members, and the proportion of these who were non-official Indians, were steadily increased, the principle of election was gradually substituted for nomination as the means of selecting non-official members, and the functions of the Councils were extended so as to include the right of interpellation, of the discussion of matters of general public interest, and of criticising and discussing the budget proposals of the Executive Government. This extension of the powers of the Councils was in the main the result of the "Morley-Minto Act" of 1909. The Indian Councils Act of 1892 had given power to discuss the budget but not to divide the Council upon it. Lord Morley's Act went further and provided that notwithstanding the terms of the Indian Councils Act of 1861 which had restricted the powers of all Councils to the discussion of legislative measures, the Local Government might make rules authorising the discussion of the annual financial statement, of any matter of general public interest, and the asking of questions under such conditions and restrictions as might be imposed by the rules, and these rules recognised the right of the Councils to vote on motions thus submitted for their discussion. The other results of the Act of 1909 were definitely to recognise the principle of election as the means of selecting non-official members of all Councils (although the method adopted was mainly that of indirect election), a considerable increase in the number of both non-official and official members, and the setting up in every province of a non-official (though not, save in one province, an elected) majority. A further important, though indirect, result of the Morley-Minto Act was the appointment of an Indian member to the Executive Council of the Governor-General and to such Provincial Executive Councils as were then in existence and subsequently created.

Old System.—But although the Legislative Councils (which, originally created in two provinces only in addition to the Governor-General's Legislative Council, existed in 1919 in nine provinces) had steadily acquired a more and more representative character and a large share of the normal functions of a legislative assembly generally understood, they still remained in hearty up to the passing of the Act of 1919 mere accessories to the Executive Government of the provinces for the purpose of advising on, and

enacting, legislation. It is true that the non-official element in the Provincial Councils as constituted by Lord Morley's Act of 1909 had acquired a considerable measure of control over legislation, in view of the fact that in most provinces that Act and the rules framed under it placed the non-official members in a slight majority over their official colleagues; but for various reasons this control even in the sphere of legislation, can hardly be described as definite popular control, and over matters outside the legislative sphere the Councils had no controlling voice at all.

The Changes.—The most important changes made by the Act of 1919 in the powers of the Provincial Councils were—

(i) the power to vote (and consequently to withhold) supplies;

(ii) a greatly enhanced freedom of initiation in the matter of legislation; and

(iii) power to frame their own rules of procedure in matters of detail, subject to the Governor's concurrence.

A further right which the Councils will acquire after four years from the time of their commencement is the right to elect their own President. At the outset the President is nominated by the Governor, but from the start every Council has an elected Deputy President. The Governor (who formerly was *ex-officio* President of his Legislative Council) no longer has any direct connection with its proceedings. The first-named of these newly acquired powers is of sufficient importance to require a detailed explanation of its scope, which can best be given in the terms of the Act itself (section 72b).

72b.—(1) The provisions contained in this section shall have effect with respect to business and procedure in governors' legislative councils.

(2) The estimated annual expenditure and revenue of the province shall be laid in the form of a statement before the council in each year and the proposals of the local government for the appropriation of provincial revenues and other moneys in any year shall be submitted to the vote of the council in the form of demands for grants. The council may assent, or refuse its assent, to a demand, or may reduce the amount therein referred to either by a reduction of the whole grant or by the omission or reduction of any of the items of expenditure of which the grant is composed :—

Provided that—

(a) the local government shall have power, in relation to any such demand, to act as if it had been assented to, notwithstanding the withholding of such assent or the reduction of the amount therein referred to, if the demand relates to a reserved subject, and the governor certifies that the expenditure provided for by the demand is essential to the discharge of his responsibility for the subject; and

(b) the governor shall have power in cases of emergency to authorise such expenditure as may be in his opinion necessary for the safety or tranquillity of the province, or for the carrying on of any department; and

(c) no proposal for the appropriation of any such revenues or other moneys for any purpose shall be made except on the recommendation of the governor communicated to the council.

(3) Nothing in the foregoing sub-section shall require proposals to be submitted to the council relating to the following heads of expenditure :—

(i) Contributions payable by the local government to the Governor-General in Council; and

(ii) Interest and sinking fund charges on loans; and

(iii) Expenditure of which the amount is prescribed by or under any law; and

(iv) Salaries and pensions of persons appointed by or with the approval of His Majesty or by the Secretary of State in Council; and

(v) Salaries of judges of the high court of the province and of the advocate-general.

If any question arises whether any proposed appropriation of moneys does or does not relate to the above heads of expenditure, the decision of the governor shall be final.

Executive and Legislature.—In the light of these facts it is now possible to explain more exactly the relationship between the provincial executive and the provincial legislature. The dual character of the former has already been mentioned, and the corresponding bifurcation of provincial subjects into "reserved" and "transferred" categories. The rules under the act prescribe a list of 20 subjects which are transferred to the administration of the Governor acting with Ministers, the more important of which are Local Self-Government, Medical Administration, Public Health, Education (with certain reservations), Public Works, Agriculture, Excise, and Development of Industries. The "reserved" subjects comprise all those in the list of "provincial" (as distinct from "central") subjects which are not transferred.

Machinery.—No change was made by the Act of 1919 in the machinery and methods of administration by the Governor in Council, decisions are taken at the Council Board, as before, by a majority vote, and the Governor is entitled, as before, to overrule such a vote in certain specified circumstances if he disagrees with it. For such decisions the Governor in Council remains, as before, responsible to the Secretary of State and Parliament, and on questions of legislation and supply he has the power of enforcing them despite opposition by a majority of the Legislative Council. But, the whole spirit of the Act and the existence of a large non-official elected majority in every Provincial Legislative Council is an important factor in determining the policy to be pursued by the official half of the Government in its administration of reserved subjects. A further and not less important factor is the existence in the Government, side by side with the Executive Council, of two or more Ministers appointed from the elected members of the legislature, who, though they are not charged by law with, and in fact are legally absolved from, any responsibility for decisions on matters outside the transferred sphere, will necessarily be able, and in fact are expected, to make their opinions felt by their colleagues in the Executive Council. But these factors, while they will doubtless lead to

constant endeavour on the part of the official half of the Government to accommodate its policy to the wishes of its ministerial colleagues and of the majority of the legislature, and to avoid situations which involve resort to the enforcement of its decisions in the face of popular opposition, are not intended to obscure the responsibility to Parliament in the last resort of the Governor in Council for the administration of reserved subjects and the right of His Majesty's Government, and of the Secretary of State as a member thereof, to lay down and require the observance of any principles which they regard as having the support of Parliament and in the last resort of the British electorate.

Transfer of Control.—With regard to transferred subjects the position is very different. Here there has been an actual transfer of control from the British elector and the British Parliament to the elector and the Legislative Council in the Indian province. The provincial subjects of administration are grouped into portfolios, and just as each member of the Executive Council has charge of a portfolio consisting of a specified list of "reserved" subjects or "departments," so each Minister is directly responsible for the administration of those particular transferred "departments" which are included in his portfolio. But his responsibility lies, not, as in the case of a member of the Executive Council, to the Government of India, the Secretary of State and Parliament, but to the Provincial Legislative Council of which he is an elected member and from which he is selected by the Governor as commanding or likely to command the support of the majority of that body. He holds office during the Governor's pleasure, but his retention of office is contingent on his ability to retain the confidence not only of the Governor, but also of the Legislative Council, upon whose vote he is directly dependent for his salary. Further, the control of the Legislative Council over transferred subjects, both as regards supplies and legislation, is almost entirely free from the restrictions just noticed which necessarily qualify its control over the "reserved" subjects. It is thus within the power of the Provincial Council to insist on the pursuit of a policy of its own choice in the administration of transferred subjects by withdrawing its confidence from a Minister who departs from that policy and bestowing it only on a successor who will follow its mandate and this power is dependent on the provincial elector in virtue of his freedom to control the composition of the Legislative Council by the use which he makes of his vote. No doubt this statement requires some qualification before it can be accepted as literally accurate, for, technically, the authority charged with the administration of transferred subjects is "the Governor acting with Ministers appointed under this Act," not the Ministers acting on their own initiative, and, further, the Governor, who is not, of course, subject to removal from office by the Legislative Council, is charged personally with responsibility for the peace and tranquillity of his province, and would be entitled, and indeed bound, to recommend the removal of a department from the transferred list if he found the legislature bent on pursuing a policy in its administration which, in his judgment, was incompatible

with the maintenance of peace and tranquillity; yet the powers of control vested in the Legislative Council over the transferred sphere are undoubtedly great, and it was the opinion at all events of the Joint Select Committee that legislature and Ministers should be allowed to exercise them with the greatest possible freedom. "If after hearing all the arguments," observed the Committee, "Ministers should decide not to adopt his advice, then in the opinion of the Committee the Governor should ordinarily allow Ministers to have their way, fixing the responsibility upon them, even if it may subsequently be necessary for him to vote any particular piece of legislation. It is not possible but that in India, as in all other countries, mistakes will be made by Ministers acting with the approval of a majority of the Legislative Council, but there is no way of learning except through experience and the realisation of responsibility."

Provision of Funds.—The terms of the Act leave the apportionment of the provincial revenues between the two halves of the executive for the financing of reserved and transferred subjects respectively to be settled by rules, merely providing that rules may be made "for the allocation of revenues or moneys for the purpose of such administration," i.e., the "administration of transferred subjects by the Governor acting with Ministers." Probably the best description available of the method adopted by the rules for the settlement of this matter is the recommendation of the Joint Select Committee whose proposals have been followed with one modification only to enable the Governor to revoke at any time, at the desire of his Council and Ministers an "order of allocation" or to modify it in accordance with their joint wishes. The passage is as follows:—

"The Committee have given much attention to the difficult question of the principle on which the provincial revenues and balances should be distributed between the two sides of the provincial governments. They are confident that the problem can readily be solved by the simple process of common sense and reasonable give-and-take, but they are aware that this question might, in certain circumstances, become the cause of much friction in the provincial government, and they

are of opinion that the rules governing the allocation of these revenues and balances should be framed so as to make the existence of such friction impossible. They advise that, if the Governor, in the course of preparing either his first or any subsequent budget, find that there is likely to be a serious or protracted difference of opinion between the Executive Council and his Ministers on this subject he should be empowered at once to make an allocation of revenue and balances between the reserved and transferred subjects which should continue for at least the whole life of the existing Legislative Council. The Committee do not endorse the suggestion that certain sources of revenue should be allocated to reserved and certain sources to transferred subjects, but they recommend that the Governor should allocate a definite proportion of the revenue, say, by way of illustration, two-thirds to reserved and one-third to transferred subjects, and similarly a proportion, though not necessarily the same fraction of the balances. If the Governor desires assistance in making the allocation, he should be allowed at his discretion to refer the question to be decided to such authority as the Governor-General shall appoint. Further, the Committee are of opinion that it should be laid down from the first that, until an agreement which both sides of the Government will equally support has been reached, or until an allocation has been made by the Governor, the total provisions of the different expenditure heads in the budget of the province for the preceding financial year shall hold good.

"The Committee desire that the relation of the two sides of the Government in this matter as in all others, should be of such mutual sympathy that each will be able to assist and influence for the common good the work of the other, but not to exercise control over it. The budget should not be capable of being used as a means for enabling Ministers or a majority of the Legislative Council to direct the policy of reserved subjects; but on the other hand the Executive Council should be helpful to Ministers in their desire to develop the departments entrusted to their care. On the Governor personally will devolve the task of holding the balance between the legitimate needs of both sets of his advisers."

THE CENTRAL GOVERNMENT.

The structural changes made by the Act of 1919 in the system of government outside the "Governors' provinces" are of comparatively minor scope, though the spirit of the Act requires, as has already been shown, considerable modification of the relationship hitherto subsisting between the Provincial Governments on the one hand and the Government of India and the Secretary of State in Council on the other. The only concrete changes made in the constitution of the Central Government are the removal of the statutory bars to the appointment of more than six members of the Governor-General's Executive Council (which, however, has had the far-reaching consequence that three of the eight members of the Council are now Indians), and the reconstitution in a much more enlarged representative and independent form of the central legisla-

ture. It has already been observed that this body was, in origin, like all other legislative bodies in India, the Governor-General's Executive Council with the addition of certain "additional members" appointed to assist the Executive Council in the formulation of legislation. Despite its steady growth in size and influence, and despite the introduction of the elective system, the existence of "additional members," who of course under Lord Morley's Act greatly preponderated in numbers over the members proper, i.e., the Executive Councillors, still persisted up to the passing of the Act of 1919. That Act however, has entirely remodelled the "Indian Legislature," and it is now called, which has become, like the Legislative Council in a Governor's province a legislature with all the inherent powers ordinarily attributed to such a body save such

as are specifically withheld by the terms of the Act. It consists of two Chambers. The "Council of State" contains 60 members, of whom 34 are elected (including one member to represent Berar, who, though technically nominated, is nominated as the result of elections held in Berar) and 26 nominated, of whom not more than 20 may be officials. The "Legislative Assembly" consists of 144 members, of whom 105 are elected (including in the case of the Council of State, one Berar member who, though actually elected, as technically a nominee). Of the 40 nominated members, not fewer than one third are required to be non-officials. The members of the Governor-General's Executive Council are not *ex-officio* members of either Chamber, but each of them has to be appointed a member of one or other Chamber, and can vote only in the Chamber of which he is a member. Any member of the Executive Council may, however, speak in either Chamber. The President of the Upper Chamber is a nominee of the Governor-General, as also, for the first four years after the constitution of the Chamber, was the President of the Legislative Assembly. But after that period the Lower Chamber elected its own President, and it elected its own Deputy-President from the outset. The normal lifetime of each Council of State is five years, and of each Legislative Assembly three years; but either Chamber, or both simultaneously, may be dissolved at any time by the Governor-General.

Election.—The method of election for both Chambers is direct, and although the number of electors is considerably smaller than for the Provincial Councils, it is a great advance on the very restricted and for the most part indirect franchise established under the Act of 1909 for the unicameral central legislature which no longer exists. Generally speaking, the electoral scheme for the Lower Chamber is on the same model as that for the Provincial Councils already described except that, *firstly*, the property qualification for voters (and consequently for candidates) is higher in order to obtain manageable constituencies, and past service with the colours is not *per se* a qualification for the franchise, and *secondly*, that the constituencies necessarily cover a considerably larger area than constituencies for the Provincial Council. The distribution of seats in both Chambers, and the arrangement of constituencies, are on a provincial basis; that is a fixed number of the elective seats in each Chamber is assigned to representatives of each province, and these representatives are elected by constituencies covering an assigned area of the province.

The following table shows the allotment of the elective seats:—

	Legislative Assembly.	Council of State.
Madras	16	5
Bombay	16	6
Bengal	17	6
United Provinces ..	16	5
Punjab	12	4
Bihar and Orissa ..	12	3
Central Provinces ..	6	2
Assam	4	1
North-West Frontier Province

Burma	4	2
Delhi	105	34

Since the area which returns perhaps 80 members to a Provincial Council is the same as the area which returns perhaps 12 members to the Legislative Assembly—namely, the entire province in each case—it follows that on the direct election system this area must be split into constituencies which are much larger than the constituencies for the local Councils, and just as it is generally correct to say that the normal area unit for those rural constituencies for the latter which are arranged on a territorial basis is the district, it may be said that the normal area unit in the case of the Legislative Assembly is the Division (the technical term for the administrative group of districts controlled by a Divisional Commissioner).

The Franchise.—The general result of the first franchise arrangements under the Act is thus that there is in each province a body of electors qualified to vote for, and stand for election to, the Provincial Council, and that a selected number of these voters are qualified to vote for and stand for election to those seats in the Legislative Assembly which are assigned to the province. The qualifications for candidature for the Legislative Assembly are the same in each province, *mutatis mutandis*, as for candidature for the Provincial Council, except that in all provinces, so long as the candidate can show that he resides somewhere within the province, no closer connection with his particular constituency is insisted upon.

The franchise for the Council of State differs in character from that for the Provincial Council and the Legislative Assembly. The concern of the framers of the Act and rules was to secure for the membership of this body a character as closely as possible approximating to a "Senate of Elder Statesmen," and thus to constitute a body capable of performing the function of a true revising Chamber. With this object, in addition and as an alternative to a high property qualification—adopted as a rough and ready method of enfranchising only persons with a stake in the country—the rules admit as qualifications certain personal attributes which are likely to connote the possession of some past administrative experience or a high standard of intellectual attainment. Examples of these qualifications are past membership of either Chamber of the Legislature as now constituted, or of its predecessor, or of the Provincial Council, the holding of high office in local bodies (district boards, municipalities and corporations), membership of the governing bodies of Universities, and the holding of titles conferred in recognition of Indian classical learning and literature.

Powers.—The powers and duties of the Indian legislature differ but little in character within the "central" sphere from those of the provincial Councils within their provincial sphere, and it has acquired the same right of voting supplies for the Central Government. But as no direct attempt has yet been made to introduce responsible government at the centre, the step in that direction having been avowedly confined to the provinces and as consequently the Executive Government of India remains legally responsible as a whole for the proper fulfil-

ment of its charge to the Secretary of State and Parliament, it follows that the powers conferred on provincial Governors to disregard an adverse vote of the Legislative Council on legislation or supplies are, as conferred on the Governor-

THE INDIA OFFICE.

The Act of 1919 makes no structural changes in the role of the India Office in the administration of Indian affairs. Slight alterations have been effected in the number and tenure of office of the members of the Secretary of State's Council, and some relaxations have been made in the statutory rigidity which formerly bound their procedure and that of the Office in general. But provisions now exist which have undoubtedly as time went on had a material effect on the activities of the Office as it is now constituted. A High Commissioner for India was appointed for the purpose of taking over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative supervision and control. The process of separation of staff and functions for the purpose of this transfer was necessarily be somewhat slow, but a substantial beginning was made by handing over to the direct control of the High Commissioner the large departments which are concerned with the ordering and supply of stores and stationery in England for Government use in India, with the payment of pensions to retired members of Indian services resident in

General in his relationship with the Indian Legislature, less restricted in their operation than in the provinces; that is to say, they cover the whole field and are not confined in their application to categories of subjects.

the United Kingdom, and with the assistance of Indian students in England. Concurrently with this change, it became possible to defray from British revenues the salaries of the Secretary of State and of the Parliamentary Under-Secretary, and that portion of the cost of salaries of India Office staff and general maintenance which is attributable to the exercise of its administrative as distinct from purely agency functions.

In due course the apportionment to British estimates will be the cost of the India Office as it exists after the transfer of functions to the High Commissioner has been completely effected; then the salaries of the High Commissioner and his staff will be the only expenses in the United Kingdom chargeable to Indian revenues. Until that time arrives, however, an estimate was the only basis for settlement. For five years from 1920-21, the cost of the India Office payable from British revenues has been fixed at 136,500*l.*, which includes the salaries of the Secretary of State and of the Parliamentary Under-Secretary, and a contribution of 40,000*l.*, which has for some years been made by the Treasury towards Indian expenditure, as the result of the recommendations of the Welby Commission. This system still continues

PERSONNEL AND PROCEDURE.

The Governor-General and the "Executive" members of his Council are appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it at five years. There are seven Executive Members of Council. These Members hold respectively the portfolios of Education, Health and Land; Home; Finance; Commerce & Railways, Industries and Labour; Law. The Viceroy acts as his own member in charge of Foreign affairs. Railways are administered by a Chief Commissioner with the assistance of a Railway Board; and are for administrative purposes grouped under the aegis of the Railways Department. The Commander-in-Chief may also be and in practice always is, an "Ordinary" member of the Council. He holds charge of the Army Department. The Governors of Madras, Bombay and Bengal become "extraordinary" members if the Council meets within their Presidencies. The Council may assemble at any place in India which the Governor-General appoints. In practice it meets only in Delhi and Simla except for a meeting or two in Calcutta after Christmas, when the Viceroy is usually in residence in the Bengal Capital.

In regard to his own Department each Member of Council is largely in the position of a Minister of State, and has the final voice in ordinary departmental matters. But any question of special importance, and any matter in which it is proposed to over-rule the views of a Local Government, must ordinarily be referred to the Viceroy. Any matter originating in one department which also affects another must be referred to the latter, and in the event of the Departments not being able to agree, the case is re-

ferred to the Viceroy. The Members of Council meet periodically as a Cabinet—ordinarily once or twice a week—to discuss questions which the Viceroy desires to put before them, or which a member who has been over-ruled by the Viceroy has asked to be referred to Council. If there is a difference of opinion in the Council the decision of the majority ordinarily prevails, but the Viceroy can over-rule a majority if he considers that the matter is of such grave importance as to justify such a step. Each departmental office is in the subordinate charge of a Secretary, whose position corresponds very much to that of a permanent Under-Secretary of State in the United Kingdom; but with these differences—that the Secretary is present though does not speak, at Council meetings at which cases under his cognisance are discussed; that he attends on the Viceroy, usually once a week, and discusses with him all matters of importance arising in his Department; that he has the right of bringing to the Viceroy's special notice any case in which he considers that the Viceroy's concurrence should be obtained to action proposed by the Departmental Member of Council; and that his tenure of office is usually limited to three years. The Secretaries have under them Deputy, Under and Assistant Secretaries, together with the ordinary clerical establishments. The Secretaries and Under-Secretaries are often, though by no means exclusively, members of the Indian Civil Service. The Government of India has no Civil Service of its own as distinct from that of the Provincial Governments, and officers serving under the Government of India are borrowed from the Provinces, or in the case of Specialist recruited direct by contract.

THE DIVISION OF FUNCTIONS.

The keynote of the 1919 scheme is effective provincial autonomy and the establishment of an immediate measure of responsibility in the provinces all of which are raised to the status of Governors in Council. This demanded a sharp division between Imperial and Provincial functions. The following subjects are reserved to the Government of India, with the corollary that all others vest in the Provincial Governments:—

1. (a) Defence of India, and all matters connected with His Majesty's Naval, Military, and Air Forces in India, or with His Majesty's Indian Marine Service or with any other force raised in India, other than military and armed police wholly maintained by local Governments.

(b) Naval and military works cantonments.

2. External relations, including naturalisation and aliens, and pilgrimages beyond India.

3. Relations with States in India.

4. Political charges.

5. Communications to the extent described under the following heads, namely:—

(a) railway and extra-municipal tramways in so far as they are not classified as provincial subjects under entry 6 (d) of Part II of this Schedule;

(b) aircraft and all matters connected therewith and

(c) inland waterways, to an extent to be declared by rule made by the Governor-General in Council or by or under legislation by the Indian legislature.

6. Shipping and navigation, including shipping and navigation on inland waterways in so far as declared to be a central subject in accordance with entry 5 (c).

7. Light-houses (including their approaches) beacons, lightships and buoys.

8. Port quarantine and marine hospitals.

9. Ports declared to be major ports by rule made by the Governor-General in Council or by or under legislation by the Indian legislature.

10. Posts, telegraph and telephones, including wireless installations.

11. Customs, cotton excise duties, income-tax, salt, and other sources of all-India revenues.

12. Currency and coinage.

13. Public debt of India.

14. Savings Banks.

15. The Indian Audit Department and excluded Audit Departments, as defined in rules framed under section 96-D (1) of the Act.

16. Civil law, including laws regarding status, property, civil rights and liabilities, and civil procedure.

17. Commerce, including banking and insurance.

18. Trading companies and other associations.

19. Control of production, supply and distribution of any articles in respect of which control by a central authority is declared by rule made by the Governor-General in Council or by or under legislation by the Indian legislature to be essential in the public interest

20. Development of industries, in cases where such development by a central authority is declared by order of the Governor-General in Council, made after consultation with the local Government or local Governments concerned expedient in the public interest.

21. Control of cultivation and manufacture of opium, and sale of opium for export.

22. Stores and stationery, both imported and indigenous, required for Imperial Departments.

23. Control of petroleum and explosives.

24. Geological survey.

25. Control of mineral development, in so far as such control is reserved to the Governor-General in Council under rules made or sanctioned by the Secretary of State, and regulation of mines.

26. Botanical Survey.

27. Inventions and designs.

28. Copyright.

29. Emigration from, and immigration into British India, and inter-provincial migration.

30. Criminal law, including criminal procedure.

31. Central police organisation.

32. Control of arms and ammunition.

33. Central agencies and institutions for research (including observatories), and for professional or technical training or promotion of special studies.

34. Ecclesiastical administration including European cemeteries.

35. Survey of India.

36. Archaeology.

37. Zoological Survey.

38. Meteorology.

39. Census and statistics.

40. All-India services.

41. Legislation in regard to any provincial subject in so far as such subject is in Part II of this Schedule stated to be subject to legislation by the Indian legislature, and any powers relating to such subject reserved by legislation to the Governor-General in Council.

42. Territorial changes, other than inter-provincial, and declaration of law in connection therewith.

43. Regulation of ceremonial, titles, orders, precedence, and civil uniform.

44. Immovable property acquired by, and maintained at the cost of, the Governor-General in Council.

45. The Public Service Commission.

GOVERNMENT OF INDIA.

VICEROY AND GOVERNOR-GENERAL OF INDIA.

His Excellency, The Most Hon'ble The Marquess of Linlithgow, P.C., K.T., G.M.S.I. G.M.I.E.
O.B.E., D.L., T.D., 18th April 1936.

PERSONAL STAFF OF THE GOVERNOR-GENERAL.

Private Secretary J. G. Lathwaite, Esq.,
C.I.E.

Asst. Private Secretary.—C. B. Duke, I.C.S.

Military Secretary Lt. Col. H. H. Stable,
C.I. Horse.

Personal Assistant—W. H. P. de la Hay,
M.B.E.

Surgeon—Major H. H. Elliott, I.M.S.

Assistant to Surgeon—J. A. Rogers, M.B.E.
M.R.C.S., I.M.D.

Comptroller of the House hold—Major W. E.
Maxwell, C.I.E., (The Baluch Regiment)

Aides-de-Camp—Squadron-Leader J. C. E. A.
Johnson, R.A.F., Captain W. H. Goschen,
Grenadier Guards, Lieutenant A. H. P. Noble,
R.N., Captain D. Ross, 15th Lancers, Captain
A. G. Stocker, 13/18th Hussars, Captain P.
M. Borwick, Royal Scots Greys.

Indian Aides-de-Camp.—Risaldar-Major (Hony
Captain), Muhammad Zaman Probyn's Horse,
Risaldar-Major Muzaffar Khan, Governor-
General's Body Guard

Honorary Aides-de-Camp—Lt. Colonel
(Hony Colonel) A. M. Robertson, M.C., V.D.,
Commanding, 1st Bn Bengal Nagpur Railway
Regiment, A.F.I., Lt. Colonel (Hony Colonel)
A. B. Beddow, V.D., Commandant, Surma Valley
Light House, Lt. Colonel (Hony. Colonel)
T. Lamb, V.D., The Bengal Artillery, A.F.I.,
Lt. Colonel (Hony Colonel) W. H. Shoober, The
Nagpur Regiment, A.F.I., Lt. Colonel
(Hony Colonel) E. K. Glazebrook, The Rangoon
Battalion, A.F.I., Lt. Colonel (Hony Colonel)
A. Duncan, V.D., The Bengal Nagpur Railway
Battalion, A.F.I., Lt. Colonel (Hony Colonel)
R. S. Weir, V.D. Commanding, The Allahabad
Contingent, Captain A. G. Maundrell, C.I.E.,
R.I.N., Lt. Colonel (Hony Colonel) M. G. Platt,
O.B.E., M.C., A.I.R.O., Lt. Colonel (Hony Colonel)
G. D. Moore, V.D., Commandant, The Bombay,
Baroda and Central India Railway, A.F.I.,

Lt. Colonel (Hony. Colonel) D. M. Reid, M.C.
The Madras Contingent, A.F.I.

Honorary Indian Aides-de-Camp—Colonel
Shambhaji Rao Bhonsle, O.B.E., Adjutant-
General, Gwalior Army, Brigadier Rahmatulla
Khan, Thakur, General Staff Officer, Jammu and
Kashmir State Forces, Lt. Colonel Mirza Kader
Beg, Sardar Bahadur, Commandant, 1st Hydera-
bad I. S. Lancers, Subadar-Major (Hony.
Captain) Mit Singh, Sardar Bahadur, I.O.M.,
late 53rd Sikhs, Risaldar-Major Karam Singh,
Bahadur, I.D.S.M. late 15th (D.C.O.) Lancers
Risaldar-Major (Hony. Captain) Mohi-ud-din
Khan, Sardar Bahadur, C.I.E., I.D.S.M., late
31st (D.C.O.) Lancers, Subadar Major (Hony.
Captain) Dalpat Singh, Sardar Bahadur, I.O.M.,
late 9th Jat Regiment, Subadar-Major (Hony.
Captain) Gulab, Shah Sardar Bahadur, 3/10th
Baluch Regiment; Risaldar-Major (Hony.
Captain) Jaffar Hussain H.O. The Viceroy's
Body Guard Risaldar-Major (Hony. Lieut.)
Sheikh Faizuddin, I.D.S.M., 9th Royal Deccan
Horse, Subadar-Major and Hony. Captain
Bukham Singh, Sardar Bahadur, M.C., I.D.S.M.,
Risaldar-Major (Hony. Lieut.) Mehtab Singh,
Governor-General's Body Guard.

Honorary Surgeons—Lt. Colonel A. M. Dick,
O.B.E., M.B., Ch. B. (Eng.) F.R.C.S. (Eng.),
I.M.S., Lt. Colonel Sir Hussan Suhrawardy, K.T.,
O.B.E., I.T.F.M.C., Lt. Colonel G. G. Jolly, C.I.E.,
M.B., Ch. B. (Edin.), D.P.H., D.T.M. & H., I.M.S.,
Colonel R. E. U. Newman, O.B.E., M.C., late
R.A.M.C., Colonel L. V. Thurston, D.S.O., late
R.A.M.C., Colonel J. St. Maughan, D.S.O., late
R.A.M.C., Lt. Colonel J. Taylor, D.S.O., M.D.,
D.P.H., I.M.S., Colonel R. P. Lewis, D.S.O.,
late R.A.M.C., Colonel H. C. Bucklev, M.D.,
F.R.C.S., I.M.S., Colonel A. A. McNeight, B.A.,
M.B., B.Ch., D.P.H., I.M.S.

Honorary Assistant Surgeons—Dr. Dabrud-
din Ahmad, O.B.E., (Bengal), Mr. G. R. Gover-
dhan, L.M.S. (Central Provinces), Major J.
M. Pereira, I.M.D. (Bihar and Orissa), Khan
Salih Dr. Suiyd Wahiduddin Haider (United
Provinces), Khan Salih Mir Muhammad Ismail
(Punjab)

EXECUTIVE COUNCIL.

His Excellency General Sir Robert Cassels,
G.C.B., C.S.I., D.S.O., Commander-in-Chief in India

The Hon'ble Sir James Grigg, K.C.B. (*Finance*)

The Hon'ble Sir Nupendra Nath Sircar,
K.C.S.I., (*Law*).

The Hon'ble Kunwar Sir Jagdish Prasad,
C.S.I., C.I.E., (*Education, Health and Lands*).

The Hon'ble Sir Muhammad Zafrulla Khan
Kt., (*Railways and Commerce*).

The Hon'ble Sir Henry Craik, K.C.S.I.,
(*Home*).

The Hon'ble Sir Frank Noyce, K.C.S.I.,
G.C.B.I., I.C.S. (*Industries and Labour*).

SECRETARIES.

DEPARTMENT OF EDUCATION, HEALTH AND LANDS.

Secretary, Sir Ghrja Shankar Bajpai, K.B.E., C.I.E., I.C.S.
Joint Secretary, M. S. A. Hydarli, C.I.E., I.C.S.
Deputy Secretary, M. W. Yeatts, I.C.S.
Addl Dy Secy, G. S. Bozman, I.C.S.
Educational Commissioner with the Government of India, Sir George Anderson, Kt, C.S.I., C.I.E., M.A.
Asst. Secretary, H. H. Lincoln, M.B.E.
Superintendents, E. B. Hughes, Rai Sahib Dhanpat Rai, C. P. Singer, Khan Sahib Sheikh Talur Ali, B.Sc., Harichand and J. A. Limaye, B.A. (Hons.)
Secretary, Central Advisory Board of Education, F. E. Quraishi, B.A.

FINANCE DEPARTMENT

Secretary, J. C. Nixon, C.I.E., I.C.S.
Joint Secretary, E. T. Coates, I.C.S.
Deputy Secretary, K. Sanjiva Row, C.I.E.
Under Secretary, H. S. Stephenson, I.C.S.
Additional Under Secretary, J. B. Bird, I.C.S.
Assistant Secretaries, K. K. Chettur, M.A., and Muhammed Ali.

Superintendents, B. Grice, Rao Sahib K. Mangesh Rao, B.A., A. T. Chatterjee, N. Sundaresan, B.A. B.L., E. Bridgnell and Qazi Abdul Hamid (offg.)

Officer on Special Duty, F. M. Callaway.

Controller of the Currency, J. W. Kelly, C.I.E.

Auditor-General, Sir Ernest Buidon, K.C.I.E., C.S.I., I.C.S.

Deputy Auditor-General in India, A. C. Badenoch, C.I.E., I.C.S.

CENTRAL BOARD OF REVENUE

Members, Central Board of Revenue, A. H. Lloyd, C.S.I., C.I.E., I.C.S., A. J. Ransman, C.I.E., I.C.S. and W. W. Niad, C.I.E. (Tempy)

DEFENCE DEPARTMENT

Secretary, G. R. F. Tottenham, C.S.I., (C.I.E., I.C.S.)

Deputy Secretary, Bt. Liout.-Colonel E. Wood, M.C.

Director of Military Lands and Cantonments, Colonel G. F. J. Paterson, O.B.E. M.C.

Director, Regulations and Forms, H. I. MacDonald, O.B.E.

Under Secretary, and Joint Secretary Indian Soldiers' Board, P. Mason, I.C.S.

Assistant Secretary, J. W. B. Gaidner, M.B.E. (on leave).

Assistant Secretary, Rai Bahadur A. P. Dube
Secretary, Principal Supply Officers' Committee (India), Major A. B. Gibson.

Officer-in-Charge Navy Office Section, Lieutenant-Commander J. T. S. Hall, R.I.N.

Officer on Special Duty, Captain C. S. Lazenby, I.M.L.

Personal Assistant to the Secretary, M. J. A. Staggs

Superintendents, A. P. West (on leave), R. W. Simpson, W. L. Harrison (offg.), F. M. Sheffa (offg.), D. S. Benegal (offg.)

MILITARY FINANCE BRANCH.

Financial Adviser, A. Macleod, C.I.E., I.C.S.
Deputy Financial Advisers, J. C. Brommage, M.B.E., A. H. Wilson, B.A., P. E. Barker, V. Natesan, M.A. (Junior), J. R. Hope.
Assistant Financial Advisers, W. E. Morton (on leave), P. N. Hardcastle, Rai Sahib Amar Nath, Rai Sahib Gaya Prasad, F.R.E.S., Rai Sahib Hakumat Rai, and H. D. Banerjee, M.A. (Offg.).
Superintendents, Rao Sahib M. Gopalan, S. C. Roy, M.A., A. C. Mukherjee, B.Sc., Bishambhar Das and S. R. Rane (Offg.)

HOME DEPARTMENT.

Secretary, the Hon'ble Mr. M. G. Hallett, C.S.I., C.I.E., I.C.S.
Joint Secretary, J. A. Thorne, C.I.E., I.C.S.
Deputy Secretary, A. S. Hands, C.I.E., M.C., I.C.S.
Addl Dy Secy, G. W. McElhunny, I.C.S.
Under-Secretary, D. S. Bakhle, I.C.S.
Assistant Secretary, W. D'Almeida, M.B.E.
Superintendents, N. Banerjee, F. H. T. Ward, E. S. Keymer, E. H. Forst, and Khan Sahib Agha Sikandar (Offg.), Rai Sahib R. B. Das, Harbans Lal

DIRECTOR, PUBLIC INFORMATION.

Director, I. M. Stephens, M.A.
Dy Director, Khan Bahadur Dr S. N. A. Jatri, Bar-at-Law.
Addl Dy Director, J. H. Phillips.

IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH, SIMLA, NEW DELHI.

Chairman, The Hon. Kunwar Sir Jagdish Prasad, Kt, C.S.I., C.I.E., O.B.E.
Officiating Vice-Chairman and Principal Administrative Officer, Sir Bryce Burt, Kt, C.I.E., M.B.E., I.A.S.
Animal Husbandry Expert, Col A. Oliver, C.B., C.M.G., F.R.C.V.S.
Agricultural Expert, (offg.), Dr F. J. F. Shaw, D.Sc., A.R.C.S., F.L.S.
Secretary, N. C. Mehta, M.A. (Cantab), Bar-at-Law, I.C.S.
Superintendents, Bhalul Karim (on leave), P. M. Sundaram, B.A., T. S. Krishnamurti, B.A. (Offg.)
Statistician, Rao Bahadur M. Vaidyanathan, M.A., I.T., F.P.S.
Chief Economist, Dr Ramji Das Kapur, M.A., Ph.D.

Sugar Technologist, R. C. Sivastava, B.Sc.
Locust Research Entomologist, Rao Bahadur Y. Ramachandra Rao Garu, M.A., F.E.S.

OFFICE OF THE AGRICULTURAL MARKETING ADVISER TO THE GOVERNMENT OF INDIA.
Agricultural Marketing Adviser, Major A. M. Livingstone, M.C., M.A., B.Sc.

FOREIGN AND POLITICAL DEPARTMENT.

Secretary, Political, The Hon'ble Sir Bertrand Glancy, K.C.S.I., C.I.E.
Secretary, Foreign, Sir Aubrey Metcalfe, K.C.I.E., C.S.I., M.V.O.

Additional Secretary, A C Lothian, C.I.E.
Joint Secretary, C. M. Corfield, C.I.E.

Deputy Secretary, Foreign, O. K. Caroe, C.I.E.
Deputy Secretary, Political, Major P. Galsford.
Additional Deputy Secretary, V. Narahari Rao, M.A.

Under Secretary, Major N. S. Allington, M.O.

Under Secretary, (G) K. G. S. Sarma.

Assistant Secretaries, R. A. K. Hill, Rai Bahadur S C Biswas.

Military Adviser-in-Chief, Indian States Forces, Major General A. M. Mills, C.B., D.S.O.

Staff Officer to the Military Adviser-in-Chief, Indian States Forces, Major H. C. James, M.C.

Superintendents, Rai Bahadur Ramji, Das Damerjah, Rai Sahib A. K. Kaul (on deputation), Rao Sahib B. R. Subramaniam, G. A. Heron, I. S. Gonsalves, M. O. Dover, Sardar Sahib Sundar Singh Chhabra, A. J. Courtney (on deputation), (offg.), S. N. Chatterjee, M.A., T. A. Coates (on deputation), Mathews, (offg.), J. M. U. N. Biswas, M.A. (offg.), L. H. Spinks (offg.), S. G. Maynard (offg.), Sardar Sahib Sardar Bishan Singh (offg.), M. O. Meally (offg.), and W. J. Chaplain (offg.).

DEPARTMENT OF COMMERCE.

Secretary, The Hon'ble Mr T. A. Stewart, I.C.S.

Joint Secretary, H. Dow, C.I.E., I.C.S.

Deputy Secretary, H. S. Malik, I.C.S.

Secretary Indian Accountancy Bd., M. I. Tannan, I.E.S., Bar-at-Law.

Assistant Secretary, Rai Sahib Ladli Pershad, B.A. (on leave), Rai Sahib A. N. Puri, B.A., LL.B. (offg.).

Assistant Secretary, G. Corley Smith, M.B.E., Chief Engineer, Lighthouse Department and Chief Inspector of Lighthouses in British India, J. Oswald, M. Inst. C.E.

Nautical Advisers to the Government of India Capt. E. V. Whist, O.B.E., R.I.M. (Retd.).

The Bombay Presidency.

Consequent on the seperation of Sind from the Bombay Presidency as from April 1, 1936, Bombay has suffered a diminution territorally and otherwise. The following details relate to Bombay minus Sind.

The Bombay Presidency now stretches along the west coast of India, from Gujerat in the North to Kanara in the South. It has an area of 77,221 square miles and a population of 18,192,475. Geographically included in the Presidency but under the Government of India is the first class Indian State of Baroda, with an area of 8,164 square miles and a population of 2,443,007. There are no States in political relations with the Government of Bombay, as they are all now under the Government of India.

The Presidency embraces a wide diversity of soil, climate and people. In the Presidency there are the rich plains of Gujerat, watered by the Nerbudda and the Tapi, whose fertility is so marked that it has long been known as the Garden of India. South of Bombay City the province is divided into two sections by the Western Ghats, a range of hills running parallel to the coast. Above Ghats are the Deccan Districts, south of these come the Karnatic districts. On the sea side of the Ghats is the Konkan, a rice-growing tract, intercepted by creeks which make communication difficult.

The People.

The population varies as markedly as soil and climate. Gujerat has remained true to Hinduism although long under the dominion of powerful Mahomedan kings. Here there is an amplitude of caste divisions, and a people, who although softened by prosperity, are amongst the keenest trading races in the world. The Deccan peasant has been seasoned by adversity; the saying goes that the Deccan expects a famine one year in every three, and gets it; the population is much more homogeneous than in Gujerat, and thirty per cent. are Mahrattas. The Karnatic is the land of the Lingayets, a Hindu reforming sect of the twelfth century, and in the Konkan there is a large proportion of Christians. Four main languages are spoken, Sindi, Gujerati, Marathi and Kanarese, with Urdu a rough *lingua franca* where English has not penetrated. The main castes and tribes number five hundred.

Industries.

The principal industry is agriculture, which supports sixty-four per cent. of the population. In Gujerat the soils are of two classes, the black cotton soil, which yields the famous broach cottons, the finest in India, and alluvial, which under careful cultivation in Ahmedabad and Kaira makes splendid garden land. The dominant soil characteristic of the Deccan is black soil, which produces cotton, wheat, gram and millet, and in certain tracts rich crops of sugarcane. The Konkan is a rice land, grown under the abundant rains of the submontane

regions, and in the south the Dharwar cotton vies with Broach as the best in India. There are no great perennial rivers suitable for irrigation, and the harvest is largely dependent upon the seasonal rainfall, supplemented by well irrigation. A chain of irrigation works, consisting of canals fed from great reservoirs in the region of unfailing rainfall in the Ghats, is gradually being completed, and this will ultimately make the Deccan immune to serious drought. More than any other part of India the Presidency has been scourged by famine and plague. The evils have not been unmixed, for tribulation has made the people more self-reliant, and the rise in the values of all produce, synchronising with a certain development of industry, has induced a considerable rise in the standard of living. The land is held on what is known as the ryotwari tenure, that is to say, each cultivator holds his land direct from Government under a moderate assessment, and as long as he pays this assessment he cannot be dispossessed.

Manufactures.

Whilst agriculture is the principal industry, others have no inconsiderable place. The mineral wealth of the Presidency is small and is confined to building stone, salt extracted from the sea, and a little manganese. But the handicrafts are widely distributed. The handloom weavers produce bright-coloured saris, and to a diminishing extent the exquisite kinrobs of Ahmedabad and Surat. Bombay silverware has a place of its own, as well as the brass work of Poona and Nasik. But the tendency is to submerge the indigenous handicrafts beneath industry organised on modern lines. Bombay is the great centre in India of the textile trade. This is chiefly found in the headquarter city, Bombay.

Number of Looms in Bombay Island.	69,862
Number of Spindles in Bombay Island.	31,69,700
Number of hands employed in the Textile Industry in Bombay Island.	
(daily average.)	95 007
Consumption of Cotton by the Mills in Bombay Island (in candies of 784 lbs)	3,06,507
Number of Spindles in Ahmedabad.	20,14,856
Number of Looms in Ahmedabad	49,920
Number of Spindles in Sholapore Dist.	2,90,332
Number of Looms in Sholapore „	6,113
Number of Spindles in the Bombay Presidency (excluding Bombay Island)	32,31,722
Number of Looms in the Bombay Presidency (excluding Bombay Island) ..	74,888

Administration.

The Presidency is administered by a Governor and an Executive Council of two members, with the assistance of two Ministers. The exact change made in the functions of the Provincial Governments is indicated in the section on the Provincial Governments (*q. v.*) where a description is given of the division of the administration into two branches, the Reserved Subjects, administered by the Governor and his Council and the Transferred Subjects, administered by the Governor and his Ministers, the whole Government commonly meeting and acting as one. In another part of that section the division between Reserved and Transferred subjects is shown. This new form of administration under the Reform Act of 1919 came into operation in January 1921. All papers relating to public service business reach Government through the Secretariat, divided into seven main departments, each under a Secretary: (a) Finance; (b) Revenue; (c) Home and Ecclesiastical; (d) Political and reforms; (e) General and Educational; (f) Legal; (g) Public Works. The senior of the Civilian Secretaries is entitled the Chief Secretary. The Government is in Bombay from November to the end of May; and in Poona from June to November; but the Secretariat is always in Bombay. Under the Governor-in-Council the Presidency is administered by three Commissioners, namely, the Commissioner for the Northern Division, with headquarters at Ahmedabad, the Central Division at Poona, and the Southern Division at Belgaum. Each district is under a Collector, usually a Covenanted Civilian, who has under him one or more Civilian Assistants Collectors, and one or more Deputy Collectors. A collectorate contains on an average from eight to ten talukas, each consisting of from one to two hundred villages whose whole revenues belong to the State. The village officers are the patel, who is the head of the village both for revenue and police purpose; the talati or kulkarni, clerk and accountant; the messenger and the watchman. Over each Taluka or group of villages is the mamlatdar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukas. The Collector and Magistrate is over the whole District. The Commissioners exercise general control over the Districts in their Divisions.

Justice.

The administration of justice is entrusted to the High Court sitting in Bombay, and comprising a Chief Justice, who is a barrister, and nine puisne Judges, either Civilian, Barristers, or Indian lawyers. Of the lower civil courts the court of the first instance is that of the Subordinate Judge recruited from the ranks of the local lawyers. The Court of first appeal is that of the District or Assistant Judge, or of a first class subordinate Judge with special powers. District and Assistant Judges are Indian Civilian, or members of the Provincial Service or the Bar. In cases exceeding Rs. 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge and from the decision of the District Judge in

all original suits lies to the High Court. District and Assistant Judges exercise criminal jurisdiction throughout the Presidency but original criminal work is chiefly disposed of by the Executive District Officers and Resident and City Magistrates. Capital sentences are subject to confirmation by the High Court. In some of the principal cities Special Magistrates exercise summary jurisdiction (Bombay has six Presidency Magistrates, as well as Honorary Magistrates exercising the functions of English Justices of the Peace) and a Court of Small Causes, corresponding to the English County Courts.

Local Government.

Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former exercising authority over a District or a Taluka, and the latter over a city or town. These bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements. Their funds are derived from cesses on the land revenue, the toll, ferry funds and local taxes. The tendency of recent years has been to increase the elective and reduce the nominated element, to allow these bodies to elect their own chairmen, whilst larger grants have been made from the general revenues for water supply and drainage.

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self-Government in the Presidency. The Act provides more adequate basis for Municipal Administration in the larger cities of the Bombay Presidency. The larger municipalities are now styled as Municipal Boroughs which are now 30 in number. The executives of these Borough Municipalities are invested with larger powers than hitherto exercised. Another important change introduced by the Act was the extension of municipal franchise to occupiers of dwellings or buildings with annual rental values of Rs. 12 or with capital value of not less than Rs. 200.

Public Works.

The Public Works Department is under the control of a Chief Engineer who acts as Secretary to the Government. Under him are Superintending Engineers in charge of Circles and Executive Engineers in charge of divisions, and the Electrical Engineer.

There is a chain of protective irrigation works, originating in reservoirs in the Ghat regions. The principal works are the Nira Canals fed by Lake Whiting impounded by the Lloyd Dam at Bhatgar, the Pravara Canals fed by Lake Arthur Hill, impounded by Wilson Dam at Bhandardara, the Mutha Canals fed by Lake Ffife at Khadakvasla, the Godavari Canals fed by Lake Beale at Nandur Madhmeshwar and the Gokak Canal. The Mutha Canals and the Gokak Canal were completed in 1896-97, the Nira Left Bank Canal in 1905-06, the Godavari Canals in 1915-16 and the Pravara Canals in 1926-27. The Nira Right Bank Canal

which has been under construction since 1912 is practically completed. The Wilson Dam at Bhandardara, the second highest yet constructed by Engineers the world over, was opened by His Excellency the Governor on 10th December 1926. The Lloyd Dam at Bhatgar which is 5,333 feet in length, 190 feet in height and 124 feet in width was opened by H. E. Sir Leslie Wilson on 27th October 1928. It cost Rs. 172 lakhs. It is remarkable as being the largest Dam in volume hitherto constructed and contains 21½ million cubic feet of masonry. The Assuan Dam in Egypt is popularly supposed to be the largest Dam in existence but that contains 19 million cubic feet. It cost also nearly 50 per cent. more than the Lloyd Dam. An idea of the magnitude of the Lloyd Dam can be gathered from the fact that if a wall 6 feet high and 15 inches thick were constructed from the masonry in the Dam it would stretch a distance of 520 miles, say from Bombay to Nagpur. These projects will irrigate certain tracts most liable to famine.

Police.

The Police Force is divided into 3 categories, viz., District Police, Railway Police and the Bombay City Police. The District and Railway Police in the Presidency proper are for the purpose of control under the Inspector-General of Police who is assisted by three Deputy Inspectors-General, of whom two are in charge of Ranges and the third is in charge of the Criminal Investigation Department and the Fingerprint Bureau. The executive management of the Police in each district and on Railways in the Presidency proper as well as in Sind is vested in a Superintendent of Police under the general direction of the Magistrate of the District concerned except in the case of the Railway Police. For the purposes of effective supervision over the investigation and prevention of crime, some of the larger districts are divided into one or more sub-divisions each under a Sub-Divisional Officer who is either an Assistant Superintendent of Police, or an Inspector of Police, a Deputy Superintendent of Police. Sub-Inspectors are the officers in charge of Police Stations and are primarily responsible under the law, for the investigation of offences reported at their Police Stations. Officers appointed directly to the posts of Assistant Superintendents of Police, Deputy Superintendents of Police, Inspectors and Sub-Inspectors undergo a course of training at the Central Police Training School at Nasik before being posted to Districts for executive duty. The Bombay City Police is a separate force under the Commissioner of Police who is directly responsible to Government.

Education.

Education is imparted partly through direct Government agency, and partly through the medium of grants-in-aid. Government maintain Arts Colleges at Bombay, Andheri, Ahmedabad and Dharwar; the Grant Medical College, the Poona College of Engineering, the Agricultural College, Veterinary College, School of Art, Law College and a College of Commerce. Most of the secondary schools are in private hands. The primary schools are maintained by Local Authorities, with a grant-in-aid.

The Bombay Municipality is responsible for primary education in Bombay City (g. v., Education).

The Quinquennial Report on Public Instruction in the Bombay Presidency for the years 1927-1932 reveals much information regarding the progress of education in recent years. The passing in 1923 of the Primary Education Act was perhaps the most important event in the history of Primary Education in the Bombay Presidency during the last 30 or 40 years whereby the control of Primary Education was transferred from the Department to the Local Authorities. Most of the Boards have prepared schemes for the expansion of education, some of them on a compulsory basis, and many boards have levied additional taxation but the finances of Government have not permitted them to perform to the full the part contemplated by the Act. The fact, however, must not be lost sight of that during the quinquennium the assignments of Government to Primary Education fell from Rs. 1,21,59,848 to Rs. 1,18,17,308. The decrease was mainly due to retrenchment in Government grants during 1931-32.

The total number of Institutions increased during the quinquennium from 16,211 to 17,159. Recognised institutions increased by 1,145 to 15,929 while unrecognised institutions decreased by 197 to 1,230. Of the recognised institutions 18 are Arts and 11 Professional Colleges and 714 Secondary Schools, 14,616 Primary Schools and 314 Special Schools.

The total number of recognised and unrecognised educational institutions during the year 1933-34 was 16,730 and the number of pupils 1,374,296.

Out of a total of 26,859 towns and villages 10,659 possessed schools, the average area served by each town or village with a school being 11.6 square miles. The percentage of pupils in recognised institutions to the total population of the Presidency was 6.11 in 1933-34. Of the total number of 1,332,324 pupils under instruction, 1,025,928 were boys and 306,596 were girls.

Hindu pupils in recognised institutions numbered 997,886, Muhammadans 235,548, Indian Christians 39,341, Parsis 18,266, Europeans and Anglo-Indians 5,540. The rest comprised 35,943.

The total expenditure on education in 1933-34 was Rs. 398½ lakhs, of which 44.2 per cent was met from Government funds, 19.4 per cent from Board funds, 23.2 per cent from fees, and 13.2 per cent from other sources. Primary schools absorbed over Rs. 205 lakhs, exclusive of expenditure on inspection, construction, and repairs.

The Educational Department is administered by a Director, with an Inspector in each Division and a Deputy or Assistant Inspector in each district.

Higher education in the Presidency is controlled by the Bombay University which was established in 1857. The constitution of the University has recently undergone, however,

considerable changes in virtue of a new enactment known as the Bombay University Act of 1928. This Act altered the whole constitution of the University so as to make it adequately representative with a view to bringing into closer association with the public the industrial commercial and civic life of the people of the Presidency to enable it to provide greater facilities for higher education in all branches of learning including Technology and to undertake on a larger scale than heretofore post-graduate teaching and research, while continuing to exercise due control over the teaching given by colleges affiliated to it from time to time. The new University Department of Chemical Technology was formally inaugurated by His Excellency the Governor of Bombay on 15th November 1933. The authorities of the University, as now constituted, are chiefly the Chancellor, Vice-Chancellor, the Syndicate, the Academic Council and the Senate. The Senate consisting of fellows is the supreme governing body of the University. The number of fellows is 144 of whom 40 are nominated by the Chancellor and 11 are ex-officio. The Academic Council consisting of educational experts deals with all purely academical questions. This body works in collaboration with the Syndicate which is the principal executive of the University.

Medical.

The Medical Department is in the charge of the Surgeon-General who is a member of the I. M. S., and Public Health in that of the Director of Public Health, who is usually a non I.M.S. Officer. Civil Surgeons stationed at each district headquarters are responsible for the medical work of the district: whilst sanitation is entrusted to one of the Assistant Directors of Public Health. Four large hospitals are maintained by the Government in Bombay, and the accommodation in them has been recently increased by 300 beds in one hospital and 180 beds in another hospital. A number of beds in the Bombay City had to be closed during 1931-32 owing to shortage of funds. Well-equipped hospitals exist in all important up-country stations.

Over 3,210,318 persons including 1,12,710 in-patients were treated during the year 1933. The Presidency contains 6 Lunatic Asylums and 16 institutions for the treatment of Lepers. Vaccination is carried out by a staff under the direction of the Director of Public Health. Sanitary work has received an immense stimulus from the large grants made by the Government from time to time.

Finance.

Under the Reform Scheme of 1919 Provincial Finance entered on a new phase. Before the passing of this Act Provincial finance was incorporated in Imperial Finance. The Provinces had certain heads of revenue of their own and other heads which they divided with the Government of India. By the new constitution a comparatively clean cut was made between the finances of the Government of India and those of the Provinces. Such revenues as they enjoy the Provinces enjoy in full, and in return they make cash contributions to the Government of India, fixed for a term of years. The general principle underlying this settlement is that these contributions shall gradually disappear. These contributions have now been remitted.

As this chapter goes to press there has just been published the report of Sir Otto Niemeyer on the financial relations between the Central and Provincial Governments of India under the Government of India Act of 1935. The report indicates no possibility of a reduction in the central expenditure or taxation unless the economic situation improves. He proposes that the centre should retain during the first five years of provincial autonomy the entire proceeds of the income tax, and during the second period of five years retain half and distribute the other half among the provinces. Of this distributable portion, Bombay is to get 20 per cent. Barring this postponed relief, Bombay will get no relief financially, except a saving of 45 lacs as the result of the separation of Sind.

Estimated Revenue for 1936-37—(in lakhs of Rupees).

Sind.

Sind is one of the two provinces created in 1936, the other being Orissa. Unlike the latter, which has been carved out on a linguistic basis from three older provinces, Sind was a compact unit and was considered a province within a province even before its separation. From the point of view of geography, ethnology and language, Sind has greater affinity to the Punjab than to Bombay. Nevertheless it has been attached to the Bombay Presidency administratively ever since its conquest by Sir Charles Napier in 1843.

The demand for its separation into a distinct political entity is of comparatively recent origin. It was only about a dozen years ago that Muslim leaders started the demand that Sind, where the Muslims are in an overwhelming majority, should have separate administrative machinery under the next reformed constitution, so that it might be a counterblast to provinces where the Hindus are in a majority. What was started as a bargaining point in inter-communal negotiations has now become an accomplished fact.

The Muslim delegation at the first Round Table Conference put forward the demand in London in the winter of 1930. The question was referred to a committee which accepted the principle of separation, suggested an expert inquiry to ascertain the financial aspect of the separation, and threw the burden of proving the feasibility of separation on those who asked for it. An expert inquiry was held and it drew a gloomy picture of the financial future of Sind. Its findings can best be summarised by its remark, "There is thus obviously no question of Sind standing surety for the Barrage. The problem is whether the Barrage can stand surety for Sind."

Demand for Separation.

A conference of representatives of the people of Sind met in 1942 to devise measures to meet the financial objections to the separation. Wide divergence of opinion prevailed at this conference, whose chairman eventually submitted a report according to which the annual deficit of the new province for the first six years of its life would be Rs. 80 lakhs, the revenue from the Barrage being eaten up by interest charges. Roughly from 1945 onwards, there would be a surplus from the Barrage to help the province. Based on this assumption the authorities set about perfecting the administrative machinery in preparation for the inauguration of the new regime.

With the stage set for the advent of the new province, an Order-in-Council was issued in January, 1936, announcing that the new province would start on its career on April 1, 1936, and creating transitional machinery for the conduct of government till provincial autonomy is inaugurated in accordance with the provisions of the Government of India Act, 1935.

Of a permanent character are those provisions of the Order-in-Council which sever Sind from Bombay and settle the liabilities of the parent and the infant in respect of development loans incurred during the joint family period. Lands, forests, buildings, property, etc., will pass to the province where they are situated. Arrears of taxes will belong to the province where the taxed property is situate or the taxed transactions took place. Of the outstanding Bombay Irrigation Debt incurred before April 1, 1921, Rs. 2,74,96,384, including Rs. 73,687 of the debt on account of the Lloyd Barrage and Canals system, will be borne by Sind, and the rest by Bombay. Of the debt incurred on account of the Lloyd Barrage and Canals system, all except the portion relating to the Nasirabad section (which is chargeable neither to Bombay nor to Sind) will be borne by Sind. The outstanding Bombay debt on account of the Bombay Development Scheme will be the debt of Bombay alone. Other loan works will be chargeable to the province where the works are located.

The temporary provisions of the Order-in-Council relate to the period between April 1, 1936, and the inauguration of provincial autonomy. During this period the Governor will carry on the administration, assisted by two Advisers and a Council which will be purely advisory in character and will comprise members nominated by the Governor. Such provisions of the Government of India Act of 1919 as relate to the composition and functions of the provincial legislative councils, the separation of provincial subjects into transferred and reserved subjects, the Ministers and Executive Councils will not apply to Sind during the transitional period.

It is also understood that the Central Government will have to come to the rescue of Sind by providing the funds to meet the deficit in the first few years. In order to make arrangements for such a subvention to Sind and Orissa and for other weak provinces and generally to adjust the financial relations between the Central and the provinces under the provincial autonomy scheme, Sir Otto Niemeyer, a financial expert, was asked to conduct an inquiry. He has completed his investigations and submitted his report, according to which Sind will get a cash subvention of Rs. 105 lakhs for a period of ten years, after which the aid will be progressively decreased. While on the subject of help from the centre, it may be mentioned that, according to the Niemeyer recommendations, Sind will get after the first five years of provincial autonomy 2 per cent. of the distributable portion of the income-tax revenue.

Population.

Sind has an area of 46,378 square miles and a population of 3,887,000. Of this, the Hindus (including scheduled castes) number 1,015,000 and the Muslims 2,831,000. The rest of the population is made up of 1,930 Anglo-Indians, 6,576 Europeans and 6,627 Indian Christians.

The language of the province, Sindhi, though it bears many marks of Arabic and Persian influence and is written in a form of Perso-Arabic script, is nearer the original Sanskrit than any other Indian language. Few, however, are capable of writing it, for only 70 out of every 1,000 people in Sind are literate. The average for males is 106 per 1,000, that for females being as low as 21 per 1,000. The Hindus are far more advanced than the Muslims and enjoy a virtual monopoly of the trade of the province. As against 263 Hindu literate males per 1,000, only 44 Muslims per 1,000 are literate, 51 per 1,000 literate Hindu females compare against five literate Muslim females. The number of those literate in English are 119 per 10,000—186 per 10,000 males and 34 per 10,000 females.

Out of every 100 workers in Sind 59 are engaged in agriculture and animal husbandry. Ten per cent are engaged in manufacturing industries, most of which are, however, of the cottage type, there being very few factories in Sind.

The cultivable area of the province is mostly commanded by the recently constructed Sukkur Barrage and Sind canals, which, with other canals and the Indus river itself supply water to 7,500,000 acres. The Barrage works have cost nearly 24 crores of rupees. The Sindhi agriculturist is gradually becoming alive to the perennial regulated supply of irrigation and his outlook is becoming brighter. The rapidity with which lands supplied by the Barrage system are being taken up augurs well for the success of the scheme and the prosperity of the province as a whole. Already there has been a growth in the production of long staple cotton all of which is easily absorbed by Indian textile mills.

Lloyd Barrage

The Barrage owes its existence largely to the zeal of Sir George (Now Lord) Lloyd, the then Governor of Bombay, whose name it bears. Started in July 1923, it was completed in January 1932. It was the completion of the dream of many an engineer and an almost incredible boon to the cultivator, who formerly carried on his agricultural operations in a haphazard manner, being unable to depend on the proverbial vagaries of the Indus. What it means to the Sindhi the Sindhi alone knows, for the Barrage has converted—or hopes to convert—a waterless desert into a smiling garden flowing with milk and honey.

The magnificence of the achievement that is the Lloyd Barrage can be imagined when it is realised that it is a huge water regulator consisting of 66 spans, each sixty feet wide, the openings being regulated by steel gates, each weighing fifty tons. The Barrage is about a mile long, about five times the length of London Bridge. Thousands of miles of new channels were excavated varying in width from 346 feet in the case of main canals to only two or three feet in the case of water courses. The total length of Government channels which were excavated was over 6,000 miles, and that of water courses over 31,000 miles. The total length is thus some 37,000 miles, which means about 11 times the circumference of the earth.

The total quantity of earthwork involved, excluding that for the watercourses was 569 crores cubic feet of earthwork which means a solid column measuring 100 feet by 100 feet extending to a height of over 550 miles.

The function of the Barrage is to lead up the river and store the water at Sukkur and from that to distribute it all the year round according to requirements of cultivators. The distribution is made through seven great canals, regulated through regulators on both banks of the river—four on the left bank, three on the right. Those on the left bank are Rohri, the Eastern Nara, the Khanpur Feeder East and the Khanpur Feeder West. Those on the right bank are the Perennial, the Central Rice and the South-Eastern Perennial or Dadu.

The total number of openings in all the canal Head Regulators is 55, each being of 25 feet span and each opening being equipped with three electrically operated gates. The total discharge of water into all the canals is approximately 45,750 cuses or 457,500 gallons per second. The total length of the main and branch canals is about 4,700 miles. To accomplish this staggering feat, excavation of earthwork to the extent of 8,000,000,000 cubic feet was involved, as much as would fill a drain 15 feet wide and four feet deep, dug round the equator. It was estimated that the ultimate area of annual cultivation on the scheme would be over 5,000,000 acres and this would be under various crops approximately as follows:

Wheat 2,440,000 acres, cotton 790,000 acres, rice 625,000 acres, *javari, bajra*, etc., 695,000 acres, pulses 53,000 acres, and oilseeds 410,000 acres.

This denoted in produce would mean the following approximate quantities:

Wheat 1,133,000 tons, cotton 592,500 bales, rice 447,000 tons; *javari, bajra*, etc., 298,000 tons, pulses 15,000 tons, and oilseeds 117,000 tons.

Inter-communal Co-operation.

Politically, the province is backward. Only the Hindu minority is politically minded, the Muslims owing allegiance to personalities rather than to principles. The Hindus are openly afraid of Muslim dominance and of being ousted from public life. They have already communicated this fear to the new Governor, Sir Lancelot Graham, who has assured them of his sympathy and determination to safeguard their legitimate interests. On the other hand, there is growing evidence of a desire on the part of the Muslim community to reassure the minority in regard to the continued enjoyment of its rights. Leaders of both communities are working for the creation of an understanding between the two which will bring about an era of inter-communal co-operation and goodwill so necessary for the successful working of the reformed constitution under unfavourable financial conditions.

Karachi.

No account of Sind will be complete without a reference to its capital, Karachi. It is a comparatively new town, for according to known

fact it was as recently as 1729 that a few traders of the neighbouring State of Kalat migrated to the "Kalachi" the land of the sand-dunes. It was several years later that its potentialities as a harbour were realised by the British—Sir Charles Napier, the Conqueror of Sind, is said to have forecast that Karachi would some day become the "Glory of the East." Recent developments in Karachi hold out fresh hopes of this prediction being fulfilled, for with the growth of aviation, Karachi, which is on the main line of imperial aerial communication between London and Australia right across India, is bound to become a vital airport. If it is not already one. In addition to being the capital of Sind, Karachi is the outlet for the products of the Punjab. If the Barrage becomes all that is expected of it, Karachi may have to handle in 1960 nearly 1,133,000 tons of wheat, 500,000 bales of cotton, 447,000 tons of rice, 298,000 tons of *jowar*, *bajri*, etc. 15,000 tons of pulses and 117,000 tons of oilseeds. That this is not altogether Utopian is evident from the fact that within four years of the commencement of Barrage operations, that is, by the end of 1935, the following areas were under cultivation in Sind: 850,000 acres under wheat, 500,000 acres under cotton and 50,000 acres under rice.

GOVERNOR

His Excellency SIR LANCELOT GRAHAM,
K.C.S.I., K.C.I.E., I.C.S.

Private Secretary—Major W. R. B. PERL

SECRETARIES

Chief Secretary Mr H. K. Kirpalani, I.C.S.

Finance Secretary—Mr S. Ridley, I.C.S.

Revenue Commissioner—Mr R. E. Gibson,
C.I.E. I.C.S.

Public Works Secretary—Mr W. L. C. Trench,
I.C.S.

Inspector-General of Police—Mr D. Healy

ADVISORY COUNCIL.

President—Sir Ghulam Hussain Hidayatullah,
Kt., K.C.S.I.

Members—Khan Bahadur Alla Bakhsh wd Khan Saheb Haji Mahomed Omar, O.B.E., Sir Shah Nawaz Khan Ghulam Murtaza Khan Bhutto, Kt., C.I.E., O.B.E., Khan Bahadur Shere Muhammad Khan Karam Khan Bijarani, Mr Mahomed Hashim Gazdar, Mr Ghulam Hyder Shah Sahibdin Shah, Khan Bahadur Ghulam Nabi Shah Moujahi Shah Sayed, M.B.E., Mr Gover Rora, Diwan Bahadur Hiranand Khemsing, Khan Bahadur Ghulam Muhammad Abdulla Khan Isran, Diwan Bahadur Issarding Tiloksing, Sardar Bahadur Jam Jan Muhammad wd Muhammad Sharf Juncjo; Khan Bahadur Jan Muhammad Khan wd Khan Bahadur Sha Pasand Khan, Khan Bahadur Muhammad Ayub Shah Muhammad, Mr H. K. Kirpalani, I.C.S., Syed Miran Muhammad Shah Zanulabdin Shah; Khan Bahadur Muhammad Kamli Shah Kabul Muhammad Shah, Mukhi Gobindram Pritamdas, Mr Parmanand Kundanmal, Mr. G. H. Raschen, Mr S. Ridley, I.C.S., Sheikh Abdul Majid Libaram, Sardar Bahadur Haji Mir Alladad Khan Mir Imam Bakhsh Khan Talpur, Mir Bandeali Khan Mir Muhammad Hassan Khan Talpur, Mr Satraamdas Sakhawatrai Tolani.

To assist the Governor "in such manner as may be prescribed by him in that behalf"—Sir Shah Nawaz Khan Ghulam Murtaza Khan Bhutto, Kt., C.I.E., O.B.E., and Diwan Bahadur Hiranand Khemsing.

The Madras Presidency.

The Madras Presidency occupies the whole southern portion of the Peninsula, and, excluding the Indian States, all of which have now come under the direct control of the Government of India, has an area of 142,260 square miles. It has on the east, on the Bay of Bengal, a coast line of about 1,250 miles; on the South on the Arabian Sea, a coast line of about 450 miles. In all this extent of coast, however, there is not a single natural harbour of any importance; the ports, with the exception of Madras, and perhaps of Cochin, are merely open roadsteads. A plateau, varying in height above sea-level from about 1,000 to about 3,000 feet and stretching northwards from the Nilgiri Hills, occupies the central area of the Presidency; on either side are the Eastern and the Western Ghats, which meet in the Nilgiris. The height of the western mountain-chain has an important effect on the rainfall. Where the chain is high, the intercepted rain-clouds give a heavy fall, which may amount to 150 inches on the seaward side, but comparatively little rain falls on the landward side of the range. Where the chain is low, rain-clouds are not checked in their westward course. In the central table land on the east coast the rainfall is small and the heat in summer excessive. The rivers, which flow from west to east, in their earlier course drain rather than irrigate the country; but the deltas of the Godavari, Kistna and Cauvery are productive of fair crops even in time of drought and are the only portions of the east coast where agriculture is not dependent on a rainfall rarely exceeding 40 inches and apt to be untimely.

Population.

The population of the Presidency was returned at the census of 1931 as 47,193,602, an increase of 10.4 per cent. over the figure of 1921. The increase was not uniform. The districts which had suffered most in 1921 tended to show large increases in 1931—Bellary and Agencies were marked illustrations. As a natural corollary to an increase in population the Presidency density has risen. Hindus account for 88 per cent of the Madras population, Muhammadans 7 per cent and Christians 3.8 per cent. The actual number in other communities is inconsiderable. The vast majority of the population is of the Dravidian race and the principal Dravidian languages, Tamil and Telugu are spoken by 19 and 18 million persons respectively. 40 per cent. of the population talk Tamil, 37 per cent. Telugu, 7.9 per cent. Malayalam, Oriya, Kanarese, Hindustani, Tulu follow in that order with percentages above 1.

Government.

The Madras Presidency is governed on the system generally similar to that obtaining in Bombay and Bengal. There are associated with the Governor four members of the Executive Council in charge of the Reserved Sub-

jects and three Ministers in charge of the Transferred Subjects. Madras administration differs, however, in some important respects from that of other major provinces. There is no intermediate local authority between the Collector of the District and the authorities at headquarters, Commissioners of Divisions being unknown in Madras. Another feature peculiar to the Southern Presidency is the manner of choice of the ministers. Following the practice of the Mother of Parliaments, Madras Governors have, ever since the inception of the Reforms, called upon the leader of the dominant party to form a ministry, giving him freedom to select his colleagues on the ministry. Consequently he enjoys the status of Chief Minister—unknown in other provinces in India.

Agriculture and Industries.

The principal occupation of the province is agriculture engaging about 68 per cent. of the population. The principal food crops are rice, cholam, ragi and kambu. The industrial crops are cotton, sugarcane and groundnuts. The agricultural education is rapidly progressing in the Presidency. The activities of the Agricultural Department in matters educational consist in the running of a college at Coimbatore affiliated to the University of Madras, three farm labourers' schools numerous demonstration farms. As it was found that the present course of middle school education does not satisfy the needs of the ryots, the only school maintained by the department at Talperemba was closed with effect from 1st April 1932. The institution of short practical courses in farm management and allied subjects in the Agricultural College at Coimbatore have been sanctioned. While paddy which is the staple food of the population, occupies the largest cultivable area, cotton and sugarcane are by no means inconsiderable crops of the province and are receiving close attention at the hands of the local agricultural authorities. The area under cotton irrigated and unirrigated is estimated at 2,138,380 acres and, as in the case of paddy, efforts are being made to produce better strains of cotton suited to different localities by means of both selection and hybridization. Side by side with an increase in the area under cotton, from existing good staple areas, improved varieties have been systematically introduced. A special feature of the agricultural activities in the Presidency is the large industry which the planting community have built up, contributing substantially to the economic development of the province. They have organised themselves as a registered body under the title of "The United Planters' Association of South India," on which are represented coffee, tea, rubber and a few other minor planting products. The aggregate value of seaborne trade of the Presidency which was Rs. 720,018,195 in 1932-33 and Rs. 70,04,81,842 in 1933-34 rose to Rs. 76,98,36,552 in 34-35. As in other provinces, the forest resources are exploited by Government. There are close upon 19,000 square miles of reserved forests.

Thirty-two spinning and weaving mills were at work during the year and they employed 44,130 operatives. The number of jute mills at work was three. At the close of the year 1933 the number of the other factories in the Presidency was 1,521. These consisted of oil mills, rope works, tie works, etc. Tanning is one of the principal industries of the Presidency and there is considerable export trade in skins and hides. The manufacturing activities which are under the direction of the Department of Industries are mainly confined to the production of soap. There are a number of indigenous match factories run on cottage lines. It is expected that the levy of the excise duty on matches will drive off the market products of inferior quality and it is probable that only the very efficient units of the cottage industry will be able to continue the manufacture of matches once the full force of the excise duty is felt upon the industry. It is slowly becoming recognised that the Madras Presidency is one of the most suitable parts of India for sugarcane cultivation and that the several deep-rooted varieties of cane which have been evolved at Coimbatore and require very little water are especially suited for the conditions which obtain in several areas of the Presidency where they grow better than in the north. The departments of Industries and Agriculture assist the development of the sugar industry by demonstration of the methods of manufacture of white sugar by centrifugals by getting trained sugar technologists, by the award of scholarships and by investigating schemes for starting sugar factories.

The question of finding foreign markets for the products of Madras cottage industries was under the consideration of the Government for sometime and they have passed orders during the year sanctioning an annual subsidy of Rs. 3,000 to the Victoria Technical Institute, Madras, for three years to enable them to appoint an agent in London for the sale of products of Madras cottage industries in European markets.

Education.

The Presidency's record in the sphere of education has been one of continuous progress. There are at present about 51,000 public institutions, ranging from village primary schools to arts and professional colleges, their total strength being about 3,053,000. Special efforts are being made to provide education for boys belonging to the Depressed Classes. The Council passed a resolution in the year 1929 at the instance of a nominated member that poor girls reading in any educational institution in the province—Government, local fund, Municipal or aided—should be exempted from School fees in any Standard up to III Form. The total expenditure of the province on Education is in the neighbourhood of Rs. 541 lakhs. The principal educational institutions in the province are the Madras, Andhra and Annamalai Universities, the Presidency College, the Christian College, the Loyola College, the Pachaiyappa's College, the Law College, and the Queen Mary's College for Women, Madras; the St. Joseph's College, Trichinopoly; the American College, Madurai, the Government College, Kumbakonam; the Government College,

Rajahmundry; the Agricultural College Coimbatore; the Medical Colleges at Madras and Vizagapatam and the Engineering College at Madras (Guindy).

Cochin Harbour Scheme.

The importance of this project lies in the fact that a good harbour at Cochin would lead to the development of a valuable hinterland and provide a ready outlet for agricultural and other produce from an area which is at present not adequately served by a convenient or well equipped harbour. The scheme involves cutting a passage through the bar which hitherto blocked the entrance from the sea to an extensive backwater and by dredging and reclamation, forming a sheltered harbour accessible and giving full protection and facilities at all seasons of the year. An agreement was reached in 1925 between the Government of Madras and the Darbars of Travancore and Cochin States indicating how the work is to be carried out and outlining the financial arrangements necessary. A trial cut was made in 1923 and the effects of the monsoon thereon were observed. The results recorded were examined by a Committee of Harbour Engineers in England who reported favourably on the prospects of the scheme.

The first cut through the bar 400 feet wide by 32½ feet deep was completed on 30th March 1928. The channel through the outer bar is now 3 miles long by 450 feet wide and during 1934-35 a minimum depth of 30 feet at L. W. O. S. T. was maintained throughout except for a small patch which had a depth of 29½ feet. The dredging of the Mooring area has been completed. Since March 1930 the Harbour has been in constant and regular use by all ships and a regular passenger service has been inaugurated.

Proposals have been formulated for the next stage of the works which include the construction of deep water jetties with railway connections, construction of godowns and transit sheds, the installation of rapid handling cranes and other transport facilities. These improvements are to be made on the new reclamation of which about 300 acres have been formed already by dredging from the harbour. It is intended to connect this to the mainland by a railway bridge across the backwater. Reclamation, when completed, will provide sufficient space for about 20 or 30 large vessels to load or unload at the same time. The execution of the further work at the port has been held over pending settlement of certain questions connected with the harbour administration. The matter was discussed at a Conference held in November 1935 and the question of giving effect to the conclusions arrived at the conference is under consideration. The Shoranur Ernakulam line has been converted from metric to broad-gauge and opened for traffic. The line is to be extended to the wharves at the reclamation. These developments will enhance the utility of the port to the planting and agricultural areas in that part of the Presidency. To facilitate navigation during the night, the channels have been lighted, and a hotel has been constructed to provide their accommodation for passengers calling at the port.

Local Self-Government.

Local bodies in the Madras Presidency are administered under the following Acts.—

The Madras City Municipal Act, 1919,

The Madras District Municipalities Act, 1920, as amended by Madras Act X of 1930, and

The Madras Local Boards Act, 1920, as amended by the Madras Act XI of 1930.

The amending Acts of 1930, which came into force on the 26th August 1930, provide, *inter alia*, for the abolition of the system of nominations to local bodies, for the inclusion of village panchayats within the scope of the Madras Local Boards Act with a view to making the village the unit of local self-government, for direct elections to district boards, for the creation of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the cessation of office of the President or Chairman on a motion of non-confidence being passed against him by a prescribed majority. The Acts have undergone subsequent amendments. Taluk Boards have been abolished with effect from the 1st April 1934.

In the interests of administration, commissioners have been appointed to almost all the Municipalities in the presidency and these have replaced non-official chairmen as executive authorities.

Under an Amending Act of 1934, the taluk boards were abolished with effect from 1st April 1934. This step was undertaken as these bodies became financially embarrassed. Their functions have been entrusted to district boards, with a view to avoid extreme centralisation of administration of district boards, it has been decided to truncate them. Up to the end of 1935, the number of district boards truncated was four.

Local bodies are now enabled under the Madras Local Authorities Entertainments Tax Act, 1926, to levy a tax on entertainments given within their jurisdiction.

Irrigation.

In March 1925, the Secretary of State sanctioned the Cauvery Reservoir Project, the estimated cost of which amounted to about 4½ millions. The project has been framed with two main objects in view. The first is to improve the existing fluctuating water supplies for the Cauvery Delta irrigation of over a million acres, the second is to extend irrigation to a new area of 301,000 acres, which will, it is estimated, add 150,000 tons of rice to the food supply of the country. The scheme which was completed in 1934 provides for a large dam at Mettur on the Cauvery to store 93,500 million cubic feet of water and for a canal nearly 88 miles long with a connected distributary system. Owing to the necessity for providing adequate surplus arrangements to dispose of floods similar to the phenomenal floods of 1924 and to other causes the estimate had to be revised and the revised estimate stands at about £ 5½ millions. A saving of nearly 1½ million is anticipated. Another important

project is the Periyar project which is intended not only for irrigation purposes but also for providing water power for generating electricity. Taking its rise in the Western Ghats, the river flows into the Arabian Sea through Travancore State territory. After prolonged negotiations, the Travancore Durbar consented to the water being caught and stored in the Travancore hills for being diverted towards the East. Some three thousand feet above sea-level a concrete and masonry dam has been constructed and nearly 50 feet below the crest-level of the dam a channel through the summit of the range carries the waters into the eastern water-shed where they are led into the river Valgal. The total quantity of water impounded to crest level is 15,660 million cubic feet. By this work, a river ordained by Nature to flow into the Arabian Sea has been led across the Peninsula into the Bay of Bengal irrigating on its way well over 100,000 acres of land. The irrigable area commanded by the Periyar system is 143,000 acres, while the supply from the lake was sufficient only for 130,000 acres. To make up for this deficit, a scheme for increasing the effective capacity of the lake by lowering the water-shed cutting is in progress. The area already under irrigation in the Madras Presidency total about 7.5 million acres. Of this over 3 million acres are served by petty irrigation works numbering about 36,000.

Electric Schemes.

The first stage of the Pykara Hydro-Electric project which was under construction by the Government of Madras has now been completed and is in operation from 1st April 1933. It consists in utilising a fall of over 3,000 ft. in the Pykara river as it descends the Nilgiris Plateau for the generation of electrical energy and its transmission for supply to the neighbouring districts, *viz.*, the Nilgiris and Coimbatore, and parts of Malabar, Salem, Trichinopoly and Tanjore. The Glen Morgan scheme started in 1928 with the object of supplying power to the main construction works of the Pykara project has now been merged with it. In its present completed form the project consists of the main power house at Singara with an installed plant capacity of 33,000 B.H.P. and the transformer station, the receiving station at Coimbatore, 10 other sub-stations, 189 miles of 66 K.V. line, 173 miles of 22 K.V. line and 135 miles of 11 K.V. line. The booked cost up to 31st March 1935 is Rs. 1,30,15,082 and the revised estimates for 1934-35 include an expenditure of Rs. 5,22,000. The revenue realised during 1934-35 is about Rs. 10 38 lakhs against an estimated revenue of Rs. 4,70,000.

Co-operation.

The agricultural classes continued to suffer from the after-effects of the general economic depression and this is reflected in the state of overdues in societies during the year 1934-35, though there was a noticeable fall in the percentage of balance to demand in the case of both principal and current interest in the dues of agricultural societies. A satisfactory feature of the year was that Central Banks increased their loan transactions from Rs. 84.77 lakhs to Rs. 102.07 lakhs. The surplus funds

of Central Banks were still further reduced to Rs. 26.36 lakhs and the Government have since relaxed the restrictions on the deposits of funds of local bodies. The policy of cautious registration of societies was continued. Only 100 societies were registered during the year as against 140 in the previous year, while 28 Societies were liquidated. Under the scheme of subvention by the Provincial Bank for the rectification of Societies the non-official staff was able to reduce overduns in 1,034 bad societies to below 40 per cent. Almost all the Central Banks have adopted the registrars scheme for the examination of individual loans in affiliated Societies with the result that, at the end of the year, additional securities were obtained in respect of loans amounting to Rs. 14.08 lakhs which were ill secured. The South India Co-operative Insurance Society started in March 1932 continued to do satisfactory work during the year. The Central Land Mortgage Bank which was started in 1929 for the purpose of financing primary land mortgage Banks by floating debentures had another successful year. It issued debentures to the extent of Rs. 28,72,800 against as 24,79,500 in 1933-34. In accordance with its policy of counting of high interest bearing debentures into ones carrying a lower rate of interest, one Bank converted debentures of a total value of Rs. 10,83,200 and the benefit of the reduction in the rate was passed on to the ultimate borrowers in the primary banks. Funds are now made available to them at 6 per cent. interest. The Government have guaranteed both the principal of and the interest on the

debentures issued by the Bank satisfying certain conditions and debentures so guaranteed have become trustee securities according to an amendment of the Indian Trusts Act.

Law and Order.

The Superior Court for Civil and Criminal Judicial work in the Presidency is the High Court at Madras, which consists of a Chief Justice and thirteen puisne judges. The existing law provides for a maximum of 20 High Court Judges. For the administration of criminal justice there are 29 Sessions Judges in the Mufassal, (including three for agency tracts) Additional and Assistant Sessions Judges being provided to assist Courts in which the work is heavy. Then there are the District Magistrates, the Subordinate Magistrates and Honorary Magistrates. The administration of civil justice is carried on by 26 District Judges, and 41 Subordinate Judges and 144 District Munsiffs. In the Presidency Town there are a City Civil Court consisting of one Judge and Small Causes Court consisting of a Chief Judge and two other Judges. Madras is a litigious province and the records show one suit for every 74 persons. The Police department is under an Inspector-General who has six deputies, four in charge of ranges of the Presidency, one in charge of the Railway Police and the Criminal Investigation Department and one in charge of the Madras City Police as Commissioner of Police. A Superintendent is stationed at each district. The sanctioned strength of the Permanent police force is about 29,000 including the Malabar Special Police.

The Bengal Presidency.

The Presidency of Bengal, as constituted on the 1st April 1912, comprises the Bardwan and Presidency divisions and the district of Dargeling which were formerly administered by the Lieutenant-Governor of Bengal, and the Rajshahi, Dacca and Chittagong divisions which by the partition of the old Province had been placed under the administration of the Lieutenant-Governor of Eastern Bengal and Assam. The area of the Presidency is 82,955 square miles, and it possesses a population of 51,087,338 persons. Included within this area are the two Indian States of Cooch Behar and Tripura, which are now placed in direct political relations with the Government of India. The Governor of Bengal in Council acts as Agent to the Governor-General of India for these States. The area of the British territory is 77,521 square miles. The general range of the country however is very low, and a great fertile plain extends southward from Jalpaiguri to the forests and swamps known as the Sunderbans, which lie between the area of cultivation and the Bay of Bengal.

The People.

Of the inhabitants of the Presidency 27,810,100 or 54.44 per cent. are Mahomedans and 22,212,069 Hindus. These two major religions embrace all but 2.09 per cent of the population, Christians, Buddhists and Animists combined, number 1,043,049.

Bengali is spoken by ninety-two per cent of the population of the Presidency and Hindi and Urdu by 3.7 per cent.

Industries.

According to the returns of the census of 1931 10,503,384 persons or 20.7 per cent of the population derive their support from pasture and agriculture, and of these 6,011,495 are cultivators and 2,718,939 are agricultural labourers. The area under jute in 1933 is estimated at 2,168,700 acres against 1,845,700 in 1932. Bengal is the most important rice-producing area in Northern India, and it is computed that 87 per cent. of the cultivated area of the Presidency is devoted to its production. Other crops include barley, wheat, pulses and oil-seeds. Sugar is produced both from the sugar-cane and from the date-palm, and tobacco is grown for local consumption in nearly every district of Bengal. The area under tea in 1933 was 209,688 acres. There were 440 plantations employing a daily average of 184,762 permanent and 7,841 temporary hands.

Manufacture and Trade.—Agriculture is the principal industry of Bengal. In addition to this there are the jute mill industry, the tea industry (confined to the districts of Jalpaiguri including the Dooars and Darjeeling), the coal mining industry and the sugar industry. The jute mills in and around Calcutta and in the riparian tracts of the districts of Howrah and Hooghly constitute the principal manufacturing industry of the Presidency.

There was some improvement in the jute trade of Bengal (which began to decline since the year 1928-29) due to a rise in the price of

raw jute, as a result of the policy of voluntary restriction of jute crop, undertaken by the Government of Bengal.

The trade of Bengal during 1934-35 showed an improvement over the previous year owing to the gradual lifting of the world-wide depression. The aggregate value of the total trade of the province (excluding treasure) with foreign countries and other Indian ports increased from Rs. 1,11.58 crores in 1933-34 to Rs. 1,19.20 crores in 1934-35. Imports of private merchandise increased from Rs. 32.13 crores in 1933-34 to Rs. 35.03 crores in 1934-35, which exports of private merchandise decreased from Rs. 58.46 crores in 1933-34 to Rs. 57.30 crores in 1934-35.

Administration.

The present form of administration in Bengal dates from January 1921. In 1912 the Government of the Province underwent an important change, when, in accordance with the Proclamation of His Majesty the King-Emperor at Delhi, the Province was raised from the status of a Lieutenant-Governor to that of a Governor-in-Council, thus bringing it into line with the Presidencies of Madras and Bombay. In 1921, under the Reform Scheme, the Local Government was reconstituted, certain of the departments being placed under the control of Ministers appointed from among elected members of the Legislative Council. There are normally four members of the Executive Council, who are in charge of the "reserved subjects", and three Ministers, who are in charge of the "transferred subjects."

Bengal is administered by five Commissioners, the divisions being those of the Presidency, Bardwan, Rajshahi, Dacca and Chittagong. The unit of administration is the District Magistrate and Collector. As Collector he supervises the gathering of the revenue and is the head of all the Departments connected with it, while as District Magistrate he is responsible for the administration of criminal justice in the district. The immediate superior of the District Magistrate is the Divisional Commissioner. Commissioners are the channels of communication between the local officers and the Government. In certain revenue matters they are, in their turn, subject to the Board of Revenue in Calcutta, in other matters they are under the direct control of Government.

Justice.

The administration of justice is entrusted to the High Court of Calcutta which consists of the Chief Justice who is a Barrister and 15 Puisne Judges including one additional judge who are Barristers, Civilians or Vakils. Below the High Court are the District and Additional Judges, the Small Causes Court and Subordinate Judges and Munsifs. Of these officers, the District and Additional Judges and a certain number of Subordinate Judges are also endowed with the powers of a Criminal Court while the remainder have jurisdiction in Civil matters only. Criminal Justice is administered by the High Court, the Courts of Session and the Courts of the various classes of Magistrates. On its appellate side, the High Court disposes

of appeals from the order of a Court of Session, and it also confirms, modifies or annuls sentences of death passed by Sessions Courts. Calcutta has six Stipendiary Presidency Magistrates, including one temporary Additional Magistrate in charge of the Traffic Court. One of the Presidency Magistrates is in charge of the Children's Court, is helped by Hony Women Magistrates. It has also two Municipal Magistrates and it possesses a Court of Small Causes with Judges who dispose of cases of the class that are usually heard in County Courts in England.

In addition a number of Union Benches and Courts have been established in selected rural areas for the disposal by honorary agency of petty criminal cases and civil disputes.

Local Self-Government.

By Bengal Act III of 1884, and its subsequent amendments, which hitherto regulated municipal bodies in the interior, the powers of Commissioner of municipalities were increased and the elective franchise was extended. Bengal Act III of 1884 was repealed by Act XV of 1932 by which material changes have been introduced, e.g., the franchise of the electors have been further widened, women have been enfranchised, the proportion of elected commissioners has been increased and the term of office of the Commissioner has been extended from three to four years. Municipal expenditure now comprises a large number of objects, including veterinary institutions, employment of health officers, vaccinators and sanitary inspectors, the training and employment of female medical practitioners, the provision of model dwelling houses for the working classes, the holding of industrial sanitary and health exhibitions and the improvement of breed of cattle. The Commissioners also have large powers in regard to the water supply and the regulation of buildings.

The Municipal Government of Calcutta is governed by Act III of 1923. This Act, which replaces Act III of 1899, makes the Corporation paramount in matters relating to municipal administration. The Act provides for the appointment of a Mayor, who replaces the chairman of the old Act, a Deputy Mayor, and Executive Officer, and Deputy Executive officers, all elected by the Corporation. The appointment of the Chief Executive Officer is subject to the approval of Government. The total number of councillors, after the enactment of the Calcutta Municipal (Second Amendment) Act, 1932, is 91 with 5 Aldermen elected by the Councillors. Of the 91 seats, 81 are elected, of which 21 are reserved for Muhammadans. Ten of the councillors are nominated by Government and the rest elected by the general or special constituencies. In order to improve the insanitary and congested areas of the city, the Calcutta Improvement Trust has been created with extensive powers. In the municipal, district and local boards exercise considerable powers, with regard to public works, education and medical relief.

Bengal Act V of 1919 introduces the new system of self-government by the creation of village authorities vested with the powers and duties necessary for the management of village affairs and entrusted with powers of self-taxation. The new village authority, called the union board, replaces gradually the old *chaukidari* *panchayats* and the union committees and deals

with the village police, village roads, water supply, sanitation, primary schools and dispensaries. The Act also empowers Government to create out of the members of the union boards, village benches and courts for the trial of petty criminal and civil cases arising within the union. The Act has been extended to all districts in the Presidency except Midnapore and up to March 1933 over 4,701 Union Boards were actually constituted.

Public Works.

The Public Works Department consists of Public Works and Railway Departments and is under the charge of Secretary to Government in the Department of Agriculture and Industries.

The Public Works Department deals with questions regarding the construction of public buildings and roads.

The Railway Department deals with questions regarding acquisition of lands required by the several Railways, the alignment of new lines of Railways, and with Tramway projects.

There is a Chief Engineer who is the principal professional adviser of Government.

Marine.

The Marine Department deals with questions connected with the administration of the port of Calcutta and inland navigation, including the control and administration of Government launches except the police launches, and the Government Dockyard, Narayanganj.

Irrigation.

The Irrigation Department deals with irrigation, navigation, flood protection by means of embankments and drainage, the latter including relief from congestion of drainage by regulating the available supplies of water to suit the requirements of agriculture combined with the supply of water for irrigation in cases in which a supply is available.

Police.

The Bengal Police force comprises the Military Police, the District Police, the Railway Police, and the River Police. The Bengal Police are under the control of the Inspector-General of Police, the present Inspector-General being a member of the Imperial Police Service. Under him are Deputy Inspectors-General for the Dacca Range, the Rajshahi range, the Presidency range, the Burdwan range and the Bakarganj range and also one Deputy Inspector-General in Charge of the C.I.D. and the Intelligence Branch. Each district is in charge of a Superintendent, and some of the more important districts have one or more Additional Superintendents. The Railway Police is divided into three distinct charges, each under a Superintendent. The River Police is also under a Superintendent. The cadre comprises Assistant Superintendents, Deputy Superintendents, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, head constables and constables. There is also a Village Police, composed of *daddars* and *chowkidars*, who receive a monthly salary which is collected from the villages or unions by the Panchayat or Union Board. There is a training college and school at Sardah in the district of Rajshahi where newly appointed officers and men of the Bengal Police learn their duties. The Calcutta City Police is a separate force maintained by Government under a Commissioner who is responsible direct to Government. The Com-

missioner has under him Deputy Commissioners, Assistant Commissioners, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, head constables and constables. A school for the training of recruits for the Calcutta Police force has been established at Calcutta. The annual cost of the Police is over 277 lakhs.

The head of the Medical Department is the Surgeon General with the Government of Bengal. In the districts the Civil Surgeons are responsible for medical work. There are 44 hospitals and dispensaries in Calcutta, 11 of which are supported by the Government and 860,540 persons were treated at these institutions of whom 57,177 were in-patients. In the Mofussil districts there are 1,200 hospitals and dispensaries, the number of patients treated in them as well as in several huts, fairs, melas, subsidised and temporary dispensaries and in various medical centres was 9,083,245.

Education.

In the Presidency of Bengal education is imparted partly through Government agency and partly through private bodies, assisted to some extent by Government grants-in-aid. Government maintains four Arts Colleges in Calcutta (of which one is a college for women, one is for Mahomedans and one the Sanskrit College), one at Hughli, one at Krishnanagar, three, including the Islamic Inter College, at Dacca, one at Rajshahi and one at Chittagong. It also maintains two training colleges, one at Calcutta and one at Dacca, for teachers who teach in secondary schools through the medium of English, and 5 normal schools, one in each division, for the training of teachers in secondary schools who teach through the medium of the vernacular: also an engineering college at Sibpur and an engineering school at Dacca, two medical colleges, a veterinary college, a school of art and a commercial school in Calcutta, and a weaving school at Serampore. It also provides at the headquarters of all districts except Burdwan and Midnapore, and also at certain other mofussil centres, English high schools for the education of boys, while to some Government Arts Colleges high schools are attached. In Calcutta there are five Government high schools for boys, two of which are attached to the Presidency College and one to the Sanskrit College. Government high schools for girls exist only in the headquarters stations of Calcutta, Dacca, Mymensingh, Comilla and Chittagong. The other secondary schools, with the exception of a few middle schools managed either by Government or by municipal and district boards, are under private control. The administration of primary education in all areas, which are not under municipalities, rests with the district boards, grants being given from provincial revenues to the boards, which contribute only slightly from their own funds. Only in backward localities are such schools either entirely managed, or directly aided, by Government. Apart from the institutions referred to above, 80 institutions called Guru Training Schools are maintained by the Department for the training of primary school teachers. For the education of Mahomedans, there are senior Madrasas at Calcutta, Dacca, Chittagong, Hughli and Rajshahi which are managed by Government. There are also certain Government institutions

for technical and industrial education. All institutions for technical and industrial education (except B. E. College, the Ahsanullah School of Engineering, Dacca, the Government Commercial Institute and the Government School of Art, Calcutta) are now under the control of the Director of Industries. A large proportion of educational work of every grade is under the control of various missionary bodies, which are assisted by Government grants-in-aid.

The municipalities are required to expend a certain proportion of their ordinary income on education. They are mainly responsible for primary education within their jurisdiction, but schools in these areas are eligible also for grants from Government. These bodies maintain a high school at Burdwan, a high school at Santipur, a high school at Kusitla and a high school at Chittagong.

In 1932-33 there were in the Presidency:—

RECOGNISED INSTITUTIONS FOR MALES.

Males	1,243	54,327
Females	311	11,377

The Department is administered by a Director of Public Instruction, assisted by an Assistant Director, a special officer appointed temporarily, an Assistant Director for Muhammadan Education and a Director of Physical Education. Each division is in charge of a Divisional Inspector assisted by a certain number of Additional or Second Inspector and Assistant Inspectors for Mahomedan Education according to the requirements of the several divisions. Similarly the administrative charge of the primary education of each district is in the hands of a District Inspector assisted by Sub-Divisional Inspectors and Sub-Inspectors of Schools, the latter class of officers being in some instances helped by officers of humbler status called Assistant Sub-Inspectors and Inspecting Pandits and Maulvis. High education is controlled by the Universities of Calcutta and Dacca established in 1857 and 1921, respectively administered by the Chancellor (the Governor of Bengal), the Vice-Chancellor (appointed by Government) and a number of ex-officio, elected and nominated fellows. The University of Calcutta maintains a Law College, called University Law College, Calcutta. Dacca University also has a Law Department attached to it. Calcutta University is mainly an examining

body, but it has now made itself responsible for advanced teaching for which purpose it employs in agency which is mainly distinct from the staffs of the affiliated Colleges.

The University at Dacca is of the residential type. There is a Board for Secondary and Intermediate Education at Dacca. It conducts the Matriculation and Intermediate Examinations for the students of Institutions at Dacca

and also the Islamic Matriculations and Intermediate Examinations.

The Education of Europeans is mainly conducted by private agency, assisted by Government grants. Government however maintain a special Inspector, and also a school for boys, a school for girls (both residential) at Kurseong, and attached to the latter a Training College (for women only).

The United Provinces.

The United Provinces of Agra and Oudh lie practically the centre of Upper India. They are bounded on the north by Tibet, on the north-east by Nepal, on the east and south-east by Bihar, on the south by two of the Chota Nagpur States of the Central India Agency and the Saugor district of the Central Provinces, and on the west by the States of Gwalior, Dholpur, Bharatpur, Sirmoor, and Jubbah, and by the Punjab. Their total area amounts to 106,248 square miles, to which may be added the area of the three Indian States of Rampur, Tehriarhwal and Benares with an area of 5,943 square miles, giving a total of 112,191 square miles. The total population is 49,614,833.

The Provinces, originally termed the North-Western Provinces and so amalgamated in 1877, receiving their present designation in 1902, include four distinct tracts of country: portions of the Himalayas, including the Kumaon division which consists of three hill districts, two of which are entirely in the hills and one a half in the submontane belt, the sub-Himalayan tract; the great Gangetic plain, and portions of the hill systems of Central India including Bundelkhand. The Gangetic plain is protected by an extensive Canal system, which though somewhat liable to run short of water in extremely dry years, is of great benefit in all ordinary years and years of limited drought. The first two of these tracts are infertile and support a very sparse population and the Central Indian plateau is almost equally infertile, though better populated. The soil of the Gangetic plain, however, possesses an extreme fertility and here the density of population varies from 542 persons per square mile in the west to 555 in the centre and 753 in the east, which gives the Provinces as a whole a greater population pressure on the soil than any other Province in India save Delhi and Bengal. In the south there are low rocky hills, broken spurs of the Vindhyan mountains, covered with stunted trees and jungle, and in the north the lower slopes of the Himalayas, clothed with dense forest, affording excellent big and small game shooting, and rising beyond in a tangled mass of ridges, ever higher and higher, until is reached the line of the eternal snows, but the greater part of the provinces consists of level plain, teeming with highly-cultivated fields and watered by three rivers—the Ganges, Jumna, and Gogra.

The People.

The population is mainly Hindu, 84.4 per cent ranking as such whilst Mahomedans number 15 per cent., the total of all other religions being 0.6 per cent. composed of Christians (Europeans and Indians), Jains, Sikhs, Parsis, Buddhists and Jews. Included among the Hindus are the Arya Samajists, followers of the Arya Samaj sect, which obtains widely in the Punjab and has extended its influence to the United Provinces. The three main racial types are Dravidian, Aryan and Mongoloid, the latter being confined to the Himalayan and sub-Himalayan districts and the former to South Mirzapur and Bundelkhand, whilst the high-caste Aryans frequent the

Western districts of the Provinces. Most of the people, however, show a mixed Arya-Dravidian origin. Two languages are spoken by the majority of people in the plains, Urdu, and Hindi, Urdu being more common in the urban areas and because of its close relationship with Persian and Arabic on the one hand and Hindi on the other, forming the *lingua franca* of the Province.

Industries.

The chief industry is agriculture, which is the principal source of livelihood of 71.1 per cent of the population and a subsidiary source of income to a further 8.2 per cent. The soils of the Provinces fall into three groups: the valley soils of the Himalayas, the main alluvium and the Central Indian alluvium. The chief characteristic soil of the Central Indian alluvium is the black soil, with a lighter variant, though here also there are light loams and gravel. The Himalayan soils are of local origin and vary with the nature of the rock from which they have been formed, whilst the main alluvium soils are sand, clay and loam, the loam being naturally the most productive. The soil generally yields excellent crop of rice, millet, maize, linseed, cotton, wheat, sugarcane, pulses, and barley, rice being grown mostly in low-lying, heavy clays. The greater part of the Provinces is highly cultivated, the rainfall varies from 50 to 60 inches in the Hills, to 40 inches in the Benares and Gorakhpur Divisions, whilst the Agra Division receives only about 25 to 30 inches annually. Drought seriously affected Bundelkhand and the Agra Divisions, in the past; improved drainage and irrigation facilities have effected considerable improvements. In the latter area, however, shortage of water in the canals and the general lowering of the water table still continue to react against full agricultural returns. Steps are being taken to increase the amount of water passing down the canals. Commodity prices showed a definite decline throughout the year 1934. Though in some cases the prices in January of 1934 ruled higher than those of 1933, by December all commodity prices were at a lower level than at the corresponding date of the previous year. In general the harvested crop of 1934 was poorer than that of 1933. It cannot be said that those solely dependent on agricultural produce are in any way better off than in the previous year. Land is held mostly on the ryotwari tenure in Bundelkhand and Kumaon, on zamindari tenure in Agra and taluqdari tenure in Oudh. The principal landowners in Oudh are the Taluqdars, some of whom own very large estates. The area held in taluqdari tenure amounts to 54 per cent of the total area in Oudh.

Manufactures.

The provinces are not rich in minerals. Iron and copper are found in the Himalayan districts, and there were mines of importance there formerly, but owing to high cost of production and inaccessibility, most of them have been closed. Gold is found in minute quantities by washing the sands in some of the rivers in the hills. Limestone is found in the Himalayas and in the Etawah district, and stone is

largely quarried in the Mirzapur district. Cotton is ginned and spun throughout the Western districts of the provinces as a home industry; and weaving by means of handlooms, is carried on in most districts. Cawnpore is the chief centre for cotton spinning and weaving mills. According to the census of 1931, 45,128 persons were employed on cotton spinning, cleaning and pressing and 408,033 on spinning and weaving. Silk weaving used to be confined to Benares (where the famous 'Kimkhab' brocade is made) but considerable work is now done at Shahjahanpur and Mau and some at Agra as well. Embroidery work is done at Lucknow, where the noted 'Chikan' work of cotton on muslins is produced, and in Benares, where gold and silver work on silk, velvet, crepe and sarsonet obtains. Benares uses local gold thread for embroidery work and 'Kimkha' weaving. The glass industry is important at Firozabad, Bahjoi, Balawah and Naini (Allahabad). Moradabad is noted for its lacquered brass-work, Benares for brassware-engraving and repousse. Farrukhabad for its calico prints and Agra for its carpets and marble and alabaster articles, glazed pottery is made at Chunar and Khurja and clay figures of men and fruits at Lucknow.

The making of brass utensils at Mirzapur, Farrukhabad and Oel (District Kheri): the carving and inlay work of Nagina and Saharanpur, the art silk industry of Fanda and Mau, the lock and brass fittings industry of Aligarh, the copper utensil industry of Almora, the duries of Agra and Bareilly, the pottery of Nizamabad (District Azamgarh) and the ivory work of Lucknow also deserve mention.

Cawnpore is the chief industrial centre. It has tanneries, soap factories, oil mills, cotton, woollen and other mills. The woollen mill is the largest in India. Lucknow possesses an important paper-mill and also a cotton mill. There are cotton spinning and pressing factories at Aligarh, Meerut and Bareilly and cotton mills at Agra, Hathras, Lucknow, Benares and Moradabad. Many sugar mills have been recently started, mainly in the Gorakhpur, Rohilkhand and Meerut divisions. Excellent furniture is made at Bareilly mostly on cottage lines.

The largest trade centres are Cawnpore, Allahabad, Mirzapur, Benares, Lucknow, Meerut, Aligarh, Hathras, Muttra, Agra, Farrukhabad, Moradabad, Chandauli, Bareilly, Saharanpur, Muzaffarnagar, Ghaziabad, Khurja, Gorakhpur, Ghazipur, Pilibhit and Shahjahanpur.

Administration.

The Province was until the close of 1920 administered by a Lieutenant-Governor, chosen from the ranks of the Indian Civil Service. Under the Reform scheme the Province was raised to the status of a Governor-in-Council, the Governor being assisted by two members of the Executive Council in charge of the Reserved Subjects and two Ministers in charge of the Transferred Subjects. The medium for the transaction of public business is the Secretariat, the staff of which consists of 7 Secretaries (including Chief Secretary), two joint Secretaries and 7 Deputy Secretaries including the Director of Public Instruction and the

Deputy Legal Remembrancer who are *ex-Officio* Deputy Secretaries in the Education and Judicial Departments respectively. There are also 4 Under-Secretaries (including the Deputy Director of Public Instruction who is *ex-Officio* Under-Secretary in the Education Department) and 4 Assistant Secretaries. The Chief Secretary is in charge of Appointment, General Administration, Executive, Political, Newspaper and Police Departments; the Finance Secretary deals mainly with the Finance Department; the Revenue Secretary is in charge of the Revenue, Scarcity, Ecclesiastical and Forest Departments and also the Buildings and Roads branch of the Public Works Department; the Education Secretary is in charge of the Education, Industries, Agriculture and Excise Departments; the L. S. G. Secretary is in charge of the local Self-Government, Municipal, Medical and Public Health Departments and the Judicial Secretary is in charge of the Judicial and Legislative Departments. The seventh Secretary belongs to the Public Works Department (Irrigation Branch) and is also Chief Engineer for the Irrigation Branch of the P.W.D. Government spends the cold weather, October to April, in Lucknow and Allahabad, mostly in Lucknow, though the Secretariat remains throughout the year at Lucknow. The Governor and the Secretaries spend the hot weather in Naini Tal, but during the monsoon the Governor tours the plains, as he does also in the cold weather. The Board of Revenue is the highest court of appeal in revenue and rent cases lying within its jurisdiction, being the chief revenue authority in the province. There are forty-eight British districts, thirty-six in Agra and twelve in Oudh, average area 2,200 square miles and average population a million. Each district is in charge of a District Officer, termed a Magistrate and Collector in Agra and a Deputy Commissioner in Oudh and Kumaon. The districts are grouped together in divisions. Each division is under a Commissioner, except the Kumaon division, the charge of which is held by the Deputy Commissioner, Naini Tal, in addition to his own duties. There are ten divisions, having an average area of nearly 10,600 square miles and an average population of nearly 5 millions. The districts are sub-divided into *tahsils*, with an average area of 500 square miles and an average population of 236,000. Each *Tahsil* is in charge of a *Tahsildar*, who is responsible for the collection of revenue, and also exercises judicial powers. *Tahsils* are divided into *parganas* which are units of importance in the settlement of land revenue. Sub-ordinate to the *Tahsildars* are *naib tahsildars* and *kanungos*. Ordinarily there are three *kanungos* and one *naib tahsildar* to a *tahsil*. The *Kanungos* supervise the work of the *priwarts*, or village accountants, check their papers and form a link direct between the villagers and Government. For judicial purposes (revenue and criminal), the District Officer assigns a sub-division, consisting of one or more *tahsils*, as the case may be to each of his subordinates, who may be covenanted civilians (Joint and Assistant Magistrates and Collectors) or members of the Provincial Service (Deputy Collectors and Magistrates). The Commissioner of the Rohilkhand Division is Political Agent for

the Indian States of Rampur and Tehri-Garhwal and the Commissioner of Benares is the Political Agent for Benares State.

Justices.

Justice is administered by the High Court of Judicature at Allahabad in the province of Agra and by the Chief Court of Oudh sitting at Lucknow which are the final appellate authorities in both criminal and civil cases. The former consists of a Chief Justice and eight permanent and three temporary puisne judges six of whom including the Chief Justice are Indians, and the latter consists of a Chief Judge and four judges four of whom are Indians. There are thirty-two posts (twenty-four in Agra including two posts temporarily held in abeyance and eight in Oudh) of district and sessions judges of which nine are held by Indians not belonging to the Indian Civil Service as they have been listed to the provincial service and the bar. They have both original and appellate jurisdiction in civil and criminal cases and occasional appellate jurisdiction in rent cases. District Officers and their assistants including tahsildars, preside in criminal courts as magistrates and as collectors and assistant collectors, in rent and revenue courts and dispose of a good deal of the work. Kumaun has been brought under the Civil jurisdiction of the High Court from 1st April 1926. The deputy and assistant commissioners exercise inferior civil powers in this division which has no separate civil courts. In the rest of the provinces there are subordinate judges, judges of small cause courts and munsifs who dispose of a large number of civil suits. In Agra the jurisdiction of a subordinate judge extends to all original suits without pecuniary limit and a munsif can hear cases ordinarily of a value not exceeding Rs. 2,000, and if specially empowered up to Rs. 5,000. In Oudh the ordinary jurisdiction of a subordinate judge extends to suits valuing not more than Rs. 20,000 and the ordinary jurisdiction of a munsif to suits of Rs. 2,000 value, provided that in special cases the limit of pecuniary jurisdiction can be removed altogether in the case of a subordinate judge and that of the munsif raised up to Rs. 5,000. Appeals from munsif always lie to the district judge while those from the subordinate judges go to the High Court or the Chief Court except in cases of a value of Rs. 5,000 or less which are heard by the district judge. Small cause court judges try suits to the value of Rs. 500. There are also honorary munsifs limited to Rs. 200 suits, and village munsifs whose jurisdiction is fixed at Rs. 20.

Local Self-Government.

The main units of local self-government are the district and municipal boards which, with the exception of two municipal boards, have non-official Chairmen. Most of the municipal boards having an annual income of Rs. 50,000 or over have executive officers to whom certain administrative powers are reserved. The administrative functions of the municipal and district boards are performed by the Chairman and Executive Officer or the secretary, but the boards themselves are directly responsible for most of the administration. The district boards obtain 41% of their income from Government grants. The other chief sources of income is the local

rate levied from the landowners. Some of the boards have recently imposed a tax on circumstances and property. The United Provinces Motor Vehicles Taxation Act has come into force with effect from January 1st, 1936. The tax realised under this Act will also be utilized in the payment of grants to local authorities for purposes of expenditure on the construction, maintenance and improvement of roads. The chief source of municipal income is the octroi or terminal tax and toll which is an octroi in modified form. Local opinion is strongly in favour of indirect as opposed to direct taxation for municipal purposes.

Public Works Department.

The Buildings and Roads branch is administered by a Civilian Secretary and the principal administrative officer is a Chief Engineer. The Province is divided into circles and divisions. Each circle is in charge of a Deputy Chief Engineer and each division is in charge of an Executive Engineer. All metalled roads maintained from Provincial funds and construction of all buildings costing more than Rs. 20,000 are in charge of the Buildings and Roads branch.

The Irrigation branch is administered by a Secretary and for the present, two Joint Secretaries, all of whom are also Chief Engineers. The third Chief Engineer'ship is a temporary post to further the organisation of development schemes. The province is divided into circles and divisions.

2 The Irrigation branch administers the various irrigation works, the Ganges Canal Hydro-electric Grid, the tube-well scheme, and other development works, such as the Daurala Sugarcane tramway. The hydro-electric works, tube-wells and development schemes are in charge of the Chief Engineer (Development), the Sarda Canal and the Bundelkhand Canals in charge of the Chief Engineer (East), and the Ganges, the Eastern Jumna and the Agra (anals are in that of the Chief Engineer (West).

3. The Sarda Canal—a work of the first magnitude—was opened in 1928 for introducing irrigation into most of the districts of Oudh.

4 The Ganges Canal Hydro-electric Grid supplies power at cheap rates for domestic, industrial and agricultural purposes to 10 districts in the west of the provinces. Six of the ten falls available for electrification have been developed and another fall is in course of development. Combined with a steam station being built at Chandausi in the east of the electrified area, a total of 28,000 kilowatts or 42,000 H.P. will be available by the end of 1937. Besides supplying some 88 towns with populations of 5 thousand or over, with cheap power for light, fans and minor industries, it provides energy for irrigation pumping from rivers and low level canals as well as from tube and open wells. Out of the ultimate output of 28,000 kilowatts, 12,000 kilowatts have been reserved for operating State tube-wells which are being sunk in the districts of Moradabad, Bijnor, Muzaffarnagar, Meerut, Bulandshahr and Budham. Some 1460 tube-wells are now under construction of which about 800 are in operation for the current sugar season. By the end of 1937, one and a half million of acres of dry land outside the existing canal areas will thus receive protection. The

annual irrigation expected is 183,000 acres of sugarcane, 350,000 of wheat and 90,000 acres of other crops.

In addition to direct local irrigation from such tube-wells, water is being pumped from some 75 additional wells of larger capacities into the channels of the Ganges Canal system in the Meerut district thereby releasing 220 cusecs of river water for extending irrigation in the less fortunate tracts of the Agra and Muttra districts where local tube-wells cannot be sunk for geological reasons.

The Ganges Grid scheme thus furnishes the means of supplying a total of 3,160 cusecs for additional irrigation in the western districts or about 3rds of the cold weather flow of the Ganges river.

5. In the east of the provinces a project has been recently sanctioned for lifting 180 cusecs from the Gogra river by electric pumps to be operated by a steam generating station near Fyzabad.

6. The construction of the Damala sugarcane tramway for tapping an area of 14,000 acres of canal irrigated sugarcane in the Meerut district has been completed. This tramway will carry 105,000 tons of cane from remote areas to the rail-head on the North Western Railway at a rate of half a pie per maund per mile.

Police.

The Police Force is administered by an Inspector-General, with three Deputies and two Assistants, forty-six Superintendents, forty-six Assistant Superintendents and fifty-six Deputy Superintendents including three temporary officers. There is a Police Training School at Moradabad under a Superintendent of Police as Principal. There is a C I D forming a separate department, under a Deputy Inspector-General with three Assistants. The armed police of the three police ranges have recently been rearmed with the 410 musket, the 476 musket and the Martini Hemmille having formed their previous armament. The administration of the Jail Department is in charge of an Inspector-General of Prisons, who is a member of the Indian Medical Service.

Education.

Education is maintained in part by the State and partly by means of grants-in-aid. There are five universities, the four residential universities of Allahabad, Lucknow, Aligarh (Muslim) and Benares (Hindu) and the affiliating University of Agra. The last named was established in 1927 and consists, besides six affiliated colleges situated outside the United Provinces, of the eight colleges, formerly associated with Allahabad University on its external side, viz., the Agra and St. John's Colleges at Agra, the Christ Church, D.A.V. and Sanatan Dharma Colleges at Cawnpore, the Meerut College, Meerut, the Bareilly College, Bareilly and St. Andrew's College, Gorakhpur. There are intermediate colleges and anglo-vernacular high and middle schools which prepare boys for the high school and intermediate examinations conducted by the Board of High School and Intermediate Education, which prescribes courses for high school and intermediate education.

There are 48 Government High Schools and 8 Government Intermediate Colleges; the

remainder are under private management and are aided by Government.

The Isabella Thoburn College at Lucknow and the Crosthwaite Girls' College at Allahabad impart university education to Indian girls and the Theosophical National Girls' School and Women's College at Benares, the Muslim Girls' Intermediate College at Aligarh, Mahila Vidyalaya Intermediate College at Lucknow and Balika Vidyalaya Intermediate College, Cawnpore teach up to the intermediate stage. In addition to these there are A. V. High Schools, English Middle and vernacular Lower Middle schools and primary schools throughout the province for the education of Indian girls; they are controlled by Chief Inspectress of Girls' school, under the Director of Public Instruction. The St. George's Intermediate College, Mussorie, the Philander Smith College, Naini Tal, the St. Joseph's College, Naini Tal, and La Martiniere College, Lucknow, are the well-known institutions for European and Anglo-Indian children in the province which teach up to the intermediate stage. Besides these, there are many excellent educational institutions for European boys and girls both in the hills and plains which are attended by students from all over India. Government maintain Training Colleges for teachers in Lucknow, Allahabad and Agra, and a training department is attached to Christian Intermediate College, Lucknow. There are training departments attached to the Aligarh Muslim University and the Benares Hindu University. There is a Government Engineering College at Roorkee (Thomason College), a School of Art and Crafts in Lucknow and an Agricultural College, and a Technological Institute at Cawnpore; there is also a non-Government Agricultural Institute at Naini, Allahabad. Education in law is given at the four residential universities and at the Agra and Meerut colleges, and at the Dayanand Anglo-Vedic and Sanatan Dharma Colleges at Cawnpore and at the Bareilly College. Instruction in commerce for the B. Com. degree of the Agra University is given in the Sanatan Dharma and the D. A. V. Colleges at Cawnpore and in the St. John's College at Agra; a commerce department for B. Com. degree is also attached to Allahabad and Lucknow Universities. The King George's Medical College, Lucknow, now merged in the Lucknow University, prepares candidates for the M.B.B.S. degree of the Lucknow University. Besides this there are two medical schools at Agra for men and women and also a College of Ayurveda and Tibbiya is attached to the Benares Hindu and the Aligarh Muslim Universities respectively. Public schools for secondary and primary vernacular education are almost entirely maintained or aided by district and municipal boards and vernacular education is administered through them and the expenditure of grants for vernacular education is in their hands. Government maintains eight Normal Schools and seventeen Central Training Schools for the training of vernacular teachers. Each district has a deputy inspector of schools who is the Secretary of the Education Committee of the district board, assisted by several sub-deputy inspectors. There are seven inspectors who supervise both anglo-vernacular and vernacular education in their enclaves.

Medical.

The Medical Department is in charge of an Inspector-General of Civil Hospitals, who is assisted by a lady Superintendent for Medical aid to women in the administration of the Dufferin fund affairs. A post of Personal Assistant to the I. G. Civil Hospitals has also been created from December 8, 1934, to relieve the I. G. of the routine duties in connexion with the control of his office. A Civil Surgeon is in charge and is responsible for the medical work of each district and in a few of the larger stations he has an assistant. In two stations (Ranikhet and Roorkee) Medical Officers in military employ hold collateral civil charge. There are 102 Provincial Medical service officers in charge of important Moffusil dispensaries and on the reserve list and a large number of Provincial subordinate medical service officers. Lady doctors and women sub-assistant surgeons visit *pardanashin* women in their own homes and much good work is done in this manner.

The best equipped hospitals for Indian patients are the Thomason Hospital at Agra, King George's Hospital and the Balrampur Hospital at Lucknow, the Prince of Wales Hospital, Cawnpore, King Edward VII Hospi-

tal, Benares, the Civil Hospital at Allahabad (for Europeans, Anglo-Indians and Indians living in European style) and Saint Mary's Cottage Hospital, Mussoorie. The Ramsay Hospital for Europeans at Naini Tal is a first class institution and there are also the Lady Dufferin Hospitals. King George's Medical College, Lucknow, is one of the best equipped colleges in the country, with a staff of highly efficient professors, and the hospital attached to it is the first in the Province. The Queen Mary's Hospital for women and children, completed in 1932, is also attached to the King George's Medical College and provides clinical material for the instruction of students in midwifery and gynaecology. There are also male and female medical schools at Agra. The X-Ray Institute at Dehra Dun has been closed, but a scheme for the appointment of a Provincial Radiologist and the training of Medical Officers in X-Ray at the King George's Medical College, Lucknow, where every facility for such work would be forthcoming is under the consideration of the Government. There are sanatoria for British soldiers in the hills. The King Edward VII Sanatorium at Bhowali in the district of Naini Tal is an up-to-date and well-equipped institution for the treatment of European and Indian consumptives.

THE FINANCES OF THE UNITED PROVINCES.

As explained in the chapters on the new constitution of India, under the Reforms Act of 1919, the financial position of the Provinces underwent a remarkable change. The Provinces are, for all practical purposes, financially independent of the Government of India. The contribution payable by the Local Government has been remitted entirely by the Government of India with effect from the year 1923-29. As the finances of the Provinces thus become of greater importance, the position is set out in some detail in the following pages:—

ESTIMATED REVENUE FOR 1935-36.

Principal Heads of Revenue.		Rs.
Taxes on Salt	..	20,000
Taxes on Income	..	
Land Revenue	..	5,80,54,492
Excise	..	1,32,06,000
Stamps	..	1,70,15,500

SUPERINTENDENT, LEGISLATIVE COUNCIL DEPARTMENT.

Mr. Durga Charan Sinha.

The Punjab.

The Punjab or land of the five rivers, is so called from the five rivers by which it is enclosed, namely, the Jhelum, Chenab, Ravi, Beas and Sutlej. Together with the North-West Frontier Province and the Indian State of Jammu and Kashmir which lie to the north, the Punjab occupies the extreme north-western corner of the Indian Empire, and with the exception of the above-mentioned province comprises all of British India north of Sind and Rajputana and west of the river Jumna. Previous to October 1912, the Punjab with its feudatories embraced an area of 136,330 square miles and a population at the Census of 1911 of 24,187,750 (inclusive of 28,587 trans-frontier Baluchis), that is to say, about one-thirteenth of the area and population of the Indian Empire. But the formation of a separate province of Delhi reduced the area and population of the Punjab by about 450 square miles and 380,000 souls, respectively. The total population of the Province in 1931, including the Baloch tribes on the border of the Dehra Ghazi Khan District, was 28,490,857 of whom 4,910,005 were in the Indian States.

Physical Features.

The greater part of the Punjab consists of one vast alluvial plain, stretching from the Jumna in the east to the Suleman Range in the west. The north-east is occupied by a section of the Himalayas and the Salt Range forms its north-western angle. A few small spurs of the Aravalli mountain system traverse the extreme south-east and terminate in the Ridge at Delhi. The Punjab may be divided into five natural divisions. The Himalayan tract includes an area of 22,000 square miles, with a scanty population living scattered in tiny mountain hamlets. The Salt Range tract includes the districts of Attock, Rawalpindi and Jhelum and part of Shahpur district. Its physical configuration is broken and confused and the mountainous tracts of Murree and Kahuta approximate closely in characteristics to the Himalayan tract. Except in the hills, the rainfall leaves little margin for protection against distress in unfavourable seasons and irrigation is almost unknown. Skirting the base of the hills and including the low range of the Siwaliks, runs the narrow sub-montane tract. This tract, secure in an ample rainfall, and traversed by streams from the hills, comprises some of the most fertile and thickly populated portions of the province. Its population of over four millions is almost agricultural and pastoral but it includes one large town in Sialkot. Of the plains of the Punjab, the eastern portion covers an area of some 36,000 square miles with a population of 10½ millions. East of Lahore, the rainfall is everywhere so far sufficient that cultivation is possible without irrigation in fairly favourable seasons, but over the greater part of the area the margin is so slight that, except where irrigation is employed, any material reduction

in the rainfall involves distress, if not actual famine. Within the eastern plains lie the large cities of Lahore and Amritsar, and the population in comparison with the western Punjab is largely urban. The western plains cover an area of 59,000 square miles, with a population of a little over six millions. The rainfall in this area, heaviest in the north and east and decreasing towards the west and south is everywhere so scanty that cultivation is only possible with the aid of artificial irrigation or upon the low-lying river-banks left moist by the retreating floods. In this very circumstance, these tracts find their security against famine, for there cultivation is almost independent of rain, a failure of which means nothing worse than a scarcity of grass. So little rain is sufficient, and absolute drought occurs so seldom that the crops may be said never to fail from this cause. The western plains embrace the great colony areas on the Chenab and Jhelum Canals which now challenge the title of the eastern plains as the most fertile, wealthy and populous portions of the province. Multan and Lyallpur are the largest towns in the western area. Owing to its geographical position, its scanty rainfall and cloudless skies, and perhaps to its wide expanse of untitled plains, the climate of the Punjab presents greater extremes of both heat and cold than any other portion of India. The summer, from April to September, is scorchingly hot, and in the winter, sharp frosts are common. But the bright sun and invigorating air make the climate of the Punjab in the cold weather almost ideal.

States.

The Indian States of the Punjab were formerly in the Political charge of the Punjab Government. In 1921, however, the thirteen most important States, including Patiala, Bahawalpur, Jind and Nabha, were formed into a separate "Punjab States Agency" under the control of the Agent to the Governor-General, Punjab States. The only States remaining in the charge of the Punjab Government are the Simla Hill States, for which the Deputy Commissioner of Simla is Political Officer, and three small States in the Ambala Division, Kalsia, Patandi and Dujana, which are supervised by the Commissioner of Ambala.

The People.

Of the population roughly one-half is Mahomedan, three-eighths Hindu and one-eighth Sikh. Socially the landed classes stand high, and of these the Jats, numbering nearly five millions, are the most important. Roughly speaking, one-half the Jats are Mahomedan, one-third Sikh and one-sixth Hindu. In distribution they are ubiquitous and are equally divided between the five divisions of the province. Next in importance come the Rajputs, who number over a million and a half. The majority of them are Mahomedans by religion,

about a fourth are Hindus and a very few Sikhs. They are widely distributed over the province. Both Jats and Rajputs of the Punjab provide many of the best recruits for the Indian Army. In fact all the agricultural classes of the Punjab, except in the south-western districts, made a magnificent response to the appeal for recruits in the great war and the province's contribution of upwards of 400,000 men to the man power of the Empire speaks for itself. The Gujars are an important agricultural and pastoral tribe, chiefly found in the eastern half of the province and in the extreme north-west. In organisation they closely resemble the Jats and are often absorbed into that tribe. There are many minor agricultural tribes, priestly and religious castes (Brahmans, Sayads and Kuroshis), most of whom are landholders, the trading castes of the Hindus (Khatris, Aroras and Banias), the trading castes of the Mahomedans (Khojas, Parachas and Khakhas), and the numerous artisan and menial castes. There are also vagrant and criminal tribes, and foreign elements in the population are represented by the Baluchis of Dera Ghazi Khan and neighbouring districts in the west, who number about half a million and maintain their tribal system, and the Pathans of the Attock and Mianwali districts. Pathans are also found scattered all over the province engaged in horse-dealing, labour and trade. A small Tibetan element is found in the Himalayan districts.

Languages.

The main language of the province is Punjabi, which is spoken by more than half the population. Western Punjabi may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west. The next most important languages are Western Hindi, which includes Hindustani and Urdu (the polished language of the towns) Western Pahari, which is spoken in the hill tracts; and Rajasthani, the language of Rajputana. Baluchi, Pushto, Sindhi and Tibeto-Burman languages are used by small sections of the population.

Agriculture.

Agriculture is the staple industry of the province affording the main means of subsistence to 65·5 per cent. of the population. It is essentially a country of peasant proprietors. About one-sixth of the total area in British districts is Government property, the remaining five-sixths belonging to private owners, and a large part of the Government land is so situated that it cannot be brought under cultivation without extensive irrigation. Thus the Lower Chenab Canal irrigates 1,261,177 acres of what was formerly waste land, the Lower Jhelum Canal, 4,18,000 acres, and the Lower Bari Doab Canal, adds 1,005,000 acres to this total. On account of the opening of the Sutlej Valley canals an area of about 1,244,000 acres more has been brought under cultivation. Large areas in the hills and elsewhere which are unsuited to cultivation are preserved as forest lands, the total extent of which is about 6,000 square miles. Of the crops grown, wheat is the most important and the development of irrigation has led to a great expansion of the wheat area. Next in importance to wheat

is gram. Other important staples are barley, rice, millets, maize, oilseeds (rape, toria and sesamum), cotton and sugarcane. In the canal colonies large areas of American cotton are grown but in the other cotton-growing districts the short staple indigenous varieties are predominant. The country being preponderantly agricultural, a considerable proportion of the wealth of the people lies in live-stock. Large profits are derived from the cattle and dairy trades and wool is a staple product in Kulu and Kangra and throughout the plains generally. The production of hides and skins is also an important industry.

Industries.

The mineral wealth of the Punjab is small, rock salt, saltpetre and limestone for road building being the most important products. There are some small coal mines in the Jhelum, Shahpur and Mianwali districts. Gold washing is carried on in most of the rivers not without remunerative results. Iron and copper ores are plentiful but the difficulty of carriage and the absence of fuel have hitherto prevented smelting on a large scale. The Punjab is not a large manufacturing province, the total number of factories being only 730 the majority of which are cotton spinning and pressing factories. Blankets and woollen rugs are produced in considerable quantities and the carpets of Amritsar are famous. Silk weaving is also carried on and the workers in gold, silver, brass, copper and earthenware are fairly numerous. Ivory carving is carried on extensively at Amritsar and Leiah and also in the Patiala State. Mineral oil is being extracted and refined in the Attock and Rawalpindi Districts and a cement factory is established at Wah near Hasanabadd. There are three match factories in the Punjab, viz., one at Shahdara and two at Gujranwala and a factory for the hydrogenation and refining of oils at Lyallpur.

Administration.

Prior to the amendment of the Government of India Act in 1919 the head of the administration was a Lieutenant-Governor, drawn from the ranks of the Indian Civil Service. Under the amended Act the province was raised to the status of a Governorship, with an Executive Council and Ministers, the Governor-in-Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects. The general system of provincial administration under this scheme is sketched in the section "Provincial Governments" (q v.) where is also given a list of the Reserved and Transferred Subjects. Associated with the Governor and the Council and Ministers is an enlarged Legislative Council, with wide powers, whose scope and authority are given in the section "Legislative Councils" (q v.), the system being common to all the major provinces. The business of Government is carried on through the usual Secretariat which consists of five Secretaries, designated (1) Chief, (2) Home, (3) Finance, and (4) Transferred Departments, (5) Electricity and Industries Deptt., one Deputy Secretary, two Under-Secretaries, and one Assistant Secretary. In the Public Works Department, there are five Chief Engineers (Secretaries except in the case of Hydro-Electric Branch) one in the Buildings and

Roads Branch, one in the Hydro-Electric Branch and three in the Irrigation Branch, while the Legal Remembrancer is also the Secretary to Government in the Legislative Department. The head of the Police Department is Joint Secretary and of Education Department an Under Secretary to Government. The Government winter in Lahore and the summer (from the middle of May to the middle of October) in Simla. Under the Governor, the province is administered by five Commissioners (for Ambala, Jullundur, Lahore, Rawalpindi and Multan) who exercise general control over the Deputy Commissioners—29 in number—each of whom is in charge of a district.

The principal heads of Department in the province are the two Financial Commissioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Agriculture and the Court of Wards), the five Chief Engineers, the Inspector-General of Police, the Director of Public Instruction, the Inspector-General of Prisons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co-operative Credit Societies and Joint Stock Companies and the Legal Remembrancer.

Justice.

The administration of justice is entrusted to a High Court, which is the final appellate authority in civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil jurisdiction in special cases. The Court sits at Lahore and is composed of a Chief Justice and eight Puisne Judges (either civilians or barristers), and temporary Additional Judges, two Subordinate to the High Court are the District and Sessions Judges (25 in number) each of whom exercise civil and criminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Frontier Crimes Regulation is in force the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment.

Local Self-Government.

Local Self-Government is secured in certain branches of the administration by the constitution of District Boards, each exercising authority over a district; of Municipal, Small Town, and Notified Area Committees each exercising authority over an urban area, and of Panchayats, each exercising authority over a revenue estate or a compact group of revenue estates. The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession taxes and miscellaneous fees, and those of Municipal, Small Town, and Notified Area Committees from octroi or terminal tax and other forms of taxation from Government grants and from rents and miscellaneous fees. The Panchayat system is an attempt to revive the

traditional village community organisation, the elected committee or Panchayat possessing certain powers in respect of taxation, local option, civil and criminal justice, the abatement of nuisances and other matters. Most of the members of practically all local bodies are now elected and elections are as a rule keenly contested.

Police.

The Police force is divided into District Police, Railway Police and Criminal Investigation Department. The combined force is under the control of the Inspector-General, who is a member of the gazetted force and has under him three Deputy Inspectors-General in charge of ranges comprising several districts and a fourth Deputy Inspector-General in charge of the Criminal Investigation Department and of the Finger Print Bureau at Phillaur. There is a Police Training School at Phillaur controlled by a Principal of the rank of Superintendent of Police. The Railway Police are under an Assistant Inspector-General. The District Police are controlled by Superintendents, each of whom is in charge of a district and has under him one or more Assistant Superintendents or Deputy Superintendents.

Education.

The strides which have been made in the past decade especially in the concluding years of the period, have brought the Punjab into line with the older and more forward provinces. The advance has not been confined to any one form of education but is spread over all grades and varieties. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains sixteen arts colleges (including one for Europeans and three for women), three normal schools for males, sixteen training classes, and combined institutions for females, one hundred and twenty-two secondary schools for boys and girls and sixty centres for vocational training. Apart from these institutions for general education, Government maintains seven higher grade professional institutions, viz., the King Edward Medical College and Veterinary College at Lahore, the Agricultural College at Lyallpur, the Engineering College at Mughalpur, the Central Training College, Lahore the Lady MacLagan Training College for women Lahore, and the Chelmsford Training College at Ghoragali, and two schools, viz., the Medical School at Amritsar and the Engineering School at Rasul. In addition there are thirty-five technical and industrial schools (thirty-two for males and three for females) scattered over the province.

The Department of Education is in charge of the Minister for Education who is assisted in the work of administration by the Director of Public Instruction.

Medical.

The Medical Department is controlled by the Inspector-General of Civil Hospitals, who is an officer of the Indian Medical Service holding the rank of Colonel. He is assisted by an officer designated the Assistant Inspector-General of Civil Hospitals, who is at present an officer of the Indian Medical Department of the rank of a Civil Surgeon.

Public Health.

The Department of Public Health is controlled by the Director of Public Health who has, working under him, four Assistant Directors of Public Health, 37 District Medical Officers of Health, and twenty-eight District Sanitary Inspectors. In addition there is a temporary staff of 10 Sub-Assistant Health Officers and 15 Sanitary Inspectors for assistance in combating epidemic diseases. The ancillary services comprise

(1) A Vaccine Institute which is in charge of the Assistant Director of Public Health, Punjab (Technical) Vaccination, assisted by a Superintendent and which prepares sufficient vaccine lymph to meet the needs not only of the Punjab, but of the Army in Northern India and of several provinces and Indian States in and beyond the confines of India.

(2) An epidemiological bureau, which is in charge of the Epidemiologist to Government where, in addition to routine bacteriological examination, research work in matters bearing upon public health problems is carried out.

(3) An Education Bureau, to which is attached a photographer and a draftsman.

(4) A Chemical Laboratory in charge of a fully trained chemist whose duties comprise the chemical analysis of water samples and food stuffs.

(5) A Public Health Equipment Depot which supplies Government Institutions, local bodies, etc., with reliable disinfectants, vaccine sera, etc.

(6) A Public Health School, the staff of which is responsible for the training of health visitors. The Principal, who is also Inspector of Health Centres, supervises the maternity and child welfare work throughout the province.

In matters connected with sanitary works the Director of Public Health works in close touch with the Superintending Engineer, Public Health Circle, Punjab, who acts as technical adviser of the Public Health Department in engineering matters. This officer and the Director of Public Health are also the technical advisers of the Sanitary Board whose duty it is to examine and report upon sanitary schemes put forward by local bodies.

Administration.

Governor, H. E. Sir Herbert William Emerson, K.C.S.I., C.I.E., C.B.E., I.C.S.

PERSONAL STAFF.

Private Secretary, Major R. T. Lawrence, C.I.E., M.C., Hodson's Horse.
Aides-de-Camp—Lieut. L. P. Le-Marchand, 5th Royal Gurkha Rifles (F.F.), Capt. V. E. O. Stevenson-Hamilton, 4th P.W.O. Gurkha Rifles; Lieut. W. H. Skrine, Royal Artillery.
Indian Aides-de-Camp—Hony Capt. Sansar Chand, Bahadur, 1st B.M. late 12th F. F. Regiment, Subedar Sirajuddin, late 12th F. F. Regiment, Hony. Captain Sardar Bahadur Chanda Singh, I.O.M.

MEMBERS OF COUNCIL.

The Hon'ble Khan Bahadur Nawab. Muzaffar Khan, C.I.E. (Revenue).
 The Hon'ble Mr. D. J. Boyd, C.I.E., I.C.S. (Finance).

MINISTERS.

The Hon'ble Sardar Sir Jogendra Singh, Minister for Agriculture.
 The Hon'ble Dr. Gokul Chand Narang, M.A., Ph.D., Minister for Local Self-Government.

CIVIL SECRETARIAT.

Chief Secretary, F. H. Puckle, C.I.E., I.C.S.
 Home Secretary, A. V. Askwith, I.C.S.
 Financial Secretary, Ramchandra, C.I.E., M.B.E., I.C.S.
 Secretary, Transferred Departments, W. G. Bradford, I.C.S.

Public Works Department.**Irrigation Branch.**

Secretary, (Southern Canals), F. J. T. B. Tate.
 Secretary, (Northern Canals), F. J. Waller, C.I.E.
 Secretary, (Construction), J. D. H. Bedford.
 Buildings and Roads Branch.

Secretary, D. Macfarlane.
 Financial Commissioners, A. Latif, C.I.E., O.B.E., I.C.S. (Revenue), M. L. Darling, I.C.S. (Development.)

MISCELLANEOUS DEPARTMENTS.

Director of Agriculture, H. R. Stewart, I.A.S.
 Director of Land Records and Inspector General of Registration, Khan Sahib Khwaja Abdul Majid, M.B.E.
 Director of Public Instruction, J. E. Parkinson.
 Inspector General of Police, Sir J. M. Ewart, C.I.E.
 Chief Conservator of Forests, R. N. Parker, I.F.S.
 Inspector-General of Civil Hospitals, Colonel C. H. Reinhold, M.C., F.R.C.S.E., I.M.S.
 Director of Public Health, Khan Bahadur, Dr. K. A. Rahman, O.B.E.
 Inspector-General of Prisons, Lt.-Col. N. D. Puri, I.M.S.
 Accountant-General, J. G. Bhandari, M.A.
 Postmaster-General, Mr. C. N. Garnier, O.B.E.
LIEUTENANT-GOVERNORS OF THE PUNJAB.

Bakim Ahmed Shuja, Khan Sahib, B.A., Assistant Secretary, Legislative Council, 3, Qutab Road, Lahore.	

Burma.

The Province of Burma lies between Assam on the North-West and China on the North-East, and between the Bay of Bengal on the West and South-West and Slam on the South-East. Its area is approximately 261,000 square miles, of which 192,000 are under direct British Administration, 7,000 are unadministered and 62,000 belong to semi-independent Native States. The main geographical feature of the country is the series of rivers and hills running fan-like from North to South with fertile valleys in between widening and flattening out as they approach the Delta. Differences of elevation and rainfall produce great variations in climate. The coastal tracts of Arakan and Tenasserim have a rainfall of about 200 inches, the Delta less than half that amount. The hot season is short and the monsoon breaks early. The maximum shade temperature is about 96°, the minimum about 60°. North of the Delta the rainfall decreases rapidly to 30 inches in the central dry zone which lies in a "rain shadow" and has a climate resembling that of Bihar. The maximum temperature is twenty degrees higher than in the wet zone, but this is compensated by a bracing cold season. To the north and east of the dry zone lie the Kachin hills and the Shan plateau. The average elevation of this tableland is 3,000 feet with peaks rising to 9,000. Consequently it enjoys a temperate climate with a rainfall of about 70 inches on the average. Its area is over 50,000 square miles. There is no other region of similar area in the Indian Empire so well adapted for European colonization. The magnificent rivers, the number of hilly ranges (Yomas), and the abundance of forests, all combine to make the scenery of Burma exceedingly varied and picturesque.

The People

The total population of Burma at the census of 1931 was 14,667,146. There were 9,092,214 Burmans, 1,037,406 Shans, 1,367,673 Karens, 153,345 Kachins, 348,904 Chins, 534,985 Arakanese and Yaukyes, 336,728 Talains and 138,739 Palungs. There is also a large alien population of 193,594 Chinese and 1,017,825 Indians, while the European and Anglo-Indian population numbered 30,441, and Indo-Burmans, 182,166.

The Burmans, who form the bulk of the population, belong to the Tibetan group and their language to the Tibeto-Chinese family. They are essentially an agricultural people, 80 per cent of the agriculture of the country being in their hands. The Burmese and most of the hill tribes also, profess Buddhism, but Animism, or the worship of nature spirits, is almost universal.

In appearance the Burman is usually somewhat short and thick set with Mongolian features. His dress is most distinctive and exceedingly comfortable. It consists of a silk handkerchief bound round his forehead, a loose jacket on his body and a long skirt or longyi tied

round his waist, reaching to his ankles. The Burmese women, perhaps the most pleasing type of womanhood in the East, lead a free and open life, playing a large part in the household economy and in petty trading. Their dress is somewhat similar to the men's minus the silk kerchief on the head, and the longyi is tucked in at the side instead of being tied in front. A well dressed and well groomed Burmese lady would, for grace and neatness, challenge comparison with any woman in the world.

Communications.

The Irrawaddy, and to a less extent the Chindwin, afford great natural thoroughfares to the country. At all seasons of the year these rivers, especially the Irrawaddy, are full of sailing and steam craft. In the Delta the net-work of waterways is indeed practically the only means of communication. The Irrawaddy Flotilla Company, with a fine fleet of mail, cargo and ferry boats, gives the Irrawaddy and the Delta rivers and creeks a splendid river service.

The Burma Railways has a length of 2,059.89 miles open line. The principal lines are from Rangoon to Mandalay, from Mandalay to Myitkyna, the most northern point in the system; the Rangoon-Prome line; and the Pegu-Martaban line, which serves Moulmein on the further bank of the Salween River.

Industry.

Agriculture is the chief industry of the province and supports nearly three-fourths of the population. The net total cropped area is 16½ million acres of which nearly 1 million acres are cropped more than once. Irrigation works supply water to nearly 1½ million acres. India is very largely dependent on Burma for her supplies of kerosene, benzine and petrol which rank second to rice in order of importance. Teak wood is exported in large quantities from Burma to India.

Forests play an important part in the industrial life of the Province. The forest reserves cover some 34,793 square miles, while unclosed forests are estimated at about 1,81,697 square miles. Government extracts some 25,331 tons of teak annually, private firms, of whom the Bombay Burma Trading Corporation and Steel Brothers are the chief, extract over 4,20,085 tons. Other timber extracted by licensees amounts to 3,28,694 tons and firewood 10,28,396 tons.

Tin and wolfram are found chiefly in the Tavoy and Mergui Districts. Wolfram and tin are found together in most mining areas in Tavoy, the proportion varying from almost pure tin to almost pure wolfram. There has been an improvement in the price of tin.

The improvement in the output of tin and wolfram continues. The output in 1934 was 315,705 tons as against 2943.62 tons in 1933. Silver, lead and zinc ore are extracted by the Burma Corporation at Bawdwin in the Northern

Shan States. Copper in small quantities is also found there. There are small deposits of Molybdenite in Tavoy and Mergui and of platinum in Myitkyna. Mining of precious stones in the Mogok Stone Tract of the Katha District continued to be carried out by natives working under licences. The output of rubies during 1934 was 21,810 carats as compared with 1,106 carats in 1933. The output of amber in 1934 was 3,696 cwt. The output of Burmese Jadeite during 1934 compared with that of the previous year showed an increase of 923 137 cwts. The oldest and largest Oilfield in the province is at Yenangyaung in the Magwe District where the Burma Oil Company has its chief wells. There were increases in the output from the wells in the Yenangyaung Oilfield and in the Minbu Thayebyio, Upper Chindwin and Pakokku Districts due to increased drilling operations in these areas. There were decreases in the output in the Chauk Oilfield and in the Kyaukpadaung District due to the natural decline in the production of oil from existing wells. The output of petroleum during 1934 exceeded that of 1933 by 57,59,172 gallons, the increase being mainly from wells in the Pakokku District and the Yenangyaung Oilfield of the Magwe District. The increase in the Pakokku District may be ascribed to greater activity on the part of the Burma Oil Company and British Burma Petroleum Company at Yenangyaung, but more especially to the development at Lanywa by the Indo-Petroleum Company. The Burma Oil Company take their oil to the refineries at Rangoon by pipe line from the Yenangyaung and Singu Oilfields. Other companies take it down by river flats. The area under rubber is 100,353 acres.

Manufactures.

There are 1,007 factories, more than half of which are engaged in milling rice and nearly one-seventh are sawmills. The remainder are, chiefly engineering works, cotton spinning mills, oil mills for the extraction of oil from groundnuts, printing presses, ice and aerated water factories, and oil refineries connected with the petroleum industry. The total number of persons employed in establishments under the Indian Factories Act in 1934 was 89,095. Perennial factories employed 40,967 and seasonal factories 48,128. At the Census of 1931, 1,850,176 or 29.79 per cent. of the total population were engaged outside agriculture and production.

As is the case in other parts of the Indian Empire, the imported and factory made article is rapidly ousting the home-made and indigenous. But at Amarapura in the Mandalay District a revival has taken place of hand silk-weaving. Burmese wood-carving is still famous and many artists in silver still remain, the finish of whose work is sometimes very fine. Bassein and Mandalay parasols are well known and much admired in Burma. But perhaps the most famous of all hand-made and indigenous industries is the lacquer work of Pagan with its delicate patterns in black, green, and yellow traced on a ground-work of red lacquer over bamboo. A new art is the making of bronze figures. The artists have gone back to nature for their models, breaking away from the conventionalized forms into which their silver

work had crystallized and the new figures display a vigour and life that make them by far the finest examples of art the province can produce.

Administration.

Burma, which was originally administered as a Lieutenant-Governorship, was deliberately excluded from the operation of the Reform Act of 1919. It was felt that the Province differed so markedly from the other Provinces in the Indian Empire that its requirements should be separately considered. After repeated discussions the question was referred to a special Burma Reforms Committee, which in 1922 recommended that all the essential provisions of the Reform Act should be applied to the Province. This recommendation was accepted and its proposals became law. Under this Act Burma became a Governor's Province, with an executive council and ministers, and conforms to the provinces recreated under the Act of 1919 (q.v.). The main difference is in the size of the electorate. Under the franchise accepted, the rural electorate is estimated at 1,979,450 and the urban electorate has been put as high as 99,892. The Legislative Council consists of 103 members, of which 80 are elected and the balance nominated. Owing to the special status of women in Burma, female franchise was adopted from the beginning.

Burma is divided administratively into Upper Burma (including the Shan States, the Kachin and Chin Hills) and Lower Burma. The Shan States are administered by the Chiefs of the States, subject to the supervision of the Commissioner, Federated Shan States, who is also Superintendent for the Southern Shan States, and the Superintendent of the Northern Shan States. The Northern and Southern Shan States were formed into a Federation on the 1st October 1922, and are designated the F. S. States. The other Shan States in Burma are subject to the supervision of the Commissioner, Sagaing Division. The Civil, Criminal and Revenue administration is vested in the Chief of the State, subject to the restrictions contained in the sanad. The law administered is the customary law of the State.

Under the Governor are eight Commissioners of divisions, three in Upper, four in Lower Burma, and one in the Federated Shan States.

Justice.

The administration of Civil and Criminal Justice is under the control of the High Court of Judicature at Rangoon, which consists of a Chief Justice and ten other permanent Judges. The Superior Judicial Service consists of District and Sessions Judges; there are also separate Provincial and Subordinate Judicial Services.

All village headmen have limited magisterial powers and a considerable number are also invested with civil jurisdiction to a limited extent.

In pursuance of the policy of decentralization steps were taken in 1917 to restore to the village headmen the power and influence which they possessed in Burmese times before the centralizing tendencies of British rule made them practically subordinate officers of the administration.

Public Works.

The P.W.D. comprises two Branches, viz., the Buildings and Roads Branch and the Irrigation Branch.

The B. & R. Branch of this Department which is under the Ministry of Forests is administered by one Chief Engineer. There is also a Personal Assistant to the Chief Engineer. There are five permanent Superintending Engineers in charge of Circles, three of which are stationed at Rangoon and two at Maymyo. These are officers of the administrative rank.

Those of the executive rank are the Executive Engineers and Assistant Executive Engineers who number 24 (twenty four), including the Personal Assistant to the Chief Engineer, on the cadre of the Indian Service of Engineers. Besides this there is also the Burma Engineering Service (Class I) which has been constituted for the purpose of gradually replacing the Indian Service of Engineers in the B & R. Branch, so far 18 appointments have been made to the latter service. There are 16 officers in service at present.

The Irrigation Branch of the P.W.D., which is under the control of the Hon'ble Finance Member, is administered by the Chief Engineer, P.W.D., Burma Irrigation Branch, who is assisted by a Personal Asstt. There are two permanent Superintending Engineers in charge of Circles, one of whom is stationed at Rangoon and the other at Maymyo. These are officers of the Administrative rank.

Those of the Executive rank are the Executive Engineers and Asst. Executive Engineers who number 17 on the cadre of the Indian Service of Engineers. Besides this there is also the Burma Engineering service, which is a Provincial Service.

Further, there is a River Training Expert. On account of reduction of works due to the financial stringency the number of temporary Engineers recruited to augment the permanent staff has been reduced to one.

Police.

The Police Force is divided into Civil, Military and Rangoon Town Police. The first two are under the control of the Inspector-General of Police, the latter is under the orders of the Commissioner of Police, Rangoon, an officer of the rank of Deputy Inspector-General. There are five other Deputy Inspectors-General, one each for the Northern, Southern and Western Ranges, one for the Railway and Criminal Investigation Department, and one for the Military Police.

A special feature of Burma is the Military Police. Its officers are deputed from the Indian Army. The rank and file are recruited from natives of India with a few Kachins, Karens and Chins. The experiment of recruiting Burmese on a small scale has been successful. The organisation is military, the force being divided into battalions. The object of the force is to supplement the regular troops in Burma. Their duties, apart from their military work, are to provide escorts for specie, prisoners, etc., and guards for Treasuries, Jails and Courts.

Education.

Under the Minister for Education there is the Director of Public Instruction with an Assistant Director, both belonging to the Indian Educational Service. There are eight Inspectors of Schools drawn from the Indian Educational Service, and the Burma Educational Service (class I) while the Burma Educational Service (class II) provides eight Assistant Inspectors. There is one Asstt. Inspector of School Physical Training, appointed on a Temporary basis. There is also one Inspector of Schools. There is a Chief Education Officer for the Federated Shan States.

A centralized, teaching and residential University for Burma, has been established in Rangoon. It now provides courses in Arts, Science, Law, Education, Economics, Engineering, and Medicine.

English and A. V. Schools are controlled by the Education Dept. A remarkable feature of education in Burma is the system of elementary education evolved, generations ago, by the genius of the people. Nearly every village has a monastery (hpooongyi-kvaung); every monastery is a village school and every Burman boy must, in accordance with his religion, attend that school, shaving his head and for the time wearing the yellow robe. At the hpooongyi-kyaungs the boys are taught reading and writing and an elementary native system of arithmetic. The result is that there are very few boys in Burma who are not able to read and write. Vernacular education is in the hands of Local Educational authorities.

Among special institutions, the Government Technical Institute, Insein, provides courses in Mechanical, Civil and Electrical Engineering and the Agricultural College, Mandalay, courses in Agriculture. The Mary Chapman Training College for Teachers and School for the Deaf exists in Rangoon and schools for the blind, at Moulmein and Rangoon.

A liberal scheme of State Scholarships provides for the despatch of 6 to 12 scholars to Europe each year.

Medical.

The control of the Medical Department is vested in an Inspector-General of Civil Hospitals. Under him are 37 Civil Surgeons. There are also a Director of Public Health, two Assistant Directors of Public Health, the senior of whom is also Director, Public Health Institute, at which there is now a Public Analyst (which post is at present held in abeyance for purposes of economy) and to which is also attached a Malaria Bureau. There are also an Inspector-General of Prisons, three whole-time Superintendents of Prisons, a Chemical Examiner and Bacteriologist and a Superintendent of the Mental Hospital. There is also a post of Hygiene Publicity Officer, which for the present is held in abeyance.

The Pasteur Institute was opened in Rangoon, July 1915. The Director is a member of the Indian Medical Service.

THE FUTURE OF BURMA.

Throughout the discussions on the Indian Reforms proposals the question of Burma's future occupied a secondary position, as nothing could be definitely settled until the Burmans themselves decided whether they would join the proposed all-India Federation and share the lot of the Indian provinces, or become a separate unitary entity with constitutional advance analogous to that conferred on India, subject to similar safeguards. It was thought that a new election of the Burma Legislative Council would give the electorate an opportunity to express itself on this question. The election was held and resulted in a majority for the anti-separationists. When, however, the new Council was called upon to give a straight answer to the question separation or Federation on the lines of His Majesty's Government's proposals it declined to do so. A large number of resolutions were tabled, but not one of them provided a clear indication of the people's mind. Even the anti-separationists did not vote for Federation, but expressed a desire to cast their lot with India as an experimental measure, reserving the right to withdraw from the Federation at a later date. Several adjournments were granted to enable the parties to arrive at a compromise resolution and, after the Governor had refused further to prolong the sittings, which had lasted several days, the special session of the Council was prorogued.

If Burma herself gave an inconclusive verdict the British Government could remain idle, but that would have been unkind both to India and Burma. Therefore, a few months later (in August) Sir Samuel Hoare presented to the Joint Parliamentary Committee a memorandum embodying Government's proposals for the future constitution of Burma if it were decided to separate Burma from India. He, however, made it clear that if the Joint Committee decided that Burma should be included in the Indian Federation, the proposals of the White Paper (subject to consequential adjustments) would apply to Burma in the same way as they would apply to any other province of India. As the Burma Council had refused to choose separation on the basis of the constitution outlined by the Premier, he suggested that the Committee should invite some Burma representatives for consultation to assist in determining which of the two courses would be in the best interests of Burma. Assuming that Burma was to be separated, he outlined a scheme of constitutional advance under which executive authority in a unitary Burma would vest in the Governor, who would also be the Commander-in-Chief. He would himself direct and control the administration of finance, external affairs, ecclesiastical affairs, monetary policy, currency, coinage, and matters connected with scheduled areas. Other subjects would be administered by Ministers elected by, and responsible to, the Council. The Legislature would be bicameral.

Shortly after the submission of this memorandum Sir Samuel expressed the opinion that an overwhelming body of Burmans had

supported separation from India. He added that Burma could not be granted the right of secession, as it would be a bad precedent and would be fatal to Federation.

In pursuance of the policy of giving Burmans the fullest opportunity to determine the future form of their constitution, the Joint Parliamentary Committee decided in November to invite twelve representative Burmans for consultation. A prolonged discussion took place in December, in which both sides freely ventilated their respective points of view. "The result of the elections to the special session of the Burma Council should be construed as a vote against separation"; "There are no two opinions in Burma, all are for separation, the so-called federationists are also for separation—but after a time." These were the conflicting views expressed in London. On behalf of His Majesty's Government, Sir Samuel made it plain that Britain had no axe to grind and that she was actuated solely by the desire to do the best for Burma. The controversy was set at rest by the publication of the report of the Joint Parliamentary Committee (see Joint Parliamentary Committee section) which provided for the separation of Burma and the establishment of a separate unitary constitution for Burma.

The Joint Parliamentary Committee's Report, was discussed by the Burma Legislative Council, which rejected a motion opposing separation and rejecting the constitution proposed by the Committee. A proposal favourable to the immediate grant of Dominion Status to Burma was carried.

Shortly after the publication of the J. P. C. Report, which covered Burma also, representatives of the Burman and Indian Governments entered into negotiations to settle the future financial and commercial relations between the two countries. These negotiations resulted in an agreement maintaining the *status quo* for a period of five years, a proposal to allow a certain latitude for low revenue duties having been abandoned. Commenting on this agreement in the House of Commons, Sir Samuel Hoare advised representatives of British trade not to ask for any special safeguards for British trade and industry at the present stage on the ground that any attempt to obtain concessions which the Indian and Burman Governments were unwilling to offer of their own accord would adversely affect British trade with India.

A tribunal was also appointed to advise the Secretary of State on the formulation of a just financial settlement between India and Burma. The tribunal's report was published in May, 1935. Taking the figures up to the year ending March, 1933, the Tribunal declared, that on the basis of 3½ per cent interest, Burma would pay India over two crores of rupees annually for 45 years to redeem principal and interest.

THE FINANCES OF BURMA.

In common with the other Provinces of India, the financial arrangement between the Government of India and the Government of Burma underwent a remodelling in consequence of the reconstitution of the Province on the lines of the other Indian Provinces. The Province obtained substantial financial independence. The present position is set out in the following statement—

ESTIMATED RECEIPTS FOR 1935-36.
(A) REVENUE RECEIPTS—ORDINARY.

	Rs.
Salt	1,85,000
Land Revenue	4,32,51,000
Excise	83,47,000
Stamps	42,02,000
Forest	83,80,000
Registration	3,43,000
Scheduled Taxes	10,88,000
Irrigation, etc., Works with Capital Accounts	32,25,000
Irrigation, etc., Works (No Capital Accounts)	1,41,000
Interest	3,18,000
Administration of Justice	8,40,000
Jails and Convict Settlements	8,04,000
Police	9,71,000
Ports and Pilotage	1,84,000
Education	5,02,000
Medical	5,75,000
Public Health	1,60,000
Agriculture	1,03,000
Industries	26,000
Miscellaneous Departments	4,56,000
Civil Works	15,55,000
Receipts in aid of Superannuation	92,000
Stationery and Printing	1,37,000
Miscellaneous	1,76,000
Miscellaneous Adjustments between Central and Provincial Governments	18,00,000
Total (a)	7,78,71,000

(b) REVENUE RECEIPTS, —
EXTRAORDINARY

Extraordinary Receipts	6,000
Total (a) & (b)	7,78,77,000

(c) DEBT HEADS

Appropriation for reduction or avoidance of debt	16,92,000
Depreciation Fund - Government Presses
Subvention from the Central Road Development Account	11,00,000
Loans and Advances by Provincial Government	16,74,600
Civil Deposits	38,400
Advances from Provincial Loans Fund	93,08,000
Total (c)	1,38,13,000
Total (a) (b) & (c)	9,16,90,000
Opening Balance	3,000
Grand Total	9,16,93,000

ESTIMATED DISBURSEMENTS FOR
1935-36.

(A) EXPENDITURE CHARGED TO REVENUE	Rs.
Land Revenue	52,41,000
Excise	17,77,000
Stamps	1,00,000
Forest	58,04,000
(a) Forest Capital Outlay	17,000
Registration	1,46,000
Scheduled Taxes	1,000
Int. on wks with cap Accts.	26,59,000
Other Revenue Expenditure	7,63,000
Interest on Ordinary Debt	6,95,000
Appropriation for reduction or avoidance of debt	16,92,000
General Administration	98,99,000
Administration of Justice	56,72,000
Jails and Convict Setts.	28,82,000
Police	1,52,74,000
Ports and Pilotage	3,45,000
Scientific Departments	58,000
Education	81,82,000
Medical	41,20,000
Public Health	9,01,000
Agriculture	16,57,000
Industries	1,83,000
Miscellaneous Departments	3,15,000
Civil Works	90,03,000
Famine	10,000
Suprn Allowns & Pensions	77,94,000
Stationery and Printing	7,82,000
Miscellaneous	12,54,000
Extraordinary Charges	1,000
Total (a)	8,71,72,000

(b) EXPENDITURE NOT
CHARGED TO REVENUE

Capital Outlay on Forests
Construction of Irrgn., etc., Works	9,51,000
Civil Works
Payment of Commuted value of Pensions	1,17,000
Payments to Retrenched Personnel	40,000
Total (b)	10,28,000
Total (a) & (b)	8,82,00,000

(c) DEBT HEADS.

Subvention from the Central Road Development Account	5,90,000
Depr Fund—Govt Presses	34,900
Loans and Advances	7,25,300
Civil Deposits	38,400
Advances from Provincial Loans Fund	21,03,400
Total (c)	34,92,000
Total (a) (b) & (c)	9,16,92,000
Closing Balance	1,000
Grand Total	9,16,93,000

Administration.

Governor, H. E. Commander the Hon Archibald Douglas Cochrane, D.S.O.
Private Secretary, Captain Arthur Denis Macnamara, Skinners Horse
Aides-de-Camp, Lieutenant A. M. Hicks, 1st Battalion, The Prince of Wales' Volunteers (South Lancashire), C. R. D. Gray, Skinners Horse
Honorary Aides-de-Camp, Captain H. W. B. Livesay, O.B.E., R.I.N., Col. F. A. G. Roughton, I.A.
Indian Aides-de-Camp, Subadar-Major Lasang Gam, late of the 3-20th Burma Rifles, Naib Commandant Atta Mohamed Khan, Khan Bahadur, Reserve Battn, Burma Military Police

EXECUTIVE COUNCIL

The Hon'ble Sir Maung Ba, K.S.M.
 The Hon'ble Mr. Idwal Geoffrey Lloyd, C.S.I., I.C.S.

Ministers.

The Hon. U Ba Pe
 The Hon. Dr. Ba Maw, Bar-at-Law.

Miscellaneous Appointments.

Director of Agriculture, J. Charlton, M.Sc. F.R.C.
Commissioner, Federated Shan States, Taunggyi, Southern Shan States, H. L. Nichols, I.C.S.
Superintendent, Northern Shan States, J. Shaw
Director of Public Instruction, P. B. Quinlan, B.A., I.E.S.

Bihar.

As in the case of Bombay Presidency, the province known hitherto as Bihar and Orissa as suffered a territorial diminution owing to the constitution of the Orissa Division as a separate province. The following details therefore appertain to the new Bihar province after the separation of Orissa as from April 1, 1936.

Bihar lies between 26°-30' and 27°-30' N. latitude and between 82°-31' and 88°-26' E. longitude and includes the provinces of Bihar and Chota Nagpur, and is bounded on the north by Nepal and the Darjeeling district of Bengal; on the east by Bengal and the Bay of Bengal; on the south by the new province of Orissa, and on the west by the United Provinces of Agra and Oudh and the Central Provinces.

The area of the territories which constitute the Governorship of Bihar is 59,348 square miles. The States in Chota Nagpur which were included in the Province have since the 1st April 1933 been transferred to the control of the Agent to the Governor-General, Eastern States and no longer form part of the Province. Chota Nagpur is a mountainous region which separates them from the Central Indian Plateau. Bihar comprises the valley of the Ganges from the spot where it issues from the territories of the Governor of the United Provinces of Agra and Oudh till it enters Bengal near Rajmahal. South of Bihar lies Chota Nagpur. Following the main geographical lines there are four Civil Divisions with headquarters at Patna, Muzaffarpur (for Tirhut), Bhagalpur and Ranchi (for Chota Nagpur). The headquarters of Government are at Patna. The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Bankipore is known as "Patna," the old town being called "Patna City."

The People.

The Province has a population of 32,371,000 persons. Even so with 467 persons per square mile, Bihar is more thickly populated than Germany. There are only four towns, which can be classed as cities, namely, Patna, Gaya, Jamshedpur and Bhagalpur. During the last ten years the population of Patna has been steadily increasing. Hindus form an overwhelming majority of the population. Though the Muhammadans form about one-tenth of the total population they constitute more than one-fifth of urban population of the province. Animists account for 5.9 per cent. These are inhabitants of the Chota Nagpur plateau and the Santal Parganas, the latter district being a continuation of the plateau in a north-easterly direction.

Industries.*

The principal industry is agriculture, Bihar, more especially North Bihar, being the "Garden of India." Rice is the staple crop but the spring crops, wheat, barley, and the like are of considerable importance. It is estimated that the normal area cultivated with rice is 15,094,000 acres or about 48 per cent. of the cropped area of the Province. Wheat is grown on 1,221,800 acres, barley on 1,307,400 acres, maize or Indian-corn on 1,697,300 the latter being an autumn crop. Oil-seeds are an important crop, the cultivation having been estimated by the demand for them in Europe. It is estimated that 1,820,800 acres of land are annually cropped with oil-seeds in the Province. There is irrigation in Shahabad, Gaya, Patna and Champaran districts. The Indigo industry is steadily on the decline, the total area sown having decreased from 342,000 acres in 1896 to 500 acres in 1933. The principal cause of this was the discovery of the possibilities of manufacturing synthetic or chemically prepared indigo on a commercial scale. Its place as a crop manufactured for export has been largely taken by sugarcane, the cultivation of which has been considerably extended owing to the high prices given by sugar factories. In the district of Purnea and parts of the Tirhut Division jute is grown, but the acreage varies according to the price of jute. The last serious famine was in 1895-96, but there was a serious shortage of foodstuffs in the south of the Province in 1919. In any year in which monsoon currents from either the Bay of Bengal or the Arabian Sea are unduly late in their arrival or cease abruptly before the middle of September the agricultural situation is very grave. It may be said that for Bihar the most important rainfall is that known as the *huti*, due towards the end of September or up to middle of October. Rain at this time not only contributes materially to an increased outturn of the rice crop, but also provides the moisture necessary for starting the spring or *rabi* crops.

Manufactures.

Opium was formerly, with indigo, the chief manufactured product of Bihar, but in consequence of the agreement with the Chinese Government the Patna Factory has been closed. At Monghyr the Peninsular Tobacco Company have erected one of the largest cigarette factories in the world and as a result tobacco is being grown much more extensively. The Tata Iron and Steel Works at Jamshedpur in Singhbhum district are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The most important of these are the Tinplate Company of India, Agricultural Implements, Ltd., Enfield

* The figures given in this paragraph relate to British territory only.

Cable Company of India, Enamelled Ironware, Limited, and Indian Steel Wire Products. The population of Jamshedpur is rapidly approaching 100,000 and it consumes 1½ million tons of coal annually. This part of the province has also some of the richest and most extensive iron mines in the world and supplies the iron and steel works in both Bengal and Bihar with raw materials, but the raising of coal is still the most important of the mineral industries in the province. The coalfields in the Manbhum District have undergone an extraordinary development in the past twenty years, while valuable new fields are being developed at Ramgarh, Bokaro and Karanpura in Hazaribagh. This same district is the most important mica mining centre in the world both on account of the quality as well as the size of its output. Manbhum, Palamau, Ranchi, the Santal Parganas and Gaya are also the chief centres for the production of lac and the manufacture of shellac, the latter of which is exported from India to the value of ten crores annually.

Administration.

The Province on first constitution was administered by a Lieutenant-Governor-in-Council, thus being unique in India as the only Lieutenant Governorship with a Council. Under the Reform Act of 1919 it was raised to the status of a Governorship, with an Executive Council and Ministers. The principles of the provincial administration are fully explained elsewhere. The Provincial Governorships, where the division of the administration into Reserved Subjects, in charge of the Governor and his Executive Council, and Transferred Subjects, in charge of the Governor and Ministers chosen from the Legislative Council, is set out in detail. In all these respects Bihar is on the same plane as the other Provinces in India.

Public Works.

The Public Works Department in the Province of Bihar consists of two separate branches, viz.:—(1) the Buildings and Roads which includes Railways and (2) Irrigation, which includes the Public Health Engineering Branch. Each has a Chief Engineer, who is also Secretary to the Local Government with an Engineer Officer as Under-Secretary in the Buildings and Roads branch and a non-professional Assistant Secretary and a Deputy Chief Engineer in the Irrigation branch under him. The Electrical work of the Province is carried out by an Electric Inspector and Electrical Engineer and a staff of subordinates.

Justice.

The administration of justice is controlled by the High Court of Judicature at Patna. In the administration of civil justice below the High Court are the District Judges as Courts of Appeal, the Subordinate Judges and the Munsifs. The jurisdiction of a District Judge or Subordinate Judge extends to all original suits cognizable by the Civil Courts. It does not, however, include the powers of a Small Cause Court, unless these be specially conferred. The ordinary jurisdiction of a Munsif extends to all suits in which the amount or value of the subject matter in dispute does not exceed Rs 1,000

though the limit may be extended to Rs. 4,000. On the criminal side the Sessions Judge hears appeals from Magistrates exercising first class powers while the District Magistrate is the appellate authority for Magistrates exercising second and third class powers. The District Magistrate can also be, though in point of fact he very rarely is, a court of first instance. It is usual in most districts for a Joint Magistrate or a Deputy Magistrate to receive complaints and police reports, cases of difficulty or importance being referred to the District Magistrate who is responsible for the peace of the district. In the non-regulation districts the Deputy Commissioner and his subordinates exercise civil powers and hear rent suits.

Land Tenures.

Estates in the Province of Bihar are of three kinds, namely, those permanently settled from 1793 which are to be found in the Patna, Tihut and Bhagalpur divisions, those temporarily settled as in Chota Nagpur and estates held direct by Government as proprietor or managed by the Court of Wards. The passing of the Bengal Tenancy Act (VIII of 1885) safeguarded the rights of the cultivators under the Permanent Settlement Act. Further, the Settlement Department under the supervision of the Director of Land Records makes periodical survey and settlement operations in the various districts both permanently and temporarily settled. In the former, the rights of the under tenants are recorded and attested, while in the latter there is the re-settlement of rents. In the re-settlement proceedings, rents are fixed not only for the landlords but also for all the tenants. A settlement can be ordered by Government on application made by landlords or tenants.

In Chota Nagpur and the Santal Parganas the rights of village headmen have been recognised. The headman collects the rents and is responsible for them minus a deduction as remuneration for his trouble.

Chota Nagpur has its own Tenancy Act. In the district of the Santal Parganas, the land tenures are governed by Regulations III of 1872 and II of 1886.

Police.

The Departments of Police, Prisons and Registration are each under the general direction of Government, supervised and inspected by an Inspector-General with a staff of assistants. The Commissioner of Excise and Salt is also Inspector-General of Registration.

Under the Inspector-General of Police are four Deputy Inspectors-General and 30 Superintendents. There are also 25 Assistant Superintendents of Police and 29 Deputy Superintendents. The force is divided into the District Police, the Railway Police and the Military Police. A Criminal Investigation Department has also been formed for the collection and distribution of information relating to professional criminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in investigations of crime of this class and other serious action which its assistance may be invoked.

There are three companies of Unmounted Military Police and one company of Mounted Military Police which are maintained as reserves to deal with serious and organised disturbances and perform no ordinary civil duties. There are also five platoons of armed police stationed at Patna to serve as a provincial reserve.

Education.

The position of education in the Province, with the numbers attending schools, is set out in the section Education and the tables attached thereto (q. v.) showing in great detail the educational status of the administration.

There is a University at Patna, whose functions are described under the Indian Universities. (q. v.)

Medical.

The Medical Department is under the control of the Inspector-General of Civil Hospitals who is a Member of the Indian Medical Service. Under him there are 21 Civil Surgeons who are responsible for the medical work of the districts at the headquarters of which they are

stationed. 60 Dispensaries are maintained by Government in addition to 626 Dispensaries maintained by Local bodies, Railways, private persons, etc. 7,089,290 patients including 70,909 in-patients were treated in all the dispensaries in 1933. The total income of the dispensaries maintained by Government and Local Bodies including that of the private aided institutions amounted to Rs. 32,39,058.

A large mental hospital for Europeans has been opened at Ranchi which receives patients from Northern India. A similar institution for Indians has been opened at Ranchi since September 1925 for the treatment of patients from Bihar and Bengal. A sanatorium at Itki in the district of Ranchi has also been established for the treatment of tuberculosis. An institute for radium treatment has also been established at Patna. Centres for anti-rabic treatment have been started at Patna.

A medical college has been opened at Patna and the Medical School which was in existence at Patna has been transferred to Darbhanga.

The finances of the province have undergone a change owing to the separation of Orissa from Bihar, so that it is not possible to give correct budget figures for Bihar for the year 1936-37.

ADMINISTRATION.

GOVERNOR.

His Excellency Sir James David Sifton, K C S I, K C I E, I C S.

PERSONAL STAFF.

Private Secretary, Major P. T. Clarke
Aide-de-Camp, Lieut. C. W. H. Rice, Lieut. H. J. Kauter, & Lieut. D. G. Walker, (Offg.)
Honorary Aide-de-Camp, Lieut.-Col. A. I. Danby, Captain D. J. Mansfield, Major W. O. Henderson, Risaldar Major & Hony. Lt. Muhammad Reza Khan, Bahadur.

EXECUTIVE COUNCIL.

The Hon'ble Babu Nirsu Narayan Sinha.
The Hon'ble Mr. P. C. Tallente, C.S.I., C.I.E., I.C.S.

Ministers

The Hon'ble Sir Ganesh Dutta Singh, Kt (Local Self-Government).
The Hon'ble Mr. Sayid Abdul Aziz, Bar-at-Law (Education.)

SECRETARIAT.

Chief Secretary to Government, Political and Appointment Departments, W. B. Brett, C.I.F., I.C.S.
Secretary to Government, Finance Department, H. C. Prior, I.C.S.

Secretary to Government, Revenue Department, J. W. Boulton, I.C.S.

Secretary to Government, Judicial Department, A. C. Davies, I.C.S.

Secretary to Government (P. W. D.), Irrigation Branch, F. A. Betterton.

Buildings and Roads Branch, J. G. Powell.
Secretary to Government, Education and Development Departments, S. Lall, I.C.S.

Secretary, Local-self Government Department,—W. G. Lacey, I.C.S.

MISCELLANEOUS APPOINTMENTS

Director of Public Instruction, G. E. Fawcus, M.A., C.I.E.

Inspector-General of Police, Lt.-Col. A. E. J. C. McDowell.

Conservator of Forests, J. S. Owden.

Inspector-General of Civil Hospital, Lt.-Col. P. S. Mills.

Director of Public Health, Lt.-Col. J. A. S. Phillips.

Inspector-General of Prisons, Lt.-Col. O. R. Ungers.

Director of Agriculture, Daulat Ram Sethi.

Director of Industries, S. M. Dhar, I.C.S.

GOVERNORS OF BIHAR AND ORISSA.

Lord Sinha of Raipur, P.C., K.C. ..	1920	Sir Hugh Lansdown Stephenson, K.C.S.I., K.C.I.E. ..	1927
Sir Henry Wheeler	1921	H. E. Sir James David Sifton, K.C.I.E., C.S.I., I.C.S. ..	1932

Legislative Council

As the separation of Orissa from Bihar took place about the time this chapter was going to press, it is not possible to give an accurate list of officials and members of the Legislative Council of Bihar. We give, however, the latest available list for Bihar and Orissa. The Orissa members of the Legislative Council now form part of the Orissa Advisory Council.

The Hon'ble Babu Rajandhari Sinha, M.A., B.L. (President)	Mr. S. Anwar Yusooif, Bar-at-Law, (Secretary).
Rai Bahadur Lakshmidhar Mahanti, (Deputy President).	Babu Raghu Nath Prasad, M.A., B.L. (Assistant Secretary)

EXECUTIVE COUNCIL.

The Hon'ble Babu Nirsu Narayan Sinha.	The Hon'ble Mr. P. C. Tallents, C.S.I., I.C.S.
---------------------------------------	--

MINISTERS.

The Hon. Syed Abdul Aziz, Bar-at-Law ..	Patna Division (Muhammadian Urban).
The Hon'ble Sir Ganesh Datta Singh, Kt ..	East Patna (Non-Muhammadian Urban).

MEMBERS.

NOMINATED OFFICIALS.

Mr. J. R. Dain, C.I.E.	Mr. A. C. Davies
„ H. C. Prior	„ C. L. Philip, C.I.E.
„ W. G. Lacey.	„ S. Solomon
„ S. Lall	„ Y. A. Godbole
„ J. W. Houlton	Lt.-Col. P. S. Mills
„ J. G. Powell	Mr. E. A. O. Perkin

NOMINATED NON-OFFICIALS

Mr. B. W. Haigh, European	Babu Sheanand Premchand (Nominated)
Mr. W. H. Meyrick, Bihar Planters	Babu Ram Narayan (Depressed classes)
Mr. S. A. Robberts, Indian Mining Association	Rai Bahadur Ram Ranvijaya Singh (Industrial interest other than Planting and Mining)
Mr. A. E. D'Silva (Anglo-Indian Community)	Rai Bahadur Harendra Nath Banerji (Labouring classes)
Rev. Brajananda Das (Depressed classes)	Rai Bahadur Birendra Nath Chakravartti (Domiciled Bengali Community)
Kumar Ajit Prashad Singh Deo, Nominated.	Mr. Sagram Hembrome, M.B.E. (Aborigines)
Mr. R. Chandra (Indian Christian Community)	Mr. Garbett Captain Manki (Aborigines).
Khan Bahadur Shah Muhammad Yahya, C.I.E.	
Babu Bimalal Charan Singh (Nominated).	

ELECTED.

Name.	Constituencies.
Babu Madandhori Sinha	Patna Division Land-holders
Mahant Manmohan Das	North-East Darbhanga (Non-Muhammadian Rural).
Mr. Muhamad Yunus	West Patna (Non-Muhammadian Rural).
Maulavi Saliyd Muhammad Hafceez	Patna University.
Rai Bahadur Dalip Narayan Singh	Bhagalpur Division Landholders.
Babu Chandreshvar Prashad Narayan Sinha, C.I.E.	Tirhut Division Landholders.
Babu Maheshvari Prashad Narayan Deo	Chota Nagpur Division Landholders.
Babu Jagadeva Prashad Singh	North Saran (Non-Muhammadian Rural).
Babu Sardananda Kumar	South-East Darbhanga (Non-Muhammadian Rural).
Babu Ramasray Prashad Chaudhuri	Samastipur (Non-Muhammadian Rural).
Babu Jamuna Karji	North-West Darbhanga (Non-Muhammadian Rural)
Rai Bahadur Sri Narayan Maitha	East Muzaffarpur (Non-Muhammadian Rural).
Babu Rameshvar Prashad Singh, M.B.E.	East Gaya (Non-Muhammadian Rural).
Mr. Chaudhuri Sherat Hussain	Shahabad (Muhammadian Rural).
Mr. Muhammad Yunus	West Patna (Muhammadian Rural)
Khan Bahadur Abdul Wahab Khan	Bhagalpur Division (Muhammadian Urban).
Maulavi M. Fazlur Rahman	Kishanganj (Muhammadian Rural)
Khan Bahadur Hapi Muhammad Bux Chaudhuri	Purnea (Muhammadian Rural)
Maulavi Abdul Aziz Khan	Santal Parganas (Muhammadian Rural)
Babu Kalyan Singh	Hazratnagar (Non-Muhammadian Rural)
Rai Bahadur Haldhar Prashad Singh	North Bhagalpur (Non-Muhammadian Rural)
Bhalva Rudra Pratap Deo	Palamau (Non-Muhammadian Rural).
Babu Shyam Narayan Singh Sharma	Patna (Non-Muhammadian Urban)
Rai Bahadur Sarat Chandra Ray	Ranchi (Non-Muhammadian Rural)
Rai Bahadur Lakshmidhar Mahanti	North Cuttack (Non-Muhammadian Rural).
Babu Harihar Das	Orissa Division (Non-Muhammadian Urban)
Rai Bahadur Loknath Mishra	South Puri (Non-Muhammadian Rural)
Babu Brjannoban Panda	Sambalpur (Non-Muhammadian Rural).
Babu Birabar Narayan Chandra Dhill Nazendra	Orissa Division Landholders
Babu Shub Chandra Singha	Santal Parganas (North) (Non-Muhammadian Rural)
Babu Devendra Nath Samantas	Singbhum (Non-Muhammadian Rural)
Babu Rameshwar Pratap Sahu	North Muzaffarpur (Non-Muhammadian Rural)
Babu Badri Narayan Singh	West Muzaffarpur (Non-Muhammadian Rural)
Babu Rudra Pratap Singh	Central Bhagalpur (Non-Muhammadian Rural)
Babu Bishundeo Narayan Singh	North-West Monghyr (Non-Muhammadian Rural).
Maulavi Khalilur Rahman	Gaya (Muhammadian Rural)
Maulavi Muhammad Abdul Ghani	Tirhut Division (Muhammadian Urban).
Maulavi Shaikh Muhammad Shafi	Darbhanga (Muhammadian Rural).
Khan Bahadur Habibur Rahman	Chota Nagpur Division (Muhammadian Rural)

ELECTED—*concd.*

Name.	Constituencies.
Maulavi Abdul Wadood	Champaran (Muhammadian Rural)
Maulavi Muhammad Hasan Jan	Muzaffarpur (Muhammadian Rural)
Mr Saiyid Akbari	East Patna (Muhammadian Rural).
Khan Bahadur Saghir-ul Haq	Saran (Muhammadian Rural)
Mr Saiyid Muhammad Mehdi	Monghyr (Muhammadian Rural)
Maulavi Shaikh Abdul Jalil	Orissa Division (Muhammadian Rural).
Babu Ramanugrah Narayan Singh	West Gaya (Non-Muhammadian Rural).
Babu Bhagwati Saran Singh	Central Gaya (Non-Muhammadian Rural).
Mr Saiyid Abdul Aziz	Patna Division (Muhammadian Urban).
Babu Godavaris Misra	North Puri (Non-Muhammadian Rural)
Rai Bahadur Satis Chandra Sinha	South Manbhum (Non-Muhammadian Rural)
Mr Kamaldhari Lall	South Bhagalpur (Non-Muhammadian Rural)
Rai Bahadur Lachimi Prasad Sinha	East Monghyr (Non-Muhammadian Rural)
Babu Jagannath Das	South Balasore (Non-Muhammadian Rural)
Babu Radharanjan Das	North Balasore (Non-Muhammadian Rural)
Babu Nikunja Kishore Das	South Cuttack (Non-Muhammadian Rural).
Babu Suruj Kumar Prasad Sinha	Patna Division (Non-Muhammadian Urban).
Babu Harmadho Prasad Sinha	South Saran (Non-Muhammadian Rural).
Chaudhari Muhammad Nazim Hasan	Bhagalpur (Muhammadian Rural).
Babu Radha Mohan Sinha	Arrah (Non-Muhammadian Rural).
Babu Ramjiwan Himat Singka	Santal Parganas (South) (Non-Muhammadian Rural)
Mr Sachchidananda Sinha	Central Shahabad (Non-Muhammadian Rural).
Raja Prithwi Chand Lall Chowdhry	Purnea (Non-Muhammadian Rural).
Rai Bahadur Dwarka Nath	Trihut Division (Non-Muhammadian Urban).
Rai Bahadur Shyammandan Sahay	Hajipur (Non-Muhammadian Rural)
Kumar Kalika Prasad Singh	South-West Monghyr (Non-Muhammadian Rural)
Babu Jogendra Mohan Sinha	Bhagalpur (Non-Muhammadian Urban)
Babu Radha Prasad Sinha	South Shahabad (Non-Muhammadian Rural).
Mr. Nanda Kumar Ghosh	Chota Nagpur Division (Non-Muhammadian Urban)
Rai Bahadur Krishnadeva Narayan Mahtha	North Champaran (Non-Muhammadian Rural).
Babu Lahta Prasad Chaudhuri	South Champaran (Non-Muhammadian Rural).
Babu Kunja Bihari Chandra	Indian Mining Federation
Babu Manindra Nath Mukharji	North Manbhum (Non-Muhammadian Rural).

Orissa.

Like Sind, Orissa was constituted a separate province on April 1936. It Sind was a separate geographical, ethnological and linguistic unit inside the administrative boundary of Bombay Presidency, the new province of Orissa is the result of the amalgamation of various Oriya speaking peoples who had till then belonged to three separate provinces, viz. Bihar and Orissa, Madras and the Central Provinces.

The Oriyas are an intensely patriotic people who bear great love for their culture and language. They have always opposed any move to dismember the Oriya-speaking tracts for political and administrative considerations. The Oriyas care their traditions far back to the days of Mahabharata when there was the ancient kingdom of Utkal embracing a wide territory now known as Orissa. Through successive conquests and annexations in known history, the Oriyas passed through varying fortunes, until

at the time of the Moghul conquest the Orissa country was broken up and the people gradually lost race consciousness, although common language and literature continued to act as a link.

Race consciousness was revived with the spirit of education under the British regime and after the great famine of 1866, Sir Stayerd Northcote suggested the separation of Orissa from Bengal. The proposal was turned down, but the patriotic fervour underlying the new move persisted and gave rise to a series of demands.

History of Separation.

The agitation for the unification of Oriya tracts first obtained official recognition in 1903 when the Government of India accepted the principle of bringing in the scattered sections

of the Oriya speaking population under a single administration. About the same time, there was brought into existence the Ukhal Union Conference, which has since carried on a sustained agitation to unify the Oriyas.

The first stage success was achieved in 1912 when an area of modern Orissa was separated from Bengal and amalgamated with Bihar to form what came to be known as the province of Bihar and Orissa. Although the status of Orissa in the province of Bihar and Orissa was much better than before, the advocates of Oriya unity continued to press their claim for the formation of Orissa into a distinct administrative unit. The late Mr. Montagu and Lord Chelmsford saw the justice of the Oriyas' claim and generally favoured the redistribution of provinces on a linguistic basis for the success of responsible government. They left it, however, to the provincial governments concerned to formulate opinions and make concrete proposals after the advent of the Montford constitution in 1920.

The Bihar and Orissa Legislative Council endorsed the idea of amalgamation, but the Madras Council held an inconclusive debate. The Madras Government was against the surrender of any of its territory, while the C. P. Government had an open mind.

The Government of India then appointed what is called the Philip-Duff Committee to make local inquiries with a view to ascertaining the attitude of Oriya speaking people in the north of Madras Presidency on the question of their union with Orissa. Messrs. C. L. Philip and A. C. Duff reported that there was "a genuine, long standing and deep seated desire on the part of the educated Oriya classes of the Oriya speaking tracts for amalgamation of these tracts with Orissa under one administration."

The next stage came with the appointment of the Simon Commission in 1927. A sub-committee of the commission presided over by Major Atlee recommended the creation of a separate administrative unit for Orissa, agreeing with the Oriyas' contention that under the autonomous conditions proposed by the Commission, the Oriyas would be an ineffective minority in Madras, Bengal, Bihar and Orissa and the C. P.

Round Table Conference.

When the idea of a federation of autonomous units dawned at the first Round Table Conference, the Oriyas' demand was presented in a crystallised form by the Maharaja (then Raja) of Paralakhemundi, who asked for a separate province for Orissa. "We want a province of our own," he said, "on the basis of language and race so that we can be a homogenous unit with feelings of contentment and peace, to realise, and be benefited by, the projected reforms and look forward to the day when the United States of India will consist of small federated States based on common language and race."

The Oriyas' demand derived adventitious support from the strength of the Muslim claim for the constitution of Sind as a separate province. Those who backed up the case of Sind could not

oppose Oriyas' claim, which, therefore, came to be recognised at the Round Table Conference.

In September 1931, the Government of India appointed the O'Donnell Committee to examine and report on the financial and other consequences of setting up a separate administration for Orissa and to make recommendations regarding the boundaries in the event of separation. The Committee recommended the creation of a new province including the Orissa division, Angul, the Khurda Zamindari of the Raipur district and the greater part of the Ganjam district and the Vizagapatam agency tract. According to the Committee, the new Orissa province was to have an area of 32,681 square miles and a population of about 81,74,000 persons. On the question of financial and other consequences of separation, the Committee made recommendations generally on the lines of the Sind Committee.

In January 1936, an Order-in-Council was issued by His Majesty's Government constituting the Orissa as a separate province to be brought into line with other provincial units when Provincial Autonomy is inaugurated under the Government of India Act of 1935.

Order confers on Orissa the full status of a Governor's province to which all the provisions of the Act of 1935 will be applied when provincial autonomy becomes an accomplished fact.

Meanwhile, as from April 1, 1936, until part III of the Government of India Act, 1935, is brought into force, the province will be under the administration of the Governor. The M. L. C's who represented the Oriya speaking places in the Legislative Councils of Bihar and Orissa, Madras and the C. P. cease to be members of these Councils as from April 1. Such portions of the Government of India Act of 1919 which apply to the Provincial Legislative Councils to Ministers and to the division of provincial subjects into transferred and reserved subjects will not apply to the new province during the transitional period. The Governor will be assisted in the administration of the province by a purely advisory council.

The Order-in-Council makes elaborate provisions for the apportionment of financial assets and liabilities arising out of the dismemberment of parts of Bihar and Orissa, Madras and the Central Provinces and their amalgamation with new Orissa. These differ in their application to the three older provinces, but the principles underlying all three are the same, land, forests, buildings, works and properties pass to the province in which they are situated. Areas of taxes will belong to the province in which the taxed property is situated or the taxed transactions took place. Of the outstanding Bihar and Orissa irrigation debt incurred before April 1, 1921, Rs. 2,56,85,136 will be the debt of Orissa and the remainder that of Bihar. Orissa assumes, and Madras will be released from the liability for Rs. 47,07,008 of the outstanding Madras Irrigation debt incurred before April 1, 1921.

Extent of Province.

The following are the areas comprised in the new province of Orissa :—

1 That portion of the Province of Bihar and Orissa which was known as the Orissa Division thereof

2 Areas transferred from the Presidency of Madras —

(i) The Ganjam Agency Tracts;

(ii) The following areas in the non-Agency portion of the Ganjam district, viz., the taluks of Ghumsur, Aska, Surada, Kodala and Chatrapur, so much of the taluks of Ichapur and Berhampur as lies to the north and west of the boundary line,

(iii) So much of the Parlakimedi Estate as lies to the north and east of the said line, and

(iv) The following areas in the Vizagapatnam district, that is to say, the Jeypore (Impartible) Estate and so much of the Pottangi taluk as is not included in that estate.

3 Areas transferred from the Central Provinces:—

(i) The Khariari Zamindari in the Raipur district, and

(ii) The Padampur Tract in the Bilaspur district, that is to say, the detached portion of that district consisting of 54 villages of Chandrapadampur estate and also of the following 7 villages, viz., Kuhakunda, Badmal, Panchpudga (Soda), Barhamputa (Malguzari), Panchpuraga (Palsada), Jogni and Thakurpal, (Jogni) *

Agriculture.

Agri-culturally and industrially, Orissa is a backward region. It has suffered as the result of being tacked to one or other of many provinces for administrative purposes. This explains why there are no big factories on Orissa although there are a large number of indigenous cotton industries, bespeaking the people's artisanship. Among the cottage industries may be mentioned handloom industries, brass, bell metal, silver filigree, cutlery, wood and paper pulp and horn articles. Sugarcane and jute are two important commercial crops in Orissa, and areas under both these are already increasing. The Orissa forests can supply a large quantity of valuable timber and fuel. Fisheries too are an important industry of Orissa. The two valuable sources of supply are the extensive Chilka lake and Puri where on an average 9,000 maunds of cured fish and 50,000 maunds of uncured fish respectively are exported to Calcutta every year.

The chief mineral resources of Orissa are iron, coal, limestone, manganese and mica. Iron ore is mostly found in Mayurbhanj, Kuonjor, Bonai, and feudatory States. The deposits in this area are remarkable for the enormous quantity of extremely rich ore they contain. More than 60 per cent. of the ore extracted in India comes from these areas of Orissa for which there is a ready demand from the Tata Iron and Steel Works in Jamshedpur and Messrs. Bird & Co of Calcutta. Orissa cannot boast of such extensive coal mines as those of Bengal and

Bihar, but coal has been found in Angul, Sambalpur and in the feudatory states of Gangpur, Talcher and Athmalik. Talcher has the largest coalfields and they are being progressively exploited. Their output increased from 38,237 tons in 1928 to 316,539 tons in 1934.

Administration.

Sir John Hubback who has been chosen to be the first Governor of the infant province of Orissa, has had wide experience in the province of Bihar and Orissa, and has been actively associated with the life of the people of Orissa. The appointment has proved very popular and the province is eagerly looking forward to an intensive period of all round development under the able and sympathetic guidance of Sir John Hubback.

THE BUDGET FOR 1936-37.

The first budget of the new Orissa Province was presented in May and was based mainly on known sources of revenue and expenditure plus fresh heads necessitated by the creation of the new province. For purposes of the budget new schemes intended to develop the province were left out of account and deferred till Orissa was in a position to pay for them.

The budget estimated a revenue deficit of Rs. 40 lakhs and in order to cover this difference, to allow for certain items of non-recurring expenditure and to provide for a road fund and a famine relief fund, the Government of India gave a grant of Rs. 50 lakhs. This sum was in addition to Rs. 14 lakhs already granted to finance the purchase of furniture and other office equipment for the new administration.

That the administrators of the province were determined to balance its finances was obvious from the decision announced in the budget that the Governor would not appoint any Ministers for the transitional period but would if necessity arose, consult a committee of the Advisory Council. The saving effected by this self-denial amounted to a little over Rs. 80,000. It was anticipated that some saving would also be effected by the postponement of appointments to the offices of the Deputy Director of Hospital and Assistant Director of Public Health.

Faced with the problem of providing Rs. 55,000 under the head "Medical" and Rs. 35,000 under the head "Public health", the new administration managed to effect a saving of Rs. 35,000, in spite of the necessity to provide for drainage in Koraput, (a prospective district headquarters), so that they had still to find Rs. 55,000.

The budget also provided for the building and equipment of the Bacteriological Laboratory in Orissa at a cost of Rs. 71,000. It was expected that a saving of Rs. 10,000 would be made under the head "Civil Works."

In the result, as the Chief Secretary pointed out, "it is probable that in the budget, as finally authenticated, the estimated closing balance of Rs. 1.34 lakhs will have disappeared and the province will be rather over one lakh in debt."

The Central Provinces and Berar.

The Central Provinces and Berar compose a great triangle of country midway between Bombay and Bengal. Their area is 133,069 sq. miles, of which 82,149 are British territory proper, 17,808 (*viz.* Berar) held on perpetual lease from H. E. H. the Nizam and the remainder held by Feudatory Chieftains. The population (1931) is 15,507,723 in C. P. British Districts and Berar. Various parts of the Central Provinces passed under British control at different times in the wars and tumult in the first half of the 19th century and the several parts were amalgamated after the Mutiny, in 1861, into the Chief Commissionership of the Central Provinces. Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with H. E. H. the Nizam for the maintenance of the Hyderabad Contingent, and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with H. E. H. the Nizam.

The Country.

The Central Provinces may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the north-west, the Vindhyan plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water-cut ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the more important cotton tracts of India and the wealthiest part of the C. P. proper. The Eastern half of the plain lies in the valley of the Wainganga and is mainly a rice growing country. Its numerous irrigation tanks have given it the name of the "lake country" of Nagpur. Further east is the far-reaching rice country of Chhattisgarh, in the Mahanadi basin. The south-east of the C. P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The States of Bastar and Kanker lie in this region. Berar lies to the south-west of the C. P. and its chief characteristic is its rich black cotton-soil plains.

The People.

The population of the province is a comparatively new community. Before the advent of the Aryans, the whole of it was peopled by Gonds and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home. But successive waves of immigration flowed into the province from all sides. The early inhabitants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of the Central Provinces being found in large numbers in all parts of the province, particularly in the South-east. The main divisions of the newcomers are indicated by the language divisions of the province, Hindi

brought in by the Hindustani-speaking peoples of the North, prevails in the North and East, Marathi in Berar and the West and Centre of the Central Provinces. Hindi is spoken by 56 per cent. of the population and is the *lingua franca*. Marathi by 31 per cent. and Gondi by 7 per cent. The effects of invasion are curiously illustrated in Berar, where numbers of Moslems have Hindu names, being descendants of former Hindu officials who on the Mahomedan invasion adopted Islam rather than lose their positions. The last census shows that a gradual Brahmanising of the aboriginal tribes is going on. The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising.

Industries.

When Sir Richard Temple became first Chief Commissioner of the C. P. the province was landlocked. The only road was that leading in from Jabulpore to Nagpur. The British administration has made roads in all directions, the two trunk railways between Bombay and Calcutta ran across the province and in the last few years a great impetus has been given to the construction of subsidiary lines. These developments have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength by a phenomenal growth of the co-operative credit movement. The land tenure is chiefly on the *malguzari*, or landlord system, ranging with numerous variations, from the great Feudatory chiefships, which are on this basis, to holdings of small dimensions. A system of land legislation has gradually been built up to protect the individual cultivator. Berar is settled on the Bombay *rayatwari* system. 16,073 square miles of the C. P. is Government Reserved forest, in Berar the forest area is about 3,339 square miles, the total forest area being one-sixth of the whole Province. The rugged nature of the greater part of the country makes forest conservation difficult and costly. Excluding forest and waste 67 per cent. of the total land is occupied for cultivation; for the two most advanced districts in the Central Provinces, the proportion averages 83 per cent., while the average figure for the Berar Districts is as high as 93 per cent. The cultivated area has extended almost continuously except for the temporary checks caused by bad seasons. Rice is the most extensive single crop of the Central Provinces, covering nearly 30 per cent. of the cropped area. Wheat comes next with over 15 per cent., then pulses and other cereals used for food and oil-seeds with nearly 50 per cent. and cotton with over 7 per cent. In Berar cotton occupies 46 per cent. Next comes *juar* and then pulses and other cereals and oil seeds of the cropped area, *jowar* covers 31 per cent., then wheat and oilseeds. In agriculture more than half the working population is female.

Commerce and Manufactures.

Industrial life is only in its earliest development except in one or two centres, where the introduction of modern enterprise along the railway routes has laid the foundations for great future developments of the natural wealth of the province. Nagpur is the chief centre of a busy cotton spinning and weaving industry. The Empress Mills, owned by Parsi manufacturers, were opened there in 1877 and the general prosperity of the cotton trade has led to the addition of many mills here and in other parts of the province. The total amount of Indian yarn exported from the Province during the years 1933-34 and 1934-35 was 1,49,608 and 1,82,328 maunds, respectively.

The largest numbers engaged in any of the modern industrial concerns are employed in manganese mining which in 1934 employed 5,005 persons and raised 1,86,025 tons. Then follow coal mining with an output of 1,438,980 tons and 12,408 persons employed, the Jubbulpore marble quarries and allied works, the limestone quarries and the mines for pottery clay, soapstone, etc.

The total number of factories of all kinds equally so described was 972 in 1934 the latest period for which returns are available and the number of people employed in them 60,503. The same economic influences which are operative in every progressive country during its transition stage are at work in the C. P. and Berar, gradually sapping the strength of the old village industries, as communications improve, and concentrating industries in the towns. While the village industries are fading away, a large development of trade has taken place. The last pre-war reports showed an increase in volume by one-third in eight years.

Administration.

The administration of the Central Provinces and Berar is conducted by a Governor-in-Council, who is appointed by the Crown. He is assisted by seven Secretaries and four under-secretaries. Under the reform scheme the administration is conducted by a Governor with an Executive Council of two members, one of whom is a non-official and two Ministers, the latter being in charge of the transferred subjects.

The local legislature consists of 73 members distributed as follows:—38 elected from the P., 17 elected from Berar; 2 members of the Executive Council; 8 nominated non-officials; 5 nominated officials. The Governor (who is not a member of the Council) has the right of nominating two additional members with special knowledge on any subject regarding which legislation is before the Council. The C. P. is divided for administrative purposes into three divisions and Berar constitutes a division. Each of these is controlled by a Commissioner. The divisions are sub-divided into districts, each of which is controlled by a Deputy Commissioner, immediately subordinate to the Commissioner. The principal heads of Provincial departments are the Commissioner of Settlement and Director of Land Records, the Chief Conservator of Forests, the Inspector-General of Civil Hospitals, the Director of Public Health, the Inspector General of Police,

the Inspector-General of Prisons, the Director of Public Instruction, the Excise Commissioner and Superintendent of Stamps and Inspector General of Registration, and Registrar-General of Births, Deaths and Marriages, the Director of Agriculture, the Registrar of Co-operative Societies, the Director of Industries, the Legal Remembrancer, the Director of Veterinary Services and a Chief Engineer, Public Works Department, Buildings and Roads and Irrigation Branches. The Deputy Commissioners of districts are the chief revenue authorities and District Magistrates and they exercise the usual powers and functions of a district officer. The district forests are managed by a forest officer, over whom the Deputy Commissioner has certain powers of supervision, particularly in matters affecting the welfare of the people. Each district has a Civil Surgeon (except Mandla, Drug and Balaghat where there are Assistant Surgeons) who is generally also Superintendent of the District Jail except at Central Jails at Nagpore and Jubbulpore and District Jails at Raipur, Narsinghpur, Amraoti and Akola where there are whole time Superintendents and whose work is also in various respects supervised by the Deputy Commissioner. The Deputy Commissioner is also Marriage Registrar and manages the estates of his district which are under the Court of Wards. In his revenue and criminal work the Deputy Commissioner is assisted by (a) one or more Assistant Commissioners, or members of the Indian Civil Service; (b) one or more Extra Assistant Commissioners, or members of the Provincial Civil Service, including a few Anglo-Indians and (c) by Tahsildars and Naib Tahsildars, or members of the Subordinate service. The district is divided for administrative purposes into tahsils, the average area of which is 1,500 square miles. In each village a lambardar or representative of the proprietary body is executive headman.

Justice.

The Court of the Judicial Commissioner was the highest court of appeal in civil cases, and also the highest court of criminal appeal and revision for the Central Provinces and Berar including proceedings against European British subjects and persons jointly charged with European British subjects.

Quite recently the Secretary of State for India approved the proposal for the establishment of a High Court in the Central Provinces and Berar and Sind and a High Court has since January 1936 been established at Nagpur.

Subordinate to the High Court are the District and Sessions Judges (9 in number) each of whom exercises civil and criminal jurisdiction in a Civil and Sessions district comprising one or more Revenue districts. The civil staff below the District and Sessions Judge consists of Subordinate Judges of the first and second class.

Local Self-Government.

Municipal administration was first introduced under the Punjab Municipal Acts and the Municipality of Nagpur dates from 1864. Several revising Acts extend its scope and the C. P. Municipalities Act passed towards the end

of the year 1922 has considerably increased the power of the Municipal Committees. The C. P. Municipalities Act has also been extended to Berar. Viewed generally, municipal self-government is considered to have taken root successfully. The larger towns have municipalities, there being 75 such bodies in the Province.

Under the Central Provinces Local Self-Government Act passed in 1920 as amended in 1931 there is a local Board for each tahsil and a district council for each district excepting Hoshangabad, Chhindwara and Saugor districts each of which has two district councils. The local board consists of elected representatives of circle and nominated members other than Government officials not exceeding in numbers one-fourth of the board, and the constitution of the district council is a certain proportion of elected representatives of local boards, of members selected by those representatives and of members, other than Government servants, nominated by Government.

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Councils. The new Central Provinces Local Self-Government Act has also been applied to Berar. The Office Bearers of all the district councils and with few exceptions of local boards also are non-officials.

Rural education, sanitation, medical relief and rural communications are among the primary objects to which these bodies direct their attention, while expenditure on famine relief is also a legitimate charge upon the District Council funds.

The Central Provinces Village Panchayat Act was passed in the year 1920. So far 917 Panchayats have been established. As the result of a recommendation of a Committee appointed in 1925 to look into the question of Panchayats, a Village Panchayat Officer was appointed to guide the developments of the Panchayat system. This post was kept vacant on account of financial stringency for more than two years. It has now been filled in with effect from the 24th May 1933.

Public Works.

The Public Works Department, which comprises Buildings and Roads and Irrigation Branches, is under the control of the Chief Engineer who is also Secretary to the Government. There are two Superintending Engineers who between them supervise the work of both branches. The Province is well served by a net-work of roads, but in a number of cases they are not fully bridged and are therefore impassable to traffic at times during the rains.

State irrigation was introduced early in the present century mainly as a result of the recommendations of the Irrigation Commission (1901-08). During the last thirty-five years a sum of Rs. 7.3 crores has been expended on the construction of irrigation works, of which the more important are the Wainganga, Tandula, Mahanadi, Kharung and Maniari canals.

Three works, *viz.*, the Mahanadi and Wainganga Canals and the Asola Mendha tank, were sanctioned originally as productive works and the

remainder were all sanctioned as unproductive works. The three works sanctioned as productive have all failed to justify their classification in that category and have now been transferred to the unproductive list. The conditions in the province are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their value as a protection against famine. The normal area of annual irrigation is at present about 323,000 acres, mainly rice and the income from these works is somewhat more than the expenditure incurred on their maintenance and management.

Police.

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities, is under one force. The strength is equal to one man per nine square miles of area. The superior officers comprise an Inspector-General, whose jurisdiction extends over Berar, three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendents and subordinate officers. On railways special Railway Police are employed under the control of two Superintendents of Railway Police with headquarters at Raipur and Hoshangabad. A Special Armed Force of 870 men is distributed over the headquarters of eight districts, for use in dealing with armed disturbers of the peace in whatever quarter they may appear. There is a small force of Mounted Police. The Central Provinces has no rural police as the term is understood in other parts of India. The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect.

Education.

The Education Department of the Central Provinces and Berar is administered by a Director of Public Instruction, a Registrar, Education Department and Secretary, High School Education Board, four Inspectors and two Inspectresses who in their turn are assisted by nine Assistant Inspectors and four Assistant Inspectresses. Schools are divided into (a) schools for general education and (b) schools for special education. The latter are schools in which instruction is given in a special branch of technical or professional education. The main division of schools for general education is into Primary and Secondary. In the Primary Schools the teaching is conducted wholly in the vernacular and these schools are known as Vernacular Schools. The Secondary Schools are divided into Middle and High Schools. The former may be either Vernacular Middle Schools in which instruction is given (a) wholly in the vernacular or (b) mainly in the vernacular with an option to take English as an additional language, or Anglo-Vernacular Middle Schools in which instruction is given both in English and the Vernacular. In the High School classes instruction until recently was given in English but the vernacular was adopted as the medium of instruction

at the beginning of the school year 1922-23. For the convenience of pupils whose mother tongue is not a recognised vernacular of the locality a few English medium classes are still maintained. For administrative purposes schools are further divided according to their management into schools (under public management and schools controlled by private bodies). The former consist of (a) schools controlled by Government and (b) schools controlled by Local Bodies or Boards. The latter consist of (a) Schools which are aided by grant from Government or from Local Funds and Municipal Funds and (b) unaided schools. All schools under public management, all aided schools and all unaided recognized schools conform in their courses of study to the standards prescribed by the Education Department or by the High School Education Board. They are subject to inspection by the Department and to the general rules governing schools of this type. They are "recognised" by the Department and their pupils may appear as candidates for any prescribed examination for which they are otherwise eligible. Unrecognized schools do not follow the rules of the Department, nor are they subject to inspection by the Department. They are mostly indigenous schools which have been too recently opened to have acquired "recognition." Their pupils may not appear as candidates at any of the prescribed examinations without the previous sanction of the Department.

Primary Education is under the control of District Councils and Municipal Committees. The Primary Education Act empowers local authorities to introduce compulsion and this is in force in several areas.

Higher Education is under the control of Nagpur University of which the following are constituent colleges:—at Nagpur, Morris College, the College of Science, Hislop College, City College, the Agriculture College, the University College of Law, at Jabulpore, Robertson College, Hitkarni City College, Spence Training College (for teachers), Hitkarni Law College, at Amraoti, King Edward College. There are also an Engineering School and a Medical School at Nagpur and a Technical Institute at Amraoti.

Secondary Education is under the control of the Board of High School Education, on which the University is represented. The High School certificate awarded by the Board qualifies for entrance to the University.

Medical.

The medical and public health services of the province are respectively controlled by an Inspector-General of Civil Hospitals and

Director of Public Health. The medical department has made some progress since the year 1911. A striking advance has been made in recent years with urban sanitation, and the opening of a Medical School at Nagpur in 1914 supplied a long-felt need. The principal medical institutions are the Mayo Hospital at Nagpur, opened in 1874 with accommodation for 213 in-patients, the Victoria Hospital at Jabulpore, opened in 1886 with accommodation for 157 in-patients, the Daga Memorial (Dufferin) Hospital and the Muir Memorial Hospital at Nagpur and the Lady Elgin Hospital and the Crump Children's Hospital at Jabulpore, these last four being for women and children and can together accommodate for 280 in-patients. Three important hospitals for women have been recently opened at Chhindwara and Khandwa and Murtizapur and at all district headquarters where no separate women's hospitals exist, sections have been opened at the Main Hospitals for the treatment of women by women. The Mayo Hospital, Nagpur, was provincialised in 1923, the Irwin Hospital at Amraoti in 1925, the Victoria Hospital at Jabulpore in 1926, and the Silver Jubilee Hospital at Raipur in 1928. In accordance with recent policy, 12½ out of 185 local fund dispensaries have been transferred to the administrative and executive control of local bodies. The Province has one Mental Hospital at Nagpur. Vaccination is compulsory in nearly all municipal towns in the Province. The Central Provinces Vaccine Institute at Nagpur was opened in 1913.

Finances.

A combination of adverse circumstances has led to a substantial contraction of the resources of the province during the last five years. In spite of drastic retrenchment all round the year opened with an unproductive debt of Rs 53 lakhs, representing loans taken in 1931-32 and 1934-35 to cover deficits. In the face of these circumstances the budget presented this year was intended to mark time and practically has reached the stage beyond which retrenchment is not possible. To replace partially the fall of revenue, principally from Excise, a bill to impose license fees on the vend of tobacco was presented to the Council. It first refused to refer the bill to a Select Committee, but subsequently agreed to the motion to circulate it for eliciting opinion thereon. It is clear that the local Government will have to explore additional sources of revenue in order to be able to resume measures of development.

FINANCES OF THE CENTRAL PROVINCES.

ESTIMATED REVENUE FOR 1935-36.

<i>Principal Heads of Revenue.</i>		Rs.
Taxes on Income
Salt
Land Revenue		2,59,30,000

North-West Frontier Province.

The North-West Frontier Province, as its name denotes, is situated on the north-west frontier of the Indian Empire. It is in form an irregular strip of country lying north by east and south by west and may generally be described as the tract of country, north of Baluchistan, lying between the Indus and the Durand boundary line with Afghanistan. To the north it extends to the mountains of the Hindu Kush. From this range a long broken line of mountains runs almost due south, dividing the province from Afghanistan, until the Sulaiman Range eventually closes the south of the Province from Baluchistan. The greatest length of the province is 408 miles, its greatest breadth 279 miles and its total area about 36,356 square miles. The territory falls into three main geographical divisions: the Cis-Indus district of Hazara; the narrow strip between the Indus and the Hills, containing the Districts of Peshawar, Kohat, Bannu and Dera Ismail Khan, and the rugged mountainous regions on the north and west between those districts and the border line of Afghanistan. Hazara and the four districts in the second division contain 13,518 square miles. The mountain regions, north and west, are occupied by tribes subject only to the political control of the H. E. the Governor in his capacity as Agent to the Governor-General. The area of this tract is roughly 22,828 square miles and in it are situated, from north to south, the political agencies severally known as the Malakand, Khyber, Kurram, North Waziristan and South Waziristan Agencies. Each of the Deputy Commissioners of the five administered districts is responsible for the management of political relations with certain tribes or sections of the tribes across the frontier. A few hundred miles of the trans-border Territory are internally administered by the Political Agents, but the bulk of the trans-border population is free from any internal interference, so long as offences are not committed and so long as the tribes observe the conditions on which allowances are paid to many of them.

The area of the Province is a little more than half that of Bombay (excluding Sind and Aden) and amounts to more than three-fifths of the size of England without Wales. The density of population throughout the Province equals 99 persons to a square mile, but in the more favoured portions the pressure of population is much greater. In the Hazara District there are 208 persons to a square mile and in the trans-Indus plains tract the number is 156. Density for the 5 rented Districts 5,179 persons per s. mile. The key to the history of the people of the N.-W. F. P. lies in the recognition of the fact that the valley of Peshawar was always more closely connected politically with Eastern Iran than with India, though in pre-Mahomedan times its population was mainly Indian by race. Early history finds the Iranians dominating the whole Indus valley. Then came the Greek invasion under Alexander the Great, in B.C. 327 then the invasions of the Sakas, and of the White Huns and later the two great waves of Muhammadan invasion. Last came the Sikhs invasion beginning in

1818. The Frontier Territory was annexed by the British in 1849 and placed under the control of the Punjab Government. Frequent warfare occurred with the border tribes. The most serious phases of these disturbances were the war provoked by the aggression of Afghanistan in 1919 and the protracted punitive operations against the Waziris in 1919-1920. These have resulted in the establishment at Razmak, a position dominating the Mahand Waziri country, of a permanent garrison of 10,000 troops drawn mostly from stations lying in the Plains immediately below the hills. A circular road from Bannu, through Razmak to Saratogha, Jandola and back to the Derajat provides communications transport with this force and facilitates its mobility. The effect of this measure has been a marked improvement in the internal peace of the Tribal area.

The division of the Frontier Province from the Punjab was frequently discussed, with the double object, in the earlier stages of these debates, of securing closer and more immediate control and supervision of the Frontier by the Supreme Government and of making such alterations in the personnel and duties of frontier officials as would tend to the establishment of improved relations between the local British representatives and the independent tribesmen. The Province was eventually removed from the control of the Punjab administration in 1901. To it was added the political charge of Dir, Swat and Chitral, the Political Agent of which had never been subordinate to the Punjab. The new Province was constituted under a Chief Commissioner and Agent to the Governor-General, with headquarters at Peshawar, in direct communication with the Government of India in the Foreign and Political Department. In April 1932 the Province was constituted a Governor's Province. In political questions there is no intermediary between the Governor and the local officer, an arrangement designed to secure both prompt disposal of references and the utilisation of the expert knowledge of frontier conditions for which the head of the administration is selected. The advisability of re-uniting the Province with the Punjab was much discussed in certain Indian political circles and as a result of the views expressed upon the matter in the Legislative Assembly the Government of India in 1922 appointed a Committee of officials and unofficials to investigate it. The Committee, presided over by Mr. D. de S. Bray, M.L.A., Joint Foreign Secretary, toured the Frontier Province and the Punjab and heard numerous witnesses. Its members were Messrs. Raza Ali, M.O.S., T. Rangacharia, Chaudhri Shahabuddin, N. M. Samarth and K. B. Abdur Rahim Khan, members of the Legislative Assembly, H. N. Bolton, I.O.S. (Foreign Dept.) and A. H. Parker, I.O.S. (Punjab) (members). The inquiry developed practically into a contest between Mahomedans and Hindus on communal lines. The Hindus, allied in sympathy with their co-religionists in the Punjab demanded the reunion of the administered districts of the

Province with the Punjab or, if that were not attainable then the placing of the judicial administration of the Province under the Punjab High Court at Lahore. The Mahomedans on the other hand claimed the right of their Province to a status corresponding with that enjoyed by other Provinces of India and to immediate reforms initiating and providing for progress along that line. The Hindus argued that a separate Pathan Province on the Frontier would cause a dangerous sentimental division from the rest of India, with leanings towards the allied racial elements outside British India. The answer to that was that a contented Pathan Province would be a valuable buttress against hostile feeling across the Border. The Committee's deliberations ended in disagreement, the two Hindu members writing each a separate report favourable to the Hindu viewpoint already explained, and the majority of the Committee, comprised of all its other members, recommending advance on a Provincial basis. Their principal recommendations were for—

Retention of the Settled Districts and Tribal Tracts as a separate unit in charge of a minor administration under the Government of India;

Early creation of a Legislative Council for the Settled District and appointment of Members of Council and Minister;

Appointment of a second Judicial Commissioner which has since been sanctioned and reform of the judicial administration in various directions, including interchange of officers with the Punjab, so that the members of the Service in the smaller Province should have the advantage of experience in the larger one.

"If (concluded the Majority) the Pathan nationality is allowed self-determination and given scope for that self-development within the Indian Empire under the Reforms Scheme after which it is now striving we are assured that with a contented Frontier population India can face with calm resolution the future that the Frontier has in store for her."

The People.

The total population of the N.-W. F. P. (1931) is 4,684,364, made up as follows:—

Hazara	669,636
Trans-Indus Districts ..	1,755,440
Trans-Border Area ..	2,259,288

This last figure is estimated. There are only 561·3 females per 1,000 males in the towns, and 872·2 females per 1,000 males in rural areas.

This disproportion of the sexes cannot at present be explained in the N.-W. F. P. any more than in other parts of Northern India where it also appears. The discrepancy is greater here than in any other Province of India. There is no ground for believing that the neglect of girls in infancy has any effect in causing the phenomenon. On the other hand, the female population has to face many trials which are unknown to men. The evils of unskilled midwifery and early marriage are among them.

Both the birth and death-rates of the Province are abnormally low. The birth rate in the administered districts, according to the last available official reports, is 25·8 and the death-rate 21·9.

The dominant language of the Province is Pashtu and the population contains several lingual strata. The most important sections of the population, both numerically and by social position, are the Pathans. They own a very large proportion of the land in the administered districts and are the ruling race of the tribal area to the west. There is a long list of Pathan, Baluch, Rajput and other tribal divisions. Gurkhas have recently settled in the Province. The Mahomedan tribes constitute almost the whole population, Hindus amounting to only 5 per cent. of the total and Sikhs to a few thousands. The occupational cleavage of the population confuses ethnical divisions.

(Under the North-West Frontier Province Law and Justice Regulation of 1901), custom governs all questions regarding successions, betrothal, marriage, divorce, the separate property of women, dower, wills, gifts, partitions, family relations such as adoption and guardianship, and religious usages and institutions, provided that the custom be not contrary to justice, equity or good conscience. In these matters the Mohammadan Law where the parties are Mohammadans, and Hindu Law, where the parties are Hindus, is applied in so far as that law has not been altered or abolished by any legislative enactment and is not opposed to the provisions of the Regulation and has moreover not been modified by any custom.

The climatic conditions of the N.-W.F.P. which is mainly the mountainous region, but includes the Peshawar Valley and the riverine tracts of the Indus in Dera Ismail Khan District, are extremely diversified. The latter district is one of the hottest areas of the Indian continent, while on the mountain ranges the weather is temperate in summer and intensely cold in winter. The air is generally dry and hence the annual ranges of temperature are frequently very large. The Province has two wet seasons, one the S.-W. Monsoon season, when moisture is brought up from the Arabian Sea and the Bay of Bengal; the other in winter, when storms from Mesopotamia, Persia and the Caspian Districts bring widespread rain and snowfall. Both sources of supply are precarious and not infrequently either the winter or the summer rainfall fails almost entirely.

Trade and Occupations.

The population derives its subsistence almost wholly from agriculture. The Province is practically without manufactures. There is no considerable surplus of commercial products for export. Any commercial importance which the province possesses it owes to the fact that it lies across the great trade routes which connect the trans-border tribal territories and the marts of Afghanistan and Central Asia with India, but the influence of rail-

ways is diminishing the importance of these trading interests. Special mention may be made of the railway comparatively recently opened linking Baluchistan, in the south-west of the N. W. F. P., *via* Nushki with south-east Persia. The line connects with the north-west railway system of India and extends 343 miles to Duzdap, within the Persian border. Two weekly trains run each way and the freight carried largely consists of carpets, wool and dates, from Persia and of tea, sugar and piece-goods from the Indian side. Though the railway is primarily strategic in purpose its commercial and political effects will be considerable. The travelling traders (or *Powindahs*) from the trans-frontier area have always pursued their wanderings into India and now, instead of doing their trading in towns near the border, carry it by train to the large cities in India. The Railway line from Pir to Lanktshina which is complete and open to public traffic now will similarly, in course of time, develop both the manner and amount of transport communications and trade. The new roads in Waziristan are already largely utilised by the Tribal Inhabitants for motor traffic. Prices of agricultural produce have in recent years been high, but the agriculturists, owing to the poverty of the means of communication, have to some extent been deprived of access to Indian markets and have therefore been unable to profit by the rates prevailing. On the other hand, high prices are a hardship to the non-agricultural classes. The effects of recent extensions of irrigation have been important. Land tenures are generally the same in the British administered districts as in the Punjab. The cultivated area of the and amounts to 25 per cent. and uncultivated to 75 per cent.

The work of civilisation is now making steady progress, both by the improvement of communications and otherwise. Relations with the tribes have improved trade has advanced, free medical relief has been vastly extended, police administration has been reformed and the desire of people for education has been judiciously and sympathetically fostered, though in this respect there is complaint against the limitations imposed by financial embarrassments. In the British administered districts the total percentage of male Scholars to the total male population 55.9 and that of female Scholars to the total female population is 1.32 for the year 1933-34, per cent. males and 7 per cent. females of the total population are returned as literates. The figures for males denote a very narrow diffusion of education even for India. Those for females are not notably low, but they are largely affected by the high literacy amongst Sikh women, of whom 13.3 per cent. are returned as literate. The inauguration of a system of light railways throughout the Province, apart from all considerations of strategy, must materially improve the condition of the people and also by that means strengthen the hold of the administration over them. The great engineering project of the Upper Swat River Canal, which was completed in 1914, and the lesser work of the Paharpur Canal, also completed a few years ago, will bring ease and prosperity to a number of peasant homes.

Administration.

The administration of the North-West Frontier Province is conducted by H. E. the Governor in Council and Agent to the Governor-General. His staff consist of—

- (1) The Hon'ble Member of the Executive Council.
- (2) The Hon'ble Minister Transferred Departments.
- (3) The Hon'ble the President, Legislative Council.
- (4) Officers of the Political Department of the Government of India.
- (5) Members of the Provincial Civil Service
- (6) Members of the Subordinate Civil Service.
- (7) Superintendents and Assistant Superintendents of Police.
- (8) Officers recruited for the service of departments requiring special knowledge—Military, Engineering, Education, Medicine and Forestry.

The cadre posts reserved for officers coming under the fourth head above are.—

Administration.	{	H. E. the Governor and Agent to the Governor-General The Hon'ble Member of the Executive Council Chief Secretary Secretary, Transferred Departments Under-Secretary	}	6
		Resident in Waziristan .. 1 Dy. Commissioners .. 5 Political Agents .. 5 Senior Sub-Judges .. 2		
Judicial Commr.'s Court & District Judges.	{	Asst. Commissioners and Asst. Political Agents.	}	12
		Judicial Commissioner. Two District and Sessions Judges One Additional ditto.		

The districts under the Deputy Commissioners are divided into from two to five sub-collectorates in charge of tahsildars, who are invested with criminal and civil and revenue powers, and are assisted by naib-tahsildars, who exercise only criminal and revenue powers. Some sub-divisions are in charge of Assistant or Extra Assistant Commissioners. The village community characteristic of some parts of India is not indigenous among the Pathans. Its place as a social unit is to some extent taken by the tribe, which is held together by the ties of kinship and ancient ancestry, real or imaginary. Modern municipal local government has been introduced in the towns. There are also district boards. The district is the unit for police, medical and educational administration and the ordinary staff includes a District Superintendent of Police, a Civil Surgeon, the Superintendent of Jail and a District

Inspector of Schools. The Province forms a single educational circle and only possesses one forest division, that of Hazara. The P. W. D. of the Province carries out duties connected with both Irrigation and Buildings & Roads. It is organised in two circles (in all seven Divisions), under a Chief Engineer, P.W.D. who is also *ex-officio* Secretary to H. E. the Governor in Council. The administration of the civil police force of the districts is vested in an Inspector-General. There is a special force of Frontier Constabulary. Of the Agencies only Kurram and Tochi Valley pay land revenue to the British Government. The revenue administration of all five administered districts is controlled by the Revenue and Divisional Commissioner. For the administration of civil and criminal justice there are two Civil and Sessions districts, each presided over by a District and Sessions Judge. The two Judicial Commissioners are the controlling authority in the Judicial branch of the administration, and their Courts are the highest criminal and appellate tribunals in this Province. The improvements needed to bring the judicial administration up-to-date, in accord with the growth of the business of administration, are dealt with in the Inquiry Committee's report to which reference was made above.

FINANCES.

In order to meet the excess in expenditure over the income of the Provinces a subvention of Rs. one crore per annum is given by the Government of India out of Central Revenues.

The Administration.

The principal officers in the present Administration are:—

H. E. the Governor and Agent to the Governor-General—H. E. Lieut.-Col Sir Ralph Griffith, K.C.S.I., C.I.E. (Assumed charge 18th April 1932).

Private Secretary—Captain L. M. Barlow, M. C. *Aide-de-Camp*—Lieut. P. J. Keen

The Hon'ble Member of the Executive Council—The Hon'ble Sir George Cunningham, K.C.I.E., C.S.I., O.B.E., I.C.S.

Resident, Waziristan—Mr. J. G. Acheson, C.I.E., I.C.S.

Judicial Commissioner, Mr. L. Middleton, I.C.S.

Additional Judicial Commissioner—Khan Bahadur Kazi Mir Ahmad Khan, B.A., LL.B.

Revenue and Divisional Commissioner, Mr. J. S. Thomson, C.I.E., I.C.S.

Chief Secretary to Government, N.W.F.P.—Mr. A. J. Hopkinson, I.C.S.

Secretary to Government, Transferred Departments—Major A. E. H. Macann.

Under Secretary to Chief Commissioner—Lt. A. L. A. Dredge.

Financial Secretary to Government, N.W.F.P.—Mr. A. N. Mitchell, I.C.S. (offg.)

Assistant Secretary (General) to Government, N.W.F.P.—Mr. W. V. Rogers (offg.)

Asstt. Financial Secy. to Govt., N.W.F.P.—S. Ata Elahi Siddiqui

Indian Personal Assistant, H. E. the Governor—Khan Bahadur Sultan Mabd Khan.

Secretary, Public Works Department—Mr. G. M. Ross, I.E.S.

Inspector-General of Civil Hospitals and Prisons—Bt Col H. H. Thorburn, C.I.E., M.B.Ch.B. (Glas.), L.M.S.

Inspector-General of Police—M. H. O. de Galle
Commandant, Frontier Constabulary—H. Illidge, I.P.

Director of Public Instruction—T. C. Orgill, M.A., I.E.S.

Superintendent, Archaeological Survey, Frontier Circle—Mahammad Hamid Kuvaishi, B.A.

District and Sessions Judge—Captain Abdur Rahim Khan

Additional District and Sessions Judge, Peshawar and Hazara—M. Mahomed Abkai Khan.

Capt. H. D. Rushton (Deputy.)

Political Agents.

Major H. H. Johnson, C.I.E., M.M., Dir. Swat and Chitral.

Major C. S. Searle, M.C., Khyber.

Capt. G. C. L. Creighton, North Waziristan.

Major C. C. H. Smith, Kurram.

Capt. H. A. Barnes, South Waziristan

Deputy Commissioners

Capt. Iskander Mirza, Hazara.

A. D. F. Dundas, I.C.S., Peshawar.

Captain A. J. Dring, Dera Ismail Khan.

Major G. L. Mallam, Bar-at-Law, Kohat.

Captain E. H. Cobb, O.B.E.

Former Chief Commissioners.

The Hon'ble Lieutenant-Colonel Sir Harold Deane, K.C.S.I., from 9th November 1901 to 3rd June 1908. Died 7th July 1908.

The Hon. Lieutenant-Colonel Sir George Roos-Keppel, G.C.I.E., K.C.S.I., from 4th June 1908 to 9th September 1919.

The Hon'ble Sir Alfred Hamilton Grant, K.C.S.I., K.C.I.E., from 10th September 1919 to 7th March 1921.

The Hon'ble Sir John Loader Maffey, K.C.V.O., C.S.I., I.C.S., from 8th March 1921 to 6th July 1923.

The Hon'ble Sir Horatio Norman Bolton, K.C.I.E., C.S.I., I.C.S., from 7th July 1923 to 30th April 1930.

The Hon'ble Sir Stuart Pears, K.C.I.E., C.S.I., I.C.S., from 10th May 1930 to 9th September 1931.

N. W. F. PROVINCE LEGISLATIVE
COUNCIL.

The Hon'ble K. B. Khan Abdul Ghafur Khan,
Khan of Zaida (*President*).

K. B. Abdul Rahim Khan, M.B.E., Bar-at-Law
(*Deputy President*).

Sheekh Abdul Hamid, B.A., LL.B. (*Secretary*).

EX-OFFICIO MEMBERS AND MINISTERS.

The Hon'ble Sir George Cunningham, K.C.I.E.,
C.S.I., O.B.E., Executive Councillor.

The Hon'ble K. B. Nawab Sir Abdul Qayum
Khan, K.C.I.E., Minister to the Government,
N.W.F.P.

OFFICIALS NOMINATED MEMBERS.

Thompson, Mr. J. S., I.C.S., Revenue and Division
Commissioner, 10, The Mall, Peshawar
Cantonment.

Macann, Capt. A. E. H., Secretary to Govern-
ment, Transferred Departments, Peshawar
Cantonment.

de Gale, Mr. H. O., Inspector-General of Police,
Commissioner Road, Peshawar Cantonment

Ross, Mr. G. M., B.A. Chief Engineer & Secretary
to Government, N.W.F.P., P.W.D.

S. Raja Singh, M.A., LL.B., 1, Cavalry Lane,
Legal Remembrancer to Government, Peshawar
Cantonment.

NON-OFFICIALS NOMINATED MEMBERS.

Allah Nawaz Khan, Nawabzada, Representative
of general interests, Dera Ismail Khan.

Khan Ghulam Rabbani Khan, B.A., LL.B. (Alig.),
Representative of general interests, Mansehra,
Hazara District.

Hassan Ali Khan, Sultan, Khan Sahib, of Boi,
Representative of general interest, Boi,
Mansehra Tahsil, Hazara District.

Khan Malik-kur Rahaman Khan, Kayani, M.A.,
Representative of general interests, Sahpur,
Kohat District.

Narain Singh Bedi, Baba, B.A., Representative
of general interests, Ganj Street, Peshawar
City.

ELECTED MEMBERS.

Khan Abdul Ghafur Khan, Hashtnagar (Muham-
madan), Bar-at-Law, Peshawar.

Abdul Qayum Khan, Mr., B.A., LL.B. (Alig.),
Outer Mansehra (Muhammadan), Mansehra,
Hazara District.

Abdur Rahaman Khan, Arbab, Doaba-cum-
Daudzai (Muhammadan), Gari Gulla, Post
Office, Nahaqui, Peshawar District.

Khan Abdul Hamid Khan, Kundi, B.A., LL.B.
(Alig.), North-West Frontier Province (Land-
holders), Pleader, Gul Imam, Dera Ismail Khan
District.

Baz Muhammad Khan, Khan Bahadur Nawab,
Kohat East (Muhammadan), Teri, Kohat
District.

Ghulam Haider Khan, Khan Bahadur, Bannu
North (Muhammadan), Bazar Ahamad Khan,
Bannu District.

Ghulam Hassan Ali Shah *alias* Hassan Gul Pir,
Kohat West (Muhammadan), Naryab, Kohat
District.

Khan Hidayatullah Khan, Peshawar District
(Landholders), Umarzai, Tashil Charsadda,
Peshawar District.

Khan Habibullah Khan, B.A., LL.B. (Alig.), Bannu
South (Muhammadan), Pleader, Lakki, Bannu
District.

Hamidullah Khan, Khan Bahadur Nawab,
Razzar-cum-Amazai (Muhammadan), Toru,
Peshawar District.

Hazara Isher Das, Rai Bahadur Lala, M.A., LL.B.,
(Non-Muhammadan), Nawanshahr, Hazara
District.

Karam Chand, Rai Bahadur, O.B.E., Mardan
(Non-Muhammadan), Peshawar Cantonment.

Khuda Baksh Khan, Malik, B.A., LL.B., Other
Towns (Muhammadan), Pleader, Dera Ismail
Khan.

Ladha Ram, Lala, B.A., LL.B., Kohat-cum-Bannu
(Non-Muhammadan), Pleader, Bannu City.

Muhammad Zaman Khan, Khan Sahib, Hazara
Central (Muhammadan), Khalabat, Hazara
District.

Khan Muhammad Abbas Khan, Inner Mansehra
(Muhammadan), Mansehra, Hazara District.

Muhammad Sharif Khan, Arbab, B.A., Khalisa-
cum-Bara (Muhammadan), Land Yarghajo,
Peshawar District.

Muhammad Ayub Khan, Mr., Merdan Kamalzai-
cum-Baizai (Muhammadan), Khandi Khan
Khelan, Hoti, Peshawar District.

Mehar Chand Khanna, Rai Sahib Lala, B.A.,
Peshawar City (Non-Muhammadan), Saddar
Bazar, Peshawar Cantonment.

Nawabzada Nasrullah Khan, Dera Ismail Khan
East (Muhammadan), Pleader, Dera Ismail
Khan.

Pir Baksh, Mr., M.A., LL.B. (Alig.), Peshawar
City (Muhammadan), Pleader, Kissa Khani,
Peshawar City.

Jagat Singh, Sardar, Narag Banker and
Merchant, North-West Frontier Province
(Sikh), Peshawar Cantonment.

Rochi Ram, Rai Sahib Lala, Dera Ismail Khan
(Non-Muhammadan), Contractor, Dera Ismail
Khan.

Samundar Khan, Mr., Hazara East (Muhamma-
dan), Banda Pir Khan, Hazara District.

Taj Muhammad Khan, Khan Bahadur, O.B.E.,
Nowshera (Muhammadan), Badrashi, Now-
shera.

Assam.

The Province of Assam, omitting the partly administered and unadministered tracts on its northern and eastern borders, comprises an area of some 67,334 square miles. It includes the Assam Valley Division, the Surma Valley and Hill Division and the State of Manipur. It owes its importance to its situation on the north-east frontier of India. It is surrounded by mountainous ranges on three sides while on the fourth (the west) lies the Province of Bengal on to the plains of which debouch the two valleys of the Brahmaputra and the Surma which form the plains of Assam. These two valleys are separated from each other by the Assam Range, which projects westward from the hills on the eastern border.

Population.

The total population of the Province in 1931 was 9,247,557, of whom 445,006 were in Manipur. Of the population in 1931, nearly 52 millions were Hindus, over 2½ millions were Muslims, a million belonged to tribal religions and a quarter of a million were Christians. 43 per cent. of the population speak Bengali, 21 per cent. speak Assamese; other languages spoken in the province are Hindi, Uriya, Mundari, Nepali and a great variety of languages classified under the general heading of the Tibeto-Chinese languages. Owing to the great areas of waste and rivers the density of the province is only 137, which compared with that of most other parts of India is low.

Agricultural Products.

It has agricultural advantages for which it would be difficult to find a parallel in any part of India, climate, soil, rainfall and river systems all being alike favourable to cultivation. Rice is the staple food crop, nearly 4,857,567 acres being devoted on this crop. Except in the Himalayan Terai irrigation is unnecessary. Tea and jute are the most important crops grown for export. The area under tea consists of 4,31,782 acres. Wheat and tobacco are also grown and about 35,934 acres are devoted to sugarcane.

Meteorological Conditions.

Rainfall is everywhere abundant, and ranges from 23·39 to 241·76 inches. The maximum is reached at Cherrapunji in the Khasi Hills, which is one of the wettest places in the world, having a rainfall of 520·09 inches. The temperature ranges from 59 at Sibsagar in January to 84·8 in July. Earthquakes of considerable severity have taken place, by far the worst being that which occurred in 1897.

Mines and Minerals.

The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil. The most extensive coal measures are in the Naga Hills and the Lakhimpur districts, where about 186,313 tons were raised in 1934. Limestone is quarried in the Khasi and Jaintia Hills. Petroleum is worked only in Lakhimpur and Cachar.

An account of the petroleum occurrences in Assam was recently published in the memoirs of the Geological Survey of India. It states that the petroleum localities in this province are confined to a curved belt of country along the basins of the Brahmaputra and

Surma. This belt is traceable over a distance of some 800 miles from N. E. Assam through Cachar and Chittagong to the Arakan coast, where it has a S.S.E. trend.

Manufactures and Trade.

Silk is manufactured in the Assam Valley, the weaving being done by the women. Cotton weaving is also largely practised by the women, and almost every house contains a loom; the cloth is being gradually displaced by imported goods of finer texture and colour. Tea manufacture is the most important industry of the province. Boat building, brass and metal and earthenwares, and limestone burning are the other industries apart from agriculture, which itself employs about 89 per cent. of the population. Assam carries on a considerable trade with the adjoining foreign tribes and countries.

Communications.

Much of the trade of Assam is carried by river. The excellence of its water communications makes the province less dependent upon roads than other parts of India. A large fleet of steamers maintained by the India General Navigation Company and the Rivers Steam Navigation Company plies on the rivers in both Valleys. An alternate day service of passenger-boats runs between Goalundo and Dibrugarh. In recent years the road system has developed. There are two trunk roads on either bank of the Brahmaputra parts of which are metalled or gravelled and the rest unmetalled and excellent metalled roads from Shillong to Gauhati and to Cherrapunjee and also between Dimapur, on the Assam Bengal Railway, and Imphal, the capital of the Manipur State. A motor road, connecting Shillong with the Surma Valley, has been completed and opened to traffic. The Government of Assam had in 1928 carried out a considerable programme of road improvement and another programme is at present being launched which aims at the improvement of nearly 300 miles of road either by metalling or gravelling and the construction of 6 big bridges. The work has already been undertaken. *Kutcha* roads are being maintained by means of mechanical plant which has proved successful in maintaining, throughout the year, a surface fit for motor vehicles. Motor traffic has increased on all sides and the demands for better roads has been insistent. The open mileage of railway has also shown a steady improvement and several branch lines to the Assam Bengal Railway system have been added in recent years. The main Assam Bengal Railway line runs from Chittagong Port, in Bengal, through the North Cachar Hills to Tinsukia, a station on the Dibrugarh Railway and connects the Surma and Brahmaputra Valleys. A branch of the line runs from Badarpur to Silchar at the Eastern end of the Surma Valley and another runs through the west of the Assam Valley from Lumding to Gauhati where it effects a junction with the Eastern Bengal Railway. The Eastern Bengal Railway connects Assam with the Bengal system via the Valley of the Brahmaputra. An extension towards Rangapora from Tanga junction; along the North Bank of the Brahmaputra has been opened to traffic.

THE FINANCES OF ASSAM.

In common with the other Provinces of India, Assam secured substantial financial autonomy under the Reform Act of 1919. The present financial position for 1935-36 is set out in the following table :—

<i>Principal Heads of Revenue—</i>	<i>Trs.</i>		<i>Trs.</i>
Taxes on Income	220	Miscellaneous Railway expenditure	1
Salt	15	Construction of Railways	62
Land Revenue	1,14,00	Navigation, Embankments, Drainage Works	6,17
Excise	3,157	Interest on ordinary Debt	10,17
Stamps	17,55	Appropriation for reduction or avoidance of debt	28,51
Forest	1,237	General Administration	10,24
Registration	1,56	Administration of Justice	4,97
<i>Railways—</i>		Jails and Convict Settlements	27,69
State Railways—		Police (other than Assam Rifles)	3,26
Gross receipts		Police (Assam Rifles)	24
<i>Deduct—Working expenses</i>		Ports and Pilotage	3
Net receipts		Scientific Departments	80
Subsidised Companies		Education (European)	1
Total		Medical	71
<i>Debt Services—</i>		Miscellaneous Departments	41,27
Interest	96	Civil Works	5
<i>Civil Administration—</i>		Famine Relief and Insurance	20,53
Administration of Justice	1,80	Superannuation Allowances and Pensions	2,68
Jails and Convict Settlements	59	Stationery and Printing	4,10
Police	1,63	Miscellaneous	<i>Nil</i>
Ports and Pilotage		Extraordinary charges	
Education	3,33	Contributions to the Central Government by the Provincial Government	
Medical	1,80	Total Reserved Subjects	1,89,73
Public Health	88	<i>Transferred Subjects—</i>	
Agriculture	99	Land Revenue	5,50
Industries	5	Excise	1,58
Miscellaneous Departments	56	Registration	1,05
<i>Buildings, Roads and Miscellaneous Public Improvements—</i>		General Administration	1
Civil Works	8,09	Scientific Departments	32,61
<i>Miscellaneous—</i>		Education (other than European)	13,57
Receipts in aid of Superannuation	19	Medical	7,03
Stationery and Printing	43	Public Health	7,45
Miscellaneous	81	Agriculture	1,95
<i>Contributions and Assignments to and from the Central Government—</i>		Industries	1
Miscellaneous adjustments between the Central and Provincial Governments	900	Miscellaneous Departments	3,74
Revenue in England		Civil Works	60
<i>Capital Revenue—</i>		Stationery and Printing	2,61
Recoveries of loans and advances by the Assam Government	5,08	Total Transferred subjects	77,61
Loan from the Provincial Loans Fund	55,20	<i>Capital Expenditure—</i>	
Appropriation for reduction or avoidance of debt	1,017	Forest capital outlay not charged to revenue	
Government Press—		Civil Works not charged to revenue	
Depreciation Fund	8	Payment of commuted value of pensions not charged to revenue	1,58
Provincial Subvention from Central Road Development Account	1,60	Payment of gratuities retrenched personnel	9
Suspense		Government Press Depreciation Fund	8
Civil deposits	42	Advances from the Provincial Loans Fund	10,17
Total receipts	2,84,06	Loans and advances by the Assam Government	1,44
Opening Balance		Provincial Subvention from Central Road Development Account	3,12
Grand total	2,84,06	Suspense	
<i>Expenditure—</i>		Expenditure in England	11,18
<i>Reserved Subjects—</i>		Civil deposits	42
Land Revenue	16,86	Total expenditure	2,84,06
Stamps	44	Closing balance	<i>Nil</i>
Forest	11,60	Grand Total	2,84,06
Forest	83		
State Railways	44		
Subsidised Companies			

Administration.

The province of Assam was originally formed in 1874 in order to relieve the Lieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1905, as the result of further deliberations, it was decided to add to the small Province of Assam the eastern portion of its unwieldy neighbour and to consolidate those territories under a Lieutenant-Governor. The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912: the Eastern Bengal Districts were united with the Bengal Commissionerships of Burdwan and the Presidency to form the Presidency of Bengal under a Governor-in-Council, Bihar, Chota-Nagpur and Orissa were formed into a separate province, while the old Province of Assam was re-constituted under a Chief Commissioner.

Under the Indian Reforms Act of 1919 the Province was raised in status to that of administration by a Governor-in-Council and was thereby ranked, with certain minor provinces, to suit its undeveloped character with the older major provinces of India.

The capital is Shillong, a town laid out with great taste and judgment among the pine woods on the slopes of the Shillong Range which rises to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt in a way more likely to withstand the shocks of earthquake.

GOVERNOR.

H. E. Sir Michael Keane, K.C.S.I., C.I.E., I.C.S.

EXECUTIVE COUNCIL.

The Hon'ble Rai Bahadur Promode Chandra Dutta, C.I.E.

The Hon'ble Mr. W. L. Scott, C.I.E., I.C.S.

MINISTERS.

The Hon'ble Maula-i Abdul Hamid, B.L.

The Hon'ble Rai Bahadur Kanak Lal Barua, B.L.

PERSONAL STAFF OF HIS EXCELLENCY THE GOVERNOR.

Private Secretary, Capt R E Peel, The Duke of Cornwall's Light Infantry.

Aide-de-Camp, Capt. W. E. Armstrong, 8th King George's Own Light Cavalry.

Honorary Aide-de-Camp, Subadar-Major Sardar Bahadur Nainsing Mall, 1 D S.M. O.B.S.I.

Honorary Aide-de-Camp, Lt-Col. J P. Moran, V.D.

SECRETARIES, ETC., TO GOVERNMENT.

Chief Secretary, J. A. Dawson, C.I.E., I.C.S.

Secretary to Government (Finance and Revenue), H. M. Prichard, I.C.S.

Secretary to Government (Transferred Departments), H. G. Dennehy, I.C.S.

Under Secretary to Government, G. R. Kamat, I.C.S.

Under Secretary (Transferred Departments), N. N. Phukan, B.L.

Secretary to Government (Legislative Department) and Secretary to the Assam Legislative Council, A. L. Blank, I.C.S.

Secretary to Government in the P. W. D., E. P. Bure, I.S.E., C.I.E.

Additional Secretary, C S Mullan, I.C.S.

Joint Secretary, Judicial Department, T E. Furze, J P (offg)

Superintending Engineer, B. F. Taylor, I.S.E.

Under Secretary, P.W.D., Ali Ahmad, I.S.E.

Assistant Secretary, Finance and Revenue Departments, A. V. Jones, I.S.O., V.D. (on deputation).
Rai Sahib S C Dutt (offg.)

Registrar, Assam Secretariat (Civil), D C. Das (on special duty) S C G Swami (offg)

Registrar, Assam Secretariat (P.W.D.), A. B. Dutt

HEADS OF DEPARTMENTS.

Director of Land Records & Surveys, I. G. Registration, etc., S P Desai, I.C.S.

Director of Industries and Registrar of Co-operative Society & Village Authorities, S L. Mehta, I.C.S.

Director of Agriculture, J N. Chakrabarty

Superintendent, Civil Veterinary Department
Rai Sahib S. C. Ghosh (Tempy)

Conservator of Forests, Assam, A. J. W. Milroy

Commissioner of Excise, Registrar of Joint Stock Companies, Assam, Khan Bahadur Muhammad Chandhuri

Superintendent and Remembrancer of Legal Affairs and Administrator-General, A. L. Blank, I.C.S.

Inspector-General of Police, T. E. Furze J P (offg)

Director of Public Instruction, G. A. Sinall

Inspector-General of Civil Hospitals and Prisons, Col. C. E. Palmer

Director of Public Health, Lt-Col. T. D. Murison.

Chief Engineer, E. P. Burke, C.I.E., I.S.E.

GOVERNORS.

Sir Nicholas Dodd Beaton Bell, K.C.S.I., K.C.I.E., 1921.

Sir William Sinclair Marris, K.C.S.I., K.C.I.E., 1922.

Sir John Henry Kerr, K.C.S.I., K.C.I.E., 1925.

Sir William James Reid, K.C.I.E., C.S.I., 1925.

Sir Egbert Laurie Lucas Hammond, K.C.S.I., C.B.E., 1927.

Sir Michael Keane, K.C.S.I., C.I.E., 1932.

Sir Abraham James Laine, K.C.I.E., 1935.

Sir Michael Keane, K.C.S.I., C.I.E., 1935.

ASSAM LEGISLATIVE COUNCIL.

The Hon'ble Maulavi Faiznur Ali (President).
 The Hon'ble Mr. W. L. Scott, C I E, I.C.S. }
 The Hon'ble Rai Bahadur Promode Chandra Datta, C I E. } *Ex-officio*.

Names.	Constituency by which elected.
ELECTED MEMBERS.	
The Rev. J. J. M. Nichols-Roy . . .	Shillong (General Urban).
Babu Sanat Kumar Das	Silchar (Non-Muhammadan Rural).
Babu Harendra Chandra Chakrabarti . . .	Hailakandi ditto.
Babu Birendra Lal Das	Sylhet Sadar ditto.
Babu Kalcharan Muchi	Sunamganj ditto.
Babu Gopendrolal Das Chaudhuri . . .	Habiganj (North) ditto.
Babu Jitendra Kumar Pal Chaudhuri . . .	Habiganj (South) ditto.
Babu Chiratan Mochi	South Sylhet ditto.
Mr. Sasanka Mohan Das	Karimganj ditto.
Kumar Pramathesh Chandra Barua . . .	Dhubri ditto.

H M Prichard.	

Non-Officials.

Sreejukta Atul Krishna Bhattacharya.	Rev Tanuram Saikia representing the labouring classes.
Sriyut Mahendra Lal Das.	Subadar-Major Sardar Bahadur Jangbir Lama, O.B.I, I.D.S.M., (representing the inhabitants of Backward Tracts).
Khan Bahadur Maulavi Muhammad Mashraf.	Khan Bahadur Maulavi Keramat Ali, Jorhat.
Rai Sahib Pyari Mohan Das.	

Baluchistan.

Baluchistan is an oblong stretch of country occupying the extreme western corner of the Indian Empire. It is divided into three main divisions: (1) British Baluchistan with an area of 9,476 square miles consisting of tracts assigned to the British Government by treaty in 1879; (2) Agency Territories with an area of 44,345 square miles composed of tracts which have, from time to time, been acquired by lease or otherwise brought under control and placed directly under British officers; and (3) the Native States of Kalat and Las Bela with an area of 80,410 square miles. The Province embraces an area of 134,838 square miles and according to the census of 1931 it contains 868,617 inhabitants.

The country, which is almost wholly mountainous, lies on a great belt of ranges connecting the Safed Koh with the hill system of Southern Persia. It thus forms a watershed the drainage of which enters the Indus on the east and the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a feature of Central Asia. Rugged, barren, sun-burnt mountains, rent by high chasms and gorges, alternate with arid deserts and stony plains, the prevailing colour of which is a monotonous sight. But this is redeemed in places by level valleys of considerable size in which irrigation enables much cultivation to be carried on and rich crops of all kinds to be raised.

The political connection of the British Government with Baluchistan commenced from the outbreak of the First Afghan War in 1839; it was traversed by the Army of the Indus and was afterwards occupied until 1842 to protect the British lines of communication. The districts of Kachi, Quetta and Mastung were handed over to the Amir of Afghanistan and Political Officers were appointed to administer the country. At the close of the First Afghan War, the British withdrew and these districts were assigned to the Khan of Kalat. The founder of the Baluchistan Province as it now exists was Sir Robert Sandeman who broke down the close border system and welded the Baluch and Brahui Chiefs into a close confederacy. In the Afghan War of 1879 Pishin, Shorapur, Sibi, Zawara Valley and Thal-Chotali were handed over by Yakub Khan to the British Government and retained at Sir Robert Sandeman's strenuous insistence.

Industries.

Baluchistan lies outside the monsoon area and its rainfall is exceedingly irregular and scanty. Shahrigh, which has the heaviest rainfall, records no more than 11½ inches in a year. In the highlands few places receive more than 10 inches and in the plains the average

rainfall is about 5 inches, decreasing in some cases to 3. The majority of the indigenous population are dependent for their livelihood on agriculture, care of animals and provision of transport. The majority of the Afghan and the Baluch, as a rule, cultivate their own lands. The Brahuis dislike agriculture and prefer a pastoral life. Previous to the advent of the British, life and property were so insecure that the cultivator was fortunate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked extension of agriculture which accounts for the increase in the numbers of the purely cultivating classes. The Mekran Coast is famous for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing.

Education is imparted in 108 public schools of all kinds with 7,665 scholars. There is a distinct desire for education amongst the more enlightened headmen round about Quetta and other centres; but on the whole education or the desire of it has made little or no advance in the outlying districts. Coal is mined at Sharigh and Harnai on the Sind-Pishin Railway and in the Bolan Pass. The output of coal in 1929-30 was 16,959 tons. Chromite is extracted in the Zhob District near Hindubagh. The chrome output fell off owing to poorer demand. Limestone is quarried in small quantities. The output of chromite during 1929-30 amounted to 17,906 tons.

Administration.

The head of the local administration is the officer styled Agent to the Governor-General and Chief Commissioner. Next in rank comes the Revenue Commissioner who controls the revenue administration and exercises the functions of a High Court as Judicial Commissioner of the Province. The keynote of administration in Baluchistan is self-government by the tribesmen, as far as may be, by means of their Jirgas or Councils of Elders along the ancient customary lines of tribal law, the essence of which is the satisfaction of the aggrieved and the settlement of the feud, not retaliation on the aggressor or the vindictive punishment of a crime. The district levies play an unobtrusive but invaluable part in the work of the Civil administration not only in watch and ward and the investigation of crime, but also in the carrying of the mails, the serving of processes and other miscellaneous work. In addition to these district levies there are ordinarily three irregular Corps in the Province: the Zhob Militia, the Mekran Levy Corps and the Chaghal Levy Corps. Fundamentally the Province is not self-supporting, the deficit being met from Imperial Funds.

Agent to the Governor-General and Chief Commissioner in Baluchistan, The Hon'ble Lt.-Col A. E. B. Parsons.

Revenue and Judicial Commissioner, B. J. Gould, C.M.G., C.I.E., I.C.S.

Secretary to the Agent to the Governor-General and Chief Commissioner, Major L. W. Galbraith, M.C.

Secretary to the Agent to the Governor-General in the Public Works Department, Brigadier Dawson, M.C.

Assistant Secretary to the Agent to the Governor-General and Chief Commissioner, Major J. E. Litherth, M.B.E.

Under Secretary and Personal Assistant to the Agent to the Governor-General and Chief Commissioner, E. F. Lydall, Esq., I.C.S.

Political Agent and Deputy Commissioner, Quetta, Lt.-Col S. Williams, O.B.E.

Assistant Political Agent and Assistant Commissioner, Quetta, Captain B. Woods Ball, I.A.

Political Agent in Kalat and Political Agent in charge of the Bolan Pass and of Chagar District, H. Weightman, I.C.S.

Assistant to the Political Agent in Kalat and of Chagar, Captain R. G. E. W. Alban

Assistant Political Agent, Mekran, Panjgur, Captain M. O. A. Baig.

Political Agent, Sibi, G. F. Squire, Esq., I.C.S.
Assistant Political Agent, Sibi, M. Worth, I.C.S.

Assistant Political Agent and Colonisation Officer, Nasirabad Sub-Division, District Sibi, G. C. S. Curtis, I.C.S.

Political Agent, Loralai, Lt.-Colonel R. G. Hinde
Assistant Political Agent, Loralai, G. E. Emerson, I.C.S.

Political Agent, Zhob, Fort, Sandeman, Major de la Fargue, I.A.

Assistant Political Agent, Zhob, Capt V. V. D. Willoughby.

Residency Surgeon and Chief Medical Officer, Major J. Roger, I.M.S.

ANDAMAN AND NICOBAR ISLANDS.

This is a group of islands lying in the Bay of Bengal. Port Blair, the headquarters of the Administration, is 780 miles from Calcutta, 740 miles from Madras, and 360 miles from Rangoon, with which ports there is regular communication by Government chartered steamers.

The total area of the Andaman Islands is 2,508 square miles and that of the Nicobar Islands 635 square miles. Of the former 15.74 square miles are cleared and partly under cultivation, the remaining area being dense forest. The population enumerated at the Census of 1931 was 29,463 of whom 7,631 were convicts. The number of convicts on 31st March 1932 was 7,672.

PORTS.—Port Blair and Boningto in the Andamans and Car Nicobar and Camorta in the Nicobars. Timber and coconuts are exported from the Andamans, and coconuts and their products from the Nicobars.

The Islands are administered by a Chief Commissioner. A penal settlement was established at Port Blair in 1858 and is the largest and most important in India.
Chief Commissioner, W. A. Cosgrave, C.I.E., I.C.S.

COORG.

Coorg is a small petty Province in Southern India, west of the State of Mysore. Its area is 1,582 square miles and its population 174,976. Coorg came under the direct protection of the British Government during the war with Sultan Tippu of Seelugapatam. In May 1834, owing to misgovernment, it was annexed. The Province is directly under the Government of India and administered by the Chief Commissioner of Coorg who is the Resident in Mysore with his headquarters at Bangalore. In him are combined all the functions of a local government and a High Court. The Secretariat is at Bangalore where the Assistant Resident is styled Secretary to the Chief Commissioner of Coorg. In Coorg his chief authority is the Commissioner whose headquarters are at Mercara and whose duties extend to every branch of the administration. A Legislative Council consisting of 15 elected members and five nominated members was created in 1923. The chief wealth of the country is agriculture and especially the growth of coffee. Although owing to overproduction and insect pests coffee no longer commands the profits it once enjoyed, the Indian output still holds its own against the severe competition of Brazil. The bulk of the output is exported to France.

Chief Commissioner, Coorg, The Hon. Lt.-Col. C. T. C. Plowden, C.I.E.

AJMER-MERWARA.

Ajmer-Merwara is an isolated British Province in Rajputana. The Agent to the Governor-General in Rajputana administers it as Chief Commissioner. The Province consists of two small separate districts, Ajmer and Merwara, with a total area of 2,711 square miles and a population of 501,395. At the close of the Pindariwar Daulat Rao Scindia, by a treaty, dated June 25, 1818, ceded the district to the British. Fifty-five per cent. of the population are supported by agriculture, the industrial population being principally employed in the cotton and other industries. The principal crops are maize, millet, barley, cotton, oilseeds and wheat.

Chief Commissioner, The Hon. Lt.-Col. Sir G. D. Ogilvie, K.C.I.E., C.S.I.

Aden.

Aden was the first new territory added to the Empire after the accession of Queen Victoria. Its acquisition was the outcome of an outrage committed by local Arabs upon the passengers and crew of a British Indian buggalow wrecked in the neighbourhood. Negotiations having failed to secure satisfactory reparation the Government of Bombay despatched a force under Major Baillie which captured Aden on January 19th, 1839.

Aden is an extinct volcano, five miles long and three broad, jutting out to sea much as Gibraltar does, having a circumference of about 15 miles and connected with the mainland by a narrow isthmus of flat ground. The highest peak on the wall of precipitous hills that surrounds the old Crater which constitutes Aden is 1,725 feet above sea level. Rugged spurs, with valleys between, radiate from the centre to the circumference of the crater. The peninsula of Little Aden, adjacent to Aden proper, was obtained by purchase in 1868 and the adjoining tract of Shaikh Othman, 39 square miles in extent, was subsequently purchased when, in 1882, it was found necessary to make provision for an overflowing population. Attached to Aden is the island of Perim, 5 square miles in extent, in the Straits of Bab-el-Mandeb at the entrance to the Red Sea. The Kuria Muria islands, which were acquired from the Sultan of Muscat in 1854, were attached to the Aden Residency until 1931, when they were transferred to the control of the British Resident in the Persian Gulf.

The whole extent of the Aden Settlement, including Aden, Little Aden, Shaikh Othman and Perim, is approximately 80 square miles. The 1931 census showed Aden, with Little Aden, Shaikh Othman, and Perim to have a population of 48,338. The population of Perim is 1,700 largely dependent on the Coal Depot maintained there by a commercial firm.

The language of the Settlement is Arabic, but several other Asiatic tongues are spoken. The population is chiefly Arab. The chief industries are salt and cigarette manufacture and dhow building. The crops of the tribal low country adjoining are jowar, sesamum, a little cotton, madder, a bastard saffron and, a little indigo. In the hills, wheat madder, fruit, coffee and a considerable quantity of wax and honey are obtained. The difficult problem of water supply has recently been solved. An artesian supply of fresh water has been obtained at Sheikh Othman. Early in 1924 a start was made with a deep bore and sweet water was found at a depth of 1,545 feet. The artesian flow of water now rises from this bore at 750 gallons per hour. A second bore was started in 1928-29 and proved more productive than the first. Five more bores have since been sunk, but two bores only are in operation at present and are sufficient to meet the requirements of the public and shipping. Bore water has practically replaced condensed water.

Supply mains for distributing water by pipe connection to houses have been laid at Crater and Tawahi and several of the private houses have been connected to the mains. Drainage systems at Tawahi and Crater have been completed.

Climate.—The average temperature of the station is 87 degrees in the shade, the mean range being from 75 in January to 98 in June, with variations up to 102. The lulls between the monsoons in May and September are very oppressive. But Aden is usually free from infectious diseases and epidemics, and the absence of vegetation, the dryness of the soil and the purity of the drinking water constitute efficient safeguards against many maladies common to tropical countries. The annual rainfall varies from $\frac{1}{2}$ inch to $8\frac{1}{2}$ inches, with an irregular average of 3 inches.

Aden Protectorate.—The principal Chiefs of the Aden hinterland are in protection treaty relations with the British Government, and their territories and dependencies comprise the Aden Protectorate. In April 1905 an Anglo-Turkish Boundary Commission signed a convention specifying a demarcated frontier between the Aden Protectorate and the (then) Turkish Yemen, stretching from Shaikh Murad, opposite Perim, to the river Bana, some 29 miles north-east of Dhala', and thence north-east to the Great Desert (Rub' al Khali). With certain modifications this frontier has been accepted by the Treaty of San'a signed on 11th February 1934 as the boundary between the Aden Protectorate and the territories of the King of the Yemen, who became ruler of the former Turkish possessions in S.W. Arabia after the conclusion of the Great War. The Aden Protectorate stretches eastwards as far as Ras Dhannah Ali, to include the Hadhramaut and the territories of the Sultan of Qishn, bordering upon Oman, and comprises in all about 42,000 square miles.

The Sultan of Qishn is also Sultan of Sokatra, an island about 1382 square miles in extent lying off Cape Guardafui on the African coast. Sokatra is included in the Aden Protectorate by virtue of a treaty between the Sultan and the British Government in 1886. Its population is said to be about 12,000 mainly pastoral inland, and fishing on the coast. The Aden Protectorate which is under the control of the Resident and Commander-in-Chief, Aden, on behalf of the Colonial Office, is not directly administered, and since the withdrawal of a small British Garrison from Dhala' in 1906 no military posts have been maintained in tribal territory.

Administration.—The administration of Aden was formerly directly under the Government of Bombay, but new arrangements came into operation in 1928. The Imperial Government is now responsible for the military and

political situation in Aden and the Aden Protectorate. The settlement of Aden itself remains under the Government of India. The financial settlement required by this division of authority provides for the payment by India to Imperial Revenues of £259,000 a year for three years and thenceforward of £150,000 a year. The larger amount is considerably less than the annual expenditure falling upon Indian revenues under the former system of control.

The administrative control of the Settlement of Aden was transferred from the Bombay Government on 1st April 1932, when Aden was formed into a separate province under the direct control of the Government of India.

The administration is vested in a Chief Commissioner who is also Resident and Commander-in-Chief. Since the introduction of the dual control referred to above, the Resident's post is to be held alternatively by an Officer of the Indian Service and a member of the Colonial Service. The District of Aden Court is the Colonial Court of Admiralty under Act XVI of 1891, and its procedure as such is regulated by the provisions of the Colonial Courts of the Admiralty Act, 1890 (53 and 54 Vic. Chapter 27). The laws in force in the Settlement are generally speaking those in force in India, supplemented on certain points by special regulations to suit local conditions. The management of the port is under the control of a Board of Trustees formed in 1888. The principal business of the Port Trust in recent years has been the deepening of the harbour so as to allow vessels of large size to enter and leave at all states of the tide. The police force, consisting of land, harbour and armed police, has been reorganised.

Chief Commissioner and Resident and Commander-in-Chief, Lieutenant-Colonel Sir Bernard Rawdon Reilly, KCMG., C.I.E., C.B.E.

Officer Commanding British Forces, Air Vice-Marshal E. L. Gosage, DSO, M.C.

District and Sessions Judge, A. G. Wells, I.C.S.

Political Secretary, Lieutenant-Colonel M. C. Lake.

Chairman of the Port Trust and Settlement, J. V. Alexander, M. Inst. C.E.

Civil Secretary, Captain M. C. Sinclair.

*Civil Administrative Medical Officer, Port Health Officer and Medical Officer in Charge Hospital—*Lieut.-Colonel E. S. Phipson, C.I.E., DSO, I.M.S.

Commandant of Police, R. H. Haslam, J.P.

Government Agent, Perim, J. Pape.

The island of Kamaran in the Red Sea about 200 miles north of Perim was taken by the British from the Turks in 1915, and is administered by the Government of India through a Civil Administrator under the control of the Chief Commissioner of Aden. It has an area of 22 square miles and a population of about 2,200. A quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Dutch East Indies.

Civil Administrator, Captain D. Thompson.

Under the new Federal constitution for India it is proposed to separate Aden from India.

The Home Government.

The Home Government of India represented for sixty years the gradual evolution of the governing board of the old East India Company. The affairs of the company were originally managed by the Court of Directors and the General Court of Proprietors. In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and concerns relating to the civil and military government, and revenues of India. By degrees the number of the Board was reduced and its powers were exercised by the President, the final precursor of the Secretary of State for India. With modifications this system lasted until 1858, when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change. Under the Act of 1858 (merged in the consolidating measure passed in 1915) the Secretary of State is the constitutional adviser of the Crown on all matters relating to India. He inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the government and revenues of India.

The Secretary of State.

Until the Reform Act of 1919 came into force the Secretary of State had the unqualified power to give orders to every officer in India, including the Governor-General, and to superintend, direct and control all acts, operations and concerns relating to the government or revenues of India. In the relations of the Secretary of State with the Governor-General in Council no express statutory change was made, but Parliament ordained through the Joint Select Committee that in practice the conventions governing these relations should be modified; only in exceptional circumstances should he be called upon to intervene in matters of purely Indian interest where the Government and the Legislature of India are in agreement.

Of the wide powers and duties still vested in the Secretary of State, many rest on his personal responsibility; others can be performed only in consultation with his Council, and for some of these the concurrence of a majority of the members of his Council voting at a meeting is required. The Act of 1919 greatly modified the rigidity of the law maintained for sixty years as to the relations of the Secretary of

State with his Council, and he has fuller power than in the past to prescribe the manner in which business is to be transacted. Though in practice the Council meets weekly (save in vacation periods) this has ceased to be a statutory requirement, the law now providing that there shall be a meeting at least once in every month.

The India Council.

The number of members of the Council was reduced by the Act to not less than eight and not more than 12, the Secretary of State being free to appoint within those limits. The period of office was reduced from 7 to 5 years, though the Secretary of State may, for special reasons of public advantage to be communicated to Parliament, re-appoint a member for another five years. Half the Council must be persons who have served or resided in India for at least ten years, and who have not left India more than five years before their appointment. The Act restored the old salary of £1,200, with an additional subsistence allowance of £600 for any member who was at the time of appointment domiciled in India. Lord Morley opened the door of the Council to Indians, and since 1917 the number of Indian members has been three.

Associated with the Secretary of State and the India Council is a Secretariat known as the India Office, housed at Whitehall. Appointments to the establishment are made by the Secretary of State in Council, and are subject to the ordinary Home Civil Service rules in all respects.

In the past the whole cost of the India Office has been borne by the revenues of India, except that the Home Government made certain grants and remissions in lieu of a direct contribution amounting to £50,000 a year. The total cost now is about £230,000. In conformity with the spirit of the 1919 Act, an arrangement was made whereby the salary of the Secretary of State is placed on the Home estimates and most of the outlay needed for the controlling and political functions exercised in Whitehall is met from British revenues, agency functions being still chargeable to Indian revenues. The contribution from the Treasury to India Office administrative expenses is about £115,000.

The High Commissionership.

The financial readjustment was accompanied by a highly important administrative change provided for by the Act, in the creation of a High Commissioner for India in the United Kingdom with necessary establishments. From October 1st, 1920, the High Commissioner took over control of the purchase of Government stores in England and the Indian Students Branch, together with the supervision of the work of the Indian Trade Commissioner. The further development of the functions and powers of the High Commissioner have included such agency work as the payment of Civil leave allowances and pensions, the recruitment of technical officers, supervision of I.C.S. and Forest probationers after first appointment, the making of arrangements for officers on deputation or study leave, repatriation

of destitute lascars, sale of Government of India publications, etc. The staff of the Stores Department is located at the Depot off the Thames in Belvedere Road, Lambeth. The High Commissioner and the rest of the staff, are at India House, Aldwych, W. C. 2, built to the design of Sir Herbert Baker at a cost for construction and equipment of £324,000. There could be no question of adopting a distinctly Oriental style for the exterior; but there are enough Indian features of ornamentation to proclaim the Eastern association of the place. Moreover the Exhibition Hall (typically Indian in design) has five windows on two sides for display specimens of the arts, craft and commerce of India.

Parliament set up in 1920 a Joint Standing Committee consisting of eleven members of each House to keep Parliament in closer touch with Indian affairs but the system has not flourished in the last few years.

INDIA OFFICE.

Secretary of State.

The Most Hon. the Marquess of Zetland, P.C.
G.C.S.I., G.C.I.E.

Permanent Under-Secretary of State.

Sir Findlater Stewart, G.O.I.E., K.C.B., C.S.I., LL.D.

Parliamentary Under-Secretary of State.

R. A. Butler, M.P.

Deputy Under-Secretary of State.

Sir L. D. Wakely, K.C.I.E., C.B.

Assistant Under-Secretaries of State.

Sir Cecil H. Kisch, K.C.I.E., C.B.
S. K. Brown, C.B., C.V.O.

Council.

Sir Henry Wheeler, K.C.S.I., K.C.I.E.
Sir Denys de S. Bray, K.C.S.I., K.C.I.E., C.B.E.
Sir Henry Strakosch, G.B.E.
Sir Reginald I. R. Glancy, K.C.I.E., C.S.I.
Sir Charles A. Tegart, C.S.I., C.I.E., M.V.O.
Sir Atul C. Chatterjee, G.C.I.E., K.C.S.I.
Sir A. A. L. Parsons, K.C.I.E.
Sir Abdul Qadir.

Sardar Bahadur Mohan Singh.
Clerk of the Council: S. K. Brown, C.B., C.V.O.
Deputy Clerk of the Council: A. Diddin.
Private Secretary to the Secretary of State W. D. Croft, C.I.E.

Assistant Private Secretary: L. W. N. Homan.
Political A.-D.-C. to the Secretary of State: Lieut.-Col. W. G. Neale, C.I.E.

Private Secretary to Permanent Under-Secretary of State: G. E. Crombie.

Private Secretary to Parly. Under-Secretary: A. F. Morley.

Heads of Departments.

SECRETARIES.

Financial. F. B. Grist.
G. H. Baxter, (Acting).
Public and Judicial: R. T. Peel, M.C., (Acting).
Military: Major-General Sir J. F. S. D. Coleridge, K.C.B., C.M.G., D.S.O.
Personal Assistant: Col. G. L. Pepys, C.B., P.S.O.
Joint Secretary J. A. Simpson, (Acting).
Staff Officer attached. Col. J. C. Macrae, D.S.O.
Political: J. C. Walton, C.B., M.C., P. J. Patrick, C.S.I.
Economic and Overseas: E. J. Turner, C.B.E.
Services and General and Establishment Officer,
F. W. H. Smith, C.I.E.
Reforms: (India).
Sir Vernon Dawson, K.C.I.E.
Sir Archibald Carter, K.C.I.E., C.B.
Reforms: (Burma).

Lord Zetland	1935

The Indian States.

The area enclosed within the boundaries of India is 1,808,670 square miles, with a population of 352,837,778 of people—nearly one-fifth of the human race. But of this total a very large part is not under British Administration. The area covered in the Indian States is 712,508 square miles with a population of 81,310,845. The Indian States embrace the widest variety of country and jurisdiction. They vary in size from petty states like Lawa, in Rajputana, with an area of 13 square miles, and the Simla Hill States, which are little more than small holdings, to States like Hyderabad, as large as Italy, with a population of over fourteen millions. They include the inhospitable regions of Western Rajputana, Baroda, part of the Garden of India, Mysore, rich in agricultural wealth, and Kashmir, one of the most favoured spots on the face of the globe.

Relations with the Paramount Power.

So diverse are the conditions under which the Indian States were established and came into political relation with the Government of India, that it is impossible even to summarise them. But broadly it may be said that as the British boundaries expanded, the states came under the influence of the Government and the rulers were confirmed in their possessions. To this general policy however there was, for a brief period, an important departure. During the regime of Lord Dalhousie the Government introduced what was called annexation through lapse. That is to say, when there was no direct heir, the Government considered whether public interests would be secured by granting the right of adoption. Through the application of this policy, the states of Satara and of Nagpur fell in to the East India Company, and the kingdom of Oudh was annexed because of the gross misgovernment of its rulers. Then came the Mutiny. It was followed by the transference of the dominions of the East India Company to the Crown, and an irrevocable declaration of policy toward the Indian States. In the historic Proclamation of Queen Victoria it was set out that "We desire no extension of our present territorial possessions; and while we will permit no aggression on our dominions or our rights to be attempted with impunity, we shall allow no encroachments on those of others. We shall respect the rights, dignity and honour of the Native Princes as our own; and we desire that they, as well as our own subjects, should enjoy that prosperity and that social advancement which can only be secured by internal peace and good government." Since the issue of that proclamation there has been no encroachment on the area under Indian rule by the Government of India. On the contrary, the movement has been in the opposite direction. In 1881 the State of Mysore, which had been so long under British administration that the traditions of Native rule were almost forgotten, was restored to the old Hindu ruling house. In 1911 the Maharajah of Benares, the great taluqdar of Oudh, was granted ruling powers over his extensive possessions. On many occasions the Government of India has had to intervene, to prevent gross misgovernment, or to carry on the

administration during a long minority; but always with the undeviating intention of restoring the territories as soon as the necessity for intervention passed. Almost all states possess the right of adoption in default of heirs.

Rights of Indian States.

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer. The Chiefs have, without exception, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Paramount Power acts for them in relation to foreign Powers and other Indian States. The inhabitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India. Criminals escaping to an Indian State must be handed over to it by its authorities, they cannot be arrested by the police of British India without the permission of the ruler of the State. The Indian Princes have therefore a suzerain power which acts for them in all external affairs, and at the same time scrupulously respects their internal authority. The suzerain also intervenes when the internal peace of their territories is seriously threatened. Finally they participate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the railways, the ports, and the markets of British India. Except in rare cases, applied to maritime states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government.

Obligations of Indian States.

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states; the authority of their rulers has no existence outside their territories. Their subjects outside their dominions become for all intents and purposes British subjects. Where foreign interests are concerned, the Paramount Power must act so that no just cause of offence is given by its subordinate allies. All Indian States alike are under an obligation to refer to the British every question of dispute with other states. Inasmuch as the Indian States have no use for a military establishment other than for police, or display, or for co-operation with the Imperial Government, their military forces, their equipment and armament are prescribed by the Paramount Power. Although old and unaltered treaties declare that the British Government will have no manner of concern with any of a Maharajah's dependants or servants, with respect to whom the Maharajah is absolute, logic and public opinion have endorsed the principle which Lord Canning set forth in his minute of 1860, that the "Government of India is not precluded from stepping in to set right such serious abuses in a Native Government as may threaten any part of the country with anarchy or disturb-

ance, nor from assuming temporary charge of a Native State when there shall be sufficient reason to do so." Of this necessity the Governor-General in Council is the sole judge subject to the control of Parliament. Where the law of British India confers jurisdiction over British subjects or other specified persons in foreign territory, that power is exercised by the British courts which possess it. The subjects of European Powers and the United States are on the same footing. Where cantonments exist in an Indian State, jurisdiction both over the cantonment and the civil station is exercised by the suzerain power.

Political Officers.

The powers of the British Government are exercised through Political Officers who, as a rule, reside in the states themselves. In the larger states the Government is represented

by a Resident, in groups of states by an Agent to the Governor-General, assisted by local Residents or Political Agents. These Officers form the sole channel of communication between the Indian States and the Government of India and its Foreign Department, with the officials of British India and with other Indian States. They are expected to advise and assist the Ruling Chiefs in any administrative or other matters on which they may be consulted. Political Agents are similarly employed in the larger States under the Provincial Governments but in the petty states scattered over British India the duties of the Agent are usually entrusted to the Collector or Commissioner in whose district they lie. All questions relating to the Indian States are under the special supervision of the Supreme Government, and in the personal charge of the Governor-General.

HYDERABAD.

The Nizam exercises full sovereignty within his dominions, grants titles and has the power of life and death over his subjects. Before 1919, the Government consisted of a Prime Minister responsible to the Nizam, with Assistant Minister but an Executive Council was established which now consists of seven members. A Legislative Council consisting of 20 members of whom 12 are official, 6 non-official, and 2 extraordinary, is responsible for making laws. The administration is carried on by a regular system of departments on lines similar to those followed in British India. The State is divided into two divisions—Telangana and Mahratwara—15 districts and 153 Talukas. Local Boards are constituted in each District and Taluka. The State maintains its own currency which consists of gold and silver coins and a large note issue. The rupee, known as the Osmanna Sica, exchanges with the British Indian rupee at an average ratio of 116-10-8 to 100. There is a State postal Service and stamps for internal purposes. The Nizam maintains his own army consisting of 18,418 troops of all ranks of which 11,211 are Irregular and 7,207 are Regular troops, which includes 2 battalions for Imperial Service, 1,032 strong.

Finance.—Hyderabad State is by far the wealthiest of the Indian States, having a revenue in its own currency of about 8½ crores, which is approximately the same as that of the Central Provinces and Behar and Orissa and double that of any other State. After many vicissitudes, its finances are at present in a prosperous condition and it enjoys a large annual surplus of revenue from which a reserve of 9½ crores has been built up. This is being used partly as a Sinking Fund for the redemption of debt and partly for the development of the resources of the State. The Budget estimates for the present year show a revenue of 873.90 lakhs under service heads and an expenditure of 857.44 lakhs, inclusive of large sums set aside for development, famine insurance and debt redemption. The capital expenditure programme provides for an expenditure of 72.43

lakhs which includes 12.78 lakhs for completion of large irrigation projects and 43.08 lakhs for open line works and road motor transport. The year opened with a cash balance of 292.07 lakhs which is expected to be 267.12 lakhs by the end of the year. The Government loans stand at about 115 for long term issues.

Production and Industry.—The principal industry of the State is agriculture, which maintains 57 per cent of the population. The common system of land tenure is ryotwari. About 55 per cent of the total area is directly administered by the State. The rest consists of private estates of His Exalted Highness the Nizam, which comprise about one-tenth of the total area of the State, and the estates of the Jagirdars and Patih nobles. The total land revenue is over 3 crores. The principal food crops are millet and rice, the staple money-crops are cotton, which is grown extensively on the black cotton soils, and oil seeds. Hyderabad is well known for its Gaomani cotton which is the finest indigenous cotton in India. The total area under cotton exceeds 3½ million acres. Hyderabad possesses the most southerly of the Indian coal mines and the whole of Southern India is dependent on it for such coal as is transported by rail. The chief mine is situated at Singareni, which is not far from Bezwada Junction on the Calcutta-Madras line. The chief manufacturing industry is based on the cotton produced in the State. There are 4 large mills in existence and others are likely to be established, while about one-third of the cloth worn in the Dominion is produced on local hand-looms. There are about 391 ginning pressing decorticating factories in the cotton tracts and also a number of tanneries and flour mills, the total number of factories (as defined in the Hyderabad Factory Act) of all kinds in the State being 419. The Shahabad Cement Co. which has been established at Shahabad on the Great Indian Peninsula Railway line, not far from Wadi, supplies the whole of Southern India with cement and has at present an annual output of 109,450 tons.

Taxation.—Apart from the land revenue which, as stated above, brings in about ₹ 25 crores, the main sources of taxation are excise and customs. The receipts from each are estimated for the present year at 180 lakhs and 95 lakhs respectively. After these come interest on investments (27 lakhs), railways (108 lakhs) and Berar rent (29 lakhs). The customs revenue is derived from an *ad valorem* duty of not more than 5 per cent. on all imports and exports.

Communications.—One hundred and thirty-two miles of broad gauge line from Bombay to Madras traverse the State; also 30 miles of metre gauge line from Masulipatam to Marmagao. At Wadi, on this section, the broad gauge system of the Nizam's State Railway takes off and running east through Hyderabad City and Warangal reaches the Calcutta-Madras line at Bezawada, a total length of 352 miles. From Kazipet, near Warangal on this line, a new link to Bellarshah strikes north thus providing the shortest route between Madras and Delhi. From Secunderabad the metre gauge Godavari Valley railway runs north-west for 386 miles to Manmad on the main line of the Great Indian Peninsula Railway to Calcutta. A metre gauge line also runs south from Secunderabad through Mahbubnagar to the border and is now linked up with Dronachellam on the Madras and Southern Maharashtra Railway. Branch lines exist from Purna to Hingoli, Farhanti to Puri-Vajinath, Karipalli to Kothagudum and Vikharabad to Bidar which last was extended to Puri-Vajinath. Thus, with branch lines, there are now 799 miles of broad gauge and 621 of the metre gauge in the State. The Barsi Light Railway owns a short extension from Kurwad on the Bombay-Madras line to Latur in Osmanabad District. The Nizam's Guaranteed State Railway was worked by a company until April, 1930, when it was pur-

chased by the Nizam's Government. The road system is being rapidly extended in accordance with a well-considered programme.

From June 1932 the Railway is running motor bus services in the city and suburbs of Hyderabad and on some district roads. At first the fleet consisted of 27 passenger vehicles operating a route mileage of 284 miles. New services have been opened from time to time and the present motor mileage operated is 1,274 miles with 92 passenger vehicles.

Education.—The Osmania University at Hyderabad which marks a new departure in Indian education, imparts instruction in all the faculties through the medium of Urdu, English being taught as a compulsory language. It has three first grade Colleges, a Medical College, an Engineering College and a Training College for teachers. The Nizam's College at Hyderabad (First Grade), is however, affiliated to the Madras University. In 1932-33 the total number of educational institutions were 4,542, the number of Primary schools in particular having been largely increased.

Executive Council.—Raja Rajayya Raja Sir Kishen Pershad Maharaja Bahadur, Yamin-us-Saltanath, C.I.E., President; Nawab Mahdi Yar Jung Bahadur, Political & Education Member, Nawab Sir Akbar Hydari, Finance and Railway Member, T. J. Tasker, Esquire, I.C.S., C.I.E. Revenue and Police Member, Nawab Lutful-Dowlah Bahadur, Judicial and Ecclesiastical Member, Nawab Aqel Jung Bahadur, Army and Medical Member; Raja Shamraj Rajawant Bahadur, Public Works Member.

British Resident.—The Hon'ble Mr. D. G. Mackenzie, C.I.E.

MYSORE.

The State of Mysore is surrounded on all sides by the Madras Presidency except on the north and the north-west where it is bounded by the districts of Dharwar and North Canara respectively and towards the south-west by Coorg. It has two natural divisions each with a distinct character of its own—the hill country (or malnad) on the west and the wide spreading valleys and plains (the maidan) on the east. The State has an area of 29,483 square miles including that of the Civil and Military Station of Bangalore and a population of 6,557,302 of whom over 92 per cent. are Hindus. Kannada is the language of the State.

History.—The ancient history of the country is varied and interesting. Tradition connects the tableland of Mysore with many a legend enshrined in the great Indian epics, the Ramayana and the Mahabharata. Coming down to historic times, the north-eastern portion of the country formed part of Asoka's Empire in the third century B.C. Mysore then came under the rule of the Andhra dynasty. From about the third to the eleventh century A.D., Mysore was ruled by three dynasties, the north-western portion by the Pallavas and the central and the southern portions by the Gangas. In the eleventh century, Mysore formed part of Chola dominion, but the Cholas were driven out

early in the twelfth century by the Hoysalas, an indigenous dynasty with its capital at Halebid. The Hoysala power came to an end in the early part of the fourteenth century. Mysore was next connected with the Vijayanagar Empire. At the end of the fourteenth century Mysore became associated with the present ruling dynasty. At first tributary to the dominant empire of Vijayanagar, the dynasty attained its independence after the downfall of Vijayanagar in 1565. In the latter part of the eighteenth century, the real sovereignty passed into the hands of Hyder Ali and then his son, Tipu Sultan. In 1799, on the fall of Seringapatam, the British Government restored the State comprised within its present limits, to the ancient dynasty in the person of Maharaja Sri Krishnaraja Wodeyar Bahadur III. Owing to the insurrections that broke out in some parts of the country, the management was assumed by the British Government in 1831. In 1881, the State was restored to the dynasty in the person of Sri Chamarajendra Wodeyar Bahadur under conditions and stipulations laid down in an Instrument of Transfer. That ruler with the assistance of Mr. (afterwards Sir) K. Seshaluri Iyer, K.C.S.I., as Dewan, brought Mysore to a state of great prosperity. He died in 1894, at the early age of 31, and was succeeded by the

present ruler His Highness Sri Krishnarajendra Wadiyar Bahadur, G.O.S.I., G.B.E., who was installed in 1902. In November 1913, the Instrument of Transfer was replaced by a Treaty which indicates more appropriately the relation subsisting between the British Government and the State of Mysore. In 1927, the Government of India remitted in perpetuity Rs. 10½ lakhs of the annual subsidy which till then had stood at Rs. 35 lakhs.

Administration—The City of Mysore is the Capital of the State but Bangalore is the Administrative headquarters. His Highness the Maharaja is the ultimate authority in the State, and the administration is conducted under his control, by an Executive Council consisting of the Dewan and two Members of Council. The High Court consisting of the Chief Justice and three Judges is the highest Judicial tribunal in the State. There are two constitutional Houses in the State—the Representative Assembly and the Legislative Council. The Representative Assembly was established in 1881 by an executive order of Government, and its powers and functions have been increased from time to time by similar orders of Government. Under the scheme of constitutional developments announced in October 1923, the Representative Assembly has been placed on a statutory basis and given a definite place in the constitution by the promulgation of the Representative Assembly Regulation, XVIII of 1923. The franchise has been extended and the disqualification of women on the ground of sex, from exercising the right to vote and standing as candidates for election has been removed. The privilege of moving resolutions on the general principles and policy underlying the budget and on matters of public administration has been granted in addition to those already enjoyed of making representations about wants and grievances and of interpellating Government. The Assembly is also to be consulted on all proposals for the levy of new taxes and on the general principles of all measures of legislation before their introduction into the Legislative Council. Besides the Budget Session (formerly Birthday Session) and the Dasara Session, provision has been made for a special session of the Assembly to be summoned only for Government business.

The strength of the Legislative Council has been raised from 30 to 50, of whom 20 are official and 30 are non-official members. The Council which exercised the privileges of interpellation, discussion of the State Budget and the moving of resolutions on all matters of public administration is, under the reformed constitution, granted the power of voting on the demands for grants. The Dewan is the ex-officio President of both the Representative Assembly and the Legislative Council.

The Legislative Council has a Public Accounts Committee which examines the audit and appropriation reports and brings to the notice of the Council all deviations from the wishes of the Council as expressed in its Budget grant.

Standing Committees.—With a view to enlarge the opportunities of non-official representatives of the people to influence the everyday Administration of the State, three Standing Com-

mittees consisting of members of the Representative Assembly and the Legislative Council, have been formed, one in connection with Railways, Electrical and P. W. Departments, the second in connection with Local Self-Government and the Departments of Medicine, Sanitation and Public Health and the third in connection with Finance and Taxation.

State Troops.—The combatant strength of the Military Force at the end of 1934-35 was 1 481 of which 482 were in the Mysore Lancers, 126 in the Mysore Horse, and the remaining 873 in the Infantry. Besides, there is a Mechanical Transport Corps which consists of two lorries (six wheeler lorries) and 4 commercial lorries with the necessary staff. The total annual cost is about 16 lakhs of rupees. The cost of the Police Administration during 1934-35 was about 19 lakhs.

Agriculture.—Nearly three-fourths of the population are employed in agriculture, and the general system of land tenure is ryotwari. The principal food crops are ragi, rice, jola, millets, gram and sugarcane, and the chief fibres are cotton and sun-hemp. The Sericultural industry is the most important subsidiary industry practised by the agriculturists. As elsewhere in India the industry is passing through one of the gravest crises in the course of its history owing to the competition of cheap foreign silk. The area under mulberry during 1934-35 had shrunk to 30,000 acres. The Department of Agriculture is popularising agriculture on scientific lines by means of demonstrations, investigations and experiment. There are 7 Government Agricultural Farms at Hebbal, Babbur, Marthur Nagenahally, Hunsur, Mandya and the coffee experimental Station at Balehonnur. A live-stock section has been organised which has been taking necessary steps for the improvement of live-stock. A cattle breeding station has been established at Parvatharayana, near Ajampur in the Kadur District, with a sub-station at Basur. A Serum Institute has been opened at Bangalore for the manufacture of serum and virus for inoculation against rinderpest and other contagious diseases. There are 64 Veterinary Dispensaries and Hospitals in the State under the control of the Civil Veterinary Department.

Industries and Commerce.—A Department of Industries and Commerce was organised in 1913 with a view to the development of Industries and Commerce in the State. Its main functions are stimulating private enterprise by the offer of technical advice and other assistance for starting new industries, undertaking experimental work for pioneering industries and developing existing industries and serving as a general bureau of information in industrial and commercial matters. The department has under its control the following demonstration factories—the Government Soap Factory, Government Porcelain Factory, Government Silk Weaving Factory and the Central Industrial Workshop. The Department has a well-equipped Government Industrial and Testing Laboratory, with a section devoted to the manufacture of pharmaceutical drugs and preparations. The Well-Boring Section which is engaged in the drilling of boreholes for meeting the requirements of drinking water in the rural areas is

now under the control of the Bureau of Sanitary Engineering department of Public Health. Mysore is the largest producer of silk in India, and the care and development of this industry is entrusted to a Department of Sericulture in charge of a Superintendent subject to the general control of the Director of Industries and Commerce. Arrangements have been made for the supply of disease-free seed and a central and five taluk popular schools have been doing good work.

With a view to demonstrate and impart instructions in the utilisation of the high grade silk produced in the State, Government have established a Silk Weaving Factory and Dyeing and Finishing Works at Mysore. The Sandalwood Oil Factory started on an experimental basis is now working on a commercial scale. A factory is working at Mysore. A large plant at a cost of more than 170 lakhs of rupees has been constructed at Bhadravathi for purposes of manufacturing

charcoal, pig-iron, distilling wood-alcohol, and developing subsidiary industries. A new Pipe Foundry was opened there for the manufacture of pipes which are in great demand in several towns in India. The installation of a steel plant is nearing completion and power lines have been already laid for supplying Electric energy to Bhadravathi from Mysore. The Works are on the borders of an extensive forest area and practically at the foot of the hills containing rich deposits of iron, manganese and bauxite, and are not far from the Gersoppa Water Falls estimated to be capable of producing 100,000 horse-power of electric energy. A Trade Commissioner in London has been appointed to look after the interest of the trade and industry of the State.

Finances.—The actual total receipts and disbursements charged to Revenue for the past five years together with the revised budget estimate for 1934-35 and budget for 1935-36 were as below.—

Year	Receipts	Disbursements	Surplus	Deficits.
	Rs.	Rs.	Rs.	Rs.
1930-31 ..	3,32,85,203	3,94,29,342		61,94,049
1931-32 ..	3,37,47,182	3,56,03,763		18,56,581
1932-33 ..	3,38,27,523	3,56,15,671		17,88,148
1933-34 ..	3,42,87,244	3,70,92,947		22,21,631
1934-35 (Revised)	3,65,81,000	3,79,05,000		5,62,000
1935-36 (Budget)	3,77,14,000	3,81,92,000	82,000

Hydro-Electric and Irrigation Works—

The river Cauvery in its course through the State, possesses a natural fall of about 380 feet near the island of Sivsamudram, and this fall was harnessed in the year 1902 for the development of electric power, to the extent of about 12,000 H. P. for supplying power mainly to the Kolar Gold Mining Companies and incidentally for lighting the cities of Mysore and Bangalore. In course of time, the demand for power increased and with a view to protecting the existing supply and augmenting the generation of additional power to meet the growing demands, the "Krishnarajasagara Reservoir" called after the name of the present Maharaja was constructed. The storage from the reservoir besides enabling the generation of electric power up to 46,000 H. P. will also bring under irrigation about 1,20,000 acres of land situated in an area subject to more or less continuous drought. The new Canal Works were started in 1927, and the main canal is named the "Irwin Canal" after Lord Irwin the then Viceroy. An area of about 9 thousand acres under this Canal has been brought under sugarcane cultivation and a Sugar Factory with a crushing capacity of about 1,400 tons of cane per day has been established near by at Mandya. An up-to-date Distillery has been erected as an adjunct to the Sugar Factory. Full advantage is being taken of the available electric power for small industries and the electrification of towns and lift irrigation.

Education.—A separate University for Mysore was established on the 1st July 1916. It is of the teaching and residential type composed of the Central and Engineering Colleges at Bangalore and the Medical Maharaja's and Maharani's Colleges at Mysore, and three

Intermediate Colleges with headquarters at Mysore. The colleges are efficiently equipped and organised and there is a training college for men located at Mysore. The Maharani's College at Mysore is a College for Women.

There are 38 High Schools of which 6 are for girls, 325 Middle Schools of which 33 are for girls. Provision has been made for teaching several vocational subjects in general schools with a view to giving a bias towards the vocations and in order to enable the pupils to take to such vocations after their High School life. There are 12 Training Institutions for training teachers in Middle and Primary Schools; 3 of them are for women. The control over Primary Education has been made over to the Local Bodies under the Elementary Educational Regulation of 1930, and the Local Bodies are responsible for making due provision for extension of Primary Education in accordance with a definite programme spread over 10 years. There are also schools for imparting instruction in Agricultural, Commercial, Engineering and other Technical subjects. There were altogether 7,692 schools on 31st March 1934 with a strength of 3,11,957 pupils. This gave one school to every 3.8 square miles of the area, and to every 835 persons of the population. The total expenditure on Education was Rs. 69,24,529 yielding an average of Rs. 1-1-3 per head of population.

Dean.—Amin-ul-Mulk Sir Mirza M. Ismail, C.I.E., C.B.E.

Members of the Executive Council.—Rajamantrapravina Mr. S. P. Rajagopalachari, B.A., B.L., First Member of Council, and Mr. N. Madhava Rao, B.A., B.L., Second Member of Council.

Resident in Mysore and Chief Commissioner of Coorg.—The Hon. Lieut-Col. C. T. C. Plowden, C.I.E.

BARODA.

The State of Baroda is situated partly in Gujerat and partly in Kathiawar. It is divided into four district blocks (1) the southern district of Navsari near the mouth of the Tapi river, and mostly surrounded by British territory, (2) central district north of the Narbada, in which lies Baroda, the capital city, (3) to the north of Ahmedabad, the district of Mehsana, and (4) to the west, in the peninsula of Kathiawar the district of Amreli, formed of scattered tracts of land. The area of the State is 8,164 square miles; the population is 2,443,007 of whom over four-fifths are Hindus.

History.—The history of the Baroda State as such dates from the break-up of the Mughal Empire. The first Maratha invasion of Gujerat took place in 1705. In later expeditions Pilaji Gaekwar, who may be considered as the founder of the ruling family, greatly distinguished himself. Songhad was the headquarters till 1766. After 1723 Pilaji regularly levied tribute in Gujerat. His son Damaji finally captured Baroda in 1734, since then it has always been in the hands of the Gaikwars; but Mughal authority in Gujerat did not end until the fall of Ahmedabad in 1753, after which the country was divided between the Gaekwar and the Peshwa. In spite of the fact that Damaji was one of the Maratha chiefs defeated at Panipat by Ahmed Shah, he continued to add to his territory. He died in 1768, leaving the succession in dispute between two rival sons. He was succeeded in turn by his sons Sayaji Rao I, Patesing Rao, Mannaji Rao and Govind Rao. The last died in 1800 and was succeeded by Anand Rao. A period of political instability ensued which was ended in 1802 by the help of the Bombay Government, who established the authority of Anand Rao at Baroda. By a treaty of 1805 between the British Government and Baroda, it was arranged *inter alia* that the foreign policy of the State should be conducted by the British, and that all differences with the Peshwa should be similarly arranged. Baroda was a staunch ally of the British during the wars with Bajji Rao Peshwa the Pindari hordes and Holkar. But from 1820 to 1841, when Sayaji Rao II was Gaikwar, differences arose between the two Governments which were settled by Sir James Carnac, Governor of Bombay, in 1841. Ganpat Rao succeeded Sayaji Rao II in 1847. During his rule the political supervision of Baroda was transferred to the Supreme Government. His successor, Khande Rao, who ascended the gadi in 1856, introduced many reforms. He stood by the British in the Mutiny. He was succeeded by his brother Malhar Rao in 1870. Malhar Rao was deposed in 1875 for "notorious misconduct" and "gross misgovernment," but the suggestion that he had instigated the attempt to poison Col Phayre, the Resident, was not proved. Sayaji Rao III, a boy of 13 years of age, who was descended from a distant branch of the family was adopted as heir of Khande Rao in 1875 and is the present Maharaja. He was invested with full powers in 1881.

Administration.—An executive council consisting of the principal officers of the State carries on the administration, subject to the control of the Maharaja, who is assisted by a Dewan and other officers. A number of departments have been formed, which are presided over by officials corresponding to those in British India. The State is divided into five

Prants each of which is sub-divided into *Mahals* and *Peta Mahals* of which there are in all 42. Attempts have for some years been made to restore village autonomy, and village panchayats have been formed which form part of a scheme for local self-government. There is a Legislative Department, under a Legal Remembrancer, which is responsible for making laws. There is also a Legislative Council, consisting of nominated and elected members. A High Court at Baroda possesses jurisdiction over the whole of the State and hears all final appeals. From the decisions of the High Court appeals lie in certain cases, to the Maharaja who decides them on the advice of the Huzur Nyaya Sabha. The State Army consists of 5,086 Regular forces and 3,806 Irregular forces.

Finance.—In 1932-33, the total receipts of the State were Rs. 2,47,30,000 and the disbursements Rs. 2,08,05,000. The principal Revenue heads were—Land Revenue Rs. 1,07,59,000, Abkari, Rs. 26,38,000, Opium Rs. 3,47,000, Railways, Rs. 20,18,000, Interest Rs. 18,45,000. Tribute from other States, Rs. 5,34,000. British Currency was introduced in 1901.

Production and Industry.—Agriculture and pasture support 63 per cent. of the people. The principal crops are rice, wheat, gram, castor-oil, rapeseed, poppy, cotton, sun-hemp, tobacco, sugarcane, maize and garden crops. The greater part of the State is held on *ryotwari* tenure. The State contains few minerals, except sandstone, which is quarried at Songur, and a variety of other stones which are little worked. There are 108 industrial or commercial concerns in the State registered under the State Companies' Act. There are four Agricultural Banks and 1,146 Co-operative Societies in the Baroda State.

Communications.—The B & C. I. Railway crosses part of the Navsari and Baroda *prants* and the Rajputana-Malwa Railway passes through the Mehsana *prant*. A system of branch lines has been built by the Baroda Durbār in all the four *prants* in addition to which the Tapi Valley Railway and the Baroda-Godhra Chord line (B & C. I.) pass through the State. The Railways owned by the State are about 706.70 miles in length. The total mileage of metalled and fair weather roads in the State is 532 and 932, respectively.

Education.—The Education Department controls 2,371 institutions of different kinds in 109 of which English is taught. The Baroda College is affiliated to the Bombay University. There are a number of high schools, technical schools, and schools for special classes, such as the jungle tribes and unclean castes. The State is "in a way pledged to the policy of free and compulsory primary education." It maintains a system of rural and travelling libraries. Eighteen per cent. of the population is returned in the census as literate. Total expense on Education is Rs. 36.84 lakhs.

Capital City.—Baroda City with the cantonment has a population of 112,800. It contains a public park, a number of fine public buildings, palaces and offices, and it is crowded with Hindu temples. The Cantonment is to the north-west of the city and is garrisoned by an infantry battalion of the Indian Army.

Ruler.—His Highness Farzandi-i-Khas-i-Dowlat-i-Englishia, Maharaja Sri Sayaji Rao III Gaekwar, Sena Khas Khel, Samsher Bahadur, G.C.S.I., G.C.I.E., L.L.D., Maharaja of Baroda.

Resident.—Lieut.-Col. J. L. R. Weir, C.I.E.
Dewan.—Sir V. T. Krishnamachari, K.T., C.I.E.

BALUCHISTAN AGENCY.

In this Agency lies the State of Kalat with its feudatory State of Las Bela.

Kalat is bounded on the North by the Chagai district, on the East by Sindh and the Marri-Bugti tribal territories, on the South by the Arabian Sea and on the West by Persia.

The Kalat State, unlike the other Indian States, is a confederacy of partially independent chiefs, whose head is the Khan of Kalat. The divisions of the State are Sarawan or the Highlands, Jhalawan or the Lowlands, Kachhi, Mekran and Kharan. The inhabitants are, for the most part Muhammadans of the Sunni sect. The area is 73,278 square miles and the population 3,42,101.

The relations of Kalat with the British Government are governed by the treaties of 1854 and 1876, by the latter of which the independence of Kalat was recognized, while the Khan agreed to act in subordinate co-operation with the British Government. There are also agreements with Kalat in connection with the construction of the Indo-European telegraph line, the cession of jurisdiction on the railways and in the Bolan Pass, and the permanent leases of Quetta, Nushki and Nasirabad.

The Khan is assisted in the administration of the State by a Wazir-i-Azam, at present a

European Officer of the Imperial service. The Governor-General's Agent in Baluchistan conducts the relations between the Government of India and the Khan, and exercises general political supervision over the State through the Political Agent in Kalat. The revenue of the State is about Rs. 13 lakhs, out of which the Khan retains a civil list of Rs. 3,00,000 per annum. The present Khan is His Highness Beglar Begi Lieut. Mir Ahmad Yar Khan. He was born in 1804.

Las Bela is a small State under the suzerainty of Kalat. The Hab river for the Southern part of its course forms the Eastern boundary with Sindh, and the greater part of the State consists of the valley and the delta of the Purul river, Area 7,132 square miles; population 63,008; chiefly Sunni Muhammadans. The estimated average revenue is about Rs. 3.5 lakhs. The ruling chief of Las Bela, known as the Jam, is Mir Ghulam Muhammad Khan, who was born in 1895. The administrative control of the State is exercised by the Hon'ble the Agent to the Governor General and Chief Commissioner in Baluchistan through the Political Agent Kalat. The Jam also employs a Wazir to assist him in the administration of the State.

RAJPUTANA AGENCY.

Rajputana is the name of a great territorial circle with a total area of about 133,886 square miles, which includes 21 Indian States, one Chieftainship, one estate, and the small British district of Ajmer-Merwar. It is bounded on the west by Sind, on the north-west by the Punjab State of Bahawalpur, on the north and north-east by the Punjab, on the east by the United Provinces and Gwalior, while the southern boundary runs across the central region of India in an irregular zigzag line. Of the Indian States, Chieftainship and estate 19 are Rajput, 2 (Bharatpur and Dholpur) are Jat, and two (Palanpur and Tonk) are Mahomedan. The chief administrative control of the British district is vested *ex-officio* in the political officer, who holds the post of Governor-General's Agent for the supervision of the relations between the several Indian States of Rajputana and the Government of India. For administrative purposes they are divided into the following groups:—Bikaner and Sirohi in direct relations with the Agent to the Governor-General. Eastern Rajputana Agency 6 States (Bharatpur, Bundi, Dholpur, Jhalawar, Karauli and Kotah), Jaipur Residency 5 States (Alwar, Jaipur, Kishangarh, Tonk, Shahpura, and Lawa Estate); Mewar Residency, and Southern Rajputana States Agency 4 States (Mewar, Dangarpur, Banswara and Pratargarh and the Kishangarh Chieftainship); Western Rajputana States Residency 4 States (Jodhpur, Jaisalmer, Palanpur and Danta).

The Aravalli Hills intersect the country almost from end to end. The tract to the north-west of the hills is, as a whole, sandy, ill-watered and unproductive, but improves gradually from

being a mere desert in the far west to comparatively fertile lands to the north-east. To the south-east on the Aravalli Hills lie higher and more fertile regions which contain extensive hill ranges and which are traversed by considerable rivers.

Communications.—The total length of railways in Rajputana is 3,259 miles, of which about 1,000 are the property of the British Government. The B. B. & C. I. (Metre-gauge) (Government) runs from Ahmedabad to Bandikui and from there branches to Agra and Delhi. Of the Indian State railways the most important are the Jodhpur and Bikaner lines from Marwar Junction to Hyderabad (Sindh) and to Bikaner.

A new Railway line from Mavli (on the Udaipur-Chittorgarh Railway) to Marwar Junction is under construction.

Inhabitants.—Over 50 per cent. of the population are engaged in some form of agriculture; about 20 per cent. of the total population are maintained by the preparation and supply of material substances; personal and domestic service provides employment for about 5 per cent. and commerce for 2½ per cent. of the population. The principal language is Rajasthani. Among castes and tribes, the most numerous are the Brahmans, Jats, Mahajans, Chamars, Rajputs, Minas, Gujars, Bhils, Malis and Balais. The Rajputs are, of course, the aristocracy of the country, and as such hold the land to a very large extent, either as receivers of rent or as cultivators. By reason of their position as integral families of pure descent,

as a landed nobility, and as the kinsmen of ruling chiefs, they are also the aristocracy of India; and their social prestige may be measured by observing that there is hardly a tribe or clan (as distinguished from a caste) in India which does not claim descent from, or irregular connection with, one of these Rajput stocks.

The population and area of the States are as follows.—

Name of State.	Area in square miles.	Population in 1931.
<i>In direct political relations with A.G.G.—</i>		
Bikaner	23,317	936,218
Sirohi	2,000	221,060
<i>Mewar Residency and S. R. S. Agency.—</i>		
Udaipur	12,923	1,566,910
Banswara	1,599	225,106
Dungarpur	1,460	227,544
Partabgarh	889	76,539
Kushalgarh (Chiefship).	338	35,564
<i>Jaipur Residency.—</i>		
Alwar	3,158	749,751
Jaipur	15,590	2,631,775
Kishangarh	849	85,744
Tonk	2,553	317,360
Shahpura	705	74,219
		(includes Partanah of Kachola)
Lawa (Estate) ..	20	2,700
<i>Western Rajputana States Residency.—</i>		
Jodhpur	36,021	2,125,982
Jaisalmer	16,007	76,255
Palanpur	1,769	264,179
Danta	347	26,172
<i>Eastern States Agency.—</i>		
Bundl	2,200	216,722
Bharatpur	1,978	486,954
Dholpur	1,173	251,986
Jhalawar	813	107,890
Karauli	1,227	140,525
Kotah	5,725	685,804

Udaipur State (also called **Mewar** was founded in about 646 A.D. The capital city is Udaipur, which is beautifully situated on the slope of a low ridge, the summit of which is crowned by His Highness the Maharana's palaces, and to the north and west, houses extend to the banks of a beautiful piece of water known as the Pichola Lake in the middle of which stand two island palaces. It is situated near the terminus of the Udaipur-Chittorgarh Railway, 697 miles north of Bombay. His Highness Maharajadhiraj Maharana Sir Bhupal Singhji Bahadur, G.O.S.I., K.C.I.E., who succeeded his father the late Maharana His Highness Maharajadhiraj Maharana Sir Fateh Singhji Bahadur, G.C.S.I.,

G.C.I.E., G.O.V.O., in 1930, is the Premier Ruling Prince of Rajputana. The revenue and expenditure of the State are now about 80·6 lakhs. Its archaeological remains are numerous, and stone inscriptions dating from the third century have been found.

Banswara State is the southernmost State of Rajputana within the Political Agency of the Southern Rajputana States. The area of the State is 1,946 square miles and the population 2,60,670 souls. It is thus in regard to size eleventh among the States of Rajputana. Banswara with Dungarpur originally formed a country known as Bagar, which was, from the beginning of the thirteenth century until about the year 1529, held by certain Rajput Rulers of the Ghelot or Shishodiya clan, who claimed descent from an elder branch of the family now ruling in Udaipur. After the death of Maha-Rawal Udal Singhji, the Ruler of Bagar, about 1520, his territory was divided between his two sons Jagmal Singhji and Prithvi Rajji, and the descendants of the two families are now the Rulers of Banswara and Dungarpur respectively. Where the town of Banswara now stands, there was a large Bhilpal or colony under a powerful Bhil Chieftain, named Wasna, who was defeated and slain by Maharawal Jagmal Singhji about 1530. The name of Banswara is by tradition said to be a corruption of Wasnawara or the country of Wasna. Others assert that the word means the country (wara) of bamboos (bans). Nearly three centuries after its foundation by Maharawal Jagmal Singhji, Maharawal Bijay Singhji anxious to get rid of the supremacy of the Mahrattas offered to become a tributary to the British Government. In 1818, a definite treaty was made with his successor, Maharawal Unmed Singhji. Banswara has been described as the most beautiful portion of Rajputana, it looks at its best just after the rains. The principal rivers are the Mahi, the Anas, the Eran, the Chap and the Haran.

The present Ruler is His Highness Rayan Rai Maharaja Dhiraj Maharawalji Sahib Shree Sir Prithi Singhji Bahadur, K.C.I.E., who was born on July 15, 1888, and is the 21st in descent from Maharawal Jagmal Singhji. His Highness was educated in the Mayo College and succeeded his father in 1914. His Highness is entitled to a salute of 15 guns. The State is ruled by His Highness the Maharawalji Sahib Bahadur with the assistance of the Diwan and the Home Minister, and the Judicial and the Legislative Councils of which the Diwan is the President and the Herir Apparent, Maharaj Raj Kumar Sahib Shri Chandivaveer Singhji Sahib, is Senior Member. The revenue of the State is about 7 lakhs and the expenditure is about the same.

Diwan—Mr. Jitendra S. Mehta, B.A., L.B.

Home Minister.—Mr. Nand Lal Banerjee.

Dungarpur State, with Banswara, formerly comprised the country called the Bagar. It was invaded by the Mahrattas in 1818. As in other States inhabited by hill tribes, it became necessary at an early period of British supremacy to employ a military force to coerce the Bhils. The State represents the *Gad*, of the eldest branch of the Sisodias

and dates its separate existence from about the close of the 12th Century. Samant Singh, King of Chitor, when driven away by Kirtipal of Jalor, fled to Bagar and killed Chowrasimal Chief of Baroda, and founded the State of Dungarpur. The present Chief is His Highness Rai-i-Rayan Mahamahendra Maharajadhiraj Maharawal Shri Sir Lakshman Singhji Bahadur, K.C.S.I., born on 7th March 1908, succeeded on 15th November 1918 and assumed charge of the administration on the 16th February 1928. No railway line crosses the territory, the nearest railway station, Udaipur, being 65 miles distant and Talod on Ahmedabad side being about 70 miles distant. Revenue about 8 lakhs.

Partabgarh State, also called the Kanhali, was founded in the sixteenth century by a descendant of Rana Mokal of Mewar. The town of Partabgarh was founded in 1698 by Partab Singh. In the time of Jaswant Singh (1775-1844), the country was overrun by the Marathas, and the Maharawat only saved his State by agreeing to pay Holkar a tribute of *Salm Shahi* Rs. 72,700 (which then being coined in the State Mint was legal tender throughout the surrounding Native States), in lieu of Rs. 15,000 formerly paid to Delhi. The first connexion of the State with the British Government was formed in 1804; but the treaty then entered into was subsequently cancelled by Lord Cornwallis, and a fresh treaty by which the State was taken under protection was made in 1818. The tribute to Holkaris paid through the British Government, and in 1904 was converted to Rs. 36,350 British currency. The present ruler is His Highness Maharawat Ram Singhji Bahadur who was born in 1906 and succeeded in 1929. The State is governed by the Maharawat with the help of the Dewan and, in judicial matters, by a Committee of members styled the Raj Sabha or State Council. Revenue about 5½ lakhs; expenditure nearly 5½ lakhs. The financial administration is under the direct supervision of the State.

Jodhpur State is the largest in Rajputana with an area of 36,021 square miles and a population of 2 4 millions, of which 83 per cent. are Hindus, 8 per cent. Muslims and the rest Jams and Animists. The greater part of the country is an arid region. It improves gradually from a mere desert to comparatively fertile land as it proceeds from the West to the East. The rainfall is scanty and capricious. There are no perennial rivers and the supply of sub-soil water is very limited. The only important river is Luni.

The Maharaja of Jodhpur is the head of the Rathor Clan of Rajputs and claims descent from Itama, the deified King of Avodhya. The earliest known King of the Clan named Abhinanyu, lived in the fifth century, from which time their history is increasingly clear. After the breaking up of their Kingdom at Kanauj they founded this State about 1212, and the foundations of the Jodhpur City were laid by Rao Jodha in 1459. He abolished the tax levied by Hussain Shah of Jaunpur from Hindu pilgrims at Gaya. His descendant was the famous Rao Maldeva, the most powerful ruler of this time having an army of 80,000 Rajputs, the Emperor Humayun when expelled by Sher

Shah in 1542 A.D. had sought refuge with him. Raja Sur Singh, son of Raja Udai Singh, in recognition of his deeds of valour was created a "Sawal Raja" with a mansab of 5,000 Zats and 3,300 Sowars by the Emperor Akbar.

The administration is carried on with the aid of a State Council composed of His Highness the Maharaja Sahib Bahadur as President Lt.-Colonel D. M. Field, C.I.E., I.A., Chief Minister, Rao Bahadur Thakur Chaim Singhji, M.A., I.L.B., Judicial Minister, Thakur Madho Singhji Home Minister and Mr S. G. Edgar, I.C.S., P.W. Minister. There is also an Advisory Committee representing the great body of Sardars who hold as much as five sixths of the total area, to aid the administration with opinion on matters affecting general customs and usage in the country.

The revenue of the State during the year 1933-34 was Rs 1,49,14,005 and the expenditure Rs 1,10,60,990. The Jodhpur Railway extending from Hyderabad (Sind) to Luni Junction and Marwar Junction to Kuchaman Road with its branches on all sides in the territories of the State is the principal railway while the B.B. & C.I. Railway runs across a portion of the south-eastern border. The famous marble quarries of Makrana as well as the Salt Lake at Sambhar are situated in Jodhpur territory.

Jaisalmer State is one of the largest States in Rajputana and covers an area of 18,062 square miles. The Rulers of Jaisalmer belong to the Jadon clan and are the direct descendants of Sri Krishna. Jaisalmer City was founded in 1156, and the State entered into an alliance of perpetual friendship with the British Government in 1818. In 1844 after the British conquest of Sind the forts of Shagarh, Garsia and Ghotaru which had formerly belonged to Jaisalmer were restored to the State. The population according to the census of 1931 is 67,652. The present Ruling Prince is His Highness Maharajadhiraj Ray Rajeshwar Maharawalji Sir Jawahar Singhji Sahib Bahadur, Yadrukul, Chandrabhal Tukun-ud-Dowla, Muzaffar Jang, Bijamand, K.C.S.I. Revenue about four Lakhs.

Sirohi State is much broken up by hills of which the main feature is Mount Abu, 5,650 feet. The Chiefs of Sirohi are Deora Rajputs, a branch of the famous Chauhan clan which furnished the last Hindu kings of Delhi. The present capital of Sirohi was built in 1425. The city suffered in the eighteenth century from the wars with Jodhpur and the depredations of wild Mina tribes. Jodhpur claimed suzerainty over Sirohi but this was disallowed and British protection was granted in 1823. The present ruler is His Highness Maharajadhiraj Maharao Shri Sir Sarup Ram Singh Bahadur, G.C.I.E., K.C.S.I. The State is ruled by the Maharao with the assistance of Ministers and other officials. Revenue about 10½ lakhs.

Jaipur is the fourth largest State in Rajputana. It consists for the most part of level and open country. It was known to the ancients as Matsya Desh, and was the kingdom of the King Virata mentioned in the Mahabharata, in whose court, the five Pandava brothers during their last period of exile resided. Bhairat in the Jaipur State has been identified.

The Maharaja of Jaipur is the head of the Kuchawa clan of Rajputs, which claims descent from Kush, son of Rama, King of Ayodhya, the famous hero of the famous epic poem, the Ramayana. This dynasty in Eastern Rajputana dates as far back as ninth century A. D. Dulha Rai, one of its most early rulers, made Amber the capital of the State in 1037 A. D. About the end of 12th century one of the rulers of Jaipur at the head of the army of Prithvi Raj, Emperor of Delhi, defeated Shahabuddin Ghori in the Khyber Pass and pursued him as far as Ghazni. Prithvi Raj had given his sister in marriage to him.

His Highness the present Maharaja Sawai Man Singh II Bahadur was born on 21st August 1911. He was adopted by His late Highness on 24th March 1921. He is a scion of the Rajawat House of Isarda, and ascended the gadi on the 7th September 1922, and was married to the sister of the present Maharsjah of Jodhpur on the 30th January 1924, from whom he has a daughter and a son and heir (b. 22nd October 1931). His second marriage with the daughter of his late Highness Maharaja Shri Sumer Singhji Bahadur of Jodhpur was celebrated on the 24th April 1932.

His Highness the Maharaja Sahib Bahadur was invested with full powers on 14th March 1931. His Highness was appointed Honorary Lieutenant in the Indian Army on the 25th April, 1931, and was promoted to the rank of Honorary Captain on the 1st January, 1934. In 1933, His Highness took his Polo Team to England, where it achieved exceptional success, setting up a record by winning all open tournaments. His Highness again visited England in 1935, sailing from Bombay on the 9th May and returning to Jaipur on the 6th September. While in England His Highness was invested by His Majesty the King Emperor with the insignia of G.C.I.E. which distinction was conferred on him on the 3rd June, 1935. A Chief Court of Judicature was established in 1921. The army consists of Cavalry, Infantry, Transport and Artillery. The normal revenues about one crore and twenty-five lakhs.

According to the Census of 1931 the population of the State is 26,31,775. In area it is 16,682 square miles.

Kishangarh State is in the centre of Rajputana and consists practically of two narrow strips of land separated from each other, with an area of 858 square miles (population 85,744), the northern mostly sandy, the southern generally flat and fertile. The Ruling Princes of Kishangarh belong to the Rathor clan of Rajputs and are descended from Maharaja Kishan Singh (second son of Maharaja Udai Singh of Jodhpur) who founded the town of Kishangarh in 1611. The present ruler is His Highness Umdaye Rajpal Bahadur Mekan Maharajah Dhiraj Dikshit Yagnaram Singh Bahadur. He was born on the 6th January, 1896, and was educated at the Mayo College, Ajmer, where he passed the Diploma Examination. He was married to the sister of Raja Bahadur Maksudangarh in May, 1915. He went to England and travelled on the continent with His Late Highness in 1921. On the demise of His Late Highness on 25th September 1926, he succeeded to the Gadi on the

24th November 1926. He administers the State with the help of a Council. Revenue about 7.5 lakhs and expenditure 6.5 lakhs.

Lawa State, or Chief of Rajputana is a separate chieftship under the protection of the British Government and independent of any Native States. It formerly belonged to Jaipur and then became part of the State of Tonk. In 1867, the Nawab of Tonk murdered the Thakur's uncle and his followers, and Lawa was then raised to its present State. The Thakurs of Lawa belonged to the Naruka sect of the Kachwaha Rajputs. The present Thakur, Bansperdeep Singh, was born on September 24, 1923 and succeeded to the chieftship on 31st December 1929. The chieftship is under minority Administration. Revenue about Rs. 50,000.

Bundi State is a mountainous territory in the south-east of Rajputana. The Ruler of Bundi is the head of the Hara sect of the great clan of Chauhan Rajputs and the pountry occupied by this sect has for the last five or six centuries been known as Haroti. The State was founded in the early part of the thirteenth century and constant feuds with Mewar and Malwa followed. It threw in its lot with the Mahomedan emperors in the sixteenth century. In later times it was constantly ravaged by the Marathas and Pindaries and came under British protection in 1815. The present ruler of the State is His Highness Maharao Raja Shri Ishwar Singhji Saheb Bahadur. He was born on 8th March 1893 and succeeded to the Gadi on 8th August 1927. His Highness is entitled to a Salute of 17 guns. His apparent Maharaj Kumar Shri Bagadur Singhji. Revenue about 13 lakhs and 3½ lakhs Kaidar.

Tonk State—Partly in Rajputana and partly in Central India, consists of six Parganas separated from one another. The ruling family belongs to the Salarzai clan of the Bunerwal Afghan tribe. The founder of the State was Nawab Muhammad Amir Khan Bahadur, General of Holkar's Army from 1798-1806. Holkar bestowed grants of land on him in Rajputana and Central India and the land so granted to him was consolidated into the present State. The present Ruler of the State is His Highness Said-ud-Daula, Wazir-ul-Mulk Nawab Hafiz Sir Muhammad Saadat Ali Khan Bahadur Saadat-i-Jang, G.C.I.E. who ascended the Masnad in 1930. The administration is conducted by the Nawab in consultation with the Council of four members, viz., (1) Major R. R. Burnett, O.B.E., Principal Official and Adviser to His Highness, Vice President, State Council, and Finance Member; (2) Khan Bahadur Sz Mohammad Abdul Tawwab Khan, Home Member, (3) Khan Bahadur Sheikh Rahim Baksh, O.B.E., Judicial Member, (4) Sheikh M. Mohd. Ghulam Bahaduddin, Revenue Member.

Revenue .. Rs. 21,68,108 Expenditure 20,34,175
Secretary—M. Hamid Husain, B.A.

Shahpura State.—The ruling family belongs to the Se-sodia Clan of Rajputs. The State came into existence about 1829 when the Parganah of Phulla was granted by the Mughal Emperor Shah-I-Jehan to Maharaj Surjan Singh, son of Maharaj Surajmal, the second son of Maharana Amar Singh of Udaipur.

Later on Raja Ran Singhji received the paraganah of Kachhola from the Maharana of Udaipur and was recognised as a great noble of the Mewar State.

The present Ruler is Rajadhiraj Sri Umald Singhji Bahadur. The State enjoys permanent honour of nine guns salute.

Bharatpur State.—Consists largely of an immense alluvial plain, watered by the Banganga and other rivers.

The present ruling family of Bharatpur are Jats, of the Sinsinwar clan who trace their pedigree to the eleventh century. The family derives its name from its old village Sinsini. Bharatpur was the first State in Rajputana that made alliance with the British Government in 1803. It helped Lord Lake with 5,000 horse in his conquest of Agra and battle of Laswari wherein the Maratha power was entirely broken and received 5 districts as reward for the service. In 1804, however, Bharatpur sided with Jaswant Rao Holkar against the British Government which resulted in a war. Peace was re-established in 1805 under a treaty of alliance and it continues in force. The Gadi being usurped by Darjan Sal in 1825, the British Government took up the cause of the rightful heir Maharaja Balwant Singh Shaib. Bharatpur was besieged by Lord Combermere, and as the faithful subjects of the State also made common cause with the British Army the usurper was quickly disposed of, and Maharaja Balwant Singh, the rightful heir to the Throne, came into his own. Bharatpur also rendered valuable service to the British Government during the Mutiny. During the great War the Bharatpur Durbar gave valuable help to the Imperial Government. The Bharatpur Imperial Service Infantry served in East Africa and the Mule Transport Corps served in all theatres of war except Africa. The present Ruler is His Highness Shri Maharaja Brijendra Sawal Brijendra Singh Bahadur, Bahadur Jung, who was born in 1918 and succeeded his father, Maharaja Sir Kishen Singh who died on the 27th of March 1929.

Revenue Rs. 31,67,000.

Dholpur State.—The family of the ruling Chiefs of Dholpur belongs to the Bamrolian Jats, the adopted home of one of their ancestors. The family took the name of Bamrolia about the year 1367. They next migrated to Gwalior, where they took the part of the Rajputs in their struggles against the Emperor's Officers. Eventually the Bamrolia Jats settled near Gohad and in 1505 Surjan Deo assumed the title of Rana of Gohad. After the overthrow of the Mahratas at Panipat, Rana Bhim Singh in 1761 possessed himself of the fortress of Gwalior but lost it six years later. In order to bar the encroachments of the Mahratas, a treaty was made with the Rana in 1779 by the British Government under Warren Hastings, and the joint forces of the contracting parties re-took Gwalior. In the treaty of the 13th October 1781 between the British Government and Scindia, it was stipulated that so long as the Maharaj Rana observes his treaty with the English, Scindia should not interfere with his territories. The possession of Gohad however led to disputes between the British and Scindia, and in 1805

the Governor-General transferred Gwalior and Gohad to Scindia, and that of Dholpur, Bari, Basari, Sepau and Rajkhera to Maharaj Rana Kirat Singh. Maharaj Rana Kirat Singh died in 1836 and was succeeded by his son Maharaj Rana Bhagwant Singh on whose death in 1870 his grandson, the late Chief Maharaj Rana Nehal Singh, succeeded to the Gadi Major His Highness Rana-ul-Daula Sipahdar-ul-Mulk Samad Rajhai Hind Maharajadhiraj Sir Sawal Maharaj Rana Sir Udal Bhan Singh Lokindra Bahadur Diler Jung Jai Deo, K.C.S.I., K.C.V.O., the present ruler, is the second son of Maharaj Rana Nehal Singh and was born on the 12th February 1893. On the death of his brother Maharaj Rana Ram Singh His Highness succeeded to the gadi on March 1911.

Karauli State.—A State in Rajputana under the Political control of the Political Agent, Eastern Rajputana States Agency, lying between 26° and 27° north latitude and 76° 30' and 77° 30' east longitude. Area, 1,242 square miles. The river Chambal forms the south-eastern boundary of the State, dividing it from Gwalior (Scindia's Territory) on the south-west it is bounded by Jaipur; and on the north-east by the States of Bharatpur, Jaipur and Dholpur. The State pays no tribute to Government. Languages spoken Hindi and Urdu.

Ruler—His Highness Maharajadhiraj Maharaja Sir Bhom Pal, Deo Bahadur, Yadukul Chandra Bhal, K.C.S.I., Heir-apparent, Maharaj Kumar Ganesh Pal. Dewan—Raj Bhushan Pandit Shiv Kumar Chaturvedi, B.A., M.B.A.S.

Kotah State belongs to the Hara section of the clan of Chauhan Rajputs, and the early history of their house is, up to the 17th century, identical with that of the Bundi family from which they are an offshoot. Its existence as a separate State dates from 1625. It came under British protection in 1817. The present ruler is H. H. Lieut.-Colonel Maharao Sir Umed Singhji Bahadur, G.C.S.I., G.C.I.E., G.B.E., who was born in 1873 and invested with full powers in 1896. In administration he is assisted by two members, Rai Bahadur Pandit Bishambhar Nath, M.A., and Major-General Onkarsingh, C.I.E. The most important event of his rule has been the restoration, on the deposition of the late Chief of the Jhalawar State, of 15 out of the 17 districts which had been ceded in 1838 to form that principality. Revenue 61 lakhs; Expenditure 47 lakhs.

Jhalawar State consists of two separate tracts in the south-east of Rajputana with an area of 813 square miles yielding a revenue of about 8 lakhs of rupees. The ruling family belongs to the Jhala clan of Rajputs. The present Ruler, Lieutenant His Highness Maharaj Rana Rajendra Singhji, succeeded to the Gadi on 13th April, 1929. He was born in 1900 and educated at the Mayo College, Ajmer, and Oxford University. The heir-apparent Maharaj Kumar Virendra Singh was born in England on 27th September, 1921. Rai Bahadur Dewan Pandit Manmohan Lal Ji Langar is the Dewan of the State.

Bikaner State in point of area is the seventh largest of all the Indian States and the second largest in Rajputna. The population

of the State is 9,36,218 of whom 77 per cent. are Hindus, 15 per cent. Mahomedans, 4 per cent. Sikhs and 3 per cent. Jains. The capital city of Bikaner, with its population including the suburbs of 85,927, is the third city in Rajputana.

The northern portion of the State consists of level loam land, whilst the remainder is for the most part sandy and undulating. The average rainfall is about 12 inches. The water level over most of the State is from 150 feet to 300 feet deep.

The Reigning Family of Bikaner is of the Rathore clan of Rajputs, and the State was founded in 1465 A.D. by Rao Bikaji, son of Rao Jodhaji, Ruler of Marwar (Jodhpur), and after him both the Capital and the State are named. Rai Singhji, the first to receive the title of Rajah, was "one of Akbar's most distinguished Generals" and it was during his reign that the present Fort of Bikaner was built in 1593. The title of Maharajah was conferred on Rajah Anup Singhji by the Mughal Emperor in 1687 in recognition of his distinguished services in the capture of Golconda. The conspicuous services of Maharajah Sardar Singhji who in the Indian Mutiny of 1857 personally led his troops to co-operate with the British forces in the field on the outbreak of the Mutiny was acknowledged by the Government of India by the transfer of the Sub-Tehsil of Tibi, consisting of 41 villages from the adjoining Sirsa Tehsil in the Punjab to the Bikaner State.

The present Ruler, Lieutenant-General His Highness Maharajadhiraj Raj Rajeshwar Narendra Shriomani Maharajah Sri Ganga Singhji Bahadur, G.C.S.I., G.C.I.F., G.C.V.O., G.B.E., K.C.B., A.D.C., L.L.D., is the 21st of a long line of distinguished rulers renowned for their bravery and statesmanship. He was born on the 13th October 1880 and assumed full ruling powers in December, 1898. He was awarded the first class Kaisar-i-Hind Medal for the active part he took in relieving the famine of 1899-1900, and soon after he went on active service to China in connection with the China War of 1900-1901 in command of his famous Ganga Risala and was mentioned in despatches and received the China Medal and K.C.I.E. The State Forces consist of the Camel Corps, known as 'Ganga Risala,' whose sanctioned strength is 466 strong, an Infantry Battalion known as Sadul Light Infantry 619 strong, a Regiment of Cavalry known as Dungan Lancers 342 strong, including His Highness' Body Guard, a Battery of Artillery (4 guns 2-75), 236 strong, two sections of Motor Machine Guns 100 strong and Camel Battery, 20 strong and State Band 35 strong. At outbreak of the Great War in 1914, His Highness immediately placed the services of himself and his State forces and all the resources of the State at the disposal of His Imperial Majesty the King-Emperor, and the Ganga Risala reinforced by the Infantry Regiment which became incorporated in the Camel Corps in the field, rendered very valuable services in Egypt and Palestine. An extra force was also raised for internal security. His Highness personally went on active service in August 1914 and enjoys the honour of having fought both in France and Egypt, and thus has the distinction of having fought for the British Crown

on three Continents, viz., Asia, Europe and Africa. He was mentioned in despatches both in Egypt and France. His Highness also played a very conspicuous political part during the period of the War when he went twice to Europe as the Representative of the Princes of India, once in 1917 to attend the meetings of the Imperial War Cabinet and Conference, and again in 1918-19 to attend the Peace Conference where he was one of the signatories to the treaty of Versailles. His Highness led the Indian Delegation to the 11th Assembly of the League of Nations at Geneva and represented the Indian States at the Imperial Conference in 1930. His Highness also attended the Indian Round Table Conference and the Federal Structure Subcommittee both in 1930 and 1931.

His Highness enjoys a salute of 19 guns (personal) whilst the permanent local salute of the State is also 19. His Highness has also had the honour of being elected the first Chancellor of the Chamber of Princes, an office which he filled most creditably for 5 years till 1925.

His Highness is assisted in the administration by a Prime Minister and an Executive Council. The post of Prime Minister is held by Col. Maharaj Sri Bhairun Singhji Bahadur, K.C.S.I. A Legislative Assembly was inaugurated in 1913, and consists of 45 Members, 20 out of whom are elected Members: it meets twice a year.

The revenues of the State are over a crore of rupees and the State owns a large Railway system, the total mileage being 795.85. The Government have also under contemplation an extension of the Bikaner State Railway from Sadulpur to Rewari and from Bikaner to Sind via Jaisalmer which will have the effect of connecting Delhi with Sind.

Hitherto there was practically no irrigation in the State, the crops depending only on the scanty rainfall; but the construction and opening in 1927 of the Gang Canal taken out from the Sutlej River has helped to protect about 6,20,000 acres of land in the northern part of the State against famine from which it has suffered in the past. 3,39,884 bighas of the Canal land have already been sold and further sale is going on. Even larger expectations are held out from the Bhakra Dam Project from which it is hoped that the remaining level lands in the north of the State will be irrigated.

A coal mine is worked at Palana, 14 miles south from the Capital.

Alwar State is a hilly tract of land in the East of Rajputana. The Alwar House is the head in India of the Naruka clan who are descendants of 'Kush', the eldest son of Shri Ram in the Solar dynasty. Raja Udai Karanji was the common ancestor of both the Alwar and Jaipur Houses. Bar Singh, the eldest son of Udai Karanji of Amber, renounced his right of succession in favour of his younger brother Nar Singhji. Nar Singhji's line founded Jaipur while in Bar Singhji's line Maharaj Pratap Singh established the Alwar State. Before his death in 1791 Maharaj Pratap Singh secured possession of large territories. His successor sent a force to co-operate with Lord Lake in the War of 1803. An alliance of mutual friendship

was concluded with the British Government in that year. The present Ruler Col His Highness Shri Sewal Maharaj Raj Rishi Sir Jey Singhji Bahadur, GCSI, G.C.I.E., who is sixth in succession from Maharaj Pratap Singhji was born in 1882, succeeded his father Maharaj Shri Mangal Singhji Dev, GCSI, in 1892 and assumed the Ruling powers in 1903. Normal revenue is about 38 lakhs. His Highness Shri Maharaj Mangal Singhji Dev was the first Prince in Rajputana to offer help in the defence of the Empire in 1888. Alwar State stood first in recruiting in Rajputana at the time of the Great War. His Highness enjoys a salute of 17 guns. Owing to agrarian trouble in the State, His Highness was asked by the Government of India to reside outside the State for an indefinite period in 1933 and the State is now being governed by an Administrator. The capital Alwar is on the B. B. & C. I. Rly 98 miles west of Delhi.

Palanpur—Palanpur is a first class State with an area of 1,768.89 square miles and a population of 2,64,179. The net revenue of the State calculated on the average of the last five years is about Rs. 10,80,000.

2. The State is under the rule of Major His Highness Zuhd-ul-Mulk Dewan Mahakhan Nawab Shri Taley Muhammed Khan Bahadur, G.C.I.E., K.C.V.O., Nawab Sahib of Palanpur. The Ruling Family is of Afghan origin belonging to the Lohani Stock and had established

their Principality in Rajputana in the 14th Century. The connection with the British may be said to have definitely begun from 1817 A. D. when Dewan Fateh Khan II entered into relations with the East India Company. A considerable trade in cloth, wheat, ghee, wool, hides, castor and rapeseeds, sugar and rice is carried on in the State. The capital city of Palanpur is situated on the B. B. & C. I. Railway and is the junction station of the Palanpur State Railway. Palanpur is a very old settlement of which mention was made in the 8th century.

WESTERN RAJPUTANA STATES.

Resident—Lt.-Col. H. M. Wightwick.

SOUTHERN RAJPUTANA STATES.

Political Agent—Lt.-Col. G. L. Betham, C.I.E., M.C.

CENTRAL INDIA AGENCY.

Central India Agency is the name given to the country occupied by the Indian States grouped together under the supervision of the Political Officer who is designated the Agent to the Governor-General in Central India with headquarters at Indore. As constituted in 1921—that is, after the separation of the Gwalior Residency—it is an irregularly formed tract lying in two sections, the Eastern comprising Bundelkhand Agency between 22°-38' and 26°-19' North and 78°-10' and 83°-0' East and the Western consisting of the Bhopal and Malwa Agencies between 21°-22' and 24°-47' North and 74°-0' and 78°-50' East. The British districts of Jhansi and Saugor and the Gwalior State divide the Agency into two sections. The total area covered is 51,651.11 square miles and the population (1931) amounts to 6,635,737. The great majority of the people are Hindus. There are 28 Salute States of which the following 10 have direct treaty engagements with the British Government.—Indore, Bhopal, Rewa, Orchha, Datia, Dhar, Dewas Senior Branch, Dewas Junior Branch, Samthar and Jaora. All of these are Hindu except Bhopal Jaora and Baoni which are Muhammadan. Besides these there are 61 Minor States and Guaranteed Estates. Excluding the Indore and Rewa States and the Hrapur and Lalgarh they Estates are divided into following groups for administrative purposes.—Bhopal Agency, 12 States and Estates (principal States Bhopal, Dewas Senior Branch, Dewas Junior Branch); Bundelkhand Agency, 33 States and Estates (principal States Orchha and Datia); Malwa Agency, 40 States and Estates (principal States

Dhar, Jaora and Ratlam). The Agency may roughly be divided into two natural divisions, Central India West comprising the former Plateau division with such hilly land as lies on this side and Central India East comprising the former low-lying area and the Eastern hilly tracts. The hilly tracts lie along the ranges of the Vindhya and Satpuras. They consist of forest areas and agriculture is little practised there, the inhabitants being mostly members of the wild tribes. The territories of the different States are much intermingled and their political relations with the Government of India and each other are very varied.

The following is the size, population and revenue of the ten treaty States mentioned above—

Name.	Area in square miles	Population	Revenue.
			Lakhs Rs
Indore ..	9,902	13,25,089	124½
Bhopal ..	6,924	7,29,955	80
Rewa ..	13,000	15,87,445	60
Orchha ..	2,080	3,14,061	10
Datia ..	912	1,58,834	13½
Dhar ..	1,800	2,43,430	17½
Dewas, Senior Branch ..	449	83,321	6½
Dewas, Junior Branch ..	419	70,513	6½
Samthar ..	178	33,307	3½
Jaora ..	602	1,00,166	13

Gwalior.—The house of Scindia traces its descent to a family of which one branch held the hereditary post of patel in a village near Satara. The head of the family received a patent of rank from Aurangzeb. The founder of the Gwalior House was Ranoji Scindia who held a military rank under the Peshwa Bajirao. In 1726 the Peshwa granted deeds to Puar, Holkar and Scindia, empowering them to levy "Chauth" and "Sarde-mukhi" and retain half the amount for payment to their troops. In 1736 Ranoji Scindia accompanied Bajirao to Delhi where he and Mulhar Rao Holkar distinguished themselves in military exploits. Ranoji fixed his headquarters at the ancient city of Ujjain, which for the time became the capital of the Scindia dominions. During the time of Mahadji Scindia and Dowlat Rao Scindia Gwalior played an important part in shaping the history of India. Despite the partial reverse which Mahadji Scindia's troops suffered at the hands of the British in 1780, reverses which led to the treaty of Salbai (1782), Scindia's power remained unbroken. For the first time he was now recognized by the British as an independent sovereign and not as a vassal of the Peshwa.

In 1790 his power was firmly established in Delhi. While he was indulging ambitious hopes he fell a prey to fever which ended his remarkable career on 12th February, 1794. Himself a military genius, Mahadji Scindia's armies reached the zenith of their glory under the disciplined training of the celebrated French adventurer—De Boigne. Mahadji was succeeded by his grand nephew Daulat Rao in whose service Perron, a Military Commander of great renown, played a leading part. The strength of Scindia's Army was, however, considerably weakened by the reverses, sustained at Ahmednagar, Assaye, Asirgarh and Laswari. Daulat Rao Scindia died in 1827. Till his death he remained in undisputed possession of almost all the territory which belonged to him in 1805.

Daulat Rao was succeeded by Jankoji Rao who passed away in the prime of life. On his demise in 1843 intrigue and party spirit were rampant and the Army was in a state of mutiny with the result that it came into collision with the British forces at Maharajpore and Pannthar.

Jankoji Rao was succeeded by Jijaji Rao whose adherence to the British cause during the dark days of Mutiny, when his own troops deserted him, was unshakable. In 1861 he was created a Knight Grand Commander of the Most Exalted Order of the Star of India and in 1877 was made a Councillor of the Empress. Subsequently he received other titles and entered into treaties of mutual exchange of territories with the British Government. He died on the 20th June 1886 and was succeeded by his son Lieutenant-General H. H. Maharaja Madho Rao Scindia, Aliyah Bahadur, G. C. V. O., G. C. S. I., G. B. E., A. D. C., to the King. He succeeded in 1886 and obtained powers in 1894. In 1901 he went to China during the war, he held the rank of honorary Lieutenant-General of the British Army and the honorary degrees of LL.D., Cambridge, and D.C.L., Oxon. He was also a Donat of the Order of St. John of Jerusalem in England. He died in June

1925 and was succeeded by his son H. H. Jeewaji Rao Scindia. During His Highness' minority the administration of the State is being conducted by a Council of Regency.

The Ruler of the State enjoys a salute of 21 guns. The State is in direct relations with the Government of India.

The State has an area of 26,367 sq. miles and population 35,23,070 according to the Census of 1931. Its average rainfall is from 25 to 36 inches. The average revenue is Rs. 2,41,79,000 and average expenditure Rs. 2,06,50,000.

The State has a Police force of 13,613 and Indian State Forces Cavalry 1,560 Infantry and Artillery, besides Regular and Irregular troops.

There is a well equipped State workshop in Lashkar, the capital of the State, there are electric Press, electric Power House, Leather Factory, Tannery and Pottery Works. There are some good cotton mills in Lashkar and Ujjain. The State has its own Light Railway and its own Postal system according to Postal Convention. The G. I. P. Railway traverses through a major portion of the State territories.

Indore.—The founder of the House of the Holkar of Indore was Malhar Rao Holkar, born in 1693. His soldierly qualities brought him to the front under the Peshwa, who took him into his service and employed him for his conquests. When the Maratha power was weakened at the battle of Panipat in 1761, Malhar Rao had acquired territories stretching from the Deccan to the Ganges as a reward for his career as a Military Commander. He was succeeded by his grandson. On his death without issue his mother Ahilya Bai became the Ruler and her administration is still looked upon with admiration and reverence as that of a model ruler. She was succeeded by Tukoji Holkar who had been associated with her to carry the Military Administration and had in course of it distinguished himself in various battles. Tukoji was succeeded by Kashirao, who was supplanted by Yeshwant Rao, his step-brother, a person of remarkable daring strategy as exhibited in a number of engagements in which he had taken part. The brilliant success he obtained at the battle of Poona against the combined armies of Peshwa and Scindia made him a dictator of Poona for some time and he declared in consequence the independence of Holkar State. During 1804-5 he had a protracted war with the British, closed by a Treaty which recognised the independence of Holkar State with practically no diminution of its territories and rights. Yeshwant Rao showed signs of insanity from 1808 onwards and succumbed to that malady in 1811, when he was succeeded by his minor son Malhar Rao II. During the Regency which followed, the power of the State was weakened by various causes, the most important of which was the refractory conduct of the Military Commanders. On the outbreak of the war between the English and the Peshwa in 1817, some of these Commanders, with a part of the army, rebelled against the authority of the State and were disposed to betray the Peshwa, while the regent mother and her ministers were for friendship with the British. There was a battle between the British Army and this refractory portion of the Holkar

Army which culminated in the latter's defeat Holkar had to come to terms and to cede extensive territories and rights over the Rajput Princes to the British, but the internal sovereignty remained unaffected. The Treaty of 1818 which embodied these provisions still regulates the relations between the British Government and the State.

Malhar Rao died a premature death in 1833. Then followed the weak administration of Hari Rao and his son. In 1844 Tukoji Rao II ascended the Throne; but as he was a minor the administration was carried on by a Regency under Sir Robert Hamilton, the Resident as its Adviser. The prosperity of the State revived a great deal during this administration and the progress was maintained after the Maharaja assumed powers in 1852. It was interrupted by the out-break of the Mutiny in 1857 in British India. This wave of disaffection did not leave some of the State troops untouched. The Maharaja with his adherents and the remaining troops remained, however, staunch to the British and gave every possible assistance to the British authorities at Indore, Mhow and other places which was recognised by the British Government. The Maharaja died in 1886 after having effected various reforms in the administration and raised the position of the State to a high degree of prosperity and honour. He was succeeded by Shivaji Rao who reigned for 16 years and will be specially remembered for his beneficent measures in matters of education, sanitation, medical relief and abolition of transit duties. Tukoji Rao III succeeded in 1903 while yet a minor. The Regency Administration was continued till 1911 and it effected a number of reforms in all the branches of administration. The policy of the Regency was maintained by the Maharaja. With his assumption of powers the State advanced in education in general, including female education, commerce and industrial developments, municipal franchise and other representative institutions. This prosperity was specially reflected in the Indore City, the population of which rose by 40 per cent.

During the war of 1914 the State placed all its resources at the disposal of the British Government. Its troops took part in the various theatres of war and the contribution of the State towards the war and charitable funds in money was 41 lakhs and its subscriptions to the War Loans amounted to Rs. 82 lakhs, while the contribution from the Indore people amounted to over one crore. This assistance received the recognition of the British Government.

His Highness Maharaja Tukoji Rao III abdicated in favour of his son. The present Maharaja, Yeshwant Rao Holkar, was born on 6th September 1908. He received his education in England during 1920-23 and again at Christ Church College, Oxford, from 1926 till his return in 1929. He married a daughter of the Junior Chief of Kagal (Kolhapur) in February 1924. His educational career at Oxford in England having come to an end, he returned to India arriving at Indore on the 12th November 1929, and received administrative training with Mr. C. U. Wills, O.I.E., I.C.S. He assumed full Ruling Powers on the 9th May 1930.

The area of the State is 9,902 square miles with a revenue of about one crore and thirty-

eight lakhs. According to the Census of 1931 the population of the State is about 1,325,000, showing an increase of 14.5 per cent. over the Census figures of 1921.

There are two first grade Colleges in the City, one is maintained by the State and teaches up to M.A. and LL.B., the other is established by the Canadian Mission and teaches up to M.A. in Philosophy. The State has six High Schools, 1 Sanskrit College and 520 other educational and 76 medical institutions. An Institute of Plant Industry for the improvement of cotton is located at Indore. It has also 9 spinning and weaving mills.

The strength of the State Army is about 3,000. The State is traversed by the Holkar State Railway, the principal station of which is Indore, the B. & C. I. Railway and the U. B. Section of the G. I. P. Railway. Besides the trunk roads, there are 691 miles of roads constructed and maintained by the State. The reforms introduced recently are the establishment of State Savings Banks, a scheme of Life Insurance of State officials, establishment of the Indore Legislative Council (Formerly known as the Indore Legislative Committee) consisting of 30 members, excluding the President and the Vice-President; of whom 15 shall be elected and 15 nominated. Introduction of a scheme of Compulsory Primary Education in the City of Indore, measures for the expansion of education in the mofussil, a scheme for the formation of the Holkar State Executive Service, a scheme of water supply and main drainage in the Indore City, raising of the marriageable age of boys and girls to 18 years and 14 years respectively, and the passing of the Indore Nukta Act and the Marriage expenses Controlling Act for controlling expenditure on funeral ceremonies and marriages.

The Chief imports are cloth, machinery, sugar, salt and kerosene oil. The total imports in 1932-33 amounted to Rs. 1,84,24,171.

The chief exports are cotton, cloth, tobacco and cereals. The total exports in 1932-33 amounted to Rs. 64,74,450 exclusive of the exported produce of the Ginning and Pressing factories.

Cloth manufactured at the local mills is valued at over two crores and the local trade in wheat is estimated at one crore.

Cotton excise duty at 3½ per cent *ad valorem* has been abolished from 1st May 1926 and an industrial tax is levied on the cotton mills from the same date.

His Highness' Government have sanctioned the construction of an Aerodrome.

Bhopal.—The principal Mohammedan State in Central India ranks next in importance to Hyderabad among the Mohammedan States of India. The ruhing family was founded by Sardar Dost Mohammad Khan, Diler-Jung, a Tirah Afghan, who, after having served with distinction in the army of the Emperor Aurangzeb, obtained the *pargana* of Berasia in 1709. With the disintegration of the Moghal Empire Bhopal State became an independent State. In the early part of the 19th century, the Nawab successfully withstood the inroads of Scindia and Bhonsla, and by the agreement of 1817 Bhopal undertook to assist the British

with a contingent force and to co-operate against the Pindari bands. In 1818 a permanent treaty succeeded the agreement of 1817.

The present ruler of the State, His Highness Sikander Sault Nawab Itfikhari-Mulk Mohammad Hamidullah Khan, Bahadur, G.C.S.I., G.C.I.E., C.V.O., B.A., succeeded his mother, Her late Highness Nawab Sultan Jahān Begam, on her abdication in May, 1926. He had previously actively participated in the administration of the State for nearly ten years as Chief Secretary and afterwards as Member for Finance and Law and Justice.

His Highness is assisted in the work of administration by an Executive Council consisting of five Members and one Secretary, whose names are given below —

Alimartabat, Motamid-us-Sultan, Rafi Bahadur, Raja Oudh Narain Bisarya, B.A., President and Member State Council.

Members State Council — Alimartabat, Rafi-ul-Qadr, Ziaul-Uloom, Mufti Mohammad Anwarul Haq, M.A., M.F., Al-Martabat, Sir Syed Ross Masood, Kt., LL.D., D. Litt., Bar-at-Law; Al-Martabat, Mushirul-Mulk, Ali-Qadr, Kazi Ali Haider Abbasi, Ali-Martabat, Ali-Qadr Mohammad Shualb Qureshi, M.A., LL.B., Bar-at-law.

Secretary.—Munshi Hasan Mohammad Hayat, B.A.

The work of legislation with the right of discussing the budget, moving resolutions and interpellations rests with a representative Legislative Council inaugurated in 1927. The *rai-yawars* system in which the cultivator holds his land direct from Government has lately been introduced. The State forests are extensive and valuable, and the arable area which comprises more than two-thirds of the total consists mostly of good soil producing cotton, wheat, other cereals, sugar-cane and tobacco. The State contains many remains of great archaeological interest including the famous Sanchi Topes, which date from the 2nd century B.C. and which were restored under the direction of Sir John Marshall. Sanchi station on the G.I.P. main line to Delhi adjoins the Topes.

Among other troops, the State maintains one full strength Infantry battalion. The capital, Bhopal City, beautifully situated on the northern bank of an extensive lake, is the junction for the Bhopal-Ujjain Section of the Great Indian Peninsula Railway.

Rewa.—Is the largest State in Central India Agency with an area of 13,000 square miles and a population of 1,587,445 (1931). The Rulers are Baghel Rajputs descended from the famous solanki clan which ruled over Gujrat from the 10th to 13th Century. During the mutiny the Durbar rendered meritorious services to the Crown for which various parganas which had been seized by Marathas were resorted to the Maharaja. The present ruler is His Highness Bandhvesh Maharaja Sir Gulab Singh Bahadur, G.C.I.E., K.C.S.I., who was born in 1903. His Highness was married in 1919 to the sister of the Maharaja of Jodhpur. Upon the death of his father, Lt.-Col. Sir Venkat Raman Singh Bahadur, G.C.S.I., on 30th October 1918, His

Highness Bandhvesh Maharaja Sir Gulab Singh Bahadur succeeded to the Gadi on 31st October as a minor. During the period of minority, the State was administered by Council of Regency with His Highness Maharaja Col. Sajan Singh Bahadur, K.C.S.I., K.C.V.O., A.D.C., of Kadam as Regent. His Highness Maharaja Sir Gulab Singh Bahadur attained majority in 1922 and was invested with full ruling powers by His Excellency the Viceroy. The Maharaja exercises full sovereignty within his State and the administration is now carried on by him with the help of a State Council of which His Highness himself is president. His Highness is very much interested in all round progress of the State. He takes a keen interest in administration and development of agriculture and mineral resources. He has opened extensive tracts by construction of roads and bridges throughout the State. A State Bank—Bank of Baghelkhand, has recently been instituted, which has its branches all over the State. His Highness is a keen sportsman and the number of tigers bagged by him totals about 500. His Highness has got a son and heir named Sri Yuvraj Maharaj Kumar Martand Singhji born on 15th March 1923.

His Highness' second marriage with the daughter of H.H. the Maharaja of Kishenghar was performed on the 18th February 1925.

Dhar.—This State, in the Agency for Southern States in Central India, takes its name from the old city of Dhar, long famous as the capital of the Parmar Rajputs, who ruled over Malwa from 9th to the thirteenth century and from whom the present Rulers of Dhar—Puar Marathas—claim descent. In the middle of the 18th century the Ruler of Dhar, Anand Rao, was one of the leading chiefs of Central India, sharing with Holkar and Scindia the rule of Malwa. The State came into treaty relations with the British Government in virtue of the treaty of 1819. Lt.-Colonel H. H. the Maharaja Sir Uday Rao Puar Sahib Bahadur, G.C.S.I., K.C.V.O., K.B.E., died on 30th July 1926. There are 13 Feudatories and 9 Bhums of whom 12 hold a guarantee from the British Government. The population of the State according to the latest Census figure is 243,521 and the average Income and Expenditure are about 17 and 16 lakhs respectively.

The present Ruler, His Highness the Maharaja Anand Rao Puar Sahib Bahadur being minor, the Government of State is carried on by a Council. Dewan Bahadur K. Nadkar is Dewan and President of the Council of Administration.

The famous and the ancient hill fort of Mandu the capital of several ancient and medieval Kingdoms, with its beautiful mausoleums, tombs and palaces and high hills and deep dales is situated in the State at a distance of 24 miles from the city of Dhar.

Jaora State—This State is the only Treaty State in the Malwa Political Agency covering an area of about 601 square miles with a total population of 100,201, and has its headquarters at Jaora town. The Chiefs of Jaora claim descent from Abdul Majid Khan, an Afghan of the Tajik Khel from Swat. The first Nawab was Abdul Ghafoor Khan who obtained the

State about the year 1908. The present Chief is Lieutenant-Colonel His Highness Fakhrud Daulah Nawab Sir Mohammad Ifkhar Ali Khan Sahib Bahadur, Saadat-e-Jang, K.C.I.E., who was born in 1883. His Highness is an Honorary Lieutenant-Colonel in the Indian Army.

In the administration of the State His Highness is assisted by a Council constituted as under:

President—His Highness the Nawab Sahib Bahadur. *Vice-President & Chief Secretary*—Khan Bahadur *Motamid Bahadur Sahibzada Mohammad Serfraz Ali Khan. *Secretary*—Mr Nasrat Mohammad Khan, M.A., LL.B. (Huz). *Members*—*Burjis Qadr Nawabzada Mohammad Nasir Ali Khan Sahib, Heir-apparent (Revenue). *Farrukh Siyar *Major Nawabzada Mohammad Mumtaz Ali Khan Sahib, Military Secretary (Military); *Muntazim Bahadur Sahibzada Mir Nasiruddin Ahmed Sahib, Secretary, Public Health Department, Major P. F. Nobury, D.S.O., I.A. (Private Secretary); Mr Serajut Rehman Khan, Bar-at-Law, Judicial Secretary and Judge, Chief Court (Law & Justice), Mirza Mohammad Aslam Beg, Revenue Secretary, Seth Govindramji (Finance).

A Chief Court with a Chief Justice and two Puisne Judges has also been established.

The soil of the State is among the richest in Malwa being mainly of the best black variety bearing excellent crops of wheat, cotton, and poppy. The average annual revenue is Rs. 12,00,000.

Rutlam—Is the premier Rajput State in the Malwa Agency. It covers an area of 871 square miles, including that of the Jagar of Khara in the Kushalgarh Chetship, which pays an annual tribute to the Rutlam Darbar. The State was founded by Raja Rutansingh, a great grandson of Raja Uday Singh of Jodhpur, in 1652. The Ruler of Rutlam is the religious head of the Rajputs of Malwa, and important caste questions are referred to him for decision. The State enjoys full and final civil and criminal powers. The present Ruler of Rutlam is Colonel His Highness Maharaja Sir Sajjan Singh, G.C.I.E., K.C.S.I., K.C.V.O., A.D.C. to H. H. H. the Prince of Wales, who was born in 1880, and educated at Daly College, Indore, received military training in Imperial Cadet Corps and invested with full powers in 1898. His Highness served in the war in France and Egypt from 1915 to 1918, was mentioned in despatches and received the Croix d'Officiers de Legion d'Honneur. Salute: 13 guns, local 15 guns.

Deewan—Rao Bahadur Devshanker J. Dave, Advocate.

Datia State.—The rulers of this State, in the Bundelkhand Agency, are Bundela Rajputs of the Orchha house. The territory was granted by the chief of Orchha to his son Bhagwan Rao in 1626, this was extended by conquest and by grants from the Delhi emperors. The present Ruler Major His Highness Maharaja Lokendra Sir Govind Singh Ju Deo Bahadur, G.C.I.E. (1932), K.C.S.I., 1918, who was born in 1886 and succeeded in 1907, married 1902, enjoys a salute of 15 guns. He placed all his resources and his personal services at the disposal of the Imperial Government during the Great War and established a War Hospital at Datia. He is a progressive Ruler and has created a Legislative Council and introduced many useful and important reforms in his State. He is a Vice-President of St. John Ambulance Association, a patron of Red Cross Society and has recently offered to the Imperial City of Delhi the life size marble statue of Lord Reading, the late Viceroy. He has built a hospital in the city named after Mrs. Heale and to advance female education he has built a girls' school named after Lady Willingdon. His Highness is a famous big game shot and has shot more than 150 tigers.

Orchha State.—The rulers of this State are Bundela Rajputs claiming to be descendants of the Gaharwars of Benares. It was founded as an independent State in 1048 A.D. It entered into relations with the British by the treaty made in 1812. His Highness Sir Pratap Singh, G.C.S.I., G.C.I.E., died in March 1940 and has been succeeded by his grandson His Highness Sawai Mahendra Maharaja Vir Singh Dev Bahadur, the present ruler. The ruler of the State has the hereditary titles of His Highness Saranand-Rajahar-Bundelkhand Maharaja Mahendra Sawai Bahadur. The State has a population of about 315,000 and an area of 2,080 square miles. The capital is Tikamgarh, 36 miles from Lalitpur Station on the G.I.P. Railway. Orchha, the old capital, has fallen into decay but is a place of interest on account of its magnificent buildings of which the finest were erected by Maharaja Bir Singh Dev I, the most famous ruler of the State (1675-1627).

Chief Minister—Major B. P. Pandey, B.A., LL.B., F.R.E.S.

GWALIOR.

Resident—E. C. Gibson, C.I.E.

BHOPAL.

Political Agent—W. Le B. Egerton

BUNDELKHAND.

Political Agent—Lt.-Col. L. E. Barton.

SIKKIM.

Sikkim is bounded on the north and north-east by Tibet, on the south-east by Bhutan, on the south by the British district of Darjeeling, and on the west by Nepal. The population consists of Bhutias, Lepchas, and Nepalese. It forms the direct route to the Chumbi Valley in Tibet. The main axis of the Himalayas, which runs east and west, forms the boundary between Sikkim and Tibet. The Singalila and Chola

ranges, which run southwards from the main chain, separate Sikkim from Nepal on the west, and from Tibet and Bhutan on the east. On the Singalila range rise the great snow peaks of Kichinjunga (28,146 feet), one of the highest mountains in the world. The Chola range which is much loftier than that of Singalila, leaves the main chain at the Dongkya La.

* State Titles

Tradition says that the ancestors of the Rajas of Sikkim originally came from eastern Tibet. The State was twice invaded by the Gurkhas at the end of the eighteenth century. On the outbreak of the Nepal War in 1814, the British formed an alliance with the Raja of Sikkim and at the close of the war the Raja was rewarded by a considerable cession of territory. In 1835 the Raja granted the site of Darjeeling to the British and received Rs. 12,000 annually in lieu of it. The State was previously under the Government of Bengal, but was brought under the direct supervision of the Government of India in 1906. The State is thinly populated, the area being 2,818 square miles, and the population 109,651, chiefly Buddhists and Hindus. The most important crops are maize and rice. There are several trade routes through Sikkim from

Darjeeling District into Tibet. In the convention of 1890 provision was made for the opening of a trade mart but the results were disappointing, and the failure of the Tibetans to fulfil their obligations resulted in 1904 in the despatch of a mission to Lhasa, where a new convention was signed. Trade with the British has increased in recent years, and is now between 40 and 50 lakhs yearly. A number of good roads have been constructed in recent years. The present ruler, His Highness Maharajah Sir Tashi Namgyal, K.C.I.E., was born in 1893 and succeeded in 1914. His Highness was invested with full ruling powers on the 5th April 1918. The title of a C.I.E. was conferred upon the Maharaja on the 1st January 1918 and K.C.I.E. on 1st January 1923. The average revenue is Rs 5,20,422. *Political Officer in Sikkim*.—F. Williamson.

BHUTAN.

Bhutan extends for a distance of approximately 190 miles east and west along the southern slopes of the central axis of the Himalayas adjacent to the northern border of Eastern Bengal and Assam. Its area is 18,000 square miles and its population, consisting of Buddhists and Hindus, has been estimated at 300,000. The country formerly belonged to a tribe called Tek-pa, but was wrested from them by some Tibetan soldiers about the middle of the seventeenth century. British relations with Bhutan commenced in 1772 when the Bhodias invaded the principality of Cooch Behar and British aid was invoked by that State. After a number of raids by the Bhutanese into Assam, an envoy (the Hon. A. Eden) was sent to Bhutan, who was grossly insulted and compelled to sign a treaty surrendering the Duars to Bhutan. On his return the treaty was disallowed and the Duars annexed. This was followed by the treaty of 1865 by which the State's relations with the Government of India were satisfactorily regulated. The State formerly received an allowance of half a lakh a year from the British Government in consideration of the cession in 1865 of some areas on the southern borders. This allowance was doubled by a new treaty concluded in January 1910, by which the Bhutanese Government bound itself to be guided by the advice of the British Government in regard

to its external relations, while the British Government undertook to exercise no interference in the internal administration of Bhutan. On the occasion of the Tibet Mission of 1904, the Bhodias gave strong proof of their friendly attitude. Not only did they consent to the survey of a road through their country to Chumbi, but their ruler, the Tongsa Penlop, accompanied the British troops to Lhasa, and assisted in the negotiations with the Tibetan authorities. For these services he was made a K.C.I.E., and he has since entertained the British Agent hospitably at his capital. The ruler is now known as H.H. the Maharaja of Bhutan, Sir Ugyen Wangchuk, K.C.S.I., K.C.I.E. At the head of the Bhutan Government, there are nominally two supreme authorities, the Dharma Raja, known as Shaping Renpoche, the spiritual head, and the Deb or Depa Raja, the temporal ruler. The Dharma Raja is regarded as a very high incarnation of Buddha, far higher than the ordinary incarnations in Tibet, of which there are several hundreds. On the death of a Dharma Raja a year or two is allowed to elapse, and his reincarnation then takes place, always in the Choje, or royal family of Bhutan.

Cultivation is backward and the chief crop is maize. The military force consists of local levies under the control of the different chiefs. They are of no military value.

NORTH-WEST FRONTIER STATES.

The Indian States of the North-West Frontier Provinces are Amb, Dir, Swat and Chitral. The area of the latter three is 13,000, 1,800 and 4,000 square miles and population 250,000, 216,000 and 99,000 respectively.

Amb.—Is only a village on the western bank of the Indus in Independent Tanawala.

Chitral—Runs from Lowaraï top to the south of the Hindu-Kush range in the north, and has an area of about 4,000 square miles. The ruling dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with its neighbours. It was visited in 1885 by the Lockhart Mission, and in 1889, on the establishment of a political agency in Gilgit, the ruler of Chitral received an annual subsidy from the British Government. That subsidy was increased two years later on condition that the ruler,

Amen-ul-Mulk, accepted the advice of the British Government in all matters connected with foreign policy and frontier defence. His sudden death in 1892 was followed by a dispute as to the succession. The eldest son Nizam-ul-Mulk was recognised by Government, but he was murdered in 1895. A war was declared by Umra Khan of Jandul and Dir against the infidels and the Agent at Gilgit, who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched (April 1, 1895) to their relief.

The valleys of which the State consists are extremely fertile and continuously cultivated. The internal administration of the country is conducted by His Highness Sir Shujaul-mulk, K.C.I.E., the Mehtar of Chitral and the foreign policy is regulated by the Political Agent at Malakand.

Dir.—The territories of this State, about 3,000 square miles in area, include the country drained by the Panjkora and its affluents down to the junction of the former river with the Bajaur Rud. The Nawab of Dir is the overlord of the country, exacting allegiance from the petty chiefs of the clans. Dir is mainly held by Yusufzai Pathans, the old non-Pathan inhabitants being now confined to the upper portion of the Panjkora Valley known as the Dir Kohistan. A motor road has been constructed to Dir from Malakand.

Swat.—The Ruler of the State, Miangul Gulshahzada Sir Abdul Wadood, K.B.E., is a descendent of the famous Akhund Sahib of Swat. He consolidated his rule in Swat from 1917 to 1922, and was recognized by the Government of India as Wali of Swat in 1926. The area of the State is 1,800 square miles and population 216,000. The Headquarters of the State is at Saidu Sharif about 40 miles from Malakand and connected with Malakand by motor road.

Political Agent for Dir, Swat and Chitral—Major H. H. Johnson, C.I.E., I.A.

STATES IN THE MADRAS PRESIDENCY.

The Madras Presidency includes 5 Indian States covering an area of 10,644 square miles. Of these, the States of Travancore and Cochin represent ancient Hindu dynasties. Pudukottai is the inheritance of the chieftain called the Tondiman. Banganapalle and Sandur two petty States, of which the first is ruled by a Nawab, lie in the centre of two British districts.

Name.	Area sq. miles.	Popula- tion	Estimated Gross Revenue in lakhs of rupees
Travancore .	7,625	5,095,973	241.36
Cochin ..	1,417	1,205,016	88.37
Pudukottai .	1,179	400,694	23.11
Banganapalle .	275	39,239	4.58
Sandur ..	167	13,583	2.21

These States were brought into direct relation with the Government of India on October 1st, 1923.

Travancore.—This State, which has an area of 7,624.84 square miles and a population of 5,095,973 with a revenue of Rs. 232.93 lakhs occupies the south-west portion of the Indian Peninsula, forming an irregular triangle with its apex at Cape Comorin. The early history of Travancore is in great part traditional; but there is little doubt that H. H. the Maharaja is the representative of the Chera dynasty, one of the three great Hindu dynasties which exercised sovereignty at one time in Southern India. The petty chiefs, who had subsequently set up as independent rulers within the State, were all subdued, and the whole country, included within its present boundaries, was consolidated and brought under one rule, by Maharaja Marthanda Varma (1729-58). The English first settled at Anjenko, a few miles to the north of Trivandrum, and built a factory there in 1684. In the wars in which the East India Company were engaged in Madura and Tinnevely, in the middle of the 18th century, the Travancore State gave assistance to the British authorities. Travancore was reckoned as one of the staunchest allies of the British Power and was accordingly included in the Treaty made in 1784 between the East India Company and the Sultan of Mysore. To protect the State from

possible inroads by Tippu, an arrangement was come to in 1788 with the East India Company, and in 1795 a formal treaty was concluded, by which the Company agreed to protect Travancore from all foreign enemies. In 1805 the annual subsidy to be paid by Travancore was fixed at 8 lakhs of rupees.

H. H. the Maharaja (b. 7th November 1912) ascended the masnad on the 1st September 1924. During the minority the State was ruled by Her Highness Maharani Setu Lakshmi Bai, C.I., aunt of the Maharaja, as Regent on his behalf. His Highness was invested with ruling powers on the 6th November 1931. The work of legislation was entrusted to a Legislative Council established as early as 1888. The Legislature was last re-constituted in January 1933, when a bicameral body was instituted. The new Chambers, viz., the Sri Mulam Assembly and the Sri Chitra State Council have a predominant elected non-official majority. Both Chambers possess the right to vote on the annual Budget, to move resolutions and ask questions. Both Chambers have also the right to initiate legislation. The elections to the Assembly are based on a wide franchise. Differences of opinion between the two Chambers will be settled by a Joint Committee consisting of an equal number of members selected by each Chamber. Women are placed on a footing of complete equality with men in the matter both of franchise and membership in the Legislature.

Local Self-Government on a small scale exists in the more important towns. The State supports a military force of 1,471 men. Education has advanced considerably in recent years and the State takes a leading place in that respect. In the matter of female Education the State has a leading place among Indian States and the British Indian Provinces. The principal food-grain grown is rice, but the main source of agricultural wealth is the coconut. Other crops are pepper, areca-nut, jack-fruit, sugar-cane and tapioca. Rubber and tea are among other important products. Cotton weaving and the making of matting from the coir are among the chief industries within recent years a ship has been given to the development of industries as well as the arts and crafts of the State. The Pullivassal Hydro-electric works, the Rubber factory in Trivandrum, the contemplated China clay and Porcelain factory and the addition of an Art Gallery named Chithralayam at Trivandrum are the results of the new policy initiated by His Highness the Maharaja. The State is well provided with roads, and with a natural

system of back-waters, besides canals and rivers navigable for country crafts. One line of railway about one hundred miles in length cuts across the State from east to west and then runs along the Coast to the Capital. More Railway lines are in contemplation. The capital is Trivandrum.

Agent to the Governor-General—Lieut.-Col. W. A. M. Garstin, C.B.E.

Dewan—Nawab sir Muhammad Habibullah, K.C.S.I., K.C.I.E., LL.D.

Cochin.—This State on the south-west coast of India is bounded by the Malabar District of the Madras Presidency and the State of Travancore. Very little is known of its early history. According to tradition, the Rajas of Cochin hold the territory in right of descent from Cheraman Perumal, who governed the whole country of Kerala, including Travancore and Malabar, as Viceroy of the Chola Kings about the beginning of the ninth century, and afterwards established himself as an independent Ruler. In 1502, the Portuguese were allowed to settle in what is now British Cochin and in the following year they built a fort and established commercial relations in the State. In the earlier wars with the Zamorin of Calicut, they assisted the Rajas of Cochin. The influence of the Portuguese on the west coast began to decline about the latter part of the seventeenth century, and in 1663 they were ousted from the town of Cochin by the Dutch with whom the Raja entered into friendly relations. About a century later, in 1759, when the Dutch power began to decline, the Raja was attacked by the Zamorin of Calicut, who was expelled with the assistance of the Raja of Travancore. In 1776, the State was conquered by Hyder Ali, to whom it remained tributary and subordinate, and subsequently to his son, Tippu Sultan. A treaty was concluded in 1791 between the Raja and the East India Company, by which His Highness agreed to become tributary to the British Government for his territories which were then in the possession of Tippu, and to pay a subsidy.

His Highness Sri Sir Rama Varmah, G.C.I.E., who ascended the throne in January 1915 having reigned on 25th March 1932, His Highness Sri Sir Rama Varma, G.C.I.E., who was born on 30th December 1861 succeeded to the throne and was duly installed as Maharaja on 1st June 1932. The administration is conducted under the control of the Maharaja whose chief Minister and Executive officer is the Dewan, Sir R. K. Shanmukham Chetty, K.C.I.E. The forests of Cochin form one of its most valuable assets. They abound in teak ebony, blackwood, & other valuable trees. Rice forms the staple of cultivation. Cocoanuts are largely raised in the sandy tracts and their products form the chief exports of the State. Communications by road and backwaters are good, and the State owns a line of railway from Shoranore to Ernakulam, the capital of the State, and a Forest Steam Tramway used in developing the forests. The State supports a force of 111 officers and 552 men.

Agent to the Governor-General—Lieut.-Col. W. A. M. Garstin, C.B.E.

Pudukkottai.—This State is bounded on the north and west by Trichinopoly, on the south by Ramanad and on the east by Tanjore. In

early times a part of the State belonged to the Chola Kings and the southern part to the Pandya Kings of Madura. Relations with the English began during the Carnatic wars. During the siege of Trichinopoly by the French in 1752, the Tondaiman of the time did good service to the Company's cause by sending them provisions, although his own country was on at least one occasion ravaged as a consequence of his fidelity to the English. In 1754 he sent some of his troops to assist Muhammad Yusuf, the Company's sepoy commandant, in settling the Madura and Tinnevely countries. Subsequently he was of much service in the wars with Haider Ali. His services were rewarded by a grant of territory subject to the conditions that the district should not be alienated (1806). Apart from that there is no treaty or arrangement with the Raja. His Highness Sri Brihadamba Das Raja Rajagopala Tondaiman Bahadur, the present ruler, is a minor. He was installed as Raja on 19-11-28. The administration of the State is carried on by an Administrator. The various departments are constituted on the British India model. The principal food crop is rice. The forests which cover about one-seventh of the State, contain only small timber. There are no large industries. The State is well provided with roads, but Pudukkottai is the only municipal town in the State.

Agent to the Governor-General—Lt.-Col. W. A. M. Garstin, C.B.E.

Banganapalle.—This is a small State in two detached portions which in the eighteenth century passed from Hyderabad to Mysore and back again to Hyderabad. The control over it was ceded to the Madras Government by the Nizam in 1800. The present ruler is Nawab Meer Fazle Ali Khan Bahadur. The chief food-grain is cholam. The Nawab pays no tribute and maintains no military force. The revenue of the State is over 3 lakhs. The Nawab enjoys a salute of 9 guns.

Agent to the Governor-General—Lt.-Col. W. A. M. Garstin, C.B.E.

Sandur.—The State is almost surrounded by the District of Bellary. The State is under the political control of the Agent to the Governor General, Madras States. After the destruction of the Empire of Vijayanagar in 1565 the State came to be held by semi-independent chiefs under the nominal sovereignty of the Sultan of Bijapur and in 1728 one of these chiefs, a Poligar of Bedar tribe, was turned out by an ancestor of the present Raja named Siddoji Rao of the Bhosle family of the famous Mahratta Chief Sivaji; they were Senapathies of Sivaji. In Siva Rao's time the State came under the Madras Government and his heirs in perpetuity with full powers. In 1876 the title of Raja was conferred on the Chief as a hereditary distinction. The present ruler is Raja Shrimant Yeshwantrao Hindurao Ghorpade who was invested with full ruling powers in February 1930.

The Raja pays no tribute and maintains no military force. The most important staple crop is cholam.

The State possesses sandalwood forests and rich manganese mines. Ranandrug Hill Station (Altitude 3,500 feet) and Shri Kaiteekswami Temple are the places of interest.

The following are the Members of the Huzur Darbar:

Shrimant R. M. Deshmukh B.A., LL.B. (canton), Bar-at-law.

Shrimant Sardar Bhujangrao Yeshwant-

rao Raje Ghorpade.

Meherban G. T. Konnur, B.A., Ex-Dewan of Sandur

Meherban V. Narasimha Rao, M.A.

Agent to the Governor-General:—Lt.-Col. W. A. M. Garstin, C.B.E.

STATES OF WESTERN INDIA.

Owing to the large number of States concerned and the interlacing of their territories with neighbouring British districts, the transfer of States under the Bombay Government to direct political relations with the Government of India (which was advocated in the Montagu-Chelmsford Report on the Constitutional Reforms) had been delayed. The first stage of that process, however, was carried out in October, 1924, when a new Residency was created in direct relation with the Government of India comprising the whole of the compact area making up the Kathiawar, Cutch and Palanpur Agencies under the Government of Bombay.

The remaining States in the Bombay Presidency which continued to remain in political relations with the Government of Bombay were transferred to the direct control of the Government of India with effect from the 1st April 1935. The transfer necessitated regrouping not only of the remaining Bombay States but also of some of the States comprised in the Western India States Agency. All the States and Estates hitherto included in the Mahi Kantha Agency except the Danta State are now in the Western India States Agency. These and the States and Estates comprised in the Banas Kantha Agency except the Palanpur State under the Western India States Agency now form a combined Agency which is designated "Sabar Kantha Agency." The Danta State has been transferred to the Rajputana Agency, so also the Palanpur State which was in the Western India States Agency has been transferred to the Rajputana Agency.

Resident of the First Class and Agent to the Governor-General in the States of Western India:—

The Hon. Sir Courtenay Latimer, K.C.I.E., C.S.I., L.C.S.

Judicial Commissioner in the States of Western India:—D. R. Norman, F.C.S.

Kathiawar—Kathiawar is the peninsula lying immediately to the north of Gujarat in the Bombay Presidency. Its extreme length is about 220 miles and its greatest breadth about 165 miles, the area being 23,445 square miles. There are nearly 200 separate States in Kathiawar, which for purposes of administrative convenience is sub-divided into subordinate Agencies known as the Western and Eastern Kathiawar Agencies. The Western Kathiawar Agency comprises the Halar and Sorath Prants, while the Eastern Kathiawar Agency comprises the Prants of Jhalawad and Gohelwad but in whichever of these two Agencies States with Salutes of guns are situated, they are in direct political relations with the Hon'ble the Agent to the Governor-General. The history of the British connection with Kathiawar commences from Colonel Walker's settlement of 1807. In

1863, the States in Kathiawar were classified into 7 classes, and although classes have since been abolished, the various jurisdictions still remained graded, as fixed in 1863.

Cutch—Before the creation in October 1924, of the Western India States Agency, the relations of the Cutch Durbar with the Bombay Government were conducted through a Political Agent in charge of the Cutch Agency, with Headquarters at Bhuj. The Cutch Agency and the appointment of the Political Agent have since been abolished and the State of Cutch is in direct relations with the Hon'ble the Agent to the Governor-General in the States of Western India.

Sabar Kantha Agency—As stated above, this is a new group comprising the States and Estates in the old Banas Kantha Agency and States and Estates in the old Mahi Kantha Agency except the Danta State. Before the year 1925, the Banas Kantha Agency was known as the Palanpur Agency when it also comprised the First Class States of Palanpur and Radhanpur. Of these two States, Palanpur is now in direct political relationship with the Government of India through the Honourable the Agent to the Governor-General in Rajputana and Radhanpur, through the Honourable the Agent to the Governor-General in the States of Western India. The First Class State of Idar which was included in the old Mahi Kantha Agency is also in direct political relationship with the Government of India through the Honourable the Agent to the Governor-General in the States of Western India; so also the full powered State of Vjayanagar. The group comprising the remaining minor States, Estates and Talukas which were included in the old Banas Kantha Agency under the Western India States Agency and the old Mahi Kantha Agency under the Government of Bombay has been named the Sabar Kantha Agency and is in charge of a Political Agent who is subordinate to the Honourable the Agent to the Governor-General in the States of Western India.

Bhavnagar—This State lies at the head and west side of the Gulf of Cambay. The Gohel Rajputs, to which tribe the Ruler of Bhavnagar belongs, are said to have settled in the country about the year 1280, under Sajakji from whose three sons—Ranoji, Sarangji and Shahji—are descended respectively the rulers of Bhavnagar, Lathi and Palitana. An intimate connexion was formed between the Bombay Government and Bhavnagar in the eighteenth century when the ruler of that State took pains to destroy the pirates which infested the neighbouring seas. The State was split up when Gujarat and Kathiawar were divided between the Peshwa and the Gackwar; but the various claims over Bhavnagar were consolidated in the hands of

the British Government in 1807. The State pays an annual tribute of Rs. 1,28,060 to the British Government, Rs. 3,581-8-0 as Peshkashi to Baroda, and Rs. 22,858 as Zortali to Junagadh. His Highness Maharaja Kishna Kumar-sinhji succeeded to the *gad* on the death of his father, Maharaja Sir Bhavsinhji K.C.S.I., on 17th July 1919, and was invested with full powers on 18th April 1931. The State Council consists of Sir Prabhashankar D. Pattani, K.C.I.E., as President. The other members of the Council are Dewan Bahadur T. K. Trivedi and Khan Bahadur S. A. Goghawala, M.A., LL.B., Bar-at-Law. One noteworthy feature in the administration is the complete separation of judicial from executive functions and the decentralisation of authority is another. The authority and powers of all the Heads of Departments have been clearly defined, and each within his own sphere is independent of the others being directly responsible to the Council.

The chief products of the State are grain, cotton, sugar-cane and salt. The chief manufactures are oil, copper and brass vessels and cloth. The Bhavnagar State Railway is 307 miles in length. The capital of the State is the town and port of Bhavnagar, which has a good and safe harbour for shipping and carried on an extensive trade as one of the principal markets and harbours of export for cotton in Kathiawar. Bhavnagar supports 270 State Lancers and 250 State Infantry.

Population (in 1931) was 500,274 of whom 86 per cent were Hindus and 8 per cent. Mahomedans. The average income for the last five years was Rs. 16,662,785, and the average expenditure Rs. 13,417,672.

Dhrangadhra State is a State of the First Class in Kathiawar with a population of nearly one lakh and an area of 1,167 square miles exclusive of the Dhrangadhra portion of the Runn of Cutch. The ruler of Dhrangadhra is the head of the Jhala family of Rajputs, originally called the Makvanas. This Rajput clan is of great antiquity having migrated to Kathiawar from the North, establishing itself first at Patri in the Ahmedabad District, thence moving to Halvad and finally settling in its present seat. Being the guardians of the North-Eastern marches of Kathiawar they had to suffer repeatedly from the successive inroads of the Mahomedans into that Peninsula, but after suffering the various vicissitudes of war they were confirmed in their possession of Halvad, its surrounding territories and the salt-pans attached thereto by an Imperial Firman issued by Emperor Aurangzeb. The States of Wankaner, Limbdi, Wadhwan, Chuda, Sayla and Than-Lakhtar are offshoots from Dhrangadhra. His Highness Maharaja Maharana Shri Sir Ghanshyamsinhji, K.C.I.E., K.C.S.I., Maharaja Raj Saheb, is the ruler of the State and the titular head of all the Jhalas. The administration is conducted under the Maharaja's directions by a Council of four members, Financial, Political, Revenue and Military. The soil being eminently fit for cotton cultivation, the principal crops are long stapled cotton and cereals of various kinds. Excellent building and ornamental stone is quarried from the hills situated within the State. Wadagara Salt of an excellent quality with Magnesium Chloride and other bye-

products of salt are also manufactured in the State Salt Works at Kuda which offer practically inexhaustible supplies for their manufacture. To utilize these valuable resources, the State built a huge factory in Dhrangadhra, known as the Shri Shakti Alkali Works, for the manufacture on a large scale of Soda Ash, Caustic Soda and Soda Bicarb as bye-products of salt. The capital town is Dhrangadhra, a fortified town, 75 miles west of Ahmedabad.

Dhrangadhra State owns the Railway from Wadhwan Junction to Halvad, a distance of 40 miles, which is worked by the B. & C. I. Railway. An extension of this line to Mahiya is under contemplation. A railway siding has been laid from Dhrangadhra to Kuda—a distance of 11 miles—to facilitate the salt traffic.

Gondal State.—The Ruling Prince of Gondal is a Rajput of the Jadeja stock with the title of H. H. Maharaja Thakore Saheb, the present Ruler being H. H. Shri Bhagwat Sinhji, K.C.I.E. The early founder of the State Kumbhoji I., had a modest estate of 20 villages. Kumbhoji II., the most powerful Chief of the House, widened the territories to almost their present limits by conquest; but it was left to the present ruler to develop its resources to the utmost, and in the words of Lord Reay, Governor of Bombay, by its "importance and advanced administration to get it recognised as a First Class State." The State pays a tribute of Rs. 1,10,721. The chief products are cotton, groundnuts and grain and the chief manufactures are cotton and woollen fabrics and gold embroidery. Gondal has always been pre-eminent amongst the States of its class for the vigour with which public works have been prosecuted, and was one of the earliest pioneers of railway enterprise in Kathiawar, having initiated the Dhasa-Dhoraji line, it owns the Dhasa-Jam Jodhpur section called the Gondal Railway and manages it along with the Jetalsar-Rajkot Railway in partnership with other Native States in Kathiawar. There are no export and import dues, the people being free from taxes and dues. Comparatively speaking Gondal stands first in Kathiawar in respect of the spread of education. Compulsory female education in the State has been ordered by His Highness. Rs. 25 lakhs have been spent on irrigation tanks and canals, water supply and electricity to the town of Gondal. The capital is Gondal, a fortified town on the line between Rajkot and Jetalsar.

Junagadh State.—A first class State under the Western India States Agency and lies in the South-Western portion of the Kathiawar Peninsula between 24°-44' and 21°-53' North latitude; 80° and 72° East longitude with the Halar division of the province as its northern boundary and Gohilwad Prant to its east. It is bounded on the south and west by the Arabian Sea. The State is divided into 12 Mahals. It has 16 ports of which the principal are Veraval, Mangrol, and Nawabandar. The principal rivers in the State are the Bhadar, Uben, Ozat, Hiran, Saraswati, Machhundri, Singadra, Meghal, Vrajmi, Raval and Sabli. The principal town of Junagadh, which is one of the most picturesque towns in India, is situated on the slope of the Girnar and

the Datar Hills, while in antiquity and historical interest it yields to none. The Upperkote or old citadel contains interesting Buddhist caves and the whole of the ditch and neighbourhood is honey-combed with caves of their remains. There are a number of fine modern buildings in the town. The famous Asoka inscription of the Buddhist time carved out on a big bolster of black granite stone is housed at the foot of the Girnar Hill, which is sacred to the Jains, the Shivalites, the Vaishnavites and other Hindus. To the south-east of the Girnar Hill lies the extensive forest of the Gir comprising 494 square miles, 823 acres and 10 gunthas. It supplies timber and other natural products to the residents of the State and the neighbouring districts and is unique as the sole stronghold of the Indian lion. The area of the State is 3,337 square miles and the average revenue amounts to about Rs. 84,00,000. The total population according to the census of 1931 is 545,152. Until 1472 when it was conquered by Sultan Mahomed Begra of Ahmedabad Junagadh was a Rajput State ruled by Chiefs of the Chuda Sama tribe. During the reign of the Emperor Akbar it became a dependency of Delhi under the immediate authority of the Moghal Viceroy of Gujarat. About 1735 when the representative of the Moghals had lost his authority in Gujarat, Sherkhan Bahl, the ancestor of the present Bahl Ruler, expelled the Moghal Governor, and established his own rule. The ruler of Junagadh first entered into engagements with the British Government in 1807. The principal articles of production in the State are cotton, bajri, juwar, sesamum, wheat, rice, sugar-cane, cereals, grass, timber, stone, castor-seed, fish, country tobacco, groundnuts, coconuts, bamboos, etc., while those of manufacture are ghee, molasses, sugarcandy, copper, and brassware, dyed cloth, gold and silver embroidery, pottery, hardware, leather, bamboo furniture, etc. The State pays a tribute of Rs. 28,394 annually to the Paramount Power and Peshkashi of Rs. 37,210 to His Highness the Gaekwar, on the other hand, the State of Junagadh receives a tribute styled Zortalbi amounting to Rs. 92,421 from not less than 134 States and Talukas, a relic of the days of Mahomedan supremacy. The State maintains State forces consisting of Lancers and the Mahabat Khanji Infantry, the sanctioned strength of the former being 173 and of the latter 219 inclusive of Bag-pipe Band.

The present Nawab is His Highness Sir Mahabat Khan III, G.C.I.E., K.C.S.I., who is the ninth in succession and seventh in descent from His Highness Bahadurkhanji I, the founder of the Bahl-Family of Junagadh in 1735 A.D. His Highness the Nawab Saheb was born on 2nd August 1900 and succeeded to the *gadi* in 1911.

Ruler.—His Highness Sir Mahabat Khanji Rasulkhanji, G.C.I.E., K.C.S.I.

Heir-Apparent.—Shahzada Mahomed Dilawarkhanji, 2nd Shahzada Mahomed Himatkhanji.

President of the Council.—J. Monteath.

Navanagar State, on the southern shore of the Gulf of Cutch, has an area of 3,791 square miles. The Maharaja of Navanagar is a Jadeja Rajput by caste, and belongs to the same

family as the Rao of Cutch. The Jadejas originally entered Kathiawar from Cutch, and dispossessed the ancient family of Jethwas then established at Ghumli. The town of Jamnagar was founded in 1540. The present Jam Saheb is Captain His Highness Maharaja Jam Shri Digvijayashinji Saheb, K.C.S.I., who succeeded in April 1933. The principal products are grain, cotton and oil-seeds, shipped from the ports of the State. A small pearl fishery lies off the coast. The State pays a tribute of Rs. 1,20,093 per annum jointly to the British Government, the Gaekwar of Baroda and Zortalbi to the Nawab of Junagadh. The State maintains two squadrons of Nawanager State Lancers and 1½ company, of the State Infantry. The capital is Jamnagar, a flourishing place, nearly 4 miles in circuit, situated 5 miles east of the port of Bedi. Population 4,09,192. Revenue nearly Rs. 94 lakhs.

Dewan.—Khan Bahadur Merwanji Pestonji, B.A., L.L.B.

Revenue Secretary.—Gokulbhai B. Desai, Bar-at-Law.

Military Secretary and Home Member.—Lt.-Col. R. K. Himmatsinhji.

Cutch.—The State is bounded on the north and north-west by Sind, on the east by the Palanpur Agency, on the south by the Peninsula of Kathiawar and the Gulf of Cutch and the south-west by the Indian Ocean. Its area, exclusive of the great salt marsh called the Rann of Cutch, is 8,249 square miles. The capital is Bhuj, where the ruling Chief (the Maharao) His Highness Maha Rao Sri Khengarji Savai Bahadur, G.C.S.I., G.C.I.E., resides. From its isolated position, the special characteristic of its people, their peculiar dialect, and their strong feeling of personal loyalty to their ruler, the peninsula of Cutch has more of the elements of a distinct nationality than any other of the dependencies of Bombay. The earliest historic notices of the State occur in the Greek writers. Its modern history dates from its conquest by the Sind tribe of Samma Rajputs in the fourteenth century. The section of the Sammas forming the ruling family in Cutch were known as the Jadejas or 'children of Jada'. The British made a treaty with the State in 1815. There is a fair proportion of good arable soil in Cutch, and wheat, barley and cotton are cultivated. Both iron and coal are found but are not worked. Cutch is noted for its beautiful embroidery and silverwork and its manufactures of silk and cotton are of some importance. Trade is chiefly carried by sea. The ruling chief is the supreme authority. A few of the Bhayats are invested with jurisdictional powers in varying degrees in their own estates and over their own ryots. A notable fact in connection with the administration of the Cutch State is the number and position of the Bhayats. These are Rajput nobles forming the brotherhood of the Rao. They were granted a share in the territories of the ruling chief as provision for their maintenance and are bound to furnish troops on an emergency. The number of these chiefs is 137, and the total number of the Jadeja tribe in Cutch is about 16,000. The British military force having been withdrawn from Bhuj, the

State now pays Rs 82,257 annually as an Anjar equivalent to the British Government. The military force consists of about 1,000 in addition to which, there are some irregular infantry, and the Bhayats could furnish on requisition a mixed force of four thousand.

Porbandar—The Porbandar State on the Western Coast of the province of Kathiawar comprises an area of 642½ square miles and has a population of 1,15,741 souls according to the Census of 1931. The capital of the State is Porbandar, a flourishing port having trade connections with Java, Burma, Persian Gulf, Africa and the important Continental Ports. The State has its own Railway. The well-known Porbandar stone is quarried in the Barda Hills near Adityana and is largely exported to important places in as well as outside India. Porbandar Ghee (butter) has also a reputation of its own and is largely exported to Africa. The Indian Cement Factory of Messrs. Tata & Sons was established at Porbandar in 1912. It manufactures Ganapati Brand Portland cement which has stood keen competition. Among more recent industries may be mentioned the establishment of the Nadiar Salt Works, the Maharana Spinning and Weaving Mill, Distemper and Paints manufacture and Glass Works. The State maintains a Military Force.

His Highness Maharaja Rana Sahab Shri Sir Natwarsingh Bahadur, K.C.S.I., is the present Ruler of the State. Born on the 30th June 1901, His Highness ascended the gadi on the 26th January 1920 and married Kunvari Shri Rupalita Sahab, M.B.E., of Limbdi.

Radhanpur is a first class State, with an area of 1,150 square miles, which is held by a branch of the illustrious Babi family, who since the reign of Humayun have always been prominent in the annals of Gujarat. The present Ruler is His Highness Nawab Jalal-ud-Inkhanji Hussinlahkhanji Babi, Nawab Sahab of Radhanpur. The State maintains a Police force of 209. The principal products are cotton, wheat and grain. The capital is Radhanpur town, a considerable trade centre for Northern Gujarat and Cutch. Sami has a cotton press and 3 ginning factories. There is one ginning factory at Munjpur, one at Lolade and one at Sankeshwar, which is a great centre of Jain pilgrimage all the year round. Gotarka, Dev and Trakod Loti are also the principal places of pilgrimage for Mahomedans, Vaisnavas and Jains, respectively.

There are several ancient monuments in the State, viz., Fatehkote at Radhanpur, Jhalore's Paba at Subapure, Loteshvara Mahadev at Loti, Sankeshvara temple at Sankeshvara, Waghel tank at Waghel, Varanatha place at Waghel, Tuleshwar Mahadev at Fatehpur, Rajaypura

Bhotava, Old Masjid at Munjpur, Place of Ashan at Gotarka, Mahabali Pir's Dargah at Gotarka and Nilkantha Mahadev at Kunwar.

There is also an Anath Ashram for the poor known as "The Husseinbakite Saheba Mohabat Vilas."

His Highness the Nawab Sahab Bahadur has established a Bank named "Vadhlar Bank" to lend money to cultivators and others on easy terms, and thus save them from the clutches of the money-lenders.

Idar—Idar is a First Class State with an area of 1,669 square miles and an average revenue of about 20 lakhs. The present Ruler of Idar H. H. Maharaja Shri Himmat Singhji is a Rajput of the Rathod clan. He was born in 1899 A.D. and ascended the gadi in 1931 on the demise of His late Highness Maharaja Sir Dowlat Singhji. His Highness accompanied His late Highness Lt.-Col. Sir Dowlat Singhji to Europe when the latter went to attend the Coronation of His Majesty the King-Emperor in London and acted as Page to his Imperial Majesty at the Coronation Darbar held at Delhi in 1911. The subordinate Feudatory Jagirdars are divided into three classes. The Jagirdars comprised in the class of Bhayats are cadets of the Ruling House to whom grants have been made in maintenance or as a Jiwarak. Those known as Sardar Pattawats are descendants of the military leaders who accompanied Anand Singhji and Rai Singhji, the founder of the present Marwar dynasty when they took possession of the State in the first quarter of the eighteenth century and to whom grants of land were made by Maharaja Shiv Singhji in 1741 A.D. on condition of military service. In the case of the Bhoomias are included all subordinate Feudatories who were in possession of their Pattas prior to the advent of the present Marwar dynasty. The pattas they hold were acquired by their ancestors by grant from the former Rao Rulers of the State. The Maharaja receives Rs 52,427 annually on account of Khichdi and other Raj Hake from his subordinate Sardars the tributary talukas of the Mahi Kantha Agency and others and pays Rs. 30,340 as Ghasdana to Gaekwar of Baroda through the British Government.

Vijaynagar.—The State has an area of 135 square miles with a population of 5,858 and an annual revenue of about Rs. 57,630. The Ruler is Rathod Rajput. His ancestors were the Rulers of Idar but on being driven from that place established their rule in Polo. The present Chief is Rao Shri Hamnirsinghji Hindusinhji. He was born on 3rd January 1904 and succeeded to the gadi in 1916. The Ruler has no salute but on account of the historic importance of the family he enjoyed rank above the Ruler of the salute State of Danta in the old Mahi Kantha Agency.

GUJARAT STATES AGENCY AND BARODA RESIDENCY.

Consequent upon the establishment of direct relations between the Government of India and the Bombay States since April 1933 many States and Estates which were previously included in the various Political Agencies of the Bombay Government have now been included in a newly

formed Political Agency of the Government of India designated the Gujarat States Agency. The charge of this new Agency has been added to the charge of the Resident at Baroda, who is now known as the A.G.G. for the Gujarat States and Resident at Baroda. The Political

Agencies thus amalgamated were the Rewa Kantha Agency, the Kaira Agency, the Surat Agency, the Nask Agency and the Thana Agency.

The following are the full-powered salute States now in direct political relations with the Government of India through the Agent to the Governor-General for the Gujarat States and Resident at Baroda:—

- (1) Balasinor .. (Old Rewa Kantha Agency)
- (2) Bansda .. (Old Surat Agency)
- (3) Baria .. (Old Rewa Kantha Agency)
- (4) Baroda
- (5) Cambay .. (Old Kaira Agency)
- (6) Chhotā Udepur (Old Rewa Kantha Agency)
- (7) Dharampur (Old Surat Agency)
- (8) Jawhar .. (Old Thana Agency)
- (9) Lunawada .. (Old Rewa Kantha Agency)
- (10) Rajpipla .. (Old Rewa Kantha Agency)
- (11) Sachin .. (Old Surat Agency)
- (12) Sant .. (Old Rewa Kantha Agency)

The Headquarters of the Agency are at Baroda and consist of—

Agent to the Governor-General, Gujarat States, and Resident at Baroda—Lieutenant-Colonel J. L. R. Weir, C.I.E.

Secretary to the Agent to the Governor-General, Gujarat States and Resident at Baroda—Major G. A. Falconer.

Indian Assistant to the Agent to the Governor-General, Gujarat States and Resident at Baroda—Mr. A. W. De Cruz.

Balasinor.—This State has an area of 189 square miles, a population of 52,525, and an annual revenue of about Rs 24 lakhs. The Ruling Prince belongs to the Bala family. The State pays a tribute of Rs 3,766-9-8 to the British Government and Rs 3,077-11-1 to the Baroda Government. The name of the present Ruler is Babu sirji Jamnathkhanji Manvar-khanji, Nawab of Balasinor. He was born on the 10th November 1894 and succeeded to the gadi in 1899. The Ruler of the State received in 1890 a Sanad guaranteeing succession according to Muhammadan Law in the event of failure of direct heirs. The Nawab is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Bansda.—This State has an area of 215 square miles, a population of 48,807 and an annual revenue of about Rs 7½ lakhs. The Ruler of Bansda are Solanki Rajputs of the Lunar Race and descendants of the Great Sidhraj Jaysinhji. The present Ruler Maharawal Shri Indrasinhji was born on 16th February 1888, and succeeded to the gadi in September 1911. The Ruler of the State has received a Sanad guaranteeing succession to an adopted heir in the event of failure of direct heirs. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Baria.—This State has an area of 813 square miles with a population of 159,429 and is situated in the heart of the Panchmahals District. The capital Deygad Baria is reached by the Baria State Railway from Piprod Station on the B. & C. I. Railway at a distance of 10 miles. The average revenue of the State is about 12 lakhs. The Ruler, Major His Highness Maharawal Shri Sir Ranjitsinhji, K.C.S.I., is the direct descendant of the Great House of Khichi Chowhan Rajputs who ruled over Gujarat for 244 years with their

capital at Champaner, enjoying the proud title of Pavapatis. The State pays no tribute either to the British Government or to any other Indian State. His Highness served in France and Flanders in the Great European War and in the Afghan War, 1919. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns and a personal salute of eleven guns.

Cambay.—This State has an area of 350 square miles, a population of 87,761 and an annual revenue of about Rs 10½ lakhs. The founder of the Ruling family was Mirza Jafar Najamud-Daulah Nommkhan I, the last but one of the Muhammadan Governors of Gujarat. The present Ruler is His Highness Mirza Hussain Yavar Khan Saheb. He was born on the 16th May 1911, succeeded to the gadi on the 21st January 1915 and was invested with ruling powers on the 13th December 1930. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 11 guns.

Chhotā Udepur.—This State has an area of 890 square miles, a population of 1,44,640 and an annual revenue of about Rs 14½ lakhs. The Ruling family belongs to the Khichi Chavan Rajput clan and claims descent from the last Patni Raja of Pawagadh or Champaner, the State being founded shortly after the fall of that fortress in 1484. The name of the present Ruler is Maharawal Shri Natwarisinhji. He was born on the 16th November 1906 and succeeded to the gadi on the 29th August 1923 on the death of his father. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Dharampur.—This State has an area of 704 square miles, a population of 1,12,051 and an annual revenue of about Rs 12 lakhs. The Rulers of Dharampur trace their descent from Itamchandraj of Hindu Mythology. They belong to the Solar Sisodia Rajputs dynasty. The present Raja, His Highness Maharaja Shri Vijaydevji Mohandevji, was born on the 3rd December 1884 and succeeded to the gadi on the 26th March 1921. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns and a personal salute of 11 guns.

Jawhar.—This State is situated to the North of the Thana District of the Bombay Presidency on a plateau above the Konkan plain. It has an area of 310 square miles, a population of 57,288 and an average annual revenue of about Rs. 5½ lakhs. Up to the period of the first Mahomedan invasion of the Deccan, Jawhar was held by a Varli, not a Koli Chief. The first Koli Chief obtained his footing in Jawhar by a device similar to that of Dido when he asked for and received as much land as the hide of a bull would cover. The Koli Chief cut a hide into strips, and thus enclosed the territory of the State. The present Chief, Raja Patangsha alias Yeshwantrao Vikramsha, is a minor and the State is at present under minority administration. The Raja is entitled to become a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Lunawada.—The State has an area of 388 square miles, a population of 95,162 and an annual revenue of about Rs 5½ lakhs. The Rulers of Lunawada belong to the historic Solanki clan of Rajputs claiming their descent from the famous Sidhraj Jaysinh of Anhilwad

The following are the particulars of the remaining States grouped in this Agency :—

State.	Name of Chief.	Area.	Population.	Revenue	Tribute to British Government.
				Rs.	Rs.
Akalkot ..	Meherban Shrimant Vijay-sinhrao Fatesinhrao Raje Bhonsle Raje Saheb of.	498	92,605	6,36,000	14,592
Aundh ..	Shrimant Bhavanrao Shrivastava <i>alias</i> Balasaheb Pant Pratinidhi.	501	76,507	4,44,000	No tribute
Jamkhandi .	Raja Shrimant Shankarrao Parshuramrao <i>alias</i> Appasaheb Patwardhan.	524	1,14,282	8,27,000	20,841
Jath . ..	Sub-Lt Shrimant Vijayasinhrao Raomrao <i>alias</i> Babasaheb Dafe	980 8	91,102	3,42,000	11,247
Kurundwad (Senior).	Shrimant Chintaman Rao Bhalchandra Rao <i>alias</i> Balasaheb Patwardhan.	182 5	44,254	2,57,000	9,619
Kurundwad (Junior).	(1) Shrimant Ganpat Rao Madhavrao <i>alias</i> Bapusaheb Patwardhan (2) Shrimant Ganpat Rao Trimbakrao <i>alias</i> Tatyasaheb Patwardhan.	116 02	39,583	2,50,000	No tribute
Miraj (Senior)	Shrimant Shri Gangadhar Rao Ganesh <i>alias</i> Balasaheb Patwardhan, K.C.I.E.	342	93,957	5,27,000	12,568
Miraj (Junior).	Shrimant Madhavrao Harihar <i>alias</i> Babasaheb Patwardhan.	196½	40,686	3,23,000	6,413
Phaltan .	Captain Shrimant Malojirao Mudhojirao Naik Nimbalkar.	397	58,761	4,49,000	9,600
Ramdurg ..	Shrimant Ramrao Venkatarao <i>alias</i> Raosaheb Bhawe.	169	35,401	2,49,000	No tribute.
Savanur ..	Major Nawab Abdul Majidkhan Saheb Dilair Jung Bahadur.	70	20,320	2,35,000	Do.
Wadi Estate.	Meherban Ganpatrao Gangadhar Rao <i>alias</i> Dajusaheb Patwardhan Jahagirdar.	12	1,704	8,000	Do.

UNDER THE GOVERNMENT OF BENGAL.

Cooch Behar.—This State, which at one time comprised almost the whole of Northern Bengal, Assam and a part of Bhutan known as the Duars and formed part of the famous kingdom of Kamrup, is a low-lying plain in North Bengal. It has an area of 1,318 square miles and a population of 5,90,866. On the demise of the late ruler His Highness Maharaja Sir Jitendra Narayan Bhup Bahadur, K.C.S.I. in December

1922 in England, his eldest son His Highness Jagaddipendra Narayan Bhup Bahadur (*born* on December 15, 1915) succeeded to the *qadi* at the age of 7 His Highness the Maharaja Bhup Bahadur belongs to the Kshatriya Varna of Kshatriya origin His Highness the Maharaja Bhup Bahadur has three sisters Maharajkumaris Ila Devi, Gayatri Devi and Menaka Devi and one brother Maharaj-

kumar Indrajitendra Narayan Her Highness the Maharani Sahiba is Regent of the State and the administration of the State is conducted by a Council of Regency composed of Her Highness the Regent, *President*, Lt.-Col. J. A. Brett, C.I.E., *Vice-President*, with (vacant) Revenue Officer, S.J. Umanath Dutt, B.L., Civil and Sessions Judge, and S.J. Dineshananda Chakraverty, Civil Surgeon, as members.

The capital is Cooch Behar, which is reached by the Cooch Behar Railway, linked to the Eastern Bengal Railway System.

Tripura—This State lies to the east of the district of Tippera and consists largely of hills covered with dense jungles. It has an area of 4,116 square miles and a population of 382,450. The revenue from the State is about 20 lakhs and from the Zemindaries in British India is about 13 lakhs. The State enjoys a Salute of 13 guns. The present Ruler is His Highness Maharaja Manikya Bir Bikram Kishore Deb Barman Bahadur, who is a Kshatriya by caste and comes of the Lunar race. He was born on 10th August 1908 and he is entitled to a salute of 13 guns. He succeeded the late Maharaja Manikya Birendra Kishore Deb Barman Bahadur on 13th August 1923. The Military prestige of Tripura dates back to the fifteenth century and a mythical account of the State takes the history to an even earlier date. Both as regards its constitution and its relations with the British Government, the State differs alike from the large Native

States of India, and from those which are classed as tributary. Besides being the Ruler of Tripura, the Maharaja also holds a large landed property situated in the plains of the Districts of Tippera, Noakhali and Sylhet. This estate covers an area of 600 square miles, and is held to form with the State an indivisible Raj. Disputes as to the right of succession have occurred on the occasion of almost every vacancy in the *gadi* producing in times gone by disturbances and domestic wars, and exposing the inhabitants to serious disorders and attacks from the Kukis, who were always called in as auxiliaries by one or other of the contending parties. The principles which govern succession to the State have recently, however, been embodied in a *sanad* which was drawn up in 1904. The chief products of the State are rice, cotton, til, jute, tea and forest produce of various kinds, the traffic being carried chiefly by water. The Maharaja received full administrative powers on 19th August 1927. His Highness married the sixth daughter of the late Maharaja Sir Bhagabati Prasad Singh Sahab Bahadur, K.C.I.E., K.B.E. of Balarampur (Oudh) on the 16th January 1929 but on her death in November, 1930, married the eldest daughter of H. H. Maharaja Mahendra Sir Yadvendia Singh Bahadur, K.C.I.E., Maharaja of Panna. The State courts are authorised to inflict capital punishment. The capital is Agartala.

Political Agent—Magistrate and Collector of Tippera (*Ex-officio*.)

EASTERN STATES AGENCY.

With effect from the 1st April 1933 the States of Bihar and Orissa and the States of the Central Provinces were transferred from the political control of the Governor in Council of Bihar and Orissa and the Governor in Council of the Central Provinces respectively, except the Makrai State which has been included in the Bhopal Political Agency in Central India, and placed in the political charge of an Agent to the Governor General, Eastern States. The States of Bamra, Bastar, Band, Dhenkanal, Ganjpur, Jashpur, Kalahandi (Karond), Kanker, Keonjhar, Koran, Mayurbhanj, Nandgaon, Nayagarh, Patna, Bugarh, Suranagar, Setakela, Sonpur and Surguja are in the direct Political charge of the Agent to the Governor General at Ranchi while the States of Athgarh, Ahmullik, Baramba, Bonai, Chingbhakar, Chikhaladan, Daspatha, Hindol, Kawardha, Khandpala, Kharasawan, Narsinghpur, Nilgiri, Pal Lahara, Raikhol, Ranpur, Sakti, Talcher, Tigra and Udaypur are in the political charge of the Secretary to the Agent to the Governor General, Eastern States, and Political Agent at Sambalpur.

The total area is 59,680 square miles and the total population 1,38,67,259. The annual income is Rs. 71,19,705. These States pay a tribute amounting to Rs. 3,35,549 to Government.

Mayurbhanj is the only full-powered State in the Eastern States Agency, and its Ruler the only permanent member of the Chamber of Princes from the Agency. Archaeological finds

and copper-plate grants that have come to light within the State area as also outside, have established that the ancient Bhanja Kingdom included almost all the States of Orissa together with the northern portion of the Ganjam District covering about 16,000 square miles. Though the origin of the kingdom is lost in hoary antiquity, tradition recorded by Hunter places it more than two thousand years ago. Bhanja Kings ruled over their extensive territory from Khijinga-Kotta, modern Khiching, whose ancient remains bear eloquent testimony to the eminence and culture of the then Rulers which found expression in diverse forms of art of a very high order styled Mayurbhanj School of Art by Rene Grousset and art critics of acknowledged authority. During the Moghul period, Mayurbhanj was recognised by the Emperors as an autonomous principality, and it had under it "twelve Zemindaries containing fifty-two Killahs." In the days of Marhatta supremacy in Orissa, the Rulers of Mayurbhanj maintained their independence. They were often, though not at war with the Marhathas who attempted to levy a precarious tribute by force of arms. In 1761, the East India Company took possession of Midnapore and almost immediately afterwards the Ruler of Mayurbhanj opened friendly negotiations with the British authorities. During half a century preceding British conquest of Orissa, the British authorities maintained their friendship with Mayurbhanj and these friendly relations were utilised by the Marquis of Wellesley during the Orissa campaign in 1803. A treaty was concluded between the East India

Company and Mayurbhanj State in 1829. When the Indian Mutiny broke out, Mayurbhanj was found loyally espousing the British cause. During the last great War, the State made large contributions in men and money.

Keonjhar is an off-shoot of Mayurbhanj, being held by a junior branch of the Ruling family which separated from the parent State several centuries ago.

Kharsawan and Seraikela—The inhabitants are mostly hill-men of Kolarian or Dravidian origin. The Chief of Kharsawan belongs to a junior branch of the Porahat Raja's family. The State first came under the notice of the British in 1793, when in consequence of disturbances on the frontier of the old Jungle Mahals the Thakur of Kharsawan and the Kunwar of Seraikela were compelled to enter into certain agreements relating to the treatment of fugitive rebels. The Chief is bound, when called upon, to render service to the British Government, but he has never had to pay tribute. The Bengal Nagpur Railway runs through a part of the State. The adjoining State of Seraikela is held by the elder branch of the Porahat Raja's family.

The States of Athgarh, Athmallik, Bamra, Baramba, Baud, Bonal, Daspalla, Dhenkanal, Ganpur, Hindol, Kalakhandi, Khandpara, Narsinghpur, Navagarh, Nilgiri, Pal-Lahara, Patna, Rairakho, Ranpur, Sonpur, Talcher, and Tigiria have no connected or authentic history. They were first inhabited by aboriginal races who were divided into innumerable communal or tribal groups each under its own Chief or headman. These carried on incessant warfare with their neighbours on the one hand and with the wild beasts of the forests on the other. In course of time their hill retreats were penetrated by Aryan adventurers who gradually overthrew the tribal Chiefs and established themselves in their place. Tradition relates how these daring interlopers, most of whom were Rajputs from the north, came to Puri on a pilgrimage and remained behind to found kingdoms and dynasties. The Chiefs of Baud and Daspalla are said to be descended from the same stock as Mayurbhanj, and a Rajput origin is also claimed by the Rajas of Athmallik, Narsinghpur, Pal-Lahara, Talcher and Tigiria. Navagarh, it is alleged, was founded by a Rajput from Rewah, and a scion of the same family was the ancestor of the present house of Khandpara. On the other hand, the Chiefs of a few States such as Athgarh, Baramba, and Dhenkanal owe their origin to favourites or distinguished servants of the Ruling sovereigns of Orissa. The State of Ranpur is believed to be the most ancient, the list of its Chiefs covering a period of over 3,600 years. It is noteworthy that this family is of Khono origin and furnishes the only known instance in which, amid many vicissitudes, the supremacy of the original settlers has remained intact. The States acknowledged the suzerainty of the paramount power and were under an implied obligation to render assistance in resisting invaders; but in other respect neither the ancient kings of Orissa nor their successors, the Moghuls and Mahrattas, ever interfered with their internal administration. All the States have annals of the dynasties that have ruled over them; but

they are made up for the most part of legend and fiction and long genealogical tables of doubtful accuracy, and contain very few features of general interest. The British conquest of Orissa from the Mahrattas which took place in 1803, was immediately followed by the submission of ten of the tributary States the Chiefs of which were the first to enter into treaty engagements.

The States have formed the subject of frequent legislation of a special character. They were taken over from the Mahrattas in 1803 with the rest of Orissa; but, as they had always been tributary States rather than regular districts of the native Governments, they were exempted from the operation of the general regulation system. This was on the ground of expediency only and it was held that there was nothing in the nature of British relations with the proprietors that would preclude their being brought under the ordinary jurisdiction of the British Courts, if that should ever be found advisable. In 1882 it was held that the States did not form part of British India and this was afterward accepted by the Secretary of State.

The staple crop in these States is rice. The forests in them were at one time among the best timber producing tracts in India, but until lately forest conservancy was practically unknown. The States have formed the subject of frequent legislation of a special character.

The States of Bastar, Changbhakar, Chhukhadan, Jaspur, Kanker, Kawardha, Khairagarh, Korea, Nandgaon, Raigarh, Sakli, Sarangarh, Surguja and Udaipur are scattered round the Chhattisgarh Division in the Central Provinces to the different districts of which the majority of them were formerly attached.

Bastar.—This State is situated in the south-east corner of the Central Provinces. In area (13,602 square miles) it is the twelfth largest State in India and is very scattered and backward. A point of interest is that Bastar is the only State in India of which the late Chief was a Hindu lady. She was the last descendant of an ancient family of Lunar Rajputs, which ruled over Warangal until the Mahomedan conquest of the Deccan in the 14th century A.D. when the brother of the last Raja of Warangal fled into Bastar and established a kingdom there. The Maharani of Bastar died in London in February 1936 and has been succeeded by her minor son, Maharaja Pravir Chandra Bhanu Deo as the Ruler of Bastar. From then till the days of the Mahrattas the State was virtually independent, its inaccessibility securing it from all but occasional raids of Mahomedan freebooters. The Bhonslas of Nagpur imposed a small tribute on Bastar in the 18th century, and at various times for delay in payment deprived it of the Sihawa tract in the Raipur district, and allowed the Raja of Jeypore in the adjacent Vizagapatnam Agency of Madras to retain possession of the Kotapad tract, originally pledged to Jeypore by the Bastar Raja for assistance during family dissensions. The dispute between Bastar and Jeypore over this land led to constant border disturbances, and was not finally settled till 1863, when the Government of India, while recognising Bastar's claim, finally made the tract over to Jeypore on the ground of long possession, on condition of payment by Jeypore of Rs. 3,00

tribute, two-thirds of which was remitted from the tribute payable by Bastar. The present tribute paid by Bastar is Rs 18,000 a year.

On the formation of the Central Provinces Bastar was recognised as a Feudatory State. Since then the State has made steady, if slow, progress, hampered by the innate conservatism of its aboriginal population, which has from time to time rebelled. The last rebellion in 1910 was due to oppression by minor State official and dislike of the rigorous forest policy then under introduction. After the rebellion the Raja had his powers reduced and a series of Diwans were appointed by the Central Provinces Administration. The State has since his death continued to be under Government management.

Nearly 11,000 square miles are covered by forest of which about 3,000 square miles are reserves. Cultivation is therefore sparse. Rice and mustard are the chief crops. There is a large export of grain, timber and minor forest produce, particularly myrobalans. Most of the sal forest is leased for sleeper manufacture. There are more than 600 miles of gravel motorable road in the State. The capital, Jagdalpur, on the Indrawati river is 184 miles, by motorable road, from Raipur in the Central Provinces.

Surguja.—Until 1905 this was included in the Chotanagpur States of Bengal. The most important feature is the Maipat, a magnificent tableland forming the southern barrier of the State. The early history of Surguja is obscure, but according to a local tradition in Palamau the present Ruling family is said to be descended

from an Arksel Raja of Palamau. In 1758 a Marhatta army overran the State and compelled its Chief to acknowledge himself a tributary for the Bhonsla Raja. At the end of the eighteenth century in consequence of the Chief having aided a rebellion in Palamau against the British an expedition entered Surguja and though order was temporarily restored, disputes again broke out between the Chief and his relations, necessitating British interference. Until 1818 the State continued to be the scene of constant lawlessness; but in that year it was ceded to the British Government under the provisional agreement concluded with Mudhoji Bhonsla of Nagpur, and order was soon established. The principal crops are rice and other cereals.

Agent to the Governor-General: Lt.-Col. A. S. Meek, C.M.G.

Secretary, Ranchi: Mr. G. H. Emerson, I.C.S.

Under-Secretary, Ranchi: Mr. Doone.

Secretary, Eastern States Agency and Political Agent, Sambalpur: Lt.-Col. Murphy.

Forest.

Forest Adviser, Eastern States (Sambalpur): Mr. H. F. Mooney, I.F.S.

Education.

Educational Adviser, Eastern States (Sambalpur): Mr. M. C. Pradhan, M.A., B.L.

Boy Scouts.

Honorary Secretary, Boy Scouts Association, Eastern States Agency (Raipur): Rai Sahib P. H. Katana, B.A.

UNDER THE GOVERNMENT OF ASSAM.

Manipur.—The only State of importance, under the Government of Assam, is Manipur which has an area of 8,320 square miles and a population of 4,45,806 (1931 Census), of which about 58 per cent are Hindus and 35 per cent animistic hill tribes. Manipur consists of a great tract of mountainous country, and a valley about 50 miles long and 20 miles wide, which is shut in on every side. The State adopted Hinduism in the early eighteenth century, in the reign of Pameliba or Gharib Nawaz, who subsequently made several invasions into Burma. On the Burmese retreating, Manipur negotiated a treaty of alliance with the British in 1762. The Burmese again invaded Manipur during the first Burmese war, and on the conclusion of peace in 1826 Manipur was declared independent. The chief event in its subsequent history was the intervention of the British in 1891 to establish the claim of Kula Chandra Singh as Maharaja, followed by the treacherous murder of the Chief Commissioner, Mr. Quilton, and the officers with him, and the withdrawal of the escort which accompanied him. From 1891 to 1907 the State was administered by the Political Agent, during the minority of H. H. Sir Chura Chand Singh. The Raja was invested with ruling powers in 1907 and formally installed on the gadi in 1908. For his services during the War the hereditary title of Maharaja was conferred on him. He was made a C.B.E. in

Dec. 1917, and K.C.S.I. in Jan. 1934. He is entitled to a salute of 11 guns.

The administration of the State is now conducted by H. H. the Maharaja, assisted by a Durbar, which consists of a President, who is usually a member of the Indian Civil Service, his services being lent to the State by the Assam Government, three ordinary and three additional members, who are all Manipuris. The staple crop of the country is rice. Forests of various kinds cover the great part of the mountain ranges.

Khasi States.—These petty chiefships, 25 in number, with a total area of about 3,600 square miles and a population of 1,80,000, are included under the Government of Assam. Most of the States have treaties or engagement with the British Government. The two largest are Khyrim and Mylliem and the smallest is Nongliwal, which has a population of only 213. Most of them are ruled by a Chief or Siem. The Siemship usually remains in one family. The succession was originally controlled by a small electoral body constituted from the heads of certain clans but in recent years there has been a tendency to broaden the elective basis. The constitution of a Khasi State has always been of a very democratic character, a Siem exercising but little control over his people.

UNDER THE GOVERNMENT OF THE UNITED PROVINCES.

Three States: Rampur, Tehri and Benares are included under this Government:—

State.	Area Sq. Miles.	Popu-lation. (1931)	Revenue in lakhs of Rupees, approxi-mate.
Rampur	893	4,65,225	49
Tehri (Garhwal)	4,180	3,49,573	19
Benares	870	3,91,272	18

Rampur State.—The State of Rampur was founded by Nawab Sayed Ali Mohammad Khan Bahadur in the middle of the 18th century and his dominions included a considerable portion of what is now known as Rohilkhand. The founder belonged to the famous Sayeds of the Bareilly clans in the Muzaffarnagar district and was a statesman of remarkable ability. He rendered invaluable services to the Moghal Emperor who recognised him as Ruler of Rohilkhand.

Upon his death, his Kingdom underwent many vicissitudes and was considerably reduced in size during the reign of his son Nawab Sayed Faizulla Khan Bahadur. The Province of Rohilkhand had now passed into the hands of the East India Company. Nawab Sayed Faizulla Khan Bahadur was most loyal and true to the British Government to whom he always looked up for help during those unsettled days and he gave tangible proof of his loyalty when during the war against France he offered all his cavalry, 2,000 strong to the British Government in 1878 and received the following message of thanks from the then Governor-General:—

“That in his own name as well as that of the Board, he returned him the warmest thanks for this instance of his faithful attachment to the Company and the English Nation.”

Another opportunity arose for the ruler of Rampur to evince his steadfast loyalty and devotion to the Imperial cause on the outbreak of the Mutiny of 1857. His Highness Nawab Sir Sayed Yusuf Ali Khan Bahadur occupied the Musnad of Rampur in those days. From the very start till peace was re-established in the country, he was lavish in his expenditure of men and money on the side of the British Government, he fought their battles, saved the lives of many Europeans whom he provided with money and other means of comfort and had so much established his reputation as a good administrator that he was placed in charge of the Moradabad district. These signal services were recognised by the Government by the grant of an *Illaq* besides other marks of distinction.

The reign of His Late Highness Nawab Sir Sayed Mohammad Hamid Ali Khan Bahadur stood out unique in many ways. Rampur made great strides in trade and commerce and in fact in every walk of life. He took keen interest in Education and did not only contribute

handsome donations but made annual grants to the various educational institutions. He was no whit behind his compatriot in his loyalty to the British Government. The Great War of 1914 found him foremost in offering his personal services and all the resources of the State—men, money and material—to the British Government. The 1st Rampur Infantry was sent to East Africa and returned home after nearly four years' service and won the favourable remarks of high British Officers. Besides the expenditure involved in this His Highness also participated in the Scheme of the Hospitalship “Loyalty” and contributed one lakh of rupees towards the cost and upkeep of it. His other contributions to the various funds amounted to over half a lakh of rupees and he also subscribed Rs. 7,00,000 to the War Loans. At the time of the Afghan War, 1919, the I. S. Lancers and the Imperial Service Infantry were sent on garrison duty in British India.

The present Ruler Captain His Highness Nawab Sayed Raza Ali Khan Bahadur succeeded his father on 20th June 1930. His Highness was born on 17th November 1906.

The permanent salute of the State is 15 guns and the annual income over fifty lakhs of rupees.

Tehri State (or Tehri-Garhwal).—This State lies entirely in the Himalayas and contains a tangled series of ridges and spurs radiating from a lofty series of peaks on the border of Tibet. The sources of the Ganges and the Jumna are in it. The early history to the State is that of Garhwal District, the two tracts having formerly been ruled by the same dynasty since 688 A. D. Pradyumna Shah, the last Raja of the whole territory, was killed in battle fighting against the Gurkhas; but at the close of the Nepalese War in 1815, his son received from the British the present State of Tehri. During the Mutiny the latter rendered valuable assistance to Government. He died in 1859. The present Raja is Major H. H. Sir Narendra Shah Bahadur, K.C.S.I., who is 59th direct male-lineal descendant from the original founder of the dynasty, Raja Kanak Pal. The principal products are rice and wheat grown on terraces on the hill sides. The State forests are very valuable and there is considerable export of timber. The Raja has full powers within the State. The strength of the State forces is 830. Tehri is the capital but His Highness and the Secretariat Office are at Narendranagar for the greater part of the year, the summer capital being Pratapnagar, 5,000 feet above the sea-level.

Agent to the Governor-General: The Governor of the U. P. of Agra and Oudh.

Benares.—The kingdom of Benares under its Hindu Rulers existed from time immemorial and finds mention in Hindu and Buddhist literature. In the 12th century it was conquered by Shahab-ud-din Ghori and formed a separate province of the Mohammadan Empire. In the 18th century when the powers of Moghal Emperors declined after the death of Aurangzeb, Raja Mansa Ram an enterprising zamindar of Gangapur (Benares district) founded the State

of Benares and obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738. Raja Mansa Ram died in 1740 and his son Balwant Singh became the virtual ruler. During the next 30 years attempts were unsuccessfully made by Sa'idul Jang and after him by Shuja-ud-daula of Oudh to destroy the independence of the Raja and the Fort of Ramnagar was built on the bank of the Ganges opposite the Benares City. Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh. He was expelled by Warren Hastings. Balwant Singh's daughter's son Mahip Narain Singh was placed on the *gadi*. The latter proved an imbecile and there was maladministration which led to an agreement in 1794 by which the lands, held by the Raja in his own right which was granted to him by the British Government, were separated from the rest of the province. The direct control of the latter was assumed by the Government and an annual income of one lakh of rupees was assured to the Raja while the former constituted the Domains. Within the Domains the Raja had revenue powers similar to those of a Collector in a British district. There was thus constituted

what for over a century was known as the Family Domains of the Maharaja of Benares. On the 1st of April, 1911, the major portion of these Domains became a State consisting of the *pergasas* of Bhadohi and Chakia (or Kera Mangraur). The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State. The Maharaja's powers are those of a Ruling Chief, subject to certain conditions, of which the most important are the maintenance of all rights acquired under laws in force prior to the transfer, the reservation to Government of the control of the postal and telegraph systems, of plenary criminal jurisdiction within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with Excise.

The present ruler is Captain H. H. Maharaja Sir Aditya Narain Singh Bahadur, K.C.S.I., who was born in 1874 and succeeded to the State in 1931 and the heir apparent Maharaj Kumar Bibhuti Narain Singh born on November 5, 1927, adopted by His Highness the Maharaja Bahadur shis son and successor on the 24th June, 1934.

PUNJAB STATES.

There are 14 States of the Punjab which since 1921, have been in direct political relation with the Government of India through the Hon'ble

the Agent to the Governor-General, Punjab States, who resides at Lahore.

The following are details.—

Name.	Permanent salute in guns.	Area (Sq. miles.)	Population (1931)	Approximate revenue in lakhs of rupees.
Patiala	17	5,942	1,625,520	145.0
Bahawalpur	17	16,434	984,612	45.5
Khairpur	15	6,050	227,143	15.0
Jind	13	1,299	324,676	24.0
Nabha*	13	947	287,574	25.5

* Under administration.

† Personal salute raised to 13 guns.

‡ Under the Political control of the A. G. G. Punjab States in April 1933.

Bahawalpur.—Bounded on the North-East by the District of Ferozepur; on the East and South by the Rajputana States of Bikaner and Jaisalmer; by the South-West by Sind, on the North-West by the Indus and Sutlej rivers. Area, 16,000 square miles.

This State is about 300 miles in length and about 50 miles wide, is divided lengthwise into three great strips. Of these, the first is a part of the Great Indian Desert; the central track which is as barren as uplands of the Western Punjab; has however been partly rendered capable of cultivation by the network of Sutlej Valley Canals constructed recently; and the third a fertile alluvial tract in the river valley is called the Sind. The State is a partner in the great Sutlej Valley Project.

The ruling family is descended from the Abbasside Khalifas of Baghdad. The tribe originally came from Sind, and assumed independence during the dismemberment of the Durrani Empire in the Treaty of Lahore in 1809. Ranjit Singh was confined to the right bank of the Sutlej.

The first treaty with Bahawalpur was negotiated in 1833, the year after the treaty with Ranjit Singh for regulating traffic on the Indus. It secured the independence of the Nawab within his own territories and opened up the traffic on the Indus and Sutlej. During the first Afghan War the Nawab rendered assistance to the British and was rewarded by a grant of territory and life pension. On his death his heir being minor for a time the administration of the State

was in the hands of the British authorities. The present ruler is Major Dr. His Highness Rukn-ud-Daula Nusrat-ji Jang-Safuddaula Hafiz-ul-Mulk Mukhlis-ud-Daula, Muinuddaula Nawab Sir Sadiq Muhammad Khan Sahib Bahadur Abbasi V., LL.D., G.O.I.E., K.C.S.I., K.C.V.O., who was born in 1904 and succeeded in 1907. During his minority the State was managed by a Council of Regency which ceased to exist in March 1924, when His Highness the Nawab was invested with full power. His Highness is now assisted in the administration of his State by a Prime Minister, Izzat Nishan, Imad-ul-Mulk, Rai Rais-ul-Wozra, Khan Bahadur, Mr. Nabi Buksh Mahomed Husain, M.A., LL.B., C.I.E., K.C.A.O., B.O.C.S., a Public Works and Revenue Minister, Mr. C. A. H. Townsend, C.I.E., a Minister for Law and Justice, Rafi-us-Shan, Itikhar-ul-Mulk, Lt.-Col. Maqbool Hasan Kureshi, M.A., LL.B., C.A.O., C.H.O., a Home Minister, Amin-ul-Mulk, Undat-ul-Umra, Sardar Mohammad Amir Khan, C.H.O., an Army Minister Major General Sahibzada Haji Mohammad Dilawar Khan Abbasi, M.B.E., C.H.O., C.A.O., and a Minister for Commerce, Mehta Udho Das, B.A., L.B.

The chief crops are wheat, rice and millet. The Lahore-Karachi branch of the North Western State Railway passes through the State. The State supports an Imperial Service combined infantry, in addition to other troops. The capital is Bahawalpur, a walled town built in 1718.

Income from all sources over 90 lakhs. Languages spoken Multani or Western Punjabi (Jatki), and Marwari.

Agent to the Governor-General, Punjab States.—The Hon. Lt.-Col. H. Wilbeforce, Bell, C.I.E., K.O.I.E., C.B.E., L.C.S.

Chamba.—This State is enclosed on the west and north by Kashmir, on the east and south by the British districts of Kangra and Gurdaspur, and it is shut in on almost every side by lofty hill ranges. The whole country is mountainous and is a favourite resort of sportsmen. It possesses a remarkable series of copper plate inscriptions from which its chronicle have been compiled.

Founded probably in the sixth century by Marut, a Surajbansi Rajput, who built Brahmapura, the modern Barmara, Chamba was extended by Meru Varma (680) and the town of Chamba built by Sahil Varma about 920. The State maintained its independence, until the Moghal conquest of India.

Under the Moghals it became tributary to the empire, but its internal administration was not interfered with, and it escaped almost unscathed from Sikh aggression. The State first came under British influence in 1846. The part west of the Ravi, was at first handed over to Kashmir, but subsequently the boundaries of the State were fixed as they now stand, and it was declared independent of Kashmir. The present chief is H. H. Raja Ram Singh, who was born in 1890, and succeeded in 1919. The principal crops are rice, maize and millets. There are some valuable forests which were partly leased to Government in 1864 for a term of 99 years, but the management of them has now been retroceded to the Chamba Durbar. The

mountain ranges are rich in minerals which are little worked. The principal road to Chamba town is from Pathankot, the terminus of the Amritsar Pathankot branch of the North-Western Railway. Chamba town, on the right bank of the Ravi, contains a number of interesting temples, of which that of Lakshmi Narayan, dating possibly from the tenth century, is the most famous.

Faridkot.—The Faridkot Rajas are sprung from the same stock as the Phulkian Chiefs having a common ancestor in Bar more remote by twelve generations than the celebrated Phul. The Faridkot House was founded in the middle of the seventeenth century. The present Ruler Farzand-i-Saadat-Nishan Hazrat-i-Ka is a r-i-Hind, Lt. His Highness Raja Hariodar Singh Barabans Bahadur was born on the 29th January 1915, succeeded to the Gaddi in 1918, and was invested with full Ruling Powers in October 1934. His Highness personally administers the State assisted by his younger brother Kanwar Muntindar Singh Bahadur, Military Secretary, and an efficient Cabinet of three other Secretaries headed by Sardar Bahadur Sardar Indar Singh, B.A., Chief Secretary. The State comprises an area of 643 square miles with a population of 1,69,364 souls and has an annual income of 18 lakhs. The Ruler is entitled to a salute of 11 guns and a visit to and return visit from the Viceroy. The State Forces consist of the State Sappers and Household Troops (Cavalry and Infantry). Faridkot, the Capital town, lies on the main Delhi-Bhatinda Lahore Section of the North Western Railway.

Jind.—Jind is one of the three Phulkian States (the other two being Patiala and Nabha). Its area is 1,268 square miles, with a population of 324,676 souls and an income of 25 lakhs.

The history of Jind as a separate State dates from 1763, when Raja Gajpat Singh, the maternal grandfather of Maharaja Ranjit Singh, and great grandson of the famous Phul, established his principality. He was succeeded by Raja Bhag Singh, who greatly assisted Lord Lake in 1805. His grandson Raja Sangat Singh was succeeded by the nearest male collateral Raja Sarup Singh in 1837. In the crisis of 1857 Raja Sarup Singh rendered valuable services to the British and was rewarded with a grant of nearly 600 square miles of land, known as Dadri territory. He was succeeded by his son Maharaja Ragbir Singh, who gave help to the British Government on the occasion of Kuka outbreak (1872) and the 2nd Afghan War (1878). The present ruler Maharaja Ranbir Singh was born in 1879, succeeded in 1887, and invested with full powers in 1899. The State rendered exemplary services in the Great European War. It supplied 8,673 men to the Indian Army and Imperial Service Troops and doubled the strength of its Imperial Service Infantry. The total contribution amounted to nearly 35 lakhs, in gifts of cash, materials, animals and loan.

His Highness enjoys a salute of 15 guns. The capital is Sangrur, which is connected by a State Railway with the North-Western Railway. The principal executive Officer of the State is called Chief Minister.

Ruler.—Colonel His Highness Farzand-i-Dilband Rasikh-ul-Itikad, Daulat-i-Inglishia Raja-i-Rajgan Maharaja Sir Ranbir Singh Rajendra Bahadur, G.O.I.E., K.C.S.I., etc.

Kapurthala.—This State consists of three detached pieces of territory in the great plain of the Jullundur Doab. The ancestors of the ruler of Kapurthala at one time held possessions both in the Cis and Trans-Sutlej and also in the Bari Doab. In the latter lies the village of Ahlu whence the family springs, and from which it takes the name of Ahluwalla. When the Jullundur Doab came under the dominion of the British Government in 1846, the estates north of the Sutlej were maintained in the independent possession of the Kapurthala Ruler, conditional on his paying a commutation in cash for military service engagements by which he had previously been bound to Maharaja Ranjit Singh, of Lahore. This annual tribute of Rs. 1,31,000 a year was remitted by the Government of India in perpetuity in (1924) in recognition of the splendid war record and uniformly efficient administration of the State. The Bari Doab estates are held by the head of the House as a jaghir in perpetuity, the civil and police jurisdiction remaining in the hands of the British authorities. For good services during the Mutiny, the present Maharaja's grandfather was rewarded with a grant of other estates in Oudh, which yield a large annual income equal to those of Kapurthala State. The present Ruler's titles are Col. H. H. Farzand-I-Dilband Rasikhul-Itikad Daulat-I-Inglishia Raja-I-Rajagan Maharaja Jagatjit Singh Bahadur Maharaja of Kapurthala, G.C.S.I. (1911), G.C.I.E. (1918), G.B.E. (1927) who was born on 24th November 1872 and succeeded his father His Highness the late Raja-I-Rajgan Kharak Singh of Kapurthala in 1877. He was granted the title of Maharaja as an hereditary distinction in 1911. His salute was raised to 15 guns and he was made Honorary Colonel of the 45th Rattays Sikhs. The Maharaja received the Grand Cross of the Legion d'Honneur from the French Government in 1924, and possesses also the Grand Cross of the Order of Carlos 3rd, of Spain, Grand Cross of the Order of the Star of Roumania, Grand Cross of the Order Menelek of Abyssinia, Grand Cordon of the Order of the Nile of Egypt, Grand Cordon of the Order of Morocco, Grand Cordon of the Order of Tunis, Grand Cross of the Order of Chili, Grand Cross of the Order of the Sun of Peru, Grand Cross of the Order of Cuba; represented Indian Princes and India on the League of Nations in 1926, 1927 and 1929, celebrated the Golden Jubilee of his reign in December 1927.

The rulers of Kapurthala are Rajput Sikh, and claim descent from Rana Kapur, a distinguished member of the Rajput House of Jaisalmer. Only a small proportion of the population however are Sikhs, the majority being Mahomedans. The chief crops are wheat, gram, maize, cotton and sugarcane. The town of Sultampur in this State is famous for hand-printed cloths. Phagwara is another important town in the State and is very prosperous on account of its grain markets and factories for manufacture of agricultural implements, and metallic utensils of household use. The situation of this town on the main railway line and the consequent facilities of export and import make its importance still greater and this is the chief commercial town in the State. The main line of the North-Western Railway passes through part of the State and the Grand Trunk Road

runs parallel to it. A branch railway from Jullundur City to Ferozepur passes through the capital. The Imperial Service and local troops of the State have been re-organized and are now designated as Kapurthala State Forces. The State Troops, the strength of which was raised during the Great War, to nearly 2,000, served the Empire in that crisis in East Africa, Mesopotamia and on the Afghan Frontier. Primary education is free throughout the State, and it spends a large proportion of its revenues on its Education Department. The State also possesses a Legislative Assembly which was created by the present Maharaja on the occasion of the Silver Jubilee of his reign in 1916. The capital is Kapurthala which has been embellished by the present Maharaja with a Palace of remarkable beauty and grandeur and with various buildings of public utility. The town boasts modern amenities such as electric light, water-works, etc.

Political Officer The Hon'ble Agent to the Governor-General, Punjab States, Lahore.

Malerkotla.—This State consists of a level sandy plain unbroken by a hill or stream, bounded by the district of Ludhiana on the north, by Patiala territory on the east and south and by the Ludhiana District, Patiala and Nabha territories on the west. The Rulers (Nawabs) of Malerkotla are of "Kurd" descent who came originally from the Province of "Sherwan" and settled in the town of "Sherwan" north of Persia, and after settling for a time in Afghanistan near Ghazni came to India and settled at *Malera*, the old capital of the State in 1442. Originally they held positions of trust under the Lodhi and Moghal Emperors. As the Moghal Empire began to sink into decay they gradually became independent. They were in constant feuds with the newly created adjacent Sikh States. After the victory of Laswari, gained by the British over Sindhia in 1803 and the subjugation and flight of Holkar in 1805, when the Nawab of Malerkotla joined the British Army, the British Government succeeded to the power of the Mahrattas in the districts between the Sutlej and the Jumna. The State entered into political relations with the British Government in 1809. The present Ruler is Lt-Col. His Highness Nawab Sir Ahmad Ali Khan, Bahadur, K.C.S.I., K.C.I.E., who was born in 1881 and succeeded in 1908. He was created Hon'y. Major in the Indian Army in June 1916 and promoted to the rank of Lt.-Col. in December 1919.

The chief products are cotton, sugar, poppy, aniseed, mustard, ajwain, methi, tobacco, garlic, onions and all sorts of grains.

The State maintains Sappers, Infantry, Cavalry and Artillery. The capital is Malerkotla. The population of the town is 30,000. Annual revenue of the State is about 18 lakhs.

Mandi is an Indian State in the Punjab Political Agency lying in the upper reaches of Bias river which drains nearly all its area. Its area is 1,200 square miles and it lies between 31°-23' North Lat.; and 76°-22' East Long.; and is bounded on the east by Kulu; on the south by Suket and on the north and west by Kangra. It has an interesting history of

considerable length which finally resulted in its entering into a treaty with the British in 1846.

The present Ruler, Capt. His Highness Raja Sir Jogindar Sen Bahadur, K.C.S.I., assumed full powers in February 1925. His Highness married the only daughter of His Highness the Maharaja of Kapurthala.

The Mandi Hydro-Electric Scheme was formally opened by His Excellency the Viceroy in March, 1932. The principal crops are rice, maize, wheat and millet. About three-fifths of the State are occupied by forests and grazing lands. It is rich in minerals. The capital is Mandi, founded in 1527, which contains several temples and places of interest and is one of the chief marts for commerce with Ladakh and Yarkand.

Nabha.—Nabha which became a separate State in 1763 is one of the 3 Phulkian States—Nabha, Patiala and Jind—and though second in point of population and revenue of the 3 sister States, it claims seniority being descended from the eldest branch. It consists of two distinct parts, the main portion comprising 12 separate pieces of territory scattered among the other Punjab States and Districts, forms the City of Nabha and the *Nizamat* of Phul and Amloh; the second portion forms the *Nizamat* of Bawal in the extreme south-east of the Punjab on the border of Rajputana; this *Nizamat* of Bawal was subsequently added to its territory as a reward from the British Government for the loyalty of the Rulers of Nabha. The State now covers an area of about 1,000 square miles and has a population of about 3 lakhs. The State maintains one battalion of Infantry known as the Nabha Akal Infantry under the Indian States Forces Scheme consisting of 482. For the preservation of the peace there is also a Police force consisting of about 400 men.

The State is traversed by the main and 3 branch lines of the N. W. Railway and the B. B. & C. I. crosses the *Nizamat* of Bawat. A portion of the State is irrigated by the Sirhind Canal. The crops of the State are gram, pulses, bajra, sugarcane, cotton, wheat and barley, to facilitate trade the Durbar has opened grain markets and Banks near the principal railway station within the State territory. The chief industries of the State consist of the manufacture of silver and gold ornaments, brass utensils, and cotton carpets, lace and *gota*, etc. There are some ginning factories and a cotton steam press in the State which are working successfully. In 1923 an inquiry was held into certain matters in dispute between the Patiala and the Nabha Durbars which showed that the Nabha Police had fabricated cases against persons connected with the Patiala State with the object of injuring them through the Patiala Durbar. As a result, the Maharaja Rupudaman Singh, who was born in 1888 and succeeded his father in 1911 entered into an agreement with the Government of India whereby he voluntarily separated himself from the administration and the control of the State was accordingly assumed by the Government of India. In consequence of repeated breaches of the agreement by the Maharaja, he was in February 1928 deprived of the title

of Maharaja, His Highness and of all rights and privileges pertaining to the Ruler of the State, and his eldest son, Partab Singh, was recognized as Maharaja in his stead.

Patiala.—This is the largest of the Phulkian States, and the premier State in the Punjab. Its territory is scattered and interspersed with small States and even single villages belonging to other States and British districts. It also comprises a portion of the Simla Hills and territory on the border of Jaipur and Alwar States. Area of 5,932 square miles. Population 16,25,520. Gross income Rs. one crore and forty lakhs. Its history as separate State begins in 1762. The present Ruler, Lieutenant-General His Highness Farzand-i-Khas Daulat-I-Inglishia Mansur-ul-Zaman Amir-ul-Umara Maharaja Dhuraj Raj Rajeshwar, Sri Maharaja-i-Rajjan Sir Bhupindra Singh Minder Bahadur, Yadu Vanshavatans Bhatti Kul Bhushan, C.O.S.I., G.C.F.E., G.C.V.O., G.B.E., A.D.C., LL.D., was born in 1891, succeeded in 1900, and assumed the reins of government in 1909 on attaining majority. His Highness the Maharaja Dhuraj enjoys at present personal salute of 19 guns and he and his successors have been exempted from presenting *Nazar* to the Viceroy in Durbar in perpetuity. The principal crops are grain, barley, wheat, sugar-cane, rapeseed, cotton and tobacco. A great part of the State is irrigated by the Sirhind and Western Jumna Canal distributaries. It possesses valuable forests. The State is rich in antiquities, especially at Pinjaur, Sunam, Sirhind, Bhatinda, Narnaul, etc. One hundred and thirty-eight miles of broad-gauge railway line comprising two Sections—from Rajpura to Bhatinda and from Sirhind to Rupar—have been constructed by the State at its own cost. The North-Western Railway, the E. I. Railway, the B. B. & C. I. Railway and the J. B. Railway traverse the State. His Highness maintains a contingent of two regiments of Cavalry and four battalions of Infantry—one battery of Horse Artillery.

The State maintains a first grade college which imparts free education to state subjects. Primary education is also free throughout the State. The Durbar sanctioned a scheme of compulsory education in 1928.

Since the State entered into alliance with the British Government in 1804 and 1809 A.D. it has rendered help to the British Government on all critical occasions such as the Gurkha War of 1814-15, the Sikh War of 1845, the Mutiny of 1857, the Afghan War of 1878-79, and the Tirah and N. W. F. campaign of 1897. On the outbreak of the European War His Highness placed the entire resources of his State at the disposal of His Majesty the King-Emperor and offered his personal services. The entire Imperial Service Contingent was on active service throughout the period of the War and served on various fronts in Egypt, Gallipoli, Mesopotamia and Palestine, winning numerous distinctions. Two mule and one camel corps were raised and placed at the service of the British Government for the period of the War, and in addition to furnishing nearly 28,000 recruits for the British Indian Army and maintaining the State Imperial Service Contingent at full strength, contributed substantially in

money and material. Again in 1919 on the outbreak of hostilities with Afghanistan His Highness served personally on the Frontier on the Staff of the General Officer Commanding and the Imperial Service Contingent saw active service towards Kohat and Quetta fronts. For his services on the N. W. Frontier His Highness was mentioned in despatches.

His Highness was selected by His Excellency the Viceroy to represent the Ruling Princes of India at the Imperial War Conference and Imperial War Cabinet in June 1918 and during his stay in Europe His Highness paid visits to all the different and principal fronts in Belgium, France, Italy and Egypt (Palestine) and received the following decorations from the allied Sovereigns and Governments.—(a) Grand Cordon of the Order de Leopold, (b) Grand Cross of the Legion of Honour, France, (c) Grand Cross of the Order of the Crown of Italy, (d) Grand Cordon of the Order of the Nile, (e) Grand Cross of the Order of the Crown of Roumania and (f) Grand Cross of the Order of St. Saviour of Greece (1926).

His Highness represented the Indian Princes at the League of Nations in 1925. In 1926, he was elected Chancellor of the Chamber of Princes (Narendra Mandal). He was re-elected Chancellor of the Chamber in 1927-28-29-30. In 1930, His Highness led the Princes' delegation to the Round Table Conference. He was again elected Chancellor of the Chamber of Princes in 1933.

Sirmur (Nahan).—This is a hilly State in the Himalayas under the Political control of the Hon'ble the Agent to the Governor-General, Punjab States, Lahore. Its history is said to date from the 11th century. In the eighteenth century the State was able to repulse the Gurkha invasion, but the Gurkhas were invited to aid in the suppression of an internal revolt in the State and they in turn had to be evicted by the British. In 1857 the Raja rendered valuable services to the British, and during the second Afghan War he sent a contingent to the North-West Frontier. The present Prince is H. H. Maharaja Rajendra Prakash who was born in 1913 and succeeded in 1933. The main agricultural feature of the State is the recent development of the Kiarda Dun, a fertile level plain which produces wheat, gram, rice, maize and other crops. The State forests are valuable and there is an iron foundry at Nahan which was started in 1867 but, being unable to compete with the imported iron, is now used for the manufacture of sugar-cane crushing mills. The State supports a Corps of Sappers and Miners which served in the Great War. It was captured with General

Townshend's force at Kut-al-Amara but the Corps was reconstituted and sent to service.

Khairpur.—The state of Khairpur lies in Upper Sind between 26°-10' and 27°-46' North Latitude and 68°-20' and 70°-14' East Longitude. It is bounded on the East by Jodhpur and Jessalmere territories and on the North, West and South by British Districts of Sind. The climate is similar to the rest of Sind. The maximum temperature in summer is 117° in the shade and the minimum in winter 30°. The nearest hill station is Quetta, 5,500 feet above sea level. Rainfall is scarce, the last 13 years' average being 3°-59°. The area of the State is about 6,050 square miles. The population of the State according to the census of 1931 is 2,27,183 souls. The majority of them are cultivators. Others are engaged in trade, State services and labour. By religion they are mainly Suni Muslims, but the Ruler and his family and some others are Shias. Hindus form the minority community. The State's revenue from all sources calculated on the average of the past five years amounts to Rs 18,12,918. The relations of the State with the British Government are those of subordinate alliance. The State pays no tribute either to the British Government or to any other State. The language of the State is Sindhi. Urdu and English are also spoken. The chief product of the State is grain, which is cultivated on irrigation canals taking off from the Indus river at the Lloyd Barrage and to a small extent on wells. Cotton, oil-seeds, ghee, hides, tobacco, Fuller's earth ("met") carbonate of Soda ("Kharo chanhi"), and wool are also produced. The manufactures comprise cotton, silken and woollen fabrics, lacquer work, carpets and pottery.

The Rulers are Muslim Talpur Balochs and belong to the Shraoet. Previous to the accession of this family on the fall of the Kalhora dynasty of Sind in 1783, the history of the State belongs to the general history of Sind. In that year Mir Fatehali Khan Talpur established himself as Ruler of Sind and subsequently his nephew, Mir Sohrab Khan Talpur, founded the Khairpur branch of the Talpur family. In 1882 the individuality of the Khairpur State was recognized by the British Government. The Ruler is a first class prince and is entitled to a permanent salute of 15 guns outside and 17 guns inside the State limits.

The last Ruler, His Highness Mir Ali Nawaz Khan Talpur, died on 25th December, 1935. His only son Mir Faiz Mahomed Khan Talpur is the Walaahd.

Agent to the Governor-General, Punjab States. —
The Hon. Lt.-Col. H. Wilberforce-Bell, C.I.E.

UNDER THE GOVERNMENT OF BURMA.

The States under this Government comprise the Shan States which are included in British India though they do not form part of Burma proper and are not comprised in the regularly administered area of the Province and the Karen States which are not part of British India and are not subject to any of the laws in force in the Shan States or other parts of Burma.

The Shan States comprise the two isolated States of Hsawngsup and Singkaling Hkamti in

the Upper Chindwin District under the supervision of the Commissioner, Sagalay Division, the eight petty village communities under separate hereditary Chiefs known as Hkamti Lung in the Myitkyna District and the two main divisions of the Shan States known as the Northern and Southern Shan States numbering six and thirty States respectively which are under the Commissioner, Federated Shan States.

Hsawnghsup with an area of 529 square miles and a population of 7,239 lies between the 24th and 25th parallels of latitude and on the 95th parallel of longitude between the Chindwin river and the State of Manipur.

Singkalong Hkamti has an area of 983 square miles and a population of 2,157 and lies on the 96th and 90th parallels of latitude and longitude respectively.

The Hkamti Long States have an area of 200 square miles with a population of 5,349 and lie between the 27th and 28th parallels of latitude on the Upper Waters of the N'Mai branch of the Irrawaddy.

The Northern Shan States (area 20,156 square miles and population 636,107) and the Southern Shan States (area 36,157 square miles and population 870,230), form with the unadministered Wa States (area about 2,000 square miles) and the Karenni States, a huge triangle lying roughly between the 19th and 24th parallels of latitude and the 96th and 102nd parallel of longitude with its base on the plains of Burma and its apex on the Mekong river.

The population consists chiefly of Shans who belong to the Shan group of the Tai-Chinese family; the remainder belong chiefly to the Wa-palaung and Mon-Khmer groups of races of the Austro-Asiatic branch of the Austro family, or to the Karen family which Sir George Grierson now proposes to separate from the Tai-Chinese family. There are also a number of Kachins and others of the Tibeto-Burman family. The Shans themselves shade off imperceptibly into a markedly Chinese race on the frontier. Buddhism and Animism are the principal religions.

The climate over so large an area varies greatly. In the narrow lowlying valleys the heat in summer is excessive. Elsewhere the summer shade temperature is usually 80 to 95° Fahr. In winter frost is severe on the paddy plains and open downs but the temperature on the hills is more equable. The rainfall varies from 50 to 100 inches in different localities.

The agricultural products of the States are rice, pulses, maize, buckwheat, cotton, sesamum, groundnuts, oranges and pineapples.

Land is held chiefly on communal tenure but unoccupied land is easily obtainable on lease from the Chiefs in accordance with special rules for non-natives of the States. Great spaces of the States are suitable for cattle, pony and mule breeding and in the Northern State-Chinese settlers appear to have found the latter a very paying proposition.

The mineral resources of the States are still unexplored. The Burma Corporation have a concession for silver, copper, lead and zinc in the Northern States which they claim to be the richest in the world. The Mawson area in the Southern States is also rich in lead. Lignite and iron ore of a low grade are found in many places.

Lashio, the headquarters of the Northern Shan States, is the terminus of the Myohaung-Lashio Branch of the Burma Railways (178 miles) and is also connected with Mandalay by a cart road.

The Burma Corporation's narrow-gauge private railway track 44.49 miles long connects their Bawdwin mine with the Burma Railways system at Namyo.

The Southern Shan States are served by the Burma Railways branch line Thazi to Heho (87 miles) which has been extended to Shwencyaung, 98 miles from Thazi.

Taunggyi, the headquarters of the Southern Shan States, is connected with Thazi by a well-graded motor road. The States vary much in size and importance. The largest State is Kengtung with an area of 12,400 square miles and population 225,894.

Hsipaw with an area of 4,400 square miles and population 148,731 is the richest State with a gross revenue of Rs. 10,62,418.

The Sawbwas of Kengtung, Hsipaw, Yawnghe and Mongnai have salutes of nine guns while the Mong Mit Sawbwa has a personal salute of the same number.

Administration.

Under the Burma Laws Act, 1898, the Civil, Criminal and Revenue administration of every Shan State is vested in the Chief of the State subject to the restrictions specified in the said act of appointment granted to him and under the same Act the law to be administered in each State is the customary law of the State so far as it is in accordance with justice, equity and good conscience and not opposed to the law in force in the rest of British India. The customary law may be modified by the Governor who has also power to appoint officers to take part in the administration of any State and to regulate the powers and proceedings of such officers. The Chiefs are bound by their oaths to follow the advice of the Superintendents appointed but subject to certain modifications which have been made in the customary law relating to criminal and civil justice have more or less maintained the semi-independent status which was found existing at the annexation of Upper Burma.

In 1920, Sir Reginald Craddock, Lieutenant-Governor of Burma, proposed a scheme for the sanction of the Secretary of State under which the Chiefs of the Northern and Southern Shan States have agreed to federalise the departments of Government in which they had been previously largely dependent on contributions from the Provincial Funds. Under this scheme no interference is contemplated in the internal management of the States and the Chiefs continue to collect their taxes and be responsible for law and order, maintain Courts for the disposal of criminal and civil cases, appoint their own officials and control their own subjects under the advice of the Superintendents. But the Federation is responsible for the centralised Departments of Public Works, Medical, Forests, Education, Agriculture and to a small extent Police. In place of the individual tribute formerly paid by them the Chiefs contribute to the Federation a proportion of their revenue which amounts roughly to the expenditure hitherto incurred by them on the heads of administration now centralised while the Provincial Government surrenders to the Federation all provincial revenue previously

derived from the States to enable it to maintain its services at the same degree of efficiency formerly enjoyed. The Federation on the other hand makes a payment of a fixed proportion of its revenue to the Provincial Treasury in place of the individual contributions of the Chiefs. Under this scheme the Federation is a sub-entity of the Burma Government, is self-contained and responsible for its own progress. The Chiefs express their views on Federal and general matters through a Council of Chiefs consisting of all Chiefs of the rank of Sawbwa and four elected representatives of the lesser Chiefs. The Superintendents, Northern Shan States and the Commissioner of the Federated Shan States to whom the supervision of the Federation has been entrusted are *ex-officio* members of the Council. The scheme was sanctioned and brought into force with effect from October 1922. The first meeting of the Council of Chiefs was formally opened by His Excellency the Governor Sir Spencer Harcourt Butler, G.C.I.E., K.C.S.I., C.S., in March 1923.

Karenni.

This district which formerly consisted of five States now consists of three as two have been amalgamated with others. It has a total area of 3,015 square miles and a population of 58,761.

It lies on the south of the Southern Shan States between Siam and the British district of Toungoo. The largest State is Kantarawadi with an area of 3,000 square miles and a population of 30,677 and a revenue of nearly 1½ lakhs of rupees. More than half of the inhabitants are Red Karens. An Assistant Political Officer is posted at Lolkaw subject to the supervision of the Superintendent, Southern Shan States, who exercises in practice much the same control over the Chiefs as is exercised in the Shan States though nominally they are more independent than their Shan neighbours. Mineral and forest rights however in Karenni belong to the Chiefs and not to the Government. In the past substantial contributions from Provincial revenues have been made to the Karenni Chiefs for education and medical service. The Chiefs are at present unwilling to surrender their special rights and join the Shan States Federation though very considerable advantages might accrue from their doing so.

The principal wealth of the country used to be in its teak timber and a large alien population was at one time supported by the timber trade. This has largely declined in the last few years and unless the Chiefs are prepared to deny themselves and close their forests they will soon disappear.

JAMMU AND KASHMIR STATE.

The territory known generally as the Jammu and Kashmir State, lies between 32° and 37° N. and 73° and 80° E. It is an almost entirely mountainous region with a strip of level land along the Punjab border, and its mountains, valleys and lakes comprise some of the grandest scenery in the world. The State may be divided physically into three areas; the upper, comprising the area drained by the River Indus and its tributaries, the middle, drained by the Jhelum and Kishenganga Rivers, and the lower area, consisting of the level strip along the southern border, and its adjacent ranges of hills. The dividing lines between the three areas are the snow-bound inner and outer Himalayan ranges known as the Zojila and the Panchal. The area of the State is 84,258 square miles. Beginning in the south where the great plain of the Punjab ends, it extends northwards to the high Karakoram mountains "Where three Empires Meet."

Briefly described, the State comprises the valleys of the three great rivers of Northern India, viz. the upper reaches of the Chenab and the Jhelum, and the middle reaches of the Indus. The total population is 36,45,000 souls.

History—Various historians and poets have left more or less trustworthy records of the history of the valley of Kashmir and the adjacent regions. In 1586 it was annexed to the Moghul Empire by Akbar. Srinagar, the capital, originally known as Pravarapura, had by then been long established, though many of the fine buildings said to have been erected by early

Hindu rulers had been destroyed in the fourteenth century. In the reign of Sikandir, who was a contemporary of Tamerlane, a large number of Hindus was converted to Islam. Jahangir did much to beautify the Valley, but after Aurangzeb there was a period of disorder and decay and by the middle of the eighteenth century the Suba or Governor of Kashmir had become practically independent of Delhi. Thereafter the country experienced the oppression of Afghan rule until it was rescued in 1819 by an army sent by Maharaja Ranjit Singh. The Sikh rule was not more beneficial to the people than that of the Afghans. The early history of the State as at present constituted is that of Maharaja Shri Gulab Singh, a scion of the old Ruling Family of Jammu, who rose to eminence in the service of Maharaja Ranjit Singh of Lahore and was, in recognition of his distinguished services, made Raja of Jammu in 1820. He held aloof from the war between the British and the Sikhs, only appearing as mediator after the battle of Sobroon (1846), when the British made over to him the valley of Kashmir and certain other areas in return for his services in re-establishing peace. His son, His Highness Maharaja Ranbir Singh, a model Hindu and one of the staunchest allies of the British Government, ruled from 1857 to 1885. He did much to consolidate his possessions and evolve order in the frontier districts. He was succeeded by his eldest son, His Highness Maharaja Shri Pratap Singh, who died on 23rd December 1925, and was succeeded by His Highness the present Shri Maharaja Hari Singh Bahadur.

The most notable reform effected in the State during the reign of the late Maharaja was the Land Revenue Settlement originally carried out under Sir Henry Lawrence and revised from time to time.

Administration.—For some years after the accession to the gadi of the late Maharaja, the administration of the State was conducted by a Council over which the Maharaja presided. In 1905 this Council was abolished and the administration of the State was thenceforward carried on by His Highness the Maharaja with the help of a Chief Minister and a number of Ministers in charge of different portfolios. This system continued until the 24th January 1922, when an Executive Council was inaugurated. Very recently certain modifications have been introduced in the constitution.

The British Resident has his headquarters at Srinagar and Sialkot and there is also a Political Agent at Gilgit. A British Officer is stationed at Leh to assist in the supervision of the Central Asian Trade with India, which passes through Kashmir.

In the Dogras (Hindus and Muslims) the State has splendid material for the Army which consists of 8,600 troops. Besides this, thousands of Dogras serve in the Indian Army.

Finance.—The financial position of the State is strong. The total revenue including Jagirs, is about 2,70,00,000; the chief sources being land, forests, customs and excise and Sericulture. There is a reserve and no debt.

Production and Industry.—The population is pre-eminently agricultural and pastoral. The principal food crops are rice, maize and wheat. Oilseed is also an important crop. Barley, cotton, saffron, tobacco, beans, walnuts, almonds and hops are also grown. Pears and apples, the principal fruits of the Valley are exported in large quantities. The State forests are extensive and valuable. The principal species of timber trees are deodar, blue pine and fir. The most valuable forests occur in Kishtwar, Kainah and Kamraj Illaqa. A survey of the mineral resources of the State is being conducted. The most noteworthy of the minerals expected to be found in the State are bauxite, coal, Fuller's earth, kaoline, slate, zinc, copper and talc. Gold is found in Baltistan and Gilgit, sapphires in Paddar, aquamarines in Skardu and lead in Uri. The silk filature in Srinagar is the largest of its kind in the world. Manufacture of silk is a very ancient industry in Kashmir. Zain-ul-Abidin who ruled from 1421 to 1472 is said to have imported silk weavers from Khurasan and settled them here. Woollen cloth, shawls, carpets, papier maché and wood carving of the State are world famous. The State participated in the British Empire Exhibition of 1924. The Kashmir Court was styled "The Gem of The Smaller Courts" and attracted many visitors. An Industrial and Agricultural Exhibition is held in the State annually, where the products of indigenous arts and craftsmanship for which Kashmir is famous are displayed. His Highness' Government are maintaining a Visitors' Bureau at Srinagar for the convenience of visitors, who are attracted by the scenery and charm of the beauty-spots of Kashmir.

Communications.—Great efforts have been made and are being made towards the improvement of roads for wheeled traffic in the State. The Jhelum Valley road (196 miles) which links the Kashmir Valley with the Punjab and the North-Western Frontier Province is considered to be one of the finest motorable mountain roads in the world.

The Banihal Cart Road, 205 miles long, joins Kashmir with the North Western Railway system at Jammu-Tawai and is also a fine motorable road.

Roads for pack animals lead from Srinagar, the summer capital of Kashmir, to the frontier districts of Gilgit and Ladakh. Internal village communications have also been much improved.

The Jammu-Suchetgarh Railway, a section of the Wazirabad Sialkot branch line of the North Western Railway system, is the only Railway in the State. The mountainous nature of the country has so far prevented the extension of the line into the heart of the State.

Public Works.—In 1904 a flood spill channel above Srinagar was constructed to minimise the constant danger of floods in the River Jhelum. A number of canals have been constructed at considerable expense both in Jammu and Kashmir. The State has been recently connected with the telephone system of British India. An aerodrome has been constructed five miles from Srinagar, and it is hoped that an arial service between Lahore and Delhi and Kashmir will be established soon. Good progress has been made with irrigation, but the most important scheme of recent years has been the installation of a large Electric Power Station on the Jhelum River at Mahora which was completed in 1907. The bridge over the Chenab at Aknur which was completed in 1935 at a cost of Rs. 4 lakhs, has the longest unsupported span in India.

Education.—According to the last census of the State, there were 1,23,800 persons able to read and write of whom 9,000 only were females. In other words, four per cent of all persons aged 5 or more could read and write. Among males 60 in every 1,000 persons could read and write. The number of educational institutions including two Arts Colleges is 1,336. The number of scholars in 1933-34 was 85,646. Nearly 28 per cent boys and 6 per cent girls of the school-going age were at school. In Municipal areas education for boys has been made compulsory since 1929.

Reforms.—One of the important reforms connected with the present Maharaja's reign has been the establishment of an independent High Court of Judicature modelled on British High Courts. Important legislative measures passed by His Highness' Government in recent years include the raising of the age of marriage to 14 for girls and 18 for boys, and the Agriculturists' Relief Regulation meant to cope with the problem of rural indebtedness.

As sign of constitutional progress of the State may be mentioned the freedom granted to the press, and the introduction of the State Assembly. Over 30 newspapers are in existence in the State, and the Assembly which has a non-official majority has already held three sessions, during a year and a half of its existence.

THE CHAMBER OF PRINCES.

The Narendra Mandal, or Chamber of Princes came into existence, with the earnest co-operation of a number of leading Princes themselves as one of the results of the Report on Indian constitutional reform presented to Parliament by Mr. Montagu, Secretary of State for India and H. E. Lord Chelmsford, Viceroy and Governor-General of India, in 1919. The proposal was that the Chamber should exist as a permanent consultative body, with the Viceroy as President and the members composing the Chamber consisting mainly of the Princes and Chiefs having salutes, or whose membership might otherwise be considered desirable by the Viceroy. Certain smaller Chiefs were grouped and were given the privilege of nominating a member to represent them from year to year. The Chamber is a recommendatory body, which performs its functions under a constitution approved by the Secretary of State and it deals with questions submitted to it concerning the Princes and their rights and privileges generally and their position in Imperial affairs.

The Chamber was formally inaugurated by H.R. H. the Duke of Connaught on 8th February 1921. It meets regularly once a year and the agenda of subjects for discussion is framed and proposed by the Chancellor of the Chamber who at present is His Highness the Maharajah of Patiala. The Chamber selects by vote its own officers, who are the Chancellor, a pro-Chancellor to act for him in his absence out of India and a Standing Committee of the Chamber. This Committee considers before the annual meetings the subjects to be discussed at them.

Until 1929, the proceedings of the Chamber were considered as confidential and there was no admittance of the general public to its meetings. At the annual session in February 1929, the Princes passed a resolution by which all meetings were ordinarily made open to the public. The Chamber contains very restricted accommodation and admission has to be regulated according to the number of seats available.

Indian States' Tribute.

Many of the States pay tribute, varying in amount according to the circumstances of each case, to the British Government. This tribute is frequently due to exchanges of territory or settlement of claims between the Governments, but is chiefly in lieu of former obligations to supply or maintain troops. The actual annual receipts in the form of tribute and contributions from Indian States are summarised in the following table. The relations of the States to one another in respect of tributes are complicated, and it would serve no useful purpose to enter upon the question. It may, however, be mentioned that a large number of the States of Kathiawar and Gujarat pay tribute of some kind to Baroda, and that Gwalior claims tribute from some of the smaller States of Central India:—

States paying tribute directly to the Government of India.

	£		1
Tribute from Jaipur	26,667	<i>Assam.</i>	
" " Kotah	15,648	Tribute from Manipur	337
" " Udaipur	13,333	" " Rambrai	7
" " Jodhpur	6,533	<i>Bengal.</i>	
" " Bundi	8,000	Tribute from Cooch Behar ..	4,514
" " Other States	15,170	<i>United Provinces.</i>	
Contribution of Jodhpur toward cost of Brijpura Irregular Force	7,667	Tribute from Benares	14,860
" of Kotah towards cost of Deolhi Irregular Force ..	13,333	<i>Punjab.</i>	
" of Bhopal towards cost of Bhopal Levy	10,753	Tribute from Mandi	6,667
" of Jaora towards cost of United Malwa Contingents ..	9,142	" " other States	3,086
Contributions towards cost of Malwa Bhil Corps	2,280	<i>Madras.</i>	
<i>Central Provinces and Berar.</i>		Tribute from Travancore	53,333
Tribute from various States ..	15,696	Peshkash and subsidy from Mysore ..	232,333
<i>Burma.</i>		" " " " Cochin	13,333
Tributes from Shan States	28,524	" " " " Travancore	888
" " other States	1,367	<i>Bombay.</i>	
		Tribute from Kathiawar	31,126
		" " various petty States ..	2,825
		Contribution from Baroda States ..	25,000
		" " Jagirdars, Southern Mahratta Country ..	5,765
		Tribute from Cutch	5,484

It was announced at the Coronation Durbar of 1911 that there would in future be no *Nazarana* payments on successions.

Foreign Possessions in India.

Portugal and France both hold small territorial possessions in the Indian Peninsula.

The Portuguese possessions in India, all of which are situated within the limits of Bombay Presidency, consist of the Province of Goa on the Arabian Sea Coast; the territory of Daman with the small territory called Fragana-Nagar-

Avelly on the Gujarat Coast, at the entrance to the Gulf of Cambay; and the little Island of Diu, with two places called Gogla and Simbor, on the southern extremity of the Kathiawar Peninsula. All these three territories constitute what is called the State of India.

GOA.

Goa forms a compact block of territory surrounded by British districts. Savantwadi State lies to the north of it, the Arabian Sea on the west and North Kanara on the south, and the eastern boundary is the range of the Western Ghats, which separates it from the British districts of Belgaum and North Kanara. The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 miles. The territory has a total area of 1,301 square miles and consists of the *Velhas Conquistas*, or Old Conquests, comprising the island of Goa, acquired by the Portuguese in 1510, and the neighbouring municipalities of Salsette, Bardez, and Mormugao acquired in 1543; and of the *Novas Conquistas*, or New Conquests, comprising the municipalities of Pernem, Sanguelim, Ponda, Quepem, Canacona, Satari and Sanguem acquired in the latter half of the 18th century. The small island of Angediva situated opposite the port of Karwar, in the British district of North Kanara, forms administratively a portion of the Canacona municipality. This was acquired in 1505. The whole country is hilly, especially the eastern portion, the predominating physical feature being the Western Ghats, which besides bounding the country along the north-east and south-east, just off westward and spread across the country in a succession of spurs and ridges. There are several conspicuous isolated peaks, of which the highest, Sonsagar, is 3,827 feet high.

The country is intersected by numerous rivers running westward from the Ghats, and the principal eight, which are all navigable, are in size of some importance. Goa possesses a fine harbour, formed by the promontories of Bardez and Salsette. Half-way between these extremities lies the *cabo*, or cape, which forms the extremity of the island of Goa. This divides the whole bay into two anchorages, known as Aguada and Mormugao. Both are capable of accommodating the largest shipping from September to May, but Aguada is virtually closed during the south-west monsoon, owing to the high winds and sea and to the formation of sand bars across the estuary of the Mandovi river, which opens into Aguada. Mormugao is accessible at all times and is therefore the harbour of commercial importance. It is the terminus of the railway running to the coast from the inland British system of lines. A breakwater and port have been built there and the trade is considerable being chiefly transit trade from British territory.

The People.

The total population of Goa was 531,952 at the census of 1921. This gives a density of 408 persons to the square mile and the popula-

tion showed an increase of 9 per cent. since the census ten years previously. In the Velhas Conquistas the majority of the population is Christian. In the Novas Conquistas Hindus are more numerous than Christians. The Moslems in the territory are numbered in a few thousands. The Christians still very largely adhere to caste distinctions, claiming to be Brahmans, Chardos and low castes, which do not intermarry. The Hindus who form about one-half of the total population are largely Maratha and do not differ from those of the adjacent Konkani districts of Bombay. All classes of the people, with the exception of Europeans, use the Konkani dialect of Marathi with some admixture of Portuguese words. The official language is Portuguese, which is commonly spoken in the capital and the principal towns as well as by all educated people. Nearly all the Christians profess the Roman Catholic religion and are spiritually subject to an archbishop who has the titles of Primate of the East and Patriarch of the East Indies and exercises ecclesiastical jurisdiction also over a portion of British India, and the provinces of Macau (China) and Timor (Oceania), with missions in foreign countries and Mocambique (Portuguese East Africa). The Christians of Daman and Diu are subject under a new Treaty signed in 1928 between Portugal and the Holy See to the Archbishop of Goa. There are numerous churches in Goa, mostly built by the Jesuits and Franciscans prior to the extinction of the religious orders in Portuguese territory. The churches are in charge of secular priests. Hindus and Mahomedans now enjoy perfect freedom in religious matters and have their own places of worship. In the early days of Portuguese rule the worship of Hindu gods in public and the observance of Hindu usages were strictly forbidden and rigorously suppressed.

The Country.

A little over one-third of the entire territory of Goa is stated to be under cultivation. The fertility of the soil varies considerably according to quality, situation and water-supply. The Velhas Conquistas are as a rule better and more intensively cultivated than the Novas Conquistas. In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying from half an acre to five or six acres. The staple produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the needs of the population for two-thirds of the year. Next to rice, the culture of cocoanut palms is deemed most important, from the variety of uses to which the products are applied. Hilly places and inferior

soils are set apart for the cultivation of cereals and several kinds of fruits and vegetables are cultivated to an important extent. The condition of the agricultural classes in the Velhas Conquistas has improved during recent years, owing to the general rise in the prices of all classes of agricultural produce and partly to the current of emigration to British territory. There is a great shortage of agricultural labour in the Velhas Conquistas. In the summer months bands of artisans and field labourers from the adjoining British territory make their way into Bardes where the demand for labour is always keen. State forests are found in the Novas Conquistas. They cover an area of 116 square miles and are under conservation and yield some profit to the administration. Iron is found in parts of the territory; but has not been seriously worked. Manganese also exists and some mines are being worked at present, the ore being exported to the Continent.

Commerce.

In the days of its glory, Goa was the chief entrepot of commerce between East and West and was specially famous for its trade in horses with the Persian Gulf. It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant.

The present trade of Goa is not very large. Its imports amount to about Rs. 160 lakhs and exports to about Rs. 40 lakhs. The discrepancy is met from the money sent to Goa by the many emigrants who are to be found all over the world. Few manufacturing industries of any moment exist and most manufactured articles in use are imported. Exports chiefly consist of coconuts, betel nuts, mangoes and other fruits and raw produce.

A line of railway connects Mormugao with the Madras and Southern Mahratta Railway. Its length from Mormugao to Castle Rock above the Ghats where it joins the British system, is 51 miles, of which 49 are in Portuguese territory. The railway is under the management of the Madras and Southern Mahratta Railway administration, and the bulk of the trade of Mormugao port is what it brings down from and takes to the interior. The telegraphs in Portuguese territories are worked as a separate system from the British. The latter, however, had an office at Nova-Goa maintained jointly by the two Governments but since 1925 the Nova-Goa office has been handed over to the Portuguese Government which now maintains and works all the telegraphs in its territories.

Taxes and Tariffs.

The country was in a state of chronic financial equilibrium for nearly sixty years with occasional exceptions. The last war enhanced the deficits to alarming proportions and these were met by fresh taxes and new loans. Most of the new taxes were the result of the initiative of the Governor-General Jaime de Morais, who is popularly known as the "Governor of Taxes." Only in 1927 the country experienced the joys of a balanced budget and the public servants whose salaries had always remained in arrears are now being paid regularly. There is an estimated surplus of about a lakh and a half which has been ear-marked for promoting the indus-

trial progress of the country. If municipal and national taxes be added together, the country presents a very high incidence of taxation, even higher than that of British India, the average coming to about Rs. 8-8 *per capita*. There is no income-tax, except for government servants, but there is a special ten per cent tax on all incomes derived in the shape of interest on loans. This tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief sources of revenue are the land tax, Excise and the customs. There is a special tax on emigrants which yields to the State about Rs. 60,000. The country being economically backward, the taxes give very little indication of its productive capacity or of its annual wealth. The national wealth is a matter of pure conjecture for lack of statistics.

The tariff schedule is based on the three-fold principle, fiscal, protective and preferential. There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent, according to the nature of the commodities, but the duties in several cases are specific, not *ad valorem*. This causes considerable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonies. Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent, on their basic price.

The Capital.

Nova-Goa, the present capital of Portuguese India, comprehends Panjim and Ribandar, Old Goa is some six miles distant from the new city. Panjim occupies a narrow strip of land leading up to the Cabo, the cape dividing the Aguada bay from that of Mormugao, and mainly slopes down to the edge of the Aguada. It was selected as the residence of the Portuguese Viceroy in 1759, and in 1843 it was raised to its present rank as the capital of Portuguese India. The appearance of the city, with its row of public buildings and elegant private residences, as seen from the water is very picturesque and this impression is not belied by a closer inspection of its neat and spacious roads, bordered by decent, tidy houses. The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library and the Government Press. Other noticeable buildings are the Cathedral and various churches, the viceregal palace and the High Court. The square in the lower part of the town is adorned with a life-sized statue of Albuquerque standing under a canopy.

History.

Goa was captured for the Portuguese by Alfonso de Albuquerque in 1510. Albuquerque promptly fortified the place and established Portuguese rule on a firm basis. From this time Goa rapidly rose in importance and became the metropolis of Portuguese power in the East. There was constant fighting with the armies of the Bijapur kingdom, but the Portuguese held their own and gained the surrounding territory now known as the Velhas Conquistas.

The subsequent history of the town is one of ostentation and decay. Goa reached its summit of prosperity at the end of the sixteenth century. The accounts of travellers show that the Goa of those days presented a scene of military, ecclesiastical and commercial magnificence which has had no parallel in the British capitals of India. Portugal, however, with its three millions of population, was too small to defend itself against Spain and maintain at the same time its immense Empire in the four Continents. Albuquerque tried to consolidate Portuguese rule in India by his policy of attracting the conquered Indians and granting them civil and religious liberties. His contemporaries, however, could not understand his far-seeing statesmanship and after his death they undid all his work basing their dominion on conquest by the sword and military force and they laboured to consolidate it by a proselytising organisation which throws all the missionary efforts of every other European power in India into the shade. Old Goa, as the ruins of the old capital are called to-day, had a hundred churches, many of them of magnificent proportions, and the Inquisition which was a power in the land. The sixty years' subjection to Spain in the 17th century completed the ruin of the Portuguese Empire in the East and though the Marquis of Pombal in the 18th century tried to stave off its decadence, his subordinates in far-off India either could not understand or would not carry out his orders and even his strong hand was unable to stop the decline. It was in the 19th century that the colonials began to enjoy full Portuguese citizenship and sent their representatives to the Parliament in Lisbon.

Modern Times.

There was frequently recurring fighting and in 1741 the Marathas invaded the neighbourhood of Goa and threatened the city itself. An army of 12,000 men arrived from Portugal at the critical moment. The invaders were beaten off, and the Novas Conquistas were added to the Portuguese possessions. In 1844 the shelter given by Goa to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bombay. In 1852 the Ranies of Satari, in the Novas Conquistas, revolted. In 1871 the native army in Goa mutinied and the King's own brother came from Lisbon to deal with the trouble and having done so disbanded the native army, which has never been reconstituted. But another outbreak among the troops took place in 1895 and the Ranies joining them the trouble was again not quieted until the arrival of another special expedition from Lisbon. The Ranies again broke out in 1901 and again in 1912, troops being again imported to deal with the last outbreak, which was only reported concluded in the summer of 1913. There has been no outbreak after that date.

The people on the whole appear to be quite satisfied with the Portuguese connection. There is no agitation for further reforms as in British India and not a sign of disaffection against Portuguese rule. This is chiefly due to the fact that under the present regime the natives of Goa enjoy complete equality with the natives of Portugal, many of the sons of Goa occupying high

and responsible positions in Portugal. Thus Elvino de Brito who was Minister of Public Works towards the end of the last century was a native of Goa as was the father of Dr. Bettencourt Rodrigues, Minister for Foreign Affairs in General Carmonas dictatorial Government. Natives of Goa are also Dr. Almeida Azevedo, President of the Supreme Court in Lisbon, Dr. Caetano Gonsalves, Judge of the same Court and Mr. Alberto Xavier, Secretary-General of the Ministry of Finance.

Administration.

The Lisbon Government by Decree No. 3266, dated 27th July 1917, enacted new rules regarding the administration of Portuguese India under an Organic Charter (*Carta Organica*) in force since 1st July 1918. This Charter, regarding civil and financial administration of the colony, was modified by rules Nos. 1005 and 1022, dated 7th and 20th August 1920, and decrees Nos. 7008 and 7030 dated 9th and 16th October. A new Organic Charter modifying in certain parts the earlier one was granted by Decree No. 12499 of 4th October 1926 and is now in force.

The territory of Portuguese India is ruled by one Governor-General, residing in the Capital of the State, at Panjim *alias* Nova-Goa, and is divided into three districts: Goa, Daman and Diu. The last two are each under a Lieutenant-Governor. The district of Goa is under the direct superintendency of the Governor-General.

Subordinate to the Governor-General the following Secretariats are working: Home and Political, Finance, Customs, Education, Military, Naval, Agriculture, Health and Public Works. There are also three special and autonomous Departments, which do not constitute exclusive Secretariats, one of them being the Department of Posts and Telegraphs, the second that of Survey and the third that of the Fiscal of the W. I. P. Railway.

As the principal organ of administration next to the Governor-General and in collaboration with him works a Governor's Council (*Conselho do Governo*) with Legislative and advisory powers. The Council is constituted, in addition to the Governor-General, *ex-officio* President, of four officials (Attorney-General, the Director of Finances, the Director of Civil Administration and the Director of Public Works), five elected members (three representing *Velhas Conquistas*, one the *Novas Conquistas* and one the Districts of Daman and Diu) and five members nominated by the Governor-General to represent the minorities, agricultural, commercial and other interests and the press.

In each province of Goa, Daman and Diu, there is a District Council to supervise the Municipalities and other local institutions. The District Council of Goa is composed of the Director of Civil Administration, President, the Government Prosecutor of the Nova-Goa Civil Court; the Deputy Chief Health Officer; the Engineer next to the Director of Public Works; the Deputy Director of Finances; the Chairman of the Municipal Corporation of the Islands; one member elected by the Commercial and Industrial Associations of the district; one member elected by the 60 highest tax payers of Goa; one member elected by the Associations of Land owners and Farmers of the District; and one

member advocates elected by the Legislative Council among the legally qualified.

There is one High Court in the State of India with five Judges and one Attorney-General; and

Courts of Justice at Panjim, Margao, Mapuca, Blocholim, Quep'm e Damão; and Municipal Courts of Justice at Mormugão (Vasco da Gama), Ponda, Diu and Nagar-Aveli.

PORT OF MORMUGAO.

Mormugão is situated towards the south of Aguada Bar, on the left Bar, on the left bank of Zuary River in Lat. 15° 25' N. and Long. 73° 47' E., about 225 miles south of Bombay and 6½ miles south of Panjim, the Capital of Portuguese India. The Port of Mormugão is the natural outlet to the sea for the whole area served by the M. & S. M. Ry. (metre-gauge), and offers the shortest route both passenger and goods traffic. The distance from Aden to Mormugão is about the same as from Aden to Bombay. The Port is provided with light-houses, buoys and all necessary marks and it is easily accessible all the year round and at any hour of the day or night even without the assistance of a Pilot. Pilotage is not compulsory, but when usual pilot flag is hoisted, a qualified officer will board the vessel and render

such assistance.

Mormugão Harbour is the terminal station of the West of India Portuguese Railway which is controlled by the Madras and Southern Maharatta Railway Company, with headquarters at Madras.

With a view to promoting the economical, commercial and industrial development of Mormugão, a special Department under the designation of the "Mormugão Improvement Trust" with its head office at Vasco da Gama, 2 miles from Mormugão Harbour, has been created and the Local Government have introduced various regulations granting every facility to those intending to raise buildings for residential and industrial purposes in the whole area, comprising about 300 acres, near the Harbour.

DAMAN.

The settlement of Damán lies at the entrance to the Gulf of Cambay, about 100 miles north of Bombay. It is composed of two portions, namely, Damán proper, lying on the coast, and the detached pargana of Nagar Aveli, separated from it by a narrow strip of British territory and bisected by the B. B. & C. I. Railway. Damán proper contains an area of 22 square miles and 26 villages and has a population (1921) of 17,566 of whom 1,480 are Christians. The number of houses is according to the same census 4,095. Nagar Aveli has an area of 60 square miles and a population (1921) of 31,048, of whom only 271 are Christians. The number of houses is 6,069. The town of Damán was sacked by the Portuguese in 1531 rebuilt by the natives and retaken by the Portuguese in 1558 when they made it one of their permanent establishments in India. They converted the mosque into a church and have since built eight other places of worship. The native Christians adopt the European costume, some of the women dressing themselves after the present European fashion, and others following the old style of petticoat and mantle once prevalent in Spain and Portugal.

The soil of the settlement is moist and fertile, especially in Nagar Aveli, but despite the ease of cultivation only one-twentieth part of the

territory is under tillage. The principal crops are rice, wheat, the inferior cereals of Gujarat and tobacco. The settlement contains no minerals. There are stately forests in Nagar Aveli, and about two-thirds of them consist of teak, but the forests are not conserved and the extent of land covered by each kind of timber has not been determined. Before the decline of Portuguese power in the East, Damán carried on an extensive commerce especially with the east coast of Africa. In those days it was noted for its dyeing and weaving.

The territory forms for administrative purposes a single district and has a Municipal Chamber and Corporation. It is ruled by a Governor invested with both civil and military functions, subordinate to the Governor-General of Goa. The judicial department is administered by a judge, with an establishment composed of a delegate of the Attorney-General and two clerks. In Nagar Aveli the greater part of the soil is the property of the Government, from whom the cultivators hold their tenures direct. A tax is levied on all lands, whether alienated or the property of the State. The chief sources of revenue are and-tax, forests, excise and customs duties.

DIU.

Diu is an island lying off the southern extremity of the Kathiawar Peninsula, from which it is separated by a narrow channel through a considerable swamp. It is composed of three portions, namely, Diu proper (island), the village of Gogla, on the Peninsula, separated by the channel, and the fortress of Simbor, about 5 miles west of the island. It has a small but excellent harbour, where vessels can safely ride at anchor in two fathoms of water and owing to the great advantages which its position offers for trade with Arabia and the Persian Gulf, the Portuguese were fixed at an early period with a desire to obtain possession

of it. This they gained, first by treaty with the Sultan of Gujarat and then by force of arms. Diu became opulent and famous for its commerce. It has now dwindled into insignificance. The extreme length of the island is about seven miles and its breadth from north to south, two miles. The area is 20 square miles. The population of the town of Diu, from which the island takes its name, is said to have been 50,000 in the days of its commercial prosperity. The total population of the island, according to the census of 1921, is 13,844, of whom 228 were Christians.

FRENCH POSSESSIONS.

The French possessions in India comprise five Settlements, with certain dependent lodges, or plots. They aggregate 203 square miles, and had a total population on the 26th Feb. 1931 of 286,410. The first French expedition into Indian waters, with a view to open up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen, but it failed, as also did several similar attempts which followed. In 1642 Cardinal Richelieu founded the first *Campagne d'Orient*, but its efforts met with no success. Colbert reconstituted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having twice attempted, without success, to establish itself in Madagascar, Colbert's Company again took up the idea of direct trade with India and its President, Caron, founded in 1668 the Comptoir, or agency, at Surat. But on finding that city unsuited for a head establishment he seized the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, speedily retook Trincomalee; and Caron, passing over to the Coromandel coast, in 1672, seized St. Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland. He was, however, compelled to restore it to the Dutch in 1674.

The ruin of the Company seemed impending when one of its agents, the celebrated Francois Martin, suddenly restored it. Rallying under him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trincomalee and St. Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Raja of Gingee. He built fortifications, and a trade began to spring up; but he was unable to hold the town against the Dutch, who wrested it from him in 1693, and held it until it was restored to the French by the Peace of Ryswick, in 1697. Pondicherry became in this year and has ever since remained, the most important of the French Settlements in India. Its foundation was contemporaneous with that of Calcutta. Like Calcutta, its site was purchased by a European Company from a native prince, and what Job Charnock was to Calcutta Francois Martin proved to Pondicherry. On its restitution to the French by the Peace of Ryswick in 1697, Martin was appointed Governor, and under his able management Pondicherry became an entrepot of trade.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688, by grant from the Delhi Emperor; Mahé, on the Malabar Coast, was obtained in 1725-6, under the government of M. Lenoir; Karikal, on the Coromandel Coast, under that of M. Dumas, in 1739. Yanaon, on the coast of the Northern Circars, was taken possession of in 1750, and formally ceded to the French two years later.

Administration.

The military command and administration in chief of the French possessions in India are vested in a Governor, whose residence is at Pondicherry. The office is of present held by

Monsieur Solomiac (Léoz). He is assisted by a Chief Justice and by several "Chefs de Service" in the different administrative departments. In 1879 local councils and a council-general were established, the members being chosen by a sort of universal suffrage within the French territories. Seventeen Municipalities, or Communal Boards, were erected in 1907, namely, Pondicherry, Ariancoupan, Modeliarpet, Oulgarct, Villenour, Tiroubouvane, Bahour and Nettapacam, for the establishment of Pondicherry; Karikal, Neravy, Nedoucadon, Tirunalar, Grande Aldée, Cotechery, for the establishment of Karikal, and also Chandernagore, Mahé and Yanaon. On municipal boards natives are entitled to a proportion of the seats. Civil and criminal courts, courts of first instance and a court of appeal compose the judicial machinery. The army and establishments connected with the Governor and his staff at Pondicherry, and those of administrators at Chandernagore, Yanaon, Mahé and Karikal, together with other headquarters charges necessarily engross a large proportion of the revenue. All the state and dignity of an independent Government, with four dependent ones, have to be maintained. This is effected by rigid economy, and the prestige of the French Government is worthily maintained in the East. Pondicherry is also the scene of considerable religious pomp and missionary activity. It forms the seat of an Archbishop, with a body of priests for all French India; and of the Missions Étrangères, the successors of the Mission du Carnatic founded by the Jesuits in 1776. But the chief field of this mission lies outside the French Settlements, a large proportion of its Christians are British subjects and many of the churches are in British territory. The British rupee is the ordinary tender within French territories. A line of railway running via Villenour, from Pondicherry to Villupuram on the South Indian Railway, maintains communication with Madras and the rest of British India, and Karika is linked to the same railway by the branch from Peralam. A Chamber of Commerce consisting of fifteen members, nine of them Europeans or persons of European descent, was reorganised by a decree of 7th March, 1914. The capital, Pondicherry, is a very handsome town, and presents, especially from the sea a striking appearance of French civilisation.

People and Trade.

The Settlements are represented in Parliament at Paris by one senator and one deputy. The Senator is Mons. Lemoigne. The Deputy is Mons. Pierre Dupuy. There were in 1932 59 primary schools and 3 colleges all maintained by the Government, with 308 teachers and 9,263 pupils. Local revenue and expenditure (Budget of 1934) Rs. 3,284,873. The principal crops are paddy, groundnut, and ragi. There are at Pondicherry 3 cotton mills, and at Chandernagore 1 jute mill. The cotton mills have, in all 1,691 looms and 71,744 spindles, employing 7,450 persons. There are also at work one oil factory and a few oil presses for groundnuts, and one ice factory. The chief exports from Pondicherry are oil seeds,

At the ports of Pondicherry and Karikal. In 1934 the imports amounted to frs. 104,282,000 and the exports to frs. 119,331,000. At these two ports in 1934 11,290 vessels entered and cleared; tonnage 144,130 T. Pondicherry is

visited by French steamers, sailing monthly between Colombo and Calcutta in connection with the Messageries Maritimes. The figures contained in this paragraph are the latest available and are corrected up to December 1934.

PONDICHERRY.

Pondicherry is the chief of the French Settlements in India and its capital is the headquarters of their Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 122 by the Villupuram-Pondicherry branch of the South Indian Railway. The area of the Settlement is 115 square miles and its population in the 26th Feb. 1931 was 183,555. It consists of the eight communes of Pondicherry. The Settlement was founded in 1674 under François Martin. In 1693, it was captured by the Dutch but was restored in 1699. It was besieged four times by the English. The first siege under Admiral Boscawen in 1748 was unsuccessful. The second, under Eyre Coote in 1761, resulted in the capture of the place, which was restored in 1765. It was again besieged and captured in 1778 by Sir Hector Munro, and the fortifications were demolished in 1779. The place was again restored in 1785 under the Treaty of Versailles of 1783. It was captured a fourth time by Colonel Braithwaite in 1793, and finally restored in 1816.

The Settlement comprises a number of isolated pieces of territory which are cut off from the main part and surrounded by the British District of South Arcot, except where they border on the sea. The Collector of

South Arcot is empowered to deal with ordinary correspondence with the French authorities on these and kindred matters, and in this capacity is styled the Special Agent. At Pondicherry itself is a British Consular Agent accredited to the French Government, who is usually an officer of the Indian Army. The town is compact, neat and clean, and is divided by a canal into two parts, the *Ville blanche* and the *Ville noire*. The *Ville blanche* has a European appearance, the streets being laid at right angles to one another with trees along their margins reminding the visitor of continental boulevards, and the houses being constructed with courtyards and embellished with green ventenats. All the cross streets lead down to the shore, where a wide promenade facing the sea is again different from anything of its kind in British India. In the middle is a screw-pile pier, which serves, when ships touch at the port, as a point for the landing of cargo, and on holidays as a general promenade for the population. There is no real harbour at Pondicherry; ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual *masula* boats of this coast. Facing the shore end of the pier is a statue of the great Duplex, to whom the place and the French name owed so much.

CHANDERNAGORE.

Chandernagore is situated on the bank of the Hooghly, a short distance below Chinsura. Population (in the 26th Feb. 1931) 27,262. The town was permanently occupied by the French in 1688, though previously it had been temporarily occupied by them at a date given as 1672 or 1676. It did not, however, rise to any importance till the time of Duplex. It changed hands between British and French various times during the Napoleonic wars and was finally restored to the French in 1816.

The former grandeur of Chandernagore has

disappeared, and at present it is little more than a quiet suburban town with little external trade. The railway station on the East Indian Railway is just outside French territory 22 miles from Calcutta (Howrah). The chief administrative officer is the Administrator who is subordinate to the Governor of the French Possessions. The chief public institution is the College Duplex, formerly called St. Mary's institution, founded in 1882 and under the direct control of the French Government.

KARIKAL.

Karikal lies on the Coromandel Coast between the Tanjore District of Madras and the Bay of Bengal. The settlement is divided into six communes, containing 110 villages in all, and covering an area of 63 square miles. It is governed by an Administrator subordinate to the Governor at Pondicherry. The population has in recent years rapidly decreased. In 1883 it was 93,056, in 1891, 76,520; in 1901, 54,003; in 1923, 57,023 in 1924, 56,922; in 1931, 57,914; but the density is still very high, being 1,063 persons per square mile. Kumbakonam is the only taluk in Tanjore District which has a higher density. Each of the six communes—namely, Karikal, La Grande Alcee, Nedungadu, Cokeré, Néray and Tirunavar—possesses a mayor and council. The members are all elected by

universal suffrage but in the municipality Karikal half the number of seats are reserved for Europeans or their descendants. The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

The capital of the settlement is situated on the north bank of the river Arasalar, about 1½ miles from its mouth. It has a brisk trade in rice with Ceylon, and to a less extent with the Straits Settlements. It has no commerce with France, and very little with other French colonies. The port is merely an open roadstead, provided with a light-house 142 feet high, the light in which has a range of from 8 to 10 miles. In 1890 Karikal was connected with Perallem on the Tanjore District Board Railway. Karikal finally came into French possession on the settlement after 1815.

The Frontiers.

By those who take a long view of politics in the wide sense of the term, it will be seen that the Indian Frontier problem, which has loomed so large in the discussion of Indian questions, has always borne a two-fold character—the local issue and the international issue. For almost a century the international issue was the greater of the two, and the most serious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face. But the tendency of later times was for the international aspect to recede and for the local aspect to grow in importance, until it might be said, with as much truth as characterises all generalisations, that the local issue dominated, if it did not absorb the situation.

The Local Problem.—The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail. From the Arabian Sea on the West to the confines of Nepal is a wild and troublous sea of some of the highest mountains in the world. The thin valleys in these immense ranges are poorly populated by hardy, brave, militant mountaineers, rendered the fiercer and the more difficult by professing the martial Moslem faith, accentuated by the most bitter fanaticism. But sparse as the population is, it is in excess of the supporting power of the country. Like mountaineers in all parts of the world, these brave and fearless men have sought to eke out their exiguous agriculture by raiding the rich plains of Hindustan. We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by opening for the warlike Highlanders a military career in the famous Highland regiments, and in rendering military operations easier by the construction of Wade's road. The Highland problem has disappeared so long from English politics that its pregnant lessons are little realised, but if the curious student will read again that brilliant novel by Neil Munro, "The New Road," he will appreciate what Wade's work meant for the Highlands of Scotland, and what lessons it teaches those who are called upon to face, in its local aspect, the Indian frontier problem. So far as the area with which we are dealing was concerned, two policies were tried. In Baluchistan, the genius of Sir Robert Sandeman devised the method of entering into military occupation of the principal points, and thence controlling the country. At the same time close engagements were entered into with the principal chiefs, through whom the tribesmen were kept in order. That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not seriously embarrass the Government of India from the time when Sandeman set his mark on the land. Not that the country was entirely peaceful. Occasional tribal raids or risings necessitated occasional military operations, and the Gomal Pass was involved in the general tribal disturbances which followed the wanton declaration of war by Afghanistan

in 1919. But speaking broadly, Sandeman brought peace to Baluchistan, and to the large frontier area which is embraced in that generic term. So far as this section of the frontier is concerned it may be said that no frontier problem exists, save the need for an economical and constructive policy.

Towards Afghanistan.—Far otherwise has it until lately been with the section of the frontier which stretches from Baluchistan to the confines of Kashmir. That has, for three quarters of a century, been the scene of almost ceaseless military operations, which have constituted a devastating drain on the Indian exchequer. For years one sought for a definite policy guiding the actions of the Government of India. One explanation of their inconsistencies was found in the existence of two schools of thought. Once the frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupation of the whole country right up to the confines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country. But those who looked at policy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan frontier would only shift the frontier problem farther North. Instead of the differing tribes, we should, they argued, have to meet the Afghan on our border line. If Afghanistan were a strong, homogeneous State, that would be a matter of little account. But even under the iron rule of Abdurrahman Khan, the Amir's writ ran but lightly in the southern confines of his kingdom. Under his successor, Habibullah Khan, whose policy was generally wise and successful, it ran still less firmly. The Amir was unable to control the organisation of the tribal gatherings which involved us in the Zakka Khel and Mohmand expeditions during the Indian secretaryship of that arch pacifist, Lord Morley. Nor did it enable Habibullah to deal effectively with a rising against his own Governor in Khost. The Afghan forces melted away under transport difficulties when they were moved against the rebellious Khostwalis, and the Amir had to make peace with his troublesome vassals. Therefore, it was said, occupation up to what is called the Durand Line because it is the line demarcated by the Frontier Commission in which Sir Mortimer Durand was the British Plenipotentiary, would simply mean that in time of trouble we should have to deal with Afghanistan instead of a tribe or two, and with the irreconcilable tribesmen along our difficult line of communications. There was the further consideration that financiers were of the fixed belief that even if the Forward Policy was wise from the military standpoint, it would involve charges over an indefinite period greater than the Indian finances would bear. Moreover on this section of the Frontier, the position was complicated by the expansion of Russia in Central Asia. The easiest passes, and the passes down which for centuries from the time of Alexander the Great invaders

have swept from Persia and Central Asia to loot the fat plains of Hindustan, traverse this region. Therefore it was deemed essential to control, if not to occupy them, in the interests of the Imperial situation. In this zone therefore policy ebbed and flowed between the Forward School, which would have occupied, or dominated, the whole Frontier up to the Durand Line, that is to say up to the Afghan frontier; and the Close Border School, which would have us remain out of the difficult mountainous zone and meet the tribesmen on the plains if they sallied forth. The extreme advocates of this school would even have had us return to the line of the Indus.

The Two Policies.—The result of this conflict of opinion was a series of wavering compromises, which like all compromises was profoundly unsatisfactory. We pushed forward posts here and there, which irritated the Tribesmen, and made them fearful of their prized independence, without controlling them. These advanced posts were in many cases inadequately held and rarely were they linked with their supporting posts by adequate means of communication. We preserved between our administrative frontier and the Durand Line which demarcated our frontier with Afghanistan an irregular belt of land called The Independent Territory, in which neither we nor the Afghan Government exercised jurisdiction. This was left entirely under the control of the tribes who peopled it. Now it was often asked why we did not follow the precedent of Baluchistan and "Sandemanise" the Independent Territory. That was one of the perennial topics of Frontier discussions. But stress was laid upon the essential differences between this zone and Baluchistan. Sir Robert Sandeman found a strong tribal system existing in Baluchistan, and he was able to enter into direct engagements with the tribal Chiefs. There is no such tribal organisation in the Independent Territory. The tribal Chiefs, or maliks, exercise a very precarious authority, and the instrument for the collective expression of the tribal will is not the chief, but the jirgah, or tribal council, of the most democratic character, where the voice of the young men of the tribe often has the same influence, in time of excitement perhaps more influence, as the voice of the wiser grey beards. The bitter fruit of this policy of compromise was reaped in 1897, when following a minor outbreak in the Tochi Valley the general uneasiness flamed into a rising which involved the whole of the North-West Frontier, from the Gomal to the borders of Nepal. A force over thirty thousand strong had to be mobilised to deal with it. Even this large force, owing to the immense difficulties of transportation, was unable effectively to deal with the situation, though peace was made. The emergency thus created synchronised with the advent of Lord Curzon as Viceroy. He dealt with it in masterful fashion. In the first place, he separated the frontier zone from the Government of the Punjab, which had hitherto been responsible for its administration, and had organised for the purpose a special force of Frontier soldiers, known as the Punjab Irregular Frontier Force. This was the revival of a scheme as old as the Viceroyalty of Lord Lytton, though no other Viceroy had been able to carry it through in the face of the strong opposition of successive Punjab Governments. The area so separated was

constituted into a separate administrative zone under the direct authority of the Government of India, exercised through a Chief Commissioner. Then Lord Curzon withdrew the advanced military posts and concentrated the Regular troops in bases better linked with the main military centres of India by roads and railways. The advanced posts, and especially important Passes like the Tochi, the Kurram and the Khyber, were entrusted to the defence of local militia, recruited from the tribesmen themselves, and officered by British officers drawn from the ranks of the Indian Army. Later it was supplemented by a fine development policy. The construction of the Upper Swat Canal, afterwards developed into the Swat Canal (*q.v.* Irrigation) led to such an increase in cultivation that the tribesmen were given a means of livelihood and were invested with the magic charm of valuable property. The irrigated part of the Frontier has since been one of the most peaceful in the whole border line.

Lord Curzon's Success.—Judged by every reasonable standard the Curzon policy was successful. It did not give us complete peace. There were occasional punitive expeditions demanded, such as for instance the Zakka Khel and Mohmand expeditions, and the Waziris, and in particular the truculent Mahsud Waziris, never ceased raiding. But in comparison with what had gone before, it gave relative peace. It endured throughout the Great War, though the Waziris built up a heavy bill of offences, which awaited settlement when Government were free from the immense preoccupations of the war. It broke down under the strain of the wanton invasion of India by the Afghans in the hot weather of 1919. On February 20th the Amir Habibullah Khan was assassinated in his sleep near Jalalabad. Although he does not figure so prominently in frontier history as his iron father Abdurrahman Khan, he nevertheless has high claims on the favourable verdict of history. None anticipated that any successor to Abdurrahman Khan could hold in the leash of a single State the fractious, fanatical tribes who make up the population of the Afghan kingdom. Yet this Habibullah did. On occasions his attitude seemed to be equivocal, as when armed gatherings of the tribes called lashkars were permitted to assemble in Afghan territory and to invade the Independent Territory, causing the Zakka Khel and Mohmand expeditions. But we must not judge a State like Afghanistan by European standards; the Amir had often to bow before the fanatical elements amongst his own people until they had burnt their fingers by contact with the British troops. At the outset of the Great War he warned the Government that he might often have to do things which seemed unfriendly, but they must trust him. In truth, the position of the Amir when Turkey entered on the war, and called Moslems everywhere to arms on the side of Germany was extraordinarily difficult; he received Turkish, German and Austrian missions in Kabul, from which British representatives were still excluded. But he kept Afghanistan out of the war, and with the complete defeat of the Central Powers and their satellites, his policy was justified up to the hilt. Indeed, his success was the cause of his assassination. The irreconcilable elements in the Kingdom saw that the day of reckoning had come and strove

to avert the settlement of their account by the murder. When he was done to death, his brother, Nasrullah Khan, was proclaimed Amir by the assassins. But the conscience of Afghanistan revolted against the idea of Nasrullah, the arch-fanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his brother. A military movement in Kabul itself brushed him aside and installed the son of Habibullah, Amanullah Khan, on the throne. But Amanullah Khan soon found it was a thorny bed on which he lay, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical crime, set his troops in motion on April 26, 1919, and preaching a *jehad* promised his soldiery the traditional loot of Hindustan. The Indian Army was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten. Dacca was seized, Jelalabad and Kabul were frequently bombed from the air, and there was nothing to prevent our occupation of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overset a government in Afghanistan, but it is quite another to set up a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August 1919.

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze. With one or two exceptions, the Tribal Militia left without the support of the regular troops who in the emergency ought to have been hastened to their succour, could not stand the strain of an appeal from their fellow tribesmen, and either melted away or joined the rising. This has often been described as the failure of the Curzon policy, which was based on the tribal militia. But there is another aspect to this issue, which was set out in a series of brilliant articles which Mr. Arthur Moore, its special correspondent, contributed to *The Times*. He pointed out that the militia was meant to be a military police force. The lapse of time, and forgetfulness of its real purpose, had converted the militia into an imitation of the regular army. The Militia was meant to be a police. When the war broke out its units were treated as a covering force behind which the Regular Army mobilised. This is a role which it was never intended they should serve; exposed to a strain which they should never have been called upon to bear, they crumpled under it. If on the outbreak of trouble troops had promptly hurried to their support all might have been well. Left to look after themselves, with no sign of support, they found themselves too weak to hold their positions and militarily their only course was to retire from the midst of their own kinsmen as the seal of revolt surged towards them. They would not take it.

Russia and the Frontier.—The Curzon policy was up to the time of its collapse greatly assisted by extraneous events. The greatest external force in moulding Indian frontier policy was the long struggle with Russia. For nearly three-quarters of a century a veiled warfare for predominance in Asia was waged between Great Britain and Russia. There are few pages

in British foreign policy less attractive to the student of Imperial affairs. Russia was confronted in Central Asia with precisely the same conditions as those which laced England in India when the course of events converted the old East India Company from a trading corporation into a governing body. The decaying khanates of Central Asia were impossible neighbours. Confronted with an inferior civilisation, and with neighbours who would not let her alone, Russia had to advance. True, the adventurous spirits in her armies and some of the great administrators in the Tsarist capital were not adverse to paying off on the Indian Borderland the score against Great Britain for the Crimean War and for what the Russians thought was depriving them of the fruits of their costly victory over Turkey in 1877-78. The result was a long and unsatisfactory guerrilla enterprise between the hardest spirits on both sides, accompanied by periodic panics in the British Press each time the Russians moved forward, which induced the coining, after the Russian occupation of Merv, of the generic term "Mervousness." This external force involved the Government of India in the humiliations of the Afghan War of 1838, with the tragic destruction of the retiring Indian force between Kabul and Jelalabad, slightly relieved by the heroic defence of Jelalabad and the firmness of General Pollock in refusing to withdraw the punitive army until he had set his mark on Kabul by the razing of the famous Bala Hissar fortress. It involved us in the second Afghan War of 1878, which left the baffling problem of no stable government in Afghanistan. There was a gleam of light when Abdurrahman Khan, whom we set up at Kabul to relieve us of our perplexities, proved himself a strong and capable ruler, it one ruthless in his methods. But in the early eighties the two States were on the verge of war over a squabble for the possession of Peshawar, and then men began to think a little more clearly. There began a series of boundary delimitations and agreements which clarified the situation, without however finally settling it. The old controversy broke out in another form when intrigues with a Burjat monk, Dorjjeff, during Lord Curzon's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Tibet. An expedition to Lhasa rent the veil which had so long concealed the mysterious city and dispersed the miasma of this intrigue. But it was not until the conclusion of the Anglo-Russian agreement of 1907 that the two countries arrived at a stage long sought by those who looked beyond their noses. The actual authors of the Agreement were Lord Grey, the Foreign Secretary, and Lord Hardinge, formerly British Ambassador in Petrograd, but it had been desired by their predecessors, whose efforts were rendered nugatory by the intransigent attitude of the dominant forces in Petrograd. It was not until Russia was chastened on the battlefields of Manchuria by Japan, and disappeared as a sea power in the decisive battle of Tsushima, that an atmosphere was created favourable to the conclusion of an Agreement. This embraced the whole frontier zone. There were many unsatisfactory features in the Agreement, especially in regard to Persia, for which we had to pay a considerable price in the attitude

of Persians in the War. But again taking long views, the Agreement fully justified itself in a broad definition of the interest of the two countries, which put an end to the period of excursions and alarms up to the outbreak of the War. Russia then ceased to be a material factor in the Indian Frontier Problem. With the establishment of the Soviet Oligarchy in Moscow uneasiness has returned, for the geographical and allied circumstances which influenced the policy of the Tsarist regime exert precisely the same pressure upon its successor, and the Soviet have a troublesome motive which the Tsars had not: their aim to produce world revolution is avowed and Britain and the Constitutionalism for which she stands are the greatest obstacles in their path.

German Influence.—As nature abhors a vacuum, so in the case of States bordered by higher civilisations, no sooner does one strong influence recede than some other takes its place. Long before the signing of the Anglo-Russian Agreement the shadow of the German menace had begun to appear on the horizon. Imitative, not creative, in this, as in most other activities, the Germans adapted their methods from the penetration by railway which was so marked a feature of Russian expansion in Manchuria, brought to an end by the disastrous issue of the war with Japan. The seeds of the German effort were sown when the Kaiser, extending the hand of Christian fellowship to the Sultan of Turkey, Abdul-Hamed, at a time when that sovereign was ostracised by Europe for his direct complicity in the massacre of Armenians, or rather one of the massacres of Armenians, made German influence supreme at Constantinople. His theatrical tour through Palestine, which was generally treated in Europe as an exhibition of opera bouffe, soon bore fruit in the acquisition by German interests of the principal railways in Anatolia. Later it fructified more effectively in the Baghdad Railway concession, under which German interests secured the right of extending the Anatolian lines from the port of Haider Pasha, opposite Constantinople, to a port in the Persian Gulf. Now successive British Statesmen of both parties had declared that the acquisition of a territorial foothold in the Persian Gulf by any power—Russia and the port of Bunder Abbas being then in view—would be regarded as an unfriendly act. There followed a replica of the period of alarms and excursions which had disfigured our relations with Russia. Undaunted, even when their endeavour to secure British co-operation in the enterprise failed, and when the Revolution in Turkey which set the Committee of Union and Progress in power entailed a temporary interruption of their influence at Constantinople, the Germans pressed forward with their enterprise. They pushed the Anatolian railways as far east as Bourghulu, and constructed a line northwards from Baghdad to Samara. They sent a mission to explore the potentialities of the port of Koweit in the Persian Gulf, and set the Turks in motion to subordinate the Sheikh of Koweit to direct Turkish sovereignty, with a nominal view to extending the Baghdad railway from Basra to Koweit, or the vicinity of Koweit at the deep water inlet behind Bublun Island. They commenced the most difficult part of the work in piercing the Amanus and Taurus

ranges by a series of tunnels, and laid the rail on the other side of the mountains across the Euphrates to Ras-al-Ain. Behind this railway activity stood a grandiose policy, which is indicated in what became known in Germany as "B.B.B."—Berlin, Byzantium, Baghdad. Throughout the progress of these schemes, which did not stop short of Baghdad, but were directed through a port in the Persian Gulf, at India, the Germans were anxious to secure the co-operation of Great Britain, if they could do so on their own terms, that is to say without affecting the enterprise as a dominant German adventure. Shortly before the commencement of the war the protracted negotiations with London which had this end in view ended in a definite agreement between the two Powers. Under this agreement the Gulf section of the line was to have been British, and the other portion German. But this agreement which had not been signed became waste paper with the outbreak of the war, and the German plans vanished in thin air with the complete defeat of Turkey and Germany. Nevertheless the railway did not stand still during the war, Germany made immense efforts to complete the difficult tunnel sections and the work was substantially finished when the Armistice was signed.

The Significance of the Baghdad Railway—The real significance of the Baghdad Railway was little appreciated in Great Britain. It was constantly pictured as a great trunk line, which would short-circuit the traditional British dominance by sea, and absorb the passenger and goods traffic from the East. This idea could only be nourished by those completely ignorant of the conditions of the Indian passenger service and the essentials of a competitive route for the carriage of merchandise. The rush of passenger traffic from India is from April to June, in order to escape the hot weather in India, and the return traffic is spread over the period of from October to January. From April to June the heat in Mesopotamia is appalling. To imagine that the passenger traffic from India would turn from the easy and comfortable, as well as fairly expeditious sea route from Bombay to Marseilles and thence by the easiest railway travelling outside the British Isles to Calais and London, for such a land route was an amazing chimera. The Baghdad route would have involved a sea voyage from Bombay or Karachi to Koweit or Basra, then a journey across the burning plains of Mesopotamia and Asia Minor to Haider Pasha, then across the Straits to Constantinople, and finally right across Europe to a North Sea port. This would in any circumstances have been a costly freak journey in comparison with the sea route. Then as for the commercial aspect of the line, the natural port of the Middle East is Basra. The sea freight from England or Germany to Basra was often less than half the freight from Basra to Baghdad. To imagine again that merchandise would desert this route for a land and sea route, which would have involved a double break of bulk at Constantinople and Haider Pasha, was again a chimera.

As a through route the primary purpose of the Baghdad Railway was strategic. It was designed to make the Power seated at Constantinople—and that Power the Teutons were resolved should be Germany—complete master of Asia

Minor and The Middle East, and the route-selected, often criticised, was the best for the rapid movement of troops to the strategic centres. As a commercial line, the Railway, if completed, would have served three zones. The western area of Turkey in Asia at Haidar Pasha. The rich lands of Anatolia at Alexandretta. The eastern zone at Basra. The Germans, it is understood, attached immense importance to the subsequent engagements with Turkey which placed them in maritime command at Alexandretta. They began to inaugurate a commercial position in the Persian Gulf through the establishment of a subsidized line of steamers run by the great Hamburg-America corporation. They strove to obtain an actual footing in the Gulf through the German house of Wonkhaus. The Germans were probably never serious in their alleged designs on Koweit, which could never have borne a more definite relation to the commerce of the Gulf than Flushing to Antwerp or Cuxhaven to Hamburg, that was one of the red herrings they drew across their trail to divert attention from their real objective, Basra, which is destined by virtue of an unchallengeable geographical and natural position to be the great port of The Middle East. These considerations have no more than an academic value now. Germany was defeated. The Turks, when they emerged from an isolated military despotism based on Angora, were confronted with the immense problem of re-building their bankrupt State, deprived of the most intelligent section of the old population—the Greeks and the Armenians, by massacre and expulsion—were a very different factor. The completion of the through line was indefinitely postponed. But as the advantages of the route, for the purposes we have indicated, are many and great, the ultimate construction of the through line only a matter of time, so one has placed these authoritative characteristics on record for the guidance of opinion when the project of the through route is revived, as it must be.

Turkey and the Frontier.—The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never assumed any significance, save as the *avant courier* of Germany, when she passed under the tutelage of that Power, and for a limited period during the war. Although so long established in Mesopotamia, Turkey was not very firmly seated in that country, the Arabs tolerated rather than accepted Turkish rule so long as they were substantially left alone, and the administration, it is understood, never paid its way. For a brief period Midhat Pasha raised the status of Mesopotamia, and after the Revolution that fine soldier Nazim Pasha became a power in the land. But speaking broadly Turkey remained in Mesopotamia because it was no-one's interest, even that of the Arab, to turn her out. When however Germany developed her "B B B" policy, Turkey was used as a stalking horse. She moved a small force to the Peninsula of Al-Katr in order to frighten the Sheikh of Bahrain, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Sheikh of Koweit into a *de facto* suzerainty, exercised by military force. These efforts faded before the vigorous action of the British Government which con-

cluded a binding arrangement with the Sheikh of Koweit, and the position of the Turks at Al-Katr was always very precarious. On the outbreak of the war however the situation profoundly changed. When the sound and carefully executed expedition to Basra and its strategic hinterland was developed into the insane enterprise to capture Baghdad by *coup de main*, with very inadequate forces, and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable character. These were completely successful with General Maude's occupation of Baghdad. After the Russian *debacle* we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asia, producing military exploits of an almost epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power in Palestine, where Lord Allenby scattered the Turks like chaff. But the aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite frontiers. This enabled the Turks, if they were so disposed, to be troublesome through guerrilla warfare in the Mosul Zone, and by stirring up the Kurds, who are the Ishmaelites of Asia Minor. The conclusion of the Treaty of Lausanne in 1923 brought temporary relief, but it did not settle the main issue, the frontier between Turkey and Iraq. Under the Treaty it was provided that if the two parties could not agree to a boundary line delimitation should be left to the League of Nations. Negotiations were promptly opened at Constantinople, but it was immediately found that there could be no mutual agreement; the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Iraq. The issue therefore went to the League of Nations. That body despatched a neutral commission to study the position on the spot; this commission reported that the best settlement would be for the Mosul vilayet to be incorporated in Iraq, if the British Government were prepared to prolong its mandate over that State for a period of twenty-five years. When the report of this commission came before the League in 1925 Britain gave the necessary guarantee, and the Council of The League unanimously allotted the Mosul vilayet to Iraq. The Turkish delegates, who at first recognised the decisive authority of the League, then declared that they would not be bound by its decisions. So the matter rested at the end of the year, with Iraq in occupation of the disputed up to the temporary frontier, which was known as The Brussels Line. After at first breathing nothing but armed resistance to acceptance of the award, the Turks afterwards assumed a more conciliatory note, and alarmed, it may be, by the threat of Italian aggression, accepted the frontier line demarcated by the League.

France and the Frontier.—If we touch for a few sentences on the position of France on the frontiers of India, it is not because they have any present day significance, but in order to complete this brief survey of the waxing and waning of external influences on Indian frontier policy. It is difficult to find any sound policy behind the efforts of France to obtain a coaling

station at Maskat in the Persian Gulf, and her long opposition to the steps necessary to extirpate the slave trade, and hold in check the immense traffic in arms which was equipping all the tribesmen on our North-West Frontier with rifles of precision and a large supply of ammunition. We can find no more definite purpose in it than a general pin-pricking policy, a desire to play the part of Russia, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cessions in West Africa, particularly in the neighbourhood of Gambia, as the price of abstinence. These embarrassments were slowly removed one by one after the conclusion of the Anglo-French Entente. Far otherwise was it in the East. The consolidation of French authority in French Indo-China was the prelude to designs for the expansion of this authority at the expense of Siam and to find compensation there for the veiled British protectorate of Egypt. There had earlier been mutterings in Burma. We were established in Lower Burma in the thirties and in the eighties the foolish and tyrannical King Theebaw, in Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British. However, if any hopes were entertained of extending the Asiatic possessions of France in this direction, they were dissipated by the Second Burmese War and the firm establishment of British rule. Far otherwise was it on the confines of Siam. It was the fixed purpose of British policy to preserve Siam as a buffer state between Burma, then a regular Province of the Indian Empire, and French Indo-China. This policy was definitely challenged by French encroachments on Siam. Matters approached a crisis in 1894, and we were within measurable distance of a situation which might have ended in open war between the two States. But as in the case of Penjdeh, and later when Major Marchand marched across Africa to Fashoda, the imminence of hostilities made statesmen on both sides ask themselves what they might be going to fight about. They found there was nothing essential and an agreement was negotiated between the two Powers, which secured the independence and integrity of Siam. That agreement has been consolidated by wise and progressive rule in Siam itself, under its own independent sovereign, who is imbued with a strong friendship for Great Britain, whilst at the same time maintaining good relations with French neighbours.

The New Frontier Problem.—The whole purpose of this brief sketch has been to show that for three generations—most assuredly since the events leading to the Afghan War of 1838—the Indian frontier problem has never been a local problem. It has been dominated by external influences—in the main the long struggle between Great Britain and Russia, for a brief period the German ambition to build up a dominant position in the East through the revival of the land route, and to a much lesser extent by the ambitions of France and Turkey. The circumstances affecting the Frontier from centres beyond it have greatly changed. Old dangers have disappeared. And, generally, conditions have become more like those normal to critical land frontiers anywhere in the world in this present time of swift

communications, aerial operations and easy propaganda. Consequently, a great deal of new attention is necessarily being directed to local aspects of the general problem. The tribesman was always an opponent to be respected. Brave, hardy, fanatical, he has always been a first-class fighting man. Knowing every inch of the inhospitable country to which punitive operations must of necessity take place he has hung on our rearwards and given them an infinite of trouble. Even when armed with a jezail and when every cartridge had to be husbanded with jealous care, the tribesman was a respectable antagonist. Now the tribesmen are everywhere armed with magazine rifles, either imported through the Persian Gulf when gunrunning was a thriving occupation, stolen from British magazines, or secured from Russian and Afghan sources. They have an abundant supply of ammunition. Considerable numbers of the fighting men have been trained in the ranks of the Indian Army, either as Regulars in the Pathan regiments, or else in the tribal militias. We found this to our cost in the events following the Afghan War of 1919. The Afghan regular army was of little account. The tribesmen who rose at the call of the jihad, especially in Waziristan, were of great account. They gave our troops the hardest fighting they have ever had on the Frontier; their marksmanship and fire discipline were described by experienced soldiers as admirable. The tribal militia, the keystone of the Curzon system, had for all practical purposes disappeared. What was to take its place?

Immediately following the Afghan War, the frontier positions were garrisoned by regular troops, but this was only a temporary measure. It may be said that the crux of the situation was in Waziristan. This sector of the Frontier has always been the most difficult of the whole, because of the intractable character of the people, and of their inveterate raiding activities. Besides, possessing a boit hole into Afghanistan they had in the past evaded effective punishment. In view of the complete disappearance of the external menace, and the consequent lapsing of any necessity to preserve open lines of communication which would enable us to go to the support of Afghanistan, now formally recognised in the Treaty of 1921 as a completely independent State, there were many who urged the desirability of complete withdrawal, even to the line of the Indus. This extreme school gained little support. Our position in Quetta on the one side and Peshawar on the other is fully consolidated, and no good case could be made out for withdrawing from it. On the other hand, there was a strong case made out for leaving the tribesmen severely alone from the Gomal to the Kurram, and dealing with them if they emerged from their fastnesses. The military standpoint was that the Waziris are absolutely intractable, that it was unfair to impose on troops the frequent necessity of punitive operations in most arduous conditions; and that the only solution of the question was the occupation of dominant points in Waziristan, as far north as Lachha, and linking these posts with our military bases, and particularly with the terminal of the Indian frontier railways, by good motor roads.

This controversy lasted long. It resulted in a typically British compromise which specially arose from the changed conditions in which we found ourselves in 1922, when our troops were in occupation of Waziristan as a result of the operations forced upon us for the suppression of the tribal outbreak which the Afghans stirred up in support of their invasion of India in 1919. The ensuing policy has been aptly described as the "half-forward" policy. It is in truth a repetition of the Sandeman policy, adapted to local conditions. There has been no withdrawal in the ordinary sense of the term, but the limit of the North Waziristan occupation was temporarily fixed at Ramzak, not at Ladha. A network of consequential roads was pushed forward. Its elaboration continues. In South Waziristan, Wana has been re-occupied, partly in response to a pressing invitation from the Wana Wazirs, because they wanted to share the benefits

which they saw British occupation to be bringing to their cousins northward of them. In February, 1933, control over tribal territory was pushed forward beyond Razmak towards the Afghan Border because of a rebellion on the Afghan side and of the need to assist the King of Kabul by preventing excursions by bodies of Wazirs into His Majesty's disturbed territory. The work of control and of civilization is rapidly progressing in the whole territory. Of this particulars are given on 272 and following pages. One of its latest fruits is a request by the Afridis for roads in their country of Tirah, a beginning with construction has been made.

The main Indian rail-head, which for many years terminated at Jamrud, at the easterly entrance to the Khyber Pass, was in the autumn of 1925 extended to Landi Khana, at the opposite end of the Pass and within a mile of the frontier between India and Afghanistan.

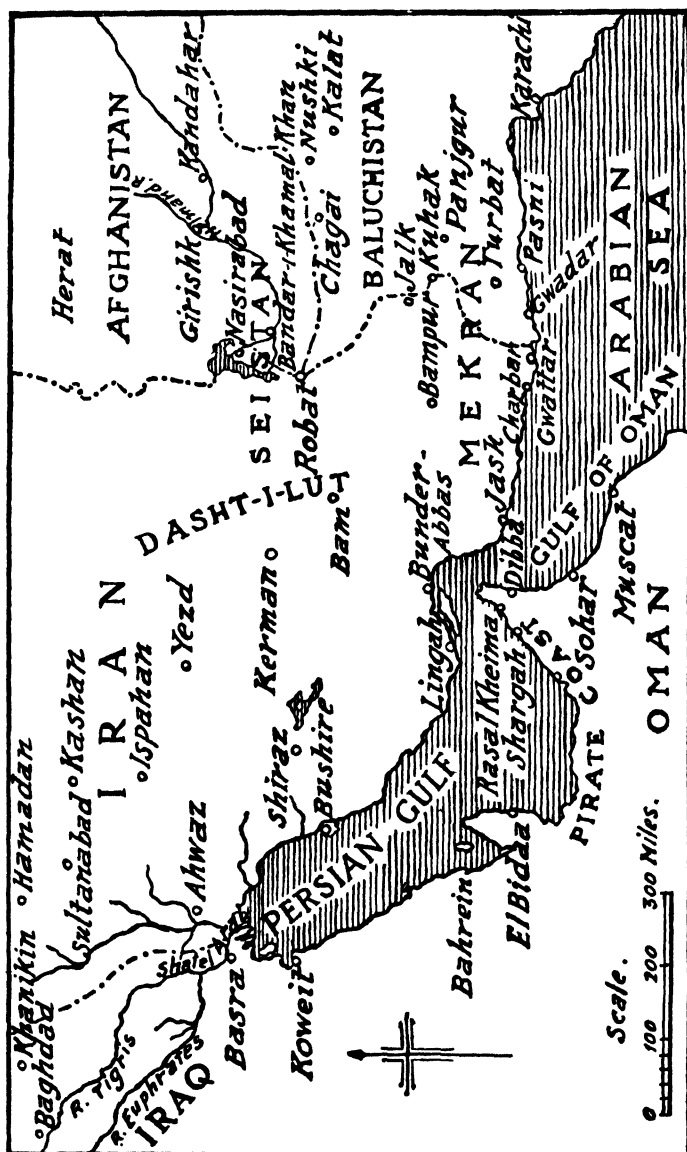

I.—THE PERSIAN GULF.

From what has gone before it will be seen that the keynote of this discussion of Indian frontier policy is that the external menace has largely disappeared. No part of the frontier is more powerfully influenced by this consideration than the Persian Gulf. Our first appearance in the Gulf was in connection with the long struggle for supremacy with the Portuguese, the French and the Dutch, who had established trading stations there. With the capture and destruction of the great entrepot which the Portuguese had established at Ormuz, the super-session of the land by the sea route, and the appearance of anarchy in the interior the importance of the Gulf declined. The Indian Government remained there primarily to preserve the peace. This work is quietly and efficiently performed. Piracy was stamped out, the Trucial Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Royal Navy kept watch and ward, and our consuls regulated the external affairs of the Arab rulers on the Arab coast. In return for these services Great Britain claimed no selfish advantages. The waters of the Gulf were kept free to the navigation of the ships of all nations, and though Great Britain could have made any territorial acquisitions she pleased she retained possession of only the tiny station of Bassidu. Left to herself Great Britain desired no other policy, but for a quarter of a century the Gulf was involved in European affairs. France sought to acquire a coaling station at Jissa, near Maskat, and obstructed the efforts of the British Government to stamp out the slave trade and to check the immense traffic in arms which was equipping the tribes on our land frontier with weapons of precision and quantities of ammunition. All causes of difference were gradually removed by agreements following the Anglo-French Entente. Russia sent one of her finest cruisers to "show the flag" in the Gulf, and established consular posts where there were no interests to preserve. She was credited with the intention of occupying a warm water port, and in particular with casting covetous eyes on the most dreadful spot in the Gulf, Bunder Abbas. This menace declined

after the signing of the Anglo-Russian Agreement and disappeared with the collapse of Russian power following the Revolution. Then Turkey, either acting for herself, or as the *avant courier* of Germany, under whose domination she had passed, began to stir. She threatened the Sheikh of Bahrain by the armed occupation of the peninsula of Al-Katr, and moved troops to enforce her suzerainty over Kowelt, the best port in the Persian Gulf and a possible terminus of the Baghdad Railway. Further to consolidate her interests, or to stake out a claim, Germany sent the heavily-subsidized ships of the Hamburg-America line to the Gulf, where they comforted themselves as the instruments of Imperial policy rather than as inoffensive merchantmen. She also strove, through the agency of the firm of Wunkhaus, to acquire a territorial footing on the island of Shargah. These events stirred the British Government to an unusual activity in the waters of the Gulf.

Counter Measures.

The first effective steps to counter these influences were taken during the vigorous viceroyalty of Lord Curzon, who visited the Gulf during his early travels and incorporated a masterly survey of its features in his monumental work on Persia. He appointed the ablest men he could find to the head of affairs, established several new consulates, and was instrumental in improving the sea communications with the Gulf ports. The British Government also took alarm. They were fortified in their stand against foreign intrigue by the opinion of a writer of unchallenged authority. The American Naval writer, the late Admiral Mahan, placed on record his view that "Concession in the Persian Gulf, whether by formal arrangement (with other Powers) or by neglect of the local commercial interests which now underlie political and military control, will imperil Great Britain's naval position in the Farther East, her political position in India, her commercial interests in both, and the Imperial tie between herself and Australasia." The Imperial standpoint, endorsed by both Parties in the State, was set out by Lord Lansdowne in

words of great import—"We (i.e., His Majesty's Government) should regard the establishment of a naval base or of a fortified port in the Persian Gulf by any other Power as a very grave menace to British interests, which we should certainly resist with all the means at our disposal." The negative measures following these declarations were followed by a constructive policy when the oil fields in the Bakhtiari country, with a great refinery, were developed by the Anglo-Persian Oil Company, in which the British Government has a large financial stake. But with the disappearance of these external forces on Gulf policy, as set out in the introduction to this section, the politics of the Persian Gulf receded in importance, until they are now more than they were before these external influences developed, a local question, mainly a question of policy. They are therefore set out more briefly and those who desire a complete narrative are referred to the Indian Year Book for 1923, pp. 178-183. An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf. The fleet consisting of two sloops and four launches, all suitably armed, was built in Italy and duly arrived at its destination in 1932. It is at the outset officered by Italians. The immediate reason for the new fleet is that an increase in the Persian Customs tariff for revenue purposes led to extensive smuggling. The fleet is required to check it. The British Government in 1935 announced their decision to transfer their principal naval station in the Persian Gulf from Henjam, on Kishm island, off the Persian shore at the entrance of the Gulf, which they held on lease from the Persian Gulf, to Bahrein, on the Western Arabian coast of the Gulf. This move is calculated to remove causes of friction.

Maskat.

Maskat, which is reached in about forty-eight hours from Karachi, is outside the Persian Gulf proper. It lies three hundred miles south of Cape Musandim, which is the real entrance to the Gulf, but its natural strength and historical prestige combine to make it inseparable from the politics of the Gulf, with which it has always been intimately associated.

Formerly Maskat was part of a domain which embraced Zanzibar, and the islands of Kishm and Larak, with Bunder Abbas on the Persian shore. Zanzibar was separated from it by agreement, and the Persians succeeded in establishing their authority over the possessions on the eastern shore.

The relations between Britain and Maskat have been intimate for a century and more. It was under British auspices that the separation between Zanzibar and Maskat was effected, the Sheikh accepted a British subsidy in return for the suppression of the slave trade and in 1892 sealed his dependence upon us by concluding a treaty pledging himself not to cede any part of his territory without our consent.

The Pirate Coast.

Turning Cape Musandim and entering the Gulf Proper, we pass the Pirate Coast, controlled by the six Trucial Chiefs. The ill-name of this territory has now ceased to have any meaning, but in the early days it had a very real relation

to the actual conditions. The pirates were the boldest of their kind, and they did not hesitate to attack on occasion, and not always without success, the Company's ships of war. Large expeditions were fitted out to break their power, with such success that since 1820 no considerable punitive measures have been necessary. The Trucial Chiefs are bound to Great Britain by a series of engagements, beginning with 1806 and ending with the perpetual treaty of 1853 by which they bound themselves to avoid all hostilities at sea, and the subsequent treaty of 1873 by which they undertook to prohibit altogether the traffic in slaves. The relations of the Trucial Chiefs are controlled by the British Resident at Bushire, who visits the Pirate Coast every year on a tour of inspection. The commercial importance of the Pirate Coast is increasing through the rise of Debal. Formerly Lingah was the entrepot for this trade, but the exactions of the Belgian Customs officials in the employ of Persia drove this traffic from Lingah to Debal. The Trucial Chiefs are—Debal, Abu Thabeeb, Shargah, Ajman, Um-al-Gawain and Ras-el-Kheyma.

Bahrein.

North of the Pirate Coast lies the little Archipelago which forms the chiefship of the Sheikh of Bahrein. Of this group of islands only those of Bahrein and Maharak are of any size, but their importance is out of all proportion to their extent. This is the great centre of the Gulf pearl fishery, which, in a good year, may be worth half a million pounds sterling. The anchorage is wretched, and at certain states of the tide ships have to lie four miles from the shore, which is not even approachable by boats, and passengers, mails and cargo have to be handed on the donkeys for which Bahrein is famous. But this notwithstanding the trade of the port is valued at over a million and a quarter sterling, and the customs revenue, which amounts to some eighty thousand pounds, makes the Sheikh the richest ruler in the Gulf.

In the neighbourhood of Bahrein lies the vast burying ground which has hitherto baffled archaeologists. The generally accepted theory is that it is a relic of the Phœnicians, who are known to have traded in these waters.

The British Government as was mentioned earlier in this review announced in 1935 that they proposed transferring the principal British Naval station in the Gulf from Henjam, on the Persian side of the water, to Bahrein.

Koweit.

In the north-west corner of the Gulf lies the port which has made more stir than any place of similar size in the world. The importance of Koweit lies solely in the fact that it is a possible Gulf terminus of the Baghdad Railway. This is no new discovery, for when the Euphrates Valley Railway was under discussion, General Chesney selected it under the alternative name of the Grane—so called from the resemblance of the formation of the Bay to a pair of horns—as the sea terminus of the line. Nowhere else would Koweit be called a good or a promising port. The Bay is 20 miles deep and 5 miles broad, but so shallow that heavy expense would have to be incurred to render it suitable for modern ocean-going steamers. It

is sheltered from all but the westerly winds, and the clean thriving town is peopled by some 20,000 inhabitants, chiefly dependent on the sea, for the mariners of Koweit are noted for their boldness and hardihood.

Muhammerah.

On the opposite side of the entrance to the Shatt-el-Arab lie the territories of Sheikh Khazal of Muhammerah. The town, favourably situated near the mouth of the Karun River, has grown in importance since the opening of the Karun River route to trade through the enterprise of Messrs. Lynch Brothers. This route provides the shortest passage to Isfahan and the central tableland, and already competes with the older route by way of Bushire and Shiraz. This importance has grown since the Anglo-Persian Oil Company—now called the Anglo-Iran Oil Company—established refineries at Muhammerah for the oil which they win in the rich fields which they have tapped near Ahwaz. Its importance will be still further accentuated, by the opening of the railway to Khorremabad by way of Dizful.

Basra.

In a sense Basra and Turkish Arabistan can hardly be said to come within the scope of the frontiers of India, yet they are so indissolubly associated with the politics of the Gulf that they must be considered in relation thereto. Basra is the present sea terminus of the Baghdad Railway. It stands on the Shatt-el-Arab, sixty miles from its mouth, favourably situated to receive the whole water-borne trade of the Tigris and Euphrates Rivers. The local traffic is valuable, for the richness of the date groves on either side of the Shatt-el-Arab is indescribable, there is a considerable entrepot traffic, whilst Basra is the port of entry for Baghdad and for the trade with Persia, which follows the caravan route *via* Kermanshah and Hamadan.

The political destinies of Basra are at present wrapped up with the destinies of the new Arab State which we have set up in Mesopotamia under King Faisal. When the war was over we found ourselves committed to immense, undefined and burdensome responsibilities in that land. The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad; then the great military enterprises necessitated by the fall of Kut-al-Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary, and west to the confines of Trans-Jordan. Amongst ardent Imperialists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire. The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodigious. In these circumstances King Faisal was imported from the Hedjaz and installed on the throne under the aegis of Great Britain. Still we were committed to the support of the new kingdom, and that most dangerous condition arose—responsibility without any real power unless King Faisal was to be a mere puppet,

hence expenditure and indefinite military commitments. In these circumstances there was an insistent demand for withdrawal from the land. British policy moved slowly towards that end, but a definite step was taken in 1923. The Secretary of State for the Colonies announced this policy in a statement which is reproduced textually, for the purpose of reference. Addressing the House of Lords on May 3rd he said—

Your Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken. Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad, the terms of which I propose to read out to Your Lordships. This announcement was drawn up in consultation with King Faisal and his Government, and has their cordial assent. It is being published at Baghdad to-day.

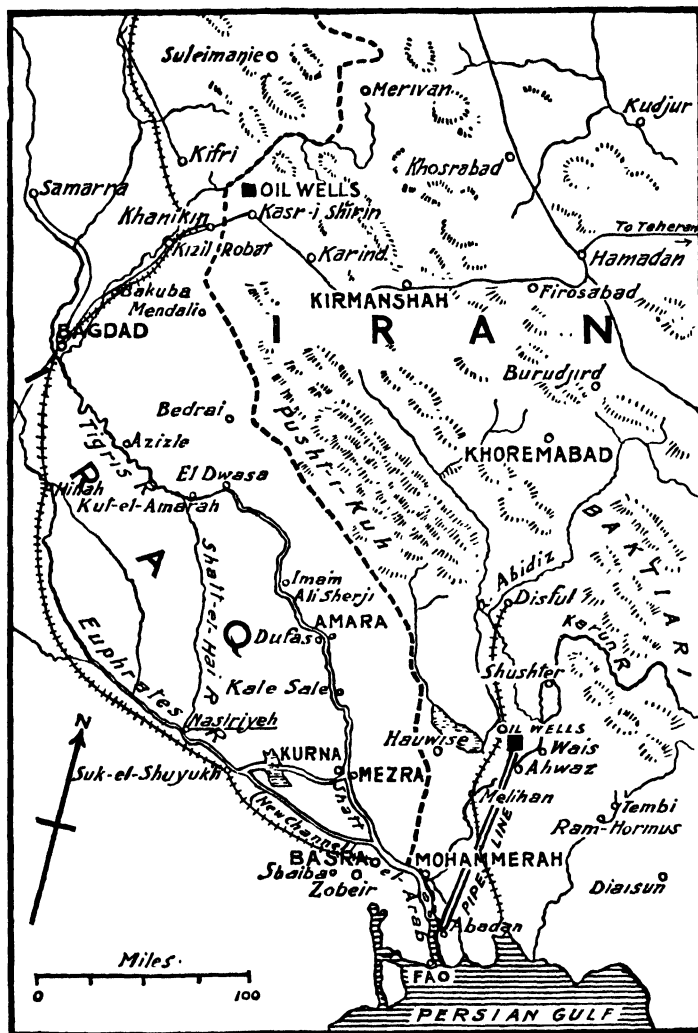

The announcement is as follows:—

"It will be remembered that in the autumn of last year, after a lengthy exchange of views, it was decided between the Governments of His Britannic Majesty and His Majesty King Faisal that a Treaty of Alliance should be entered into between His Britannic Majesty and His Majesty the King of Iraq. This Treaty, which was signed on the 10th October, 1922, and the term of which was to be twenty years (subject to periodical revision at the desire of either party) provided for the establishment of an independent Constitutional Government in Iraq, enjoying a certain measure of advice and assistance from Great Britain of the nature and extent indicated in the text of the Treaty itself and of subsidiary Agreements which were to be made thereunder."

"Since then the Iraq Government has made great strides along the path of independence, and stable existence and has been able successfully to assume administrative responsibility and both parties being equally anxious that the commitments and responsibilities of His Majesty's Government in respect of Iraq should be terminated as soon as possible, it is considered that the period of the Treaty in its present form can conveniently be shortened. In order to obviate the inconvenience of introducing amendments into the body of a Treaty already signed, it has been decided to bring about the necessary modifications by means of a protocol which, like the Treaty itself, will be subject to ratification by the Constituent Assembly.

"Accordingly a protocol has now been signed by the parties in the following terms:—

It is understood between the High Contracting Parties that, notwithstanding the provisions of Article 18, the present Treaty is all terminate upon Iraq becoming member of the League of Nations and in any case not later than four years from the ratification of peace with Turkey. Nothing in this protocol shall prevent a fresh agreement from being concluded with a view to regulate the subsequent relations between the High Contracting Parties; and negotiations for that object shall be entered into between them before the expiration of the above period."

It will be noticed that under this protocol the Treaty in its present form was to terminate on the entry of Iraq into the League of Nations or in four years, whichever might be earlier.

The position of Iraq as regards the League was that when the Treaty was ratified His Britannic Majesty was bound under Article 6 to use his good offices to secure the admission of Iraq to membership of the League of Nations as soon as possible. His Majesty's Government would be in a position to take this step on the fulfilment of the two following essential conditions, namely, the delimitation of the frontiers of Iraq, and the establishment of a stable government in accordance with the Organic Law.

The Council of the League of Nations in January, 1932, adopted the report of the Iraq Commission recommending the termination of the mandate subject to the admission of Iraq to membership of the League and Iraq entering into a number of undertakings, with regard to treatment of minorities and the administration of justice. This meant the termination of the mandate when the next Assembly of the League voted for the admission of Iraq to League membership.

Under the Treaty of Lausanne between Turkey and the Powers, which was signed in 1923, it was agreed that the frontier between King Faisal's State and Turkey, the important frontier because the future of Mosul was in dispute, should be settled by the League of Nations, should Great Britain and Turkey be unable to come to agreement by direct negotiation. These direct negotiations were opened at Constantinople, but no agreement was reached, so the question was opened before the Council of the League in September 1924. Whilst the matter was under discussion complaint was made by Great Britain that Turkey had violated the provisional frontier drawn in the Treaty of Lausanne, and certain irregular hostilities were carried on in the disputed zone. This matter too was remitted to the League, and a further provisional boundary was drawn, which was accepted by both parties.

Here the matter remained until the autumn of 1925. In order to secure the material for a decision the League of Nations despatched a neutral commission to Mosul to investigate the situation. This commission produced a long and involved report, but one which led by devious paths to a common sense recommendation. It was that the first essential in the Mosul vilayet is stable government. The desires of the people were for incorporation in the State of Iraq. If therefore the British Government was willing to extend its mandate over Iraq for a further period of twenty-five years—a guarantee of stable government—then Mosul should be incorporated in Iraq; if Britain was not willing, then Mosul should return to Turkey. When the matter came before the Council of the League Great Britain gave the necessary guarantee. The Turks thereupon challenged the whole competence of the Council to give an award under the terms of the Treaty of Lausanne. The issue was remitted to the Court of International Justice at The Hague which decided in favour of the competence of the Council. About this time there was published the "report of a distin-

guished Estonian General, General Laidoner, who had been despatched by the League to investigate allegations of brutality by the Turks in deporting Christians from their own zone, and this report was of the most damning character. Great Britain having given the necessary assurance, that she was prepared to extend her mandate over Iraq for a further twenty-five years, thereupon the Council of the League allocated the whole of the area in dispute, right up to the temporary frontier—commonly called The Brussels Line—to Iraq. The Turks refused to accept the award and withdrew from Geneva threatening force. Later, wiser counsels prevailed and in 1928 Turkey accepted a frontier substantially as drawn by the League.

A New Treaty.—A new Treaty regulating the relation of Iraq with Great Britain, the Mandatory Power, was negotiated in 1927, and signed towards the end of the year.

The Treaty declares that there shall be peace and friendship between His Britannic Majesty and His Majesty the King of Iraq. It states that "Provided the present rate of progress in Iraq is maintained and all goes well in the interval, His Britannic Majesty will support the candidature of Iraq for admission to the League of Nations in 1932." It stipulated that separate agreements superseding those of March 25, 1924, shall regulate the financial and military relations.

The King of Iraq undertook to secure the execution of all international obligations which His Britannic Majesty had undertaken to see carried out in respect of Iraq. He also undertook not to modify the existing provisions of Iraq's organic law so as adversely to affect the rights and interests of foreigners, and to constitute any difference in the rights before the law among Iraqis on the grounds of differences of race, religion, or language.

There was provision for full consultation between the high contracting parties in all matters of foreign policy which may affect their common interests. The King of Iraq undertook so soon as local conditions permit to accede to all general international agreements already existing, or which might be concluded thereafter with the approval of the League of Nations, in respect of the slave trade, the traffic in drugs, arms and munitions, the traffic in women and children, transit navigation, aviation, and communications, and also to execute the provisions of the Covenant of the League of Nations, the Treaty of Lausanne, the Anglo-French Boundary Convention, and the San Remo Oil Agreement in so far as they apply to Iraq.

There was provision against discrimination in matters concerning taxation, commerce, or navigation against nationals or companies of any State which is a member of the League of Nations, or of any State to which the King of Iraq had agreed by Treaty that the same rights should be ensured as if it were a member of the League.

Any difference that might arise between the high contracting parties was to be referred to the Permanent Court of International Justice provided for by Article Fourteen of the Covenant of the League. The Treaty was made

Railway Position in the Middle East.

subjected to revision with the object of making all the modifications required by the circumstances when Iraq entered the League of Nations.

It is important to remember that there is a considerable difference between the vilayet of Basra and the other portions of King Faisal's State. Basra has for long been in the closest commercial contact with India, and is in many respects a commercial appanage of Bombay. Its people have not much in common with those of the North. They took no part in the Arab rising which followed the war, and they ask nothing better than to remain in close touch with India and through India with the British Government. If we are correct in the supposition that Basra is destined to be the great port of the Middle East, then its future under an Arab State, with no experience of administration in such conditions, is one of the greatest interest, which can hardly be regarded as settled by the policy underlying the declaration which is set out above.

The Persian Shore.

The Persian shore presents fewer points of permanent interest. The importance of Bushire is administrative rather than commercial. It is the headquarters of Persian authority, the residence of the British Resident, and the centre of many foreign consuls. It is also the main entrepot for the trade of Shiraz, and competes for that of Ispahan. But the anchorage is wretched and dangerous, the road to Shiraz passes over the notorious kotals which preclude the idea of rail connection, and if ever a railway to the central tableland is opened, the commercial value of Bushire will dwindle to insignifi-

cance. Further south lies Langah, reputed to be the prettiest port on the Persian coast, but its trade is being diverted to Debel on the Pirate Coast. In the narrow channel which forms the entrance to the Gulf from the Arabian Sea is Bunder Abbas. Here we are at the key of the Gulf. Bunder Abbas is of some importance as the outlet for the trade of Kerman and Yazd. It is of still more importance as a possible naval base. To the west of the town between the Island of Kishm and the mainland, lie the Clarence Straits which narrow until they are less than three miles in width, and yet contain abundance of water. Here, according to sound naval opinion, there is the possibility of creating a naval base which would command the Gulf. The great obstacle is the climate, which is one of the worst in the world. On the opposite shore, under the shadow of Cape Musandim, lies another sheltered deep-water anchorage, Elphinstone's Inlet, where the climate conditions are equally vile. But between these two points there is the possibility of controlling the Gulf just as Gibraltar controls the Mediterranean. For many years Bunder Abbas loomed large in public discussions as the possible warm water port for which Russia was seeking. There was established a British Naval station at Honjam, a small island close to Kishm, where the station was constructed under agreement with the Persian authorities. Its evacuation by Great Britain in favour of Bahrein was decided upon by the British Government in 1935. On the Mekran coast, there is the cable station of Jask, and the possible port of Chahbar. An interesting development, in the Gulf in the past two or three years has been the institution of a Persian Navy.

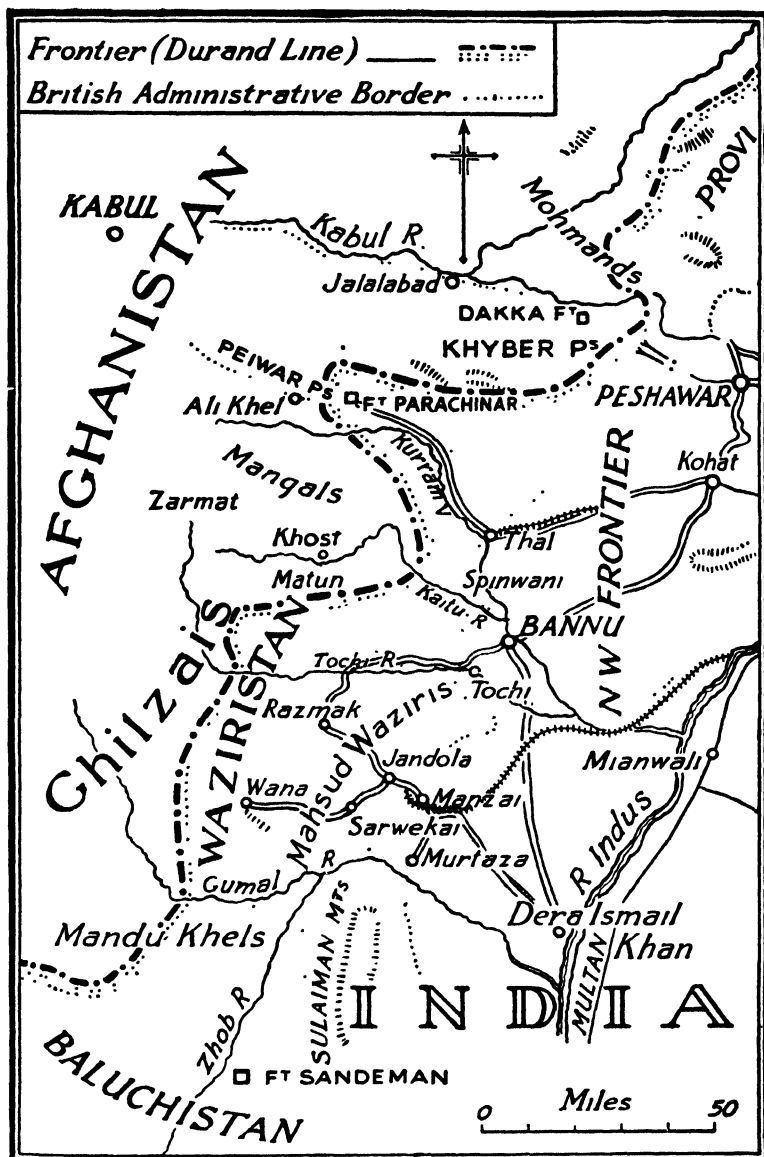

II.—SEISTAN.

The concentration of public attention on the Persian Gulf was allowed to obscure the frontier importance of Seistan. Yet it was for many years a serious preoccupation with the Government of India. Seistan lies midway north and south between the point where the frontiers of Russia, Persia and Afghanistan meet at Zulfikar and that where the frontiers of Persia and of our Indian Empire meet on the open sea at Gwattur. It marches on its eastern border with Afghanistan and with Baluchistan. It commands the valley of the Helmand, and with it the road from Herat to Kandahar, and its immense resources as a wheat-producing region have been only partly developed under Persian misrule. It offers to an aggressive rival, an admirable strategic base for future military operations; it is also midway athwart the track of the shortest line which could be built to connect the Trans-Caspian Railway with the Indian Ocean, and if and when the line from Askabad to Meshed were built, the temptation to extend it through Seistan would be strong. Whilst the gaze of the British was concentrated on the North-West Frontier, and to possible lines of advance through Kandahar to Quetta, and through Kabul to Peshawar, there can be little doubt that Russian attention was directed to a more leisurely movement through Seistan, if the day came when she moved her armies against India.

Whether with this purpose or not, Russian intrigue was particularly active in Seistan in

the early years of the century. Having Russia fled Khorassan, her agents moved into Seistan and through the agency of the Belgian Customs officials, "scientific missions" and an irritating plague cordon, sought to establish influence, and to stifle the British trade which was gradually being built up by way of Nushki. These efforts died down before the presence of the McMahon mission, which, in pursuance of Treaty rights, was demarcating the boundary between Persia and Afghanistan, with special reference to the distribution of the waters of the Helmand. They finally ceased with the conclusion of the Anglo-Russian Agreement. Since then the international importance of Seistan has waned.

The natural conditions which give to Seistan this strategic importance persist. For a time, British influence increased in substance through the Seistan trade route. The distance from Quetta to the Seistan border at Killa Robat is 465 miles, most of it dead level, and it was provided with fortified posts, dak bungalows, wells, and all facilities for caravan traffic. The railway was pushed out from Spezzand, on the Bolan Railway, to Nushki, so as to provide a better starting point for the caravans than Quetta. This line was extended to Duzdap, 54 miles on the Persian side of the Indo-Persian Frontier during the war as a military measure, but the traffic after the re-establishment of peace supported only two trains a week. There then arose trouble owing to

Persian insistence on the collection of Customs duties on rations taken across their frontier for the railway staff. This led to the stoppage of train running on the Persian side of the Frontier Negotiations for years dragged on to bring about a reasonable settlement in regard to the situation. The Persian Foreign Minister, Mons. B. Kazem, paid a visit to New Delhi in

November 1935, and travelled eastward from Persia by the Baluchistan route. He was interested, as his Government's representative in the development of railways in Seistan and in securing British-Indian assistance in that enterprise. Only informal conversations on the subject took place.

III.—IRAN.

From causes which only need to be very briefly set out, the Iran question as affecting Indian frontier policy has receded until it is of no account. Reference is made in the introduction to this section to the fact that the conclusion of the Anglo-Russian Agreement left us a bitter legacy in Persia. That Agreement divided Iran into two zones of influence, and the Iranians bitterly resented this apparent division of their kingdom between the two Powers, though no such end was in view. German agents, working cleverly on this feeling, established an influence which was not suspected, and when the war broke out they were able to raise the tribes in opposition to Great Britain, in the South, and after the fall of Kut-al-Amara when a Turkish Division penetrated Western Iran, they exercised a strong influence in Teheran. With the defeat of Turkey and the Central Powers this influence disappeared, but at that time there was no authority in Iran besides that of the British Government, which had strong forces in the North-West and controlled the southern provinces through a force organised under British officers and called The South Persian Rifles. It was one of the first tasks of the British Government to regularise this position, and for this purpose an agreement was reached with the then Persian Government, the main features of which were:—

- To respect Persian integrity;
- To supply experts for Persian administration;
- To supply officers and equipment for a Persian force for the maintenance of order;
- To provide a loan for these purposes;
- To co-operate with the Persian Government in railway construction and other forms of transport.

Both Governments agreed to the appointment of a joint committee to examine and revise the Customs tariff.

The second agreement defined the terms and conditions on which the loan was to be made to Persia. The loan was for £2,000,000 at 7 per cent. redeemable in 20 years. It was secured on the revenues and Customs' receipts assigned for the repayment of the 1911 loan and should these be insufficient the Persian Government was to make good the necessary sums from other sources.

The Present Position.—We have given the main points in the Anglo-Iran agreement, because few documents have been more misunderstood. Those who desire to study it in greater detail will find it set out in the Indian Year Book for 1921, page 138 *et seq.* It has been explained that most Iranians construed it into a guarantee of protection against all external enemies. When the British troops

in the north-west retired before the Bolsheviks, the Iranians had no use for the Agreement and it soon became a dead instrument. It was finally rejected and the advisers who were to have assisted Persia under it withdrew.

A remark frequently heard amongst soldiers and politicians in India after the War was that Great Britain must take an active hand in Iran because she could not be a passive witness to chaos in that country. The view always taken in the Indian Year Book was that the internal affairs of Iran were her own concern; if she preferred chaos to order that was her own lookout, but left alone she would hammer out some form of Government. That position has been justified. The Sirdar Sipah, or commander-in-chief, a rough but energetic soldier, gradually took charge of Iranian affairs and established a thinly-veiled military dictatorship which made the Government feared and respected throughout the country for the first time since the assassination of Shah Nasr-ed-din. A body of capable Americans under Dr. Millsbaugh restored order to the chaotic finances. These two forces operating in unison gave Iran the best government she had known for a generation. But the Sirdar Sipah chafed under the irregularities of his position, with a Shah spending his time in Europe and wasting the resources of the country. He moved to have his position regularised by the deposition of the absentee Shah and his own ascent of the throne. At first he was defeated by the opposition of the Mollahs, but in 1925 prevailed, and the Shah was formally deposed and the Sirdar Sipah chosen monarch in his place under the title of Reza Shah Pahlavi. The change was made without disturbance, and Iran entered on a period of peace and consolidation which has removed it from the disturbing forces in the post-war world. Since then considerable progress has been made with the reform of the administration, and many projects are afoot for the improvement of communications, which is the greatest need of the land, such as an air service to Teheran and railway construction. The least reassuring episode was the departure of the American financial mission, which had done admirable work in the restoration of the finances. When their contract expired Dr. Millsbaugh and his colleagues were offered a renewal of it on terms which they did not regard as satisfactory, especially in regard to the powers they were to exercise. They therefore withdrew from the country, and have been replaced by other foreign advisers. The general situation was gravely disturbed in 1932 by the sudden termination by the Iran Government of the Anglo-Iran Oil Co's concession, a matter affecting one of the biggest industrial undertakings in the

world and millions sterling of capital. The intervention of the British Government led to the reference of the trouble to the League of Nations and this paved the way for negotiations between the Company and the Iran Government. While these were being settled some

progress was also made with general negotiations between the British and Iran Governments for an agreement covering all outstanding points of difficulty between them.

Mr. Knatchbull-Hugeson is British Minister at Teheran.

IV.—THE PRESENT FRONTIER PROBLEM.

There yet remains a small part of British India where the King's writ does not run. Under what is called the Durand Agreement with the Amir of Afghanistan, the boundary between Indian and Afghanistan influence was settled, and it was delimited in 1903 except for a small section which was delimited after the Afghan War in 1919. But the Government of India have never occupied up to the border. Between the administered territory and the Durand line there lies a belt of territory of varying width extending from the Gomal Pass in the south, to Kashmir in the north; this is generically known as the Tribal Territory. Its future is the keynote of the interminable discussions of frontier policy for nearly half a century.

This is a country of deep valleys and secluded glens, which nature has fenced in with almost inaccessible mountains. It is peopled with wild tribes of mysterious origin, in whom Afghan, Tartar, Turkoman, Persian Indian, Arab and Jewish intermingle. They had lived their own lives for centuries, with little intercourse even amongst themselves, and as Sir Valentine Chirol truly said "the only bond that ever could unite them in common action was the bond of Islam." It is impossible to understand the Frontier problem unless two facts are steadily borne in mind. The strongest sentiment amongst these strange people is — or was until comparatively recently — the desire to be left alone. They value their independence much more than their lives. The other factor is that the country does not suffice even in good years to maintain the population. They must find the means of subsistence outside, either in trade, by service in the Indian Army or in the Khassadars, or else in the outlet which hill-men all the world over have utilised from time immemorial, the raiding of the wealthier and more peaceful population of the Plains. The internal peace enforced amongst them by British control has in late years led to an increase in their numbers and this has aggravated their economic problem.

Frontier Policy.

The policy of the Government of India toward the Independent Territory has ebbed and flowed in a remarkable degree. It has fluctuated between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the tribesmen entirely to their own resources, punishing them only when they raided British territory. Behind both the policies lay the menace of a Russian invasion, and that coloured our frontier policy until the Anglo-Russian Agreement. This induced what was called Hit and Retire tactics. In the half century which ended in 1897 there were nearly a score of punitive expeditions, each one of which left behind a

legacy of distrust, and which brought no permanent improvement in its train. The fruit of the suspicion thus engendered was seen in 1897. Then the whole Frontier, from the Malakand to the Gomal, was ablaze. The extent of this rising and the magnitude of the military measures which were taken to meet it compelled a consideration of the whole position. The broad outlines of the new policy were laid down in a despatch from the Secretary of State for India, which prescribed for the Government the "limitation of your interference with the tribes, so as to avoid the extension of administrative control over tribal territory." It fell to Lord Curzon to give effect to this policy. The main foundations of his action were to exercise over the tribes the political influence requisite to secure our imperial interests, to pay them subsidies for the performance of specific duties, but to respect their tribal independence and leave them, as far as possible, free to govern themselves according to their own traditions and to follow their own inherited habits of life without let or hindrance.

New Province.

As a first step Lord Curzon took the control of the tribes under the direct supervision of the Government of India. Up to this point they had been in charge of the Government of the Punjab, a province whose head is busied with many other concerns. Lord Curzon created in 1901 the North-West Frontier Province, and placed it in charge of a Chief Commissioner, with an intimate frontier experience, directly subordinate to the Government of India. This was a revival of a scheme prepared by Lord Lytton in 1877, and often considered afterwards, but which had slipped for lack of driving power. Next, Lord Curzon withdrew the regular troops so far as possible from the advanced posts, and placed these fortalices in charge of tribal levies, offered by a handful of British officers. The most successful of these was the Khyber Rifles, which steadfastly kept the peace of that historic Pass until 1919. At the same time the regular troops were cantoned in places whence they could quickly move to any danger point, and these bases were connected with the Indian railway system. In pursuance of this policy frontier railways were run out to Dargal, and a narrow-gauge line, since converted to the broad-gauge, was constructed from Kushalgarh to Kohat, at the entrance of the Kohat Pass, and to Thal in the midst of the Kurram Valley. These railways were completed by lines to Tonk and Bannu. By this means the striking power of the regular forces was greatly increased. Nor was the policy of economic development neglected. The railways gave a powerful stimulus to trade and the Lower Swat Canal converted frac-

tious tribesmen into successful agriculturists. This policy of economic development is receiving a great development through the completion of the Upper Swat Canal (q. v. Irrigation). Now it is completed there are other works awaiting attention. For many years this policy was completely justified by results.

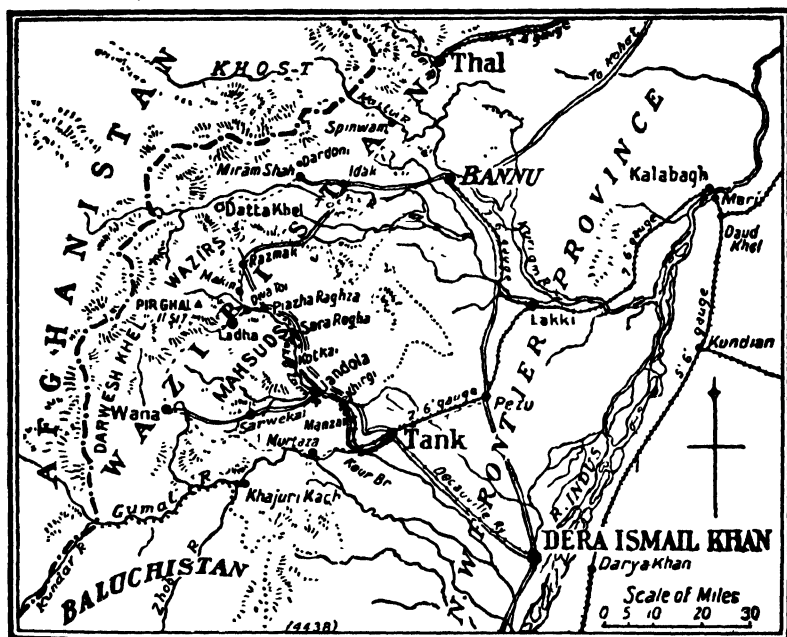

A New Policy.

It saved us from serious complications for nearly twenty years, although the position could never be said to be entirely satisfactory, particularly in Waziristan, peopled by the most reckless raiders on the whole border-line, with a bolt hole into Afghanistan when pressed from the British side. It endured through the Great War and did not break down until the Amir of Afghanistan sought refuge from his internal troubles in a jihad against India. In this insane enterprise the Afghans placed less reliance in their regular troops which have never offered more than a contemptible resistance to the British forces than in the armed tribesmen. In this they were justified, for the Indian Military authorities failed to give timely support to the advanced militia posts, some of these posts were ordered to withdraw, the Militia collapsed and the most serious fighting was with the tribesmen. The tribal levies collapsed with almost universal swiftness. The Southern Waziristan Militia broke and there was serious trouble throughout the Zhob district. The Afridis, our most serious enemies in 1897, and the most powerful of the tribes on the North-West Frontier, remained fairly quiet throughout the actual hostilities with Afghanistan, but later it was necessary to take measures against a leading malcontent and destroy his fort at Chora. But the Mahsuds and the Waziris broke into open hostilities. Their country lies within the belt bounded by the Durand line and the Afghan frontier on the west, and by the districts of Bannu and Dehra Ismail Khan on the east. Amongst them the Afghan emissaries were particularly active and as they could put in the field some 30,000 warriors, 75 per cent. armed with modern weapons of precision, they constituted formidable adversaries. They refused to make peace even when the Afghans craved in. They rejected our terms and active measures were taken against them. The fighting was the most severe in the history of the Frontier. The Mahsuds fought with great tenacity. Their shooting was amazingly good; their tactics were admirable, for amongst their ranks were many men trained either in the Militia or in the Indian Army; and more than once they came within measurable distance of considerable success. They were assisted by the fact that the best trained troops in the Indian Army were still overseas and younger soldiers were opposed to them. But their very tenacity and bravery were their own undoing; their losses were the heaviest in the long history of the Borderland and when the Mahsuds made their complete submission in September 1921 they were more severely chastened than at any time during their career.

A New Chapter.—As the result of the Afghan War of 1919, Indian frontier policy was again thrown into the melting pot. There was much vague discussion of the position

in the course of the months which followed the Afghan War and the troubles in Waziristan which succeeded it, but this discussion did not really come to a head until February-March 1922. The Budget then presented to the country revealed a serious financial position. It showed that despite serious increases in taxation, the country had suffered a series of deficits, which had been financed out of borrowings. Further heavy taxation was proposed in this Budget, but even then the equilibrium which the financial authorities regarded as of paramount importance was not attained. When the accounts were examined, it was seen that the heaviest charges on the exchequer were those under Military Expenses, and that there was an indefinitely large, and seemingly unending expenditure on Waziristan. This forced the Military, and allied with it the Frontier, expenditure to the front. In actual practice the discussion was really focussed on Waziristan. In essentials it was the aged controversy—shall we deal with this part of the Frontier on what is known as the Sandeman system, namely, by occupying commanding posts within the country itself, dominating the tribesmen but interfering little in their own affairs; or shall we revert to what was known as the close border system, as modified by Lord Curzon, of withdrawing our regular troops to strategic positions outside the tribal area, leaving the tribesmen, organised into militia, to keep the passes open, and punishing the tribesmen by expeditions when their raiding propensities become unbearable.

The Curzon Policy.—The Curzon policy, adopted in 1899, to clear up the aftermath of the serious and unsatisfactory Frontier rising in 1897, was a compromise between the "occupation" and the "close border" policies. It was based on the withdrawal of the regular troops so far as possible to cantonments in rear whilst the frontier posts, such as those in the Tochi at Wana and in the Khyber and Kurram were held by militia, recruited from amongst the tribesmen themselves. The cantonments for regular troops were linked so far as possible with the Indian railway system, so as to permit of rapid reinforcement. But it must be remembered that like all Frontier students, Lord Curzon did not regard this as the ideal policy. He wrote in the Memorandum formulating his ideas: "It is of course inevitable that in the passage of time the whole Waziri country up to the Durand line will come more and more under our control. No policy in the world can resist or greatly retard that consummation. My desire is to bring it about by gradual degrees and above all without the constant aid and presence of British troops." The Curzon policy, though it was not pursued with the steadfastness he would have followed if he had remained in control, gave us moderate—or rather it should be said bearable—frontier conditions until the Afghan War. It then broke down, because the tribal militia, on which it was based, could not, when left without the support of regular troops in the day of need, withstand the wave of fanaticism and other conditions set up by the Afghan invasion of 1919. The Khyber militia faded away; the Waziri militia either mutinied, as at Wana, or deserted. The pillar of the Curzon system fell.

VAZIRISTAN.

The Policy.—The policy first adumbrated to meet these changed conditions was outlined by Lord Chelmsford, the then Viceroy, in a speech which he addressed to the Indian Legislature. He said it had been decided to retain commanding posts in Waziristan; to open up the country by roads; to extend the main Indian railway system from its then terminus, Jamrud, through the Khyber to the frontier of Afghanistan, and to take over the duties of the Militia by regular troops. That immediate policy was soon modified so far as the policing of these frontier lines by regular troops was concerned. Such duties are immensely unpopular in the regular army, which is not organised and equipped for work of this character. Irregulars have always existed on the frontier, and as they had disappeared with the Militia, it was necessary to recreate them. The new form of irregular was what have been called Khassadars and Scouts. The Kha-

sadar is an extremely irregular. He has no British officers and no uniform, except a distinguishing kind of *pagri*. In contradistinction to the old Militia, he finds his own rifle. As one informed observer remarked, the beauty of the system is that so long as the Khassadars, under their own headmen, secure the immunity of the caravans and perform their other police duties, they draw their pay and no questions are asked. If they desert in the day of trouble, they lose their pay but the Government loses no rifles, nor does it risk mutiny or the loss of British and Indian officers. But the application of this policy produced an acute controversy. It was one thing to say that commanding posts in Waziristan should be retained; it was another to decide what these posts should be. We must therefore consider the special problem of Waziristan. The Scouts are a mobile, mounted, irregular force not territorially recruited, officered by British officers.

V.—WAZIRISTAN.

We can now approach the real frontier question of the day, the future of Waziristan. What follows is drawn from an admirable article contributed some years ago to "The Journal of the United Service Institution of India," written by Lt.-Col. G. M. Routh, D.S.O.

Geographically Waziristan is a rough parallelogram averaging 60 miles from East to West and 160 from North to South. The western half consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the water-shed between the Indus and the Helmund Rivers and corresponds with the Durand Line separating India from Afghanistan. This is the western boundary. On the east is the Indus. North is the watershed of the Kurram River running East and West about 30 miles north of Bannu separating Waziristan from the Kohat District. South is a zigzag political boundary from the Durand Line running between Wana and Fort Sandeman in Baluchistan with a turn southwards to the Indus.

The western half is a rugged and inhospitable medley of ridges and ravines straggled and confused in hopeless disarray. The more inhabited portions lie well up the slope at heights of four to six thousand feet. Here are our outposts of Wana and Ladhra some 15 and 20 miles respectively from the Durand Line, in the centre of the grazing district, the latter within five miles of important villages of Kaniguram and Makin.

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sand desert in the Marwat above Peshu.

Where irrigation or river water is obtainable cultivation is attempted under conditions which can hardly be encouraging. Other tracts like that between Peshu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfall.

Inhabitants.—The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of their richer and more peaceful neighbours. The name originates according to tradition from one Wazir, two of whose grandsons were

the actual founders of the race. Of the four main tribes Darweshkhel, Mahsuds, Dawars and Batanni, only the first two are true Wazirs. Their villages are separate though dotted about more or less indiscriminately, and inter-marriage is the exception—in fact all traditionally are in open strife, a circumstance which, until some bright political comet like the Afghan War of 1919 joined them together, as materially aided our dealings with them.

Unlike other parts of India, however, these wild people acknowledge little allegiance to maliks or headmen. No one except perhaps the Mullia Powindah till his death in 1913 could speak of any portion of them as his following.

Policy.—The policy of the British was at first one of non-interference with the tribes. Even now only part of the country is administered. Gradually it was found that more and more supervision became necessary to control raiding and this was attempted by expeditions to portions of the country with Regulars, followed by building posts and brick towers to be held by Militia. These posts were at first placed at the points where raiders usually debouched. The Political Officers, at first supported by Regulars, built up from 1904 onwards a force of some 3,000 Militia with British Officers at their disposal, who were backed up by the garrisons at Bannu and Dera Ismail Khan. In addition certain allowances were made to the tribes for good behaviour, prevention of raids and surrender of offenders when required; also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied. Wana was occupied in 1895 at the request of the Wana Wazirs. Similarly the Tochi in 1896. In the comprehensive expedition of 1895-96 when this policy was put into effect, the British arms were shown in every remote valley in the vain hope of taming the Mahsuds. It was hoped the various posts would prove a pacifying influence and a rallying ground for Government supporters. From 1904 to 1919 they were held by Militia. Roads and communications were improved and tribal allowances augmented by sales of produce to the troops on a liberal scale.

A Programme.—Lt.-Col. Routh then outlined a possible policy for Waziristan. We give it textually, because we believe that when it was written it reflected how military opinion in India was developing:—

"To the unprejudiced mind it appears more practical to grasp the nettle firmly and dominate the inhabited tracts. Why should not the road now being made to Ladha be continued 36 miles north to the Tochi road at Datta Khel and 29 miles south to Wana? Why should we not occupy the healthier portions of Waziristan rather than the foothills or Cis-Indus zones? The Razmak district round Makin 6,000 feet up is both healthy and fertile. The same applies to the Shawal valley lying behind Pir Gul, the national peak near Ladha rising to a height of 11,556 feet above the sea. The Wana plain, 5,000 feet up, 30 miles by 15, could with railways support an army corps; there is no doubt that a forward railway policy will help to solve the problem. A line has been surveyed from Tank to Draband and thence up the valley to Fort Sandeman, so connecting with the Zhob and perhaps later to Wana. The Gumal Tangi from Murtaza to Khajuri Kach is the apparently obvious route, but would be prohibitively expensive in construction and require much tunnelling. Beyond Khajuri Kach *via* Tanal and Rogha Kot to Wana, some 23 miles, offers no difficulty. The old policy of the raiders working westwards and our retributive expeditions stretching their very temporary tentacles eastwards seems to suggest better lateral communications. The broad gauge at Kohat might without undue cost be extended to Thal and thence to Idak *via* Spinwam. From here till further extension proved desirable, a motor road through Razmak, Makin and Dwatoi to link up with that now surveyed to Ladha sounds possible to the looker on. Eventually such communications, road, rail, or both, could continue to Wana, Fort Sandeman and Quetta *via* Hindu Bagh, a strategic line offering great defensive possibilities substituting Razmak, which resembles Ootacamund, and healthy uplands for the deadly fever spots now occupied. The very fact of employing the tribesmen on these works with good pay and good engineers tends to pacify the country as well as providing healthy accessible hill stations in place of the proverbially comfortless cantonments which now exist in this part of the Frontier."

A Compromise.—A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Mahsud rebellion was made by the Foreign Secretary, Sir (then Mr.) Denys Bray, in the course of a Budget discussion in the Legislative Assembly on 5th March 1923. He outlined neither a Forward policy nor a Close Border policy. Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the one plan nor the other remained within the bounds of reasonable argument.

The Foreign Secretary explained that the ingredients of the Frontier problem at the present day are essentially three, namely, the Frontier districts, the neighbouring friendly State of Afghanistan, and the so-called Independent Territory, this last being the belt of unsettled mountain country which lies between

the borders of British India and India. He proceeded specially to show that this belt is, in fact, within India "... It is boundary pillars that mark off Waziristan from Afghanistan; it is boundary pillars that include Waziristan in India. We are apt to call Waziristan independent territory; and it is only from the point of view of our British districts that these tribes are trans-frontier tribes. From the point of view of India, from the international point of view that is, they are cis-frontier tribesmen of India. If Waziristan and her tribes are India's scourge, they are also India's responsibility—and India's alone. That is an international fact that we must never forget."

Sir Denys next referred to the triumph of the Sandeman policy in Baluchistan. He pointed out that some people long ago believed that the same policy would prove effective in Waziristan. "But what was a practical proposition 20 or 30 years ago is not necessarily so now. The task is infinitely more difficult to-day, chiefly because the tribesmen are infinitely better armed; their arms having increased at least tenfold during the last 20 years." Dealing with the Close Border prescription he showed that if one erected a Chinese wall of barbed-wire fence along the plain some distance below the hills, "all the time the problem in front of us would be going from bad to worse, with the inevitable increase of arms in the trans-border and with that inevitable increase in the economic stringency in this mountainous tract, which would make the tribesmen more and more desperate, more and more thrown back on barbarism..... A rigid Close Border policy is really a policy of negation, and nothing more..... We might gain for our districts a momentary respite from raids but we would be leaving behind a legacy of infinitely worse trouble for their descendants."

The settled policy of Government in Waziristan, Sir Denys showed, was the control of that country through a road system, of which about 140 miles would lie in Waziristan itself and one hundred miles along the border of Derajat, and the maintenance of some 4,600 Khasadars and of some 5,000 irregulars, while at Razmak 7,000 feet high and overlooking northern Waziristan there would be an advanced base occupied by a strong garrison of regular troops. Razmak he showed to be further from the Durand Line than the old-established posts in the Tochi. In the geographical sense, therefore, the policy was, in one signal respect, a backward policy. None the less, it was a forward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through civilization, of the most backward and inaccessible, and therefore the most truculent and aggressive tribes on the border. "Come what may civilization must be made to penetrate these inaccessible mountains or we must admit that there is no solution to the Waziristan problem, and we must fold our hands while it grows inevitably worse."

The policy thus initiated has proceeded with results according with the highest reasonable expectations and exceeding the most sanguine hopes of most people concerned in its formulation.

The roads are policed by the Khassadars, who have, in the main, proved faithful to their trust. The open hostility of the Waziri tribesmen to the presence of troops and other agents of Government in their midst, which at the outset they showed by shooting up individuals and small bodies of troops on every opportunity, has faded away, and the people have shown an understanding of the rule of law, and, under the control exercised, a readiness to conform to it. In various small but significant ways, methods of civilization have caught the imagination of the people and won their approval. Thus, the safety of the roads has encouraged, and is buttressed by a considerable development of motor-bus traffic. The roads, as the King's Highway, are officially held to be sacrosanct, that is no shooting up or other pursuit of personal or tribal feuds is permitted upon them. This permits villagers to proceed to and from the plains towns in safety. Under the influence of their women, the tribesmen applied that the ban against shooting upon the highway would be extended to all the country for three miles on either side of the highway. Tentative efforts to introduce primary education proved possible and achieved as much success as could be expected. The hospitals and dispensaries maintained for irregular troops, called Scouts, employed about the country, attend to the wants of the tribespeople who come to them. So much has this arrangement been appreciated that the Mahsuds formally applied for the establishment of a hospital of their own. With grim humour, they offered to provide such an institution with the necessary surgical instruments, saying that they had saved this from the time when the British formerly left the country. In other words, they offered what they had captured or looted during the 1919 emeute.

A remarkable illustration of the acceptance by the people of the new conditions was provided a year or two ago by the Wana Wazirs when they partitioned the Political Authorities for the occupation of south Waziristan corresponding with that already established in northern Waziristan. A motor road had already been run out from Jhandola through Chagmalai and the Shahur Tangi to Sarwekal. A brigade of troops, hitherto stationed at Manzal, whereabouts the Tak-i-Zam, after flowing down its deep valley from northern Waziristan, debouches on to the Derajat, was accordingly ordered up to Wana in the autumn of 1929. It proceeded throughout the journey thither without opposition and was warmly welcomed by the tribes people at Wana, where it established itself in a favourably sited camp not far from the fort which was the earlier centre of British occupation. There it happily remains.

The reoccupation of Wana and the circumstances in which it took place illustrate that a policy is a live thing. In other words, it is not a programme which can reach fulfilment or completion. It lives and always waits upon some new action to give it further expression. In this respect the new policy, though it has only demonstrably been applied in Waziristan, must be regarded as that which governs the actions of the authorities in regard, at least to the whole Frontier region lying between

Baluchistan and the Khyber Pass, except, possibly, the Kurram Valley.

The area cultivated by the villagers of Wana plain doubled by the end of 1931 and the people declared their readiness to surrender their firearms if their neighbours also gave up theirs or were deprived of them. A road has been built commencing Fort Sandeman *via* Gulkach, on the Gomal river, with Tenal, on the Sai-wekal-Wana road. A motor road has also been constructed from Razmak through Kaniguram, in the heart of the Mahsud country to Wana. It was completed in 1933 and the only disputes connected with its construction arose from the rivalry of the tribesmen whose villages lie along the route and who sometimes fought one another to secure road-making contracts.

A startling new development upon the North West Frontier during 1930 was the spread thereto of agitation carried on by the Indian National Congress in the interior of India in pursuit of its efforts to bring political pressure to bear upon the Government of India, and above them, His Majesty's Government. The Congress at its annual session at Lahore in the week following Christmas, 1929, adopted a programme aiming at the separation of India from the British Empire and at the promotion of revolution in India to secure this end. In particular, it avowedly set out "to make Government impossible." Revolutionary agitation, and especially a campaign to promote disobedience of the civil law in order to bring the administration to a stand-still, commenced all over India immediately after the Congress meetings. The settled districts of the N.W. F. P. were the scene of this, in common with the rest of the land. The agitation was there carried on by Congress agents organised in what are known as Khilafat Committees. For their purpose they made special use of misrepresentations of the Sarda Act, recently passed by the Indian Legislature by the official and Hindu votes against the opposition of the Muslim non-official members. This measure makes illegal and provides penalties for the marriage of boys and girls below stated minimum ages. The age at which marriage may take place is also in general terms laid down for Mohammedans by their religious law. Hence, the Muslims in British India, while acknowledging that the Sarda Act would not in practice affect them, because its provisions in no way over-rule their religious law, nevertheless saw in the measure an act affecting the domain of their religious law, and passed, in spite of their dissent, in a Legislature in which Muslims are, by themselves, a hopeless minority. They regarded its enactment as a grave illustration of their fears that under any scheme of democratic self-government in India, Muslim interests would not be safe against disregard by the Hindu majority.

Outbreak at Peshawar in 1930.—This Muslim apprehension, after the passing of the Act, strongly influenced the attitude of the community towards all questions of political reform, and the lever which misrepresentation of the Act provided for stirring up anti-Government agitation in the almost wholly and fanatical Muslim province in the north can easily be understood. Grossly untrue propaganda was carried on; it was, for instance,

alleged that under the Act all girls must be medically examined before marriage. An elaboration of this untruth was that the Government were recruiting a large body of Hindu inspectors to make the examinations. And the agitation was deliberately pushed outwards from the settled districts of the N. W. F. P. into the tribal areas. Waziristan was amongst the first of them to be inundated with the propaganda. This was in March-April 1929. The poison spread outwards from Peshawar into Tirah about the same time. The agitation was sedulously carried on in the district northward of Peshawar city and from thence was pushed into Mohmand country. The first point of violent combustion was Peshawar city, where the mob murderously broke out on 23rd April 1930. Within a short time, Afridi bands descended the ravines and nullahs from Tirah to join in the fray. The Mohmands became greatly excited and sent down bands to sit near the border and watch for an opportunity to join in. The Upper Tochi Waziris simultaneously took to arms and shortly afterwards the Mahsud Waziris, about Ladha, did the same. At this stage, the development of the Air arm in India proved of incalculable value. Aeroplanes patrolled the whole country and were frequently employed by the political authorities to take preventive and punitive action by bombing. The road system, meanwhile, enabled troops to be moved at will to positions of advantage for dealing with whatever serious tribal aggression appeared likely.

In the result, the Mohmands, after being bombed several times, found discretion the better part of valour and made no descent in force. The Afridis twice endeavoured to raid Peshawar in force but by combined air and land action were both times driven back to their hills with no achievement to report. The Orakzais of southern Tirah threatened to descend by the Ublan Pass upon Kohat and their western clans attacked a post in the Upper Kurram and endeavoured to attack Parachinar. Helped by the machinations of Congress agents, they succeeded in drawing two or three clans of Afghan tribesmen across the border into the fray. Combined air and ground action crushed these efforts. The Tochi Waziris heavily attacked Datta Khel, but were speedily brought to order by force. The Mahsuds were similarly repulsed and punished when they assaulted Sorarogha, in the valley of the Takli-Zam.

All outbreaks of revolt were suppressed in the same manner and the establishment of new fortified posts on the Peshawar plain, immediately opposite the main valleys leading out of Tirah, and the construction of roads for their service, now indicate the application of the new frontier policy in that region. The Afridis long refused to assent to these, but being thereby deprived of access to their normal winter grazing grounds on the Khajuri and Aka Khul plain, and prevented from visiting Peshawar, their marketing centre, they came in an accepted peace under the new conditions before the opening of the winter of 1931-32. The Afridis have later asked for roads into Tirah but are not yet sufficiently agreed among themselves about the point for construction successfully to proceed.

It will be seen that the events of the summer of 1930 put the policy to a severe test, and that its successful operation in the emergency was specially assisted by the Royal Air Force. The resultant position appears, then, to be that the control of the tribes, where the policy has already been expressed in road building and in the establishment of suitable garrisons, is effective, that the political and military ground organisation with which the policy is supported brings about the introduction of the ameliorative influence of civilization, and that the rapidity and success with which the Royal Air Force can operate over the hills, tends to diminish the amount of ground force necessary. On the other hand, the two descents of the Afridis upon the plain and their return to their homes without great loss, despite all that the Royal Air Force and large bodies of troops could do, indicate the capacity for mischief which lies in the hands of the Tirah tribes, and must remain there so long as the policy is not extended over their highlands.

Mohmand Outbreak in 1933.—Disturbances in the Mohmand country during the summer of 1933 both illustrated the operation of the modern Frontier policy and the need to keep it a live policy if it is to be of any use at all. The Mohmands may for the purposes of present description be divided into two categories namely, the Upper Mohmands, who live in the highlands of the Mohmand country, and the Lower Mohmands, whose country stretches from the lower altitudes of the same hills down to the Peshawar Plain. Through the country of the Upper Mohmands passes the Durand line but the Afghan Government have never agreed to its delimitation in part of this region and consequently its place has long been taken over a considerable portion of the length of the Frontier by what is described as the Presumptive Frontier. The exact position of this latter has never been settled between the two governments and it is consequently sometimes difficult to say whether people from particular villages belong to one side or to the other of it.

In 1932, during the revolutionary Red Shirt campaign, in connection with the Indian National Congress, in the Peshawar Plain, the Upper Mohmands decided to join in the disturbances and raids in the administered territory immediately northward of Peshawar. The Lower Mohmands are described as the Assured Tribes. The meaning of the description is that the British Indian authorities assure them protection against the attacks of the Upper Mohmands and they, on the other hand, are bound by promises of good behaviour. The Assured Tribes in 1932 interfered with the programme of the Upper Mohmands for raiding the plain and the Upper Mohmands in 1933, when spring and early summer once more facilitated their methods of campaigning, commenced retributory raids upon the Halimzai and other Assured clans. The attacked clans appealed to the political authorities for help and that help they were obliged to give.

About the same time as this trouble was germinating, there appeared in Bajaur, a country immediately to the north of that in which the events just described developed, a Pretender to the Afghan throne. He was accompanied

by two companions and started a campaign in Bajaur for a revolution or such other trouble as might be possible in Afghanistan. This compelled the British Indian authorities to take measures in fulfilment of their obligations of good neighbourliness to Afghanistan.

Road construction from the Peshwar-Shah-kadir road northwards through Ghalanai into the Halimzai country and towards the passes which lead from that country into the upper extremities of the Bajaur Valley was undertaken and two brigades of troops, with other details, were sent forward up it to assist in dealing with the Upper Mohmands. At the same time, aeroplanes bombarded the village of Kotkai in Upper Bajaur, which had given shelter to the Pretender, further aerial demonstrations were made and the Bajauris were given an ultimatum demanding the surrender of the Pretender by a given date.

The Upper Mohmands continuing aggressive and the Bajauris obdurate, there was good prospect of a campaign over the same country as that covered by the campaign of 1897. It seemed likely that the Ghalanai Road would be continued into the upper extremity of Bajaur and that another road for troops would also have to be constructed up the Bajaur valley itself so that by the meeting of the two roads in Upper Bajaur, there would become established a circular road through this part of the tribal

territory, resembling that running through North Waziristan.

In the end, the Upper Mohmands, partly doubtless because of punishment which they received in certain encounters with our troops and partly probably because of influence brought to bear upon them from Kabul, retired to their hills and after negotiations entered into bonds to keep the peace; and the Bajauris, while maintaining on grounds of tribal custom their refusal to surrender the Pretender, nevertheless expelled that person from their territory, probably into Afghanistan. Here, then, the trouble ceased. The net result of it was the construction of the road through Ghalanai and the rapid development of bus services and other activities of civilization which speedily took place along it.

The Upper Mohmands made another descent in the summer of 1935. The Lower Mohmands quarrelled among themselves over the distribution of road maintenance contracts and the upper Mohmands decided to fish in the troubled waters. Successful military operations ended in the Upper Mohmands suing for peace—and in the Ghalanai road being carried forward over the Nahakki Pass and down beyond it on to the Main which extends to the national road junction where the Upper Bajaur Valley meets the Upper Mohmand country.

VI.—AFGHANISTAN.

The relations of Afghanistan with the Indian Empire were for long dominated by one main consideration—the relation of Afghanistan to a Russian invasion of India. All other considerations were of secondary importance. For nearly three-quarters of a century the attitude of Great Britain toward successive Amirs has been dictated by this one factor. It was in order to prevent Afghanistan from coming under the influence of Russia that the first Afghan War of 1838 was fought—the most melancholy episode in Indian frontier history. It was because a Russian envoy was received at Kabul whilst the British representative was turned back at All Masjid that the Afghan War of 1878 was waged. After that the whole end of British policy toward Afghanistan was to build up a strong independent State, friendly to Britain, which would act as a buffer against Russia, and so to order our frontier policy that we should be in a position to move large forces up, if necessary, to support the Afghans in resisting aggression.

Gates to India.

A knowledge of the trans-frontier geography of India brought home to her administrators the conviction that there were only two main gates to India—through Afghanistan, the historic route to India, along which successive invasions have poured, and by way of Seistan. It was the purpose of British policy to close them, and of Russia to endeavour to keep them at any rate half open. To this end, having pushed her trans-Persian railway to Samarkand, Russia thrust a military line from Merv to the Kushkinksky Post, where railway material is collected for its immediate prolongation to Herat. Later, she connected the trans-

Siberian railway with the trans-Caucasian system, by the Orenburg-Tashkent line, thus bringing Central Asia into direct touch with her European magazines. Nor has Great Britain been idle. A great military station has been created at Quetta. This is connected with the Indian railway system by lines of railway which climb to the Quetta Plateau by the Bolan Pass and through the Chapper Rift, lines which rank amongst the most picturesque and daring in the world. From Quetta the line has been carried by the Khojak tunnel through the Khwaja Amran Range, until it leads out to the Afghan Border at New Chaman, where it opens on the route to Kandahar. The material is stocked at New Chaman which would enable the line to be carried to Kandahar in sixty days. In view of the same menace the whole of Baluchistan has been brought under British control. Quetta is now one of the great strategical positions of the world, and nothing has been left undone which modern military science can achieve to add to its natural strength. In the opinion of many military authorities it firmly closes the western gate to India, either by way of Kandahar, or by the direct route through Seistan.

Further east, the Indian railway system was carried to Jamrud and by the autumn of 1925 up the Khyber Pass to Landi Kotal and down the other side of the Pass to Landi Khana. A first class military road sometimes double, sometimes treble, also threads the Pass to our advanced post at Landi Kotal, and then descends until it meets the Afghan frontier at Landi Khana. Later, a commencement was made with the Lol Shikhar Railway, which starting from Peshawar was de-

signed to penetrate the Mullagori country and provide an alternative advance to the Khyber for the movement of British troops for the defence of Kabul. For unexplained reasons, this line was suddenly stopped and is now thrust in the air. In this wise the two Powers prepared for the great conflict which was to be fought on the Kandahar-Ghazni-Kabul line.

Relations with India.

Between the advanced posts on either side stands the Kingdom of Afghanistan. The end of British policy has been to make it strong and friendly. In the first particular it has early and largely succeeded. The second aim may now also be said to have been attained. When the late Abdurrahman was invited to ascend the throne, as the only means of escape from the tangle of 1879, none realised his great qualities. Previously the Amir of Afghanistan had been the chief of a confederacy of clans. Abdurrahman made himself master in his own kingdom. By means into which it is not well closely to enter; he beat down opposition until none dared lift a hand against him. Aided by a British subsidy of twelve lakhs of rupees a year, increased to eighteen by the Durand Agreement of 1893, and subsequently to over 20 lakhs, he established a strong standing army and set up arsenals under foreign supervision to furnish it with arms and ammunition. Step by step his position was regularised. The Anglo-Russian Boundary Commission,—which nearly precipitated war over the Pendjeh episode in 1885,—determined the northern boundaries. The Pamirs Agreement delimited the borders amid those snowy heights. The Durand Agreement settled the border on the British side, except for a small section to the west of the Khyber, which remained a fruitful source of trouble between Afghanistan and ourselves until 1919, when the Afghan claims and action upon the undemarcated section led to war. That section was finally surveyed and the frontier determined shortly after the conclusion of peace with Afghanistan. Finally the McMahon award closed the old feud with Persia over the distribution of the waters of the Helmand in Seistan. It was estimated by competent authorities that about the time of Abdurrahman's death, Afghanistan was in a position to place in the field, in the event of war, one hundred thousand well-armed regular and irregular troops, together with two hundred thousand tribal levies, and to leave fifty thousand regulars and irregulars and a hundred thousand levies to maintain order in Kabul and the provinces. But if Afghanistan were made strong, it was not made friendly. Abdurrahman Khan distrusted British policy up to the day of his death. All that can be said is that he distrusted it less than he distrusted Russia, and if the occasion had arisen for him to make a choice, he would have opposed a Russian advance with all the force at his disposal. He closed his country absolutely against all foreigners, except those who were necessary for the supervision of his arsenals and factories. He refused to accept a British Resident, on the ground that he could not protect him, and British affairs were entrusted to an Indian

agent, who was in a most equivocal position. At the same time he repeatedly pressed for the right to pass by the Government of India and to establish his own representative at the Court of St. James.

Afghanistan and the War.—These relations were markedly improved during the reign of His Majesty the Amir Habibullah Khan. It used to be one of the trite sayings of the Frontier that the system which Abdurrahman Khan had built up would perish with him, for none was capable of maintaining it. Habibullah Khan more than maintained it. He visited India soon after his accession and acquired a vivid knowledge of the power and resources of the Empire. He strengthened and consolidated his authority in Afghanistan itself. At the outset of the war he made a declaration of his complete neutrality. It is believed—a considerable reticence is preserved over our relations with Afghanistan—that he warned the Government of India that he might be forced into many equivocal acts, but that they must trust him; certainly his reception of Turkish, Austrian and German "missions" at Kabul, at a time when British representatives were severely excluded, was open to grave misconception. But a fuller knowledge induced the belief that the Amir was in a position of no little difficulty. He had to compromise with the fanatical and anti-British elements amongst his own people, inflamed by the Turkish preaching of a jihad, or holy Islamic war. But he committed no act of hostility; as soon as it was safe to do so he turned the members of these missions out of the kingdom. At the end of the war his policy was completely justified; he had kept Afghanistan out of the war, he had adhered to the winning side, his authority in the kingdom and in Central Asia was at its zenith.

Murder of the Amir.—It is believed that if he had lived Habibullah Khan would have used this authority for a progressive policy in Afghanistan, by opening up communications and extending his engagements with India. He was courted by the representatives of Persia and the Central Asian States as the possible rallying centre of a Central Asian Islamic confederation. At this moment he was assassinated on the 20th February 1919. The circumstances surrounding his murder have never been fully explained; but there is strong ground for the belief that it was promoted by the reactionaries who had harassed him all his reign. These realised that with his vindication by the war their time of reckoning had come; they anticipated it by suborning one of his aides to murder him in his sleep. His brother, Nasrullah Khan, the nominee of the fanatical element, was proclaimed Amir at Jelalabad in his stead, but public opinion in Afghanistan revolted at the idea of the brother seizing power over the corpse of the murdered man. His sons, Hayat and Amanullah, were not disposed to waive their heritance. Amanullah was at Kabul, controlling the treasury and the arsenal and supported by the Army. Nasrullah found it impossible to make head against him and withdrew. The new Amir, Amanullah, at once communicated his accession to the Government of India and proclaimed his desire to adhere to

the traditional policy of friendship. But his difficulties at once commenced; he had to deal with the war party in Afghanistan; he was confronted with the dissatisfaction arising from the manner in which the murderers of Habibullah had been dealt with; the fanatical element was exasperated by the imprisonment of Nasrullah; and the Army was so incensed that it had to be removed from Kabul and given occupation to divert its thoughts. A further element of complexity was introduced by the political situation in India. The agitation against the Rowlatt Act was at its height. The disturbances in the Punjab and Gujarat had taken place. Afghan agents in India, of whom the most prominent was Ghuiaim Hyder Khan the Afghan postmaster at Peshawar, flooded Afghanistan with exaggerated accounts of the Indian unrest. The result of all this was to convince the Amir that the real solution of his difficulties was to unite all the disturbing elements in a war with India. On the 25th April his troops were set in motion and simultaneously a stream of anti-British propaganda commenced to flow from Kabul and open intrigue was started with the Frontier tribes, on whom the Afghans placed their chief reliance.

Speedy Defeat.—The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad. Nevertheless the regular Afghan Army was rapidly dealt with. Strong British forces moved up the Khyber and seized Dacca. Jelalabad was repeatedly bombed from the air and also Kabul. Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelalabad. In ten days the Afghans were severely defeated. On the 14th May they asked for an Armistice. With the usual Afghan spirit of haggling, they tried to water down the conditions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawalpindi on the 26th July. On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp. 196-197.

Post-War Relations—It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards. During the hot weather of 1920 there were prolonged discussions at Mussoorie between Afghan Representatives and British officials under Sir Henry Dobbs. These were private, but it is believed that a complete agreement was reached. Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace. This Mission crossed the Border in January 1921 and entered Kabul where a peace treaty was signed.

The main points of the Treaty are set out in the Indian Year Book, 1923, pp. 197, 198-199.

Afghanistan after the War.—Since the War the relations between Afghanistan and Great Britain have been good and improving. There were painful episodes in 1923 when a murder gang from the tribal territory in the

British side of the Frontier committed raids in British India, murdering English people and kidnapping English women and then took refuge in Afghanistan. In course of time this gang was broken up. His Majesty the King of Afghanistan had troubles within his own borders which have made him glad of British help. The main object of his government was to strengthen the resources of the country and to bring it into closer relation with modern methods of administration. But Afghanistan is an intensely conservative country and no changes are popular; especially violent was the opposition to a secular form of administration and education. The direct result was a formidable rebellion of Mangals and Zadrans in the Southern Provinces, and serious reverses to the regular troops sent against the rebels. At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of aeroplanes and other assistance afforded by the Government of India the insurrection was broken. Whilst this assistance was appreciated, the whole business gave a serious set-back to the reforms initiated by His Majesty; he had to withdraw almost the whole of his administrative code and to revert to the Mahomedan Law which was previously in force.

Bolshevik Penetration.—Taking a long view, a much more serious development of the policies of Afghanistan, at the period to which the foregoing notes apply was the penetration of the Bolsheviks. These astute propagandists have converted the former Trans-Caspian States of Tsarist Russia into Soviet Republics, where the rule of the Bolsheviks is much more drastic and disruptive than was that of what was called the despotism of the Romanoffs. The object of this policy is gradually to sweep into the Soviet system the outlying provinces of Persia, of China and of Afghanistan. In Persia this policy was foiled by the vigour of the Sipar Salah, Reza Khan, since declared Shah. In Chinese Turkestan it is pursued with qualified success. In Afghanistan it also made certain progress. The first step of the Bolsheviks was to extend the Soviet Republics of Tajikistan, Uzbekia and Turkmanistan so as to absorb all Northern Afghanistan. This was later, apparently, abandoned for the moment for a more gentle penetration. Large subsidies, mostly delivered in kind, were given to Afghanistan. Telegraph lines were erected all over the country; roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pilots and mechanics was created and was largely developed. In return the Bolsheviks received important trading facilities. The whole purpose of this policy was ultimately to make it possible to attack Great Britain in India through an absorbed Afghanistan.

It is very doubtful if the Amir and his advisers were deceived by these practices, and whether they did not pursue the simple plan of taking all they could get without the slightest intention of handing themselves over to the Bolsheviks. But it is easier to let the Bolshevik in than to get him out; friends of the Afghans were asking themselves whether the Amir was not nourishing vipers in his bosom. Towards the end of

1925 and in the early part of 1926 there was a rude awakening. The Northern Frontier of the country has always been unsettled because of the shifting courses of the Oxus. In December Bolshevik forces captured with violence the Afghan post of Darkabad, killing one soldier. These events aroused great indignation at Kabul and were denounced by the Amir *coram publico*. There is no little evidence to show that though the form of government has changed in Russia the aims of Russian policy are the same. It used to be said that the test of Russian good faith under the Anglo-Russian Agreement would be the attitude of Petrograd towards the extension of the Orenberg-Tashkent railway to Termez. That line has been constructed by the Bolsheviks. The Afghans have had their eyes opened.

Russo-Afghan Treaty.—Outwardly the relations between the two States are friendly. In December 1926 the Afghan papers published the text of a new treaty concluded with Soviet Russia, which was signed on August 31st, but it provided that it should in no way interfere with the secret treaty signed in Moscow on February 28th, 1921. The principal clauses of this treaty, as disclosed in the Afghan papers, are as follows:—

Clause 1.—In the event of war or hostile action between one of the contracting parties and a third power or powers, the other contracting party will observe neutrality in respect of the first contracting party.

Clause 2.—Both the contracting parties agree to abstain from mutual aggression, the one against the other. Within their own dominions also they will do nothing which may cause political or military harm to the other party. The contracting parties particularly agree not to make alliances or political and military agreements with any one or more other powers against each other. Each will also abstain from joining any boycott or financial or economic blockade organized against the other party. Besides this in case the attitude of a third power or powers is hostile towards one of the contracting parties, the other contracting party will not help such hostile policy, and, further, will prohibit the execution of such policy and hostile actions and measures within its dominions.

Clause 3.—The high contracting parties acknowledge one another's Government as rightful and independent. They agree to abstain from all sorts of armed or unarmed interference in one another's internal affairs. They will decidedly neither join nor help any one or more other powers which interfere in or against one of the contracting Governments. None of the contracting parties will permit in its dominions the formation or existence of societies and the activities of individuals whose object is to gather armed force with a view to injuring the other's independence, or otherwise such activities will be checked. Similarly, neither of the contracting parties will allow armed forces, arms, ammunition, or other war material, meant to be used against the other contracting party to pass through its dominions.

Clause 6.—This treaty will take effect from the date of its ratification, which should take place within three months of its signature.

It will be valid for three years. After this period it will remain in force for another year provided neither of the parties has given notice six months before the date of its expiry that it would cease after that time.

On March 23rd there was also signed in Berlin a treaty between Germany and Afghanistan which amounted to no more than the establishment of diplomatic relations.

A British Minister is established in Kabul as well as the representatives of other European States. The representatives of Afghanistan are established in India and in London, and at some of the European capitals. The various subsidiary agreements under the Treaty have been carried into effect.

The King's Tour.—In the closing months of 1927 His Majesty King Amanullah, accompanied by the Queen and a staff of officials, commenced a long tour to India and Europe. It is understood that this was one of the cherished ambitions of his father, King Habibullah, who was assassinated in 1919. King Amanullah, when he set out, was warmly welcomed in India and received a great popular greeting in Bombay both from his co-religionists and from members of other communities, who forgot the invasion of India in 1919. He then took ship to Europe. He was the guest of His Majesty King George V in London, and visited the principal European capitals. He made a State visit to Turkey, and returned to Afghanistan by way of Soviet Russia and Persia. A series of treaties with the governments of the countries visited was announced and the King returned to Kabul in the late summer of 1928, the tour having been unclouded by untoward incident. Afghanistan was peaceful during his long absence.

Reforming Zeal.—King Amanullah returned to his realm as full of reforming zeal. He was much impressed by the political and social institutions of the western lands he visited, and in particular by the dramatic forcefulness with which Mustapha Kemal Pash had driven Turkey along the path of "reform," or perhaps it would be more correct to say westernisation. In this he was encouraged by the Queen, who was desirous of seeing the women of Afghanistan enjoy some of the freedom and opportunity won by and for the women of the West. Edict after edict was issued, changing the whole structure of Afghan society. New codes and taxes were imposed: it was proposed that women should emerge from their seclusion and doff the veil; the co-education of boys and girls was prescribed; in September Government officials were forbidden to practise polygamy; in October European dress was ordered for the people of Kabul. At the same time, the pay of the regular troops fell into arrears.

With every appreciation of the spirit and direction of these changes, friends of His Majesty advised the King to moderate the pace. They reminded him that in 1924 far less drastic changes had brought serious trouble in their train. In May of that year the "Lame Mullah" raised the standard of rebellion amongst the Güzal and Mangal clansmen of Khoest. The Mullahs were openly active against the King and His Majesty was equally frank in his

hostility to them. Possibly also well-wishers suggested that what was possible in Turkey, after centuries of close contact with the West, and where the ground had been prepared by missionary effort and a long struggle for the emancipation of women, might be less easy in Afghanistan, where there had been no contact with the western world.

A change of Kings.—Events moved rapidly in 1929. A notorious north Afghan *budmash*, Bacha-i-Saqqa, raised the standard of revolt and inflicted severe losses on the Afghan Regular troops, discontented as they were by arrears of pay. Day by day the Afghan representatives in various parts of the world issued messages asserting that the rebels had been destroyed, and a rapid series of pronouncements declared the withdrawal of all the reforms and the establishment of a Council of Provincial Representatives. Communications with the outer world were broken. King Amanulla and his family fled from Kabul to Kandahar, and then from Kandahar *via* Quetta to Bombay where they took ship to Europe. King Amanulla on his arrival at Rome entered into possession of the Afghan Legation, where he remained. Bacha-i-Saqqa declared himself King of Afghanistan, and for a few months held his position in Kabul. Without money, administrative experience or a disciplined following, his throne was a thorny one and he was harassed by constant attacks. The Royal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant flights evacuated all without the slightest hitch. The most formidable of the new king's adversaries were led by General Nadir Khan, a scion of the old ruling house, with a wide knowledge of the world. Heavy fighting took place. Fortunes varied. Nadir Khan almost gave up his chances as finally lost. But a band of Wazirs from the British side of the border attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest. Nadir Khan thus became victor and shortly afterwards, at the wish of the Afghans, Bacha-i-Saqqa was executed with other rebels, and when the year closed Nadir Khan was to all seeming in firm possession of the Kingdom. He despatched members of his family to the principal Afghan Legations in Europe. A Shiwari rising near the exit from the Khyber Pass took place in February 1930, and was repressed with unexpected success and vigour. There followed a serious rebellion

in Kohidaman. Bacha-i-Saqqa's country. This also was promptly quelled. And thereafter Nadir Shah ruled without challenge. He devoted himself to the reorganisation of his Army. England was strictly neutral during the successive stages of the revolution, but promised support to Afghanistan to help her maintain internal peace when she had restored it and this promise was fulfilled by the provision of an interest free loan of £200,000 to King Nadir and by the supply of rifles and ammunition to him. He gave evidence of his friendliness towards Britain and India. He co-operated effectively to prevent tribes on his side of the Frontier joining those on the British side against the Government of India in response to the Congress agitation in the summer of 1930. The trade routes were re-opened and the new King again took up Amanullah's mantle of reform but in a statesmanlike manner which carried the Mullah's along with him.

Murder of Nadir Shah—This ordered march of progress was tragically interrupted by the murder of His Majesty Nadir Shah on the afternoon of 8 November 1933. His Majesty was attending a football tournament prize-giving, when a young man among the gathering stepped forward and fired several revolver shots into him at close range, killing him instantly. It later appeared that the assassin committed the crime in revenge for the execution of a prominent Afghan who had been caught deeply involved in treasonable activities after he had been mercifully treated for earlier behaviour of the same kind. The assassin's father was stated to have been this man's servant. The murder was not followed by general or widespread disorder. The members of Nadir Shah's family and his prominent officers of State stood loyally by his heir, his son, Mohammed Zahir. The latter was duly placed on his father's throne and his accession was in due course acknowledged and confirmed throughout the kingdom in the traditional manner. The new king started his reign with a high reputation for courage and steadiness. He early issued assurances to his people that he would continue the policy of his father in affairs of State. No untoward events have occurred in the years that have since past and during them the new young king has by his sagacity and good Government gradually strengthened his position on the throne.

British Representative—Lt.-Col Fraser Tytler, C.I.E.

VII. - TIBET.

Recent British policy in Tibet is really another phase in the long-drawn-out duel between Great Britain and Russia in Central Asia. The earliest efforts to establish communication with that country were not, of course, inspired by this apprehension. When in 1774 Warren Hastings despatched Bogle on a mission to the Tashi-Lama of Shigatse,—the spiritual equal if not superior, of the Dalai Lama of Lhasa—his desire was to establish facilities for trade, to open up friendly relations with a Power which was giving us trouble on the frontier, and gradually to pave the way to a good understanding between the two countries. After

Warren Hastings' departure from India the subject slept, and the last Englishman to visit Lhasa, until the Younghusband Expedition of 1904, was the unofficial Manning. In 1885, under the inspiration of Colman Macaulay, of the Bengal Civil Service, a further attempt was made to get into touch with the Tibetans, but it was abandoned in deference to the opposition of the Chinese, whose suzerainty over Tibet was recognised and to whose view until the war with Japan, British statesmen were inclined to pay excessive deference. But the position on the Tibetan frontier continued to be most unsatisfactory. The Tibetans

were aggressive and obstructive, and with a view to putting an end to an intolerable situation, a Convention was negotiated between Great Britain and China in 1890. This laid down the boundary between Sikkim and Tibet, it admitted a British protectorate over Sikkim, and paved the way for arrangements for the conduct of trade across the Sikkim-Tibet frontiers. These supplementary arrangements provided for the opening of a trade mart at Yatung, on the Tibetan side of the frontier, to which British subjects should have the right of free access, and where there should be no restrictions on trade. The agreement proved useless in practice, because the Tibetans refused to recognise it, and despite their established suzerainty, the Chinese Government were unable to secure respect for it.

Russian Intervention.

This was the position when in 1899 Lord Curzon, Viceroy of India, endeavoured to get into direct touch with the Tibetan authorities. Three letters which he addressed to the Dalai Lama were returned unopened, at a time when the Dalai Lama was in direct intercourse with the Tsar of Russia. His emissary was a Siberian Dorjoff, who had established a remarkable ascendancy in the counsels of the Dalai Lama. After a few years' residence at Lhasa Dorjoff went to Russia on a confidential mission in 1899. At the end of 1900 he returned to Russia at the head of a Tibetan mission of which the head was officially described in Russia as "the senior Tsanite Khoimba attached to the Dalai Lama of Tibet." This mission arrived at Odessa in October 1900, and was received in audience by the Tsar at Livadia. Dorjoff returned to Lhasa to report progress, and in 1901 was at St. Petersburg with a Tibetan mission, where as bearers of an autograph letter from the Dalai Lama they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by a Russian force to which several Intelligence Officers were attached. At the time it was rumoured that Dorjoff had, on behalf of the Dalai Lama, concluded a treaty with Russia, which virtually placed Tibet under the protectorate of Russia. This rumour was afterwards officially contradicted by the Russian Government.

The Expedition of 1904.

In view of these conditions the Government of India, treating the idea of Chinese suzerainty over Tibet as a constitutional fiction, proposed in 1903, to despatch a mission, with an armed escort, to Lhasa to discuss the outstanding questions with the Tibetan authorities on the spot. To this the Home Government could not assent, but agreed, in conjunction with the Chinese Government, to a joint meeting at Khamba Jong, on the Tibetan side of the frontier. Sir Francis Younghusband was the British representative, but after months of delay it was ascertained that the Tibetans had no intention of committing themselves. It was therefore agreed that the mission, with a strong escort, should move to Gyantse. On the way the Tibetans developed marked hostility, and there was fighting at Tuna, and several sharp encounters in and around Gyantse. It

was therefore decided that the mission should advance to Lhasa, and on August 3rd, 1904, Lhasa was reached. There Sir Francis Younghusband negotiated a convention by which the Tibetans agreed to respect the Chinese Convention of 1890; to open trade marts at Gyantse, Gartok and Yatung; to pay an indemnity of £500,000 (seventy-five lakhs of rupees); the British to remain in occupation of the Chumbi Valley until this indemnity was paid off at the rate of a lakh of rupees a year. In a separate instrument the Tibetans agreed that the British Trade Agent at Gyantse should have the right to proceed to Lhasa to discuss commercial questions, if necessary.

Home Government intervenes.

For reasons which were not apparent at the time, but which have since been made clearer, the Home Government were unable to accept the full terms of this agreement. The indemnity was reduced from seventy-five lakhs of rupees to twenty-five lakhs, to be paid off in three years, and the occupation of the Chumbi Valley was reduced to that period. The right to despatch the British Trade Agent to Lhasa was withdrawn. Two years later (June 1906) a Convention was concluded between Great Britain and China regulating the position in Tibet. Under this Convention Great Britain agreed neither to annex Tibetan territory, nor to interfere in the internal administration of Tibet. China undertook not to permit any other foreign State to interfere with the territory or internal administration of Tibet. Great Britain was empowered to lay down telegraph lines to connect the trade stations with India, and it was provided that the provisions of the Convention of 1890, and the Trade Regulations of 1893, remained in force. The Chinese Government paid the indemnity in three years and the Chumbi Valley was evacuated. The only direct result of the Mission was the opening of the three trade marts and the establishment of a British Trade Agent at Gyantse.

Chinese Action.

The sequel to the Anglo-Russian Agreement was dramatic, although it ought not to have been unexpected. On the approach of the Younghusband Mission the Dalai Lama fled to Urga, the sacred city of the Buddhists in Mongolia. He left the internal government of Tibet in confusion, and one of Sir Francis Younghusband's great difficulties was to find Tibetan officials who would undertake the responsibility of signing the Treaty. Now the suzerainty of China over Tibet had been explicitly reaffirmed. It was asserted that she would be held responsible for the foreign relations of Tibet. In the past this suzerainty, having been a "constitutional action," it was inevitable that China should take steps to see that she had the power to make her well respected at Lhasa. To this end she proceeded to convert Tibet from a vassal state into a province of China. In 1908 Chao Erh-feng, Acting Viceroy in the neighbouring province of Szechuen, was appointed Resident in Tibet. He proceeded gradually to establish his authority, marching through eastern Tibet and treating the people with great severity. Meantime the Dalai Lama, finding his presence a

Urga, the seat of another Buddhist Pontiff, Irlksum, had taken refuge in Si-ning. Thence he proceeded to Peking, where he arrived in 1908,* was received by the Court, and despatched to resume his duties at Lhasa. Moving by leisurely stages, he arrived there at Christmas, 1908. But it was soon apparent that the ideas of the Dalai Lama and of the Chinese Government had little in common. The Dalai Lama expected to resume the temporal and spiritual despotism which he had exercised prior to 1904. The Chinese intended to deprive him of all temporal power and preserve him as a spiritual pope. The Tibetans had already been exasperated by the pressure of the Chinese soldiery. The report that a strong Chinese force was moving on Lhasa so alarmed the Dalai Lama that he fled from Lhasa, and by the irony of fate sought a refuge in India. He was chased to the frontier by Chinese troops, and took up his abode in Darjeeling, whilst Chinese troops overran Tibet.

Later Stages.

The British Government, acting on the representations of the Government of India, made strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances in the peace of a country which was a neighbour, on intimate terms with other neighbouring States on our frontier, especially with Nepal, and pressed that an effective Tibetan Government be maintained. The attitude of the Chinese Government was that no more troops had been sent to Tibet than were necessary for the preservation of order, that China had no intention of converting Tibet into a province, but that being responsible for the good conduct of Tibet, she must be in a position to see that her wishes were respected by the Tibetans. Finally, the Chinese remarked that the Dalai Lama was such an impossible person that they had been compelled again to depose him. Here the matter might have rested, but for the revolution in China. That revolution broke out in Szechuen, and one of the first victims was Chao Erh-feng. Cut off from all support from China, surrounded by a hostile and infuriated populace, the Chinese troops in Tibet were in a hopeless case; they surrendered, and sought escape not through China, but through India, by way of Darjeeling and Calcutta. The Dalai Lama returned to Lhasa, and in 1913. In the House of Lords on July 28, Lord Morley stated the policy of the British Government in relation to these changes. He said the declaration of the President of the Chinese Republic saying that Tibet came within the sphere of Chinese internal administration; and that Tibet was to be regarded as on an equal footing with other provinces of China, was met by a very vigorous protest from the British Government. The Chinese Govern-

ment subsequently accepted the principle that China is to have no right of active intervention in the internal administration of Tibet, and agreed to the constitution of a conference to discuss the relation of the three countries. This Convention met at Simla when Sir Henry McMahon, Foreign Secretary to the Government of India; Mr. Ivan Chen, representing China; and Mr. Long Chen Shatra, Prime Minister to the Dalai Lama, threshed out these issues. Whilst no official pronouncement has been made on the subject, it is understood that a Convention was initiated in June which recognised the complete autonomy of Tibet proper, with the right of China to maintain a Resident at Lhasa with a suitable guard. A semi-autonomous zone was to be constituted in Eastern Tibet, in which the Chinese position was to be relatively much stronger. But this Convention, it is understood, has not been ratified by the Chinese Government, owing to the difficulty of defining Outer and Inner Tibet, and in 1918 Tibet took the offensive and throw off the last vestiges of Chinese suzerainty. When the Chinese province of Szechuan went over to the South, the Central Government at Peking was unable to finance the frontier forces or to withstand the Tibetan advance, which was directed from Lhasa and appeared to be ably managed. After the Tibetan army had occupied some towns on the confines of the Szechuan marshes, hostilities were suspended and an armistice was concluded.

From what has gone before, it will be seen that the importance which formerly attached to the political condition of Tibet was much less a local than an external question, and was influenced by our relations with Russia and China rather than with our relations with Tibet. Russia having relapsed into a state of considerable confusion, and China having relapsed into a state of absolute confusion, these external forces temporarily at any rate disappeared, and Tibet no longer loomed on the Indian political horizon. The veil was drawn afresh over Lhasa, and affairs in that country pursued an isolated course, with this considerable difference. The Dalai Lama was now on terms of the greatest cordiality with the Government of India. In 1920 he requested that a British officer should be sent to discuss with him the position in Central Asia brought about by the Revolution in Russia and the collapse of Government in China, and Mr. Bell, C.M.G., J.C.S., Political Officer in Sikkim, was deputed for this purpose. In 1922 telephonic communication between Lhasa and India was established. The Chinese have lately to increase their hold on Tibet but without persuading the Tibetans to accept closer association.

Political Officer in Sikkim Mr B. G. Gould, I.C.S.

British Trade Agent, Gyantse and Yatung.—Capt. R. K. M. Battye.

VIII.—THE NORTH-EASTERN FRONTIER.

The position on the northern frontier has been considered as if the British line were contiguous with that of Tibet. This is not so. The real frontier States are Kashmir, Nepal,

Sikkim and Bhutan. From Chitral to Gilgit now the northernmost posts of the Indian Government, to Assam, with the exception of the small wedge between Kashmir and Nepal,

where the British district of Kumaon is thrust right up to the confines of Tibet, for a distance of nearly fifty hundred miles there is a narrow strip of native territory between British India and the true frontier. The first of these frontier States is Kashmir. The characteristics of this State are considered under Indian States (q.v.); it is almost the only important Native State in India with frontier responsibilities, and it worthily discharges them through the agency of its efficient Indian State troops—four regiments of infantry and two Mountain Batteries, composed mainly of the Rajput Dogras, who make excellent fighting material. One of the most important trade routes with Tibet passes through Kashmir—that through Ladak. Then we come to the long narrow strip of Nepal. This Gurkha State stands in special relation with the British Government. It is for all practical purposes independent, and the British resident at Khatmandu exercises no influence on the internal administration. The governing machine in Nepal is also peculiar. The Maharaj Dhiraj, who comes from the Sesodia Rajput clan, the bluest blood in India, takes no part in the administration. All power vests in the Prime Minister, who occupies a place equivalent to that of the Mayors of the Palace, or the Shoguns of Japan. The present Prime Minister, Sir Chandra Shamsheer, has visited England, and has given conspicuous evidence of his attachment to the British Government. Nepal is the main Indian outpost against Tibet or against Chinese aggression through Tibet. The friction between the Chinese and the Nepalese used to be frequent, and in the eighteenth century the Chinese marched an army to the confines of Khatmandu—one of the most remarkable military achievements in the history of Asia. Under the firm rule of the present Prime Minister Nepal has been largely free from internal disturbance, and has been raised to a strong bulwark of India. Nepal is the recruiting ground for the Gurkha Infantry, who form such a splendid part of the fighting arm of the Indian Empire. Beyond Nepal are the smaller States of **Bhutan** and **Sikkim**, whose rulers are Mongolian by extraction and Buddhists by religion. In view of Chinese aggressions in Tibet, the Government of India in 1910 strengthened their relations with Bhutan by increasing their subsidy from fifty thousand to a lakh of rupees a year, and taking a guarantee that Bhutan would be guided by them in its foreign relations. Afterwards China was officially notified that Great Britain would protect the rights and interests of these States. At the request of the Nepalese Government a British railway expert was deputed to visit the country and advise on the best means of improving communications with India. As the result of his report the Nepalese Government have decided to construct a light railway from Bhechhakhorl to Raxaul. Great success has attended the orders passed by the Nepalese Government abolishing slavery.

Assam and Burma.

We then come to the Assam border tribes—the Dailas, the Miris, the Abors and the Mishmis. Excepting the Abors none of these tribes has recently given trouble. The murder of Mr Williamson and Dr. Gregerson by the Minyong Abors in 1911 made necessary an expedition

to the Dihang valley of the Abor country on the N. E. frontier. A force of 2,500 and about 400 military police was employed from October 1911 to April 1912 in subduing the tribe. After two or three small actions the murderers were delivered up. The cost of the expedition was Rs. 21,80,000. At the same time friendly missions were sent to the Mishmi and Miri countries. Close contact with these forest-clad and leech-infested hills has not encouraged any desire to establish more intimate relations with them. The area occupied by the Nagasares runs northwards from Manipur. The Nagasares, a Tibeto-Burman people, devoted to the practice of head hunting, which is still vigorously prosecuted by the independent tribes. The Chin Hills is a tract of mountainous country to the south of Manipur. The corner of India from the Assam boundary to the northern boundary of the Shan States is for the most part included in the Myitkina and Bhamo districts of Burma. Over the greater part of this area, a labyrinth of hills in the north, no direct administrative control is at present exercised. It is peopled by the Shans and the Kachins. Civilisation is said to be progressing and steps have been taken to prevent encroachments from the Chinese side. Negotiations between Britain and China on this subject were long in progress, particularly with a view to the frontier between Burma and the Chinese province of Yunnan, where the absence of a defined boundary makes the maintenance of the peace difficult. A Delimitation Commission, consisting of British and Chinese Commissioners with a Neutral President proceeded to the frontier region in November 1935, to spend the winter settling the line between the two countries. The Neutral President is the distinguished Swiss engineer officer, Colonel F. Iselin. It became obvious in April, 1936, that the Commission would be unable to complete its work before the end of the current dry season and the Chairman therefore decided that it should disperse and reassemble in November, 1936, to complete its task.

There is a considerable trade with China through Bhamo. On the Eastern frontier of Burma are the Shan States, with an area of fifty thousand square miles and a population of 1,300,000. These States are still administered by the Sawbwas or hereditary chiefs, subject to the guidance of Superintendents and Assistant Superintendents. The Northern Shan Railway to Lashio, opened in 1903, was meant to be a stage in the construction of a direct railway link with China, but this idea has been put aside, for it is seen that there can never be a trade which would justify the heavy expenditure. The Southern Shan States are being developed by railway connection. The five Karenni States lie on the frontier south of the Shan States. South of Karenni the frontier runs between Siam and the Tenasserim Division of Burma. The relations between the Indian Government and the progressive kingdom of Siam are excellent. A notable humanitarian development of recent years is the success of the measures to abolish slavery in the Hukawng Valley. In this remote place in the north-east of Burma a mild system of slavery existed, but in response to the initiative and pressure of British officers they were all freed by April 1926.

NEPAL.

The small hilly independent Kingdom of Nepal is a narrow tract of country extending for about 520 miles along the southern slope of the central axis of the Himalayas. It has an area of about 56,000 square miles, with a population of about 5,580,000, chiefly Hindus. The greater part of the country is mountainous, the lower slopes being cultivated. Above these is a rugged broken wall of rock leading up to the chain of snow-clad peaks which culminate in Mount Everest (29 002 feet) and others of slightly less altitude. The country before the Gurkha occupation was split up into several small kingdoms under Newar kings. The Gurkhas under Prithvi Narayan Shah overran and conquered the different kingdoms of Patan, Kathmandu, and Bhatgaon, and other places during the latter half of the 18th century and since then have been rulers of the whole of Nepal. In 1846 the head of the Rana family Maharaja Jung Bahadur Rana, obtained from the sovereign the perpetual right to the office of Prime Minister of Nepal, and the right is still enjoyed by the descendants of the Rana family. In 1850 Jung Bahadur paid a visit to England and was thus the first Hindu Chief to leave India and to become acquainted with the power and resources of the British nation. The relations of Nepal with the Government of India are regulated by the treaty of 1816 and subsequent agreements by which a representative of the British Government is received at Kathmandu. By virtue of the same Treaty either Government maintained a representative at the Court of the other and her treaty relations with Tibet allow her to keep a Resident at Lhasa of her own. Her relation with China is of a friendly nature. Ever since the conclusion of the treaty of 1816 the friendly relations with the British Government have steadily been maintained. During the rule of the late Prime Minister it has been at its height as is evidenced by the valuable friendly help in men and money which has been given and which was appreciatively mentioned in both the Houses of Parliament and by Mr Asquith in his Guildhall speech in 1915. The message from His Majesty the King-Emperor to the Nepalese Prime Minister sent on the termination of hostilities and published at the time as also Viceroy's valedictory address to the Nepalese contingent on the eve of their return home after having laudably fulfilled their mission in India eloquently and gratefully acknowledged the valuable help rendered by Nepal during the four and a half years of war. In recognition of this help Nepal receives an unconditional annual present of rupees ten lakhs from the British Government to be paid in perpetuity. To further strengthen and cement the bonds of friendship that have subsisted so long between the two countries, a new Treaty of friendship was concluded between the Government of Nepal and Great Britain on the 21st December 1923.

From the foregoing account of the history of Nepal it will be seen that the Government of the country has generally been in the hands of the Minister of the day. Since the time of Jung Bahadur this system of government has been clearly laid down and defined. The sovereign, or Maharajadhiraja, as he is called, is but a

dignified figure-head, whose position can best be likened to that of the Emperor of Japan during the Shogunate. The present King, His Majesty Maharajadhiraja Tribhubana Bir Bikram Jung Bahadur Shah Bahadur Shum Shere Jung Deva, ascended the throne on the death of his father in 1911. The real ruler of the country is the Minister who, while enjoying complete monopoly of power, couples with his official rank the exalted title of Maharaja. Next to him comes the Commander-in-Chief, who ordinarily succeeds to the office of Minister.

The present Minister at the head of affairs of Nepal is Maharaja Bhim, Shum Shere Jung Bahadur Rana, G.C.S.I., G.C.M.G., K.C.V.O., Yit Tang-Paoing-Shun Chan, Luh Chuan-Shang-Chuang (Chinese), Honorary Lieutenant-General British Army and Hon. Colonel, 4th Gurkhas, who succeeded the late Maharaja Chandra Shum Shere Jung Bahadur Rana as Prime Minister and Supreme Commander-in-Chief in November 1929. Soon after this accession to power, with the consummate skill and political acumen of a born diplomat he averted a threatened breach of relations with Tibet. A man of proved ability as the Commander-in-Chief of Nepal he has inaugurated several urgent and important works of public utility. Already he has abolished certain uneconomical imposts such as those on salt, cotton, etc., has tentatively suspended capital punishment in the kingdom with a view to its final abolition, constructed a second water-works, improved mintage and expanded general education. The reclamation on a large scale of forest areas both in the hills and the Tarai is now going on, to provide a health and home for Gurkhas retiring from British Service and part of the overflow population now migrating outside the country. In all his public utterances he has expressed an earnest desire to uphold and augment the traditional friendship with the British Government.

Rice, wheat and maize form the chief crops in the lowlands. Mineral wealth is supposed to be great, but, like other sources of revenue, has not been developed. Communications in the State are primitive, but since 1920 the Government has already undertaken the construction of a good and permanent road for vehicular traffic from Amlekhgunj to Bhiphedi—the base of a steep ridge in the main route to the capital of the country from British India—and also has installed a ropeway to connect this base with the capital proper covering a distance of 14 miles. A light railway from Amlekhgunj covering a distance of 25 miles in the route and connecting with the B. & N. W. Ry. at Raxaul also has been constructed and opened for traffic since March 1927. It has also put up a telephone over this route connecting the capital with the frontier township of Birgunge near Raxaul. The revenue is about two crores of rupees per annum. The standing army is estimated at 45,000 the highest posts in it being filled by relations of the minister. The State is of considerable archaeological interest and many of the sites connected with scenes of Buddha's life have been identified in it by the remains of inscribed pillars.

British Envoy—Lieut.-Col. F. M. Bailey, C.I.E.

Railways to India.

The prospect of linking Europe and Asia by a railway running eastwards through Asia Minor has fascinated men's minds for generations. The plans suggested have, owing to the British connection with India, always lain in the direction of lines approaching India. More than 50 years ago a Select Committee of the House of Commons sat for two years to consider the question of a Euphrates Valley railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many years before the end of the nineteenth century. A proposal was put forward in 1895 for a line of 1,000 miles from Cairo and Port Said to Koweit, at the head of the Persian Gulf. While these projects were in the air, German enterprise stepped in and made a small beginning by constructing the Anatolian railway system. Its lines start from Scutari, on the southern shore of the Bosphorus, opposite Constantinople, and serve the extreme western end of Asia Minor. And upon this foundation was based the Turkish concession to Germans to build the Baghdad Railway.

Meanwhile, Russia was pushing her railway from various directions into the Central Asian territory running along the northern frontiers of Persia and Afghanistan to the borders of Chinese Turkestan. The construction of a Trans-Persian railway, connecting India, across Persia, with the Russian lines between the Black Sea and the Caspian Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia.

The Germans pushed forward their Baghdad railway project with a calculating shrewdness arising from their estimate of the value it would possess in their grand aim to overthrow the British Empire. The outbreak of the great war and the success of the Germans in inveigling Turkey into it saw the final stages of the construction of the railway pressed forward with passionate energy. Thus, before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and in use from Scutari across Anatolia, over the Taurus Mountains to Aleppo and thence eastward across the Euphrates to a point between Nisibin and Mosul. The Germans had also by that time constructed a line to Baghdad at the eastern end of the route, northwards from Baghdad to a point a considerable distance beyond Samarra.

The war compelled the British to undertake considerable railway development northward from Basra, the port at the mouth of the Shat-el-Arab, the broad stream in which the Tigris and Euphrates, after their junction, flow into the head of the Persian Gulf. The system consists of a metre-gauge line from Basra *via* Nasarieh, on the Euphrates, thence northwards to Baghdad, the line passing a considerable distance westward to Kut-I-Amara, of historic fame. From Baghdad the line runs eastward approximately to the foot of the pass through which the Persian road crosses the frontier of that country. A line branches off in the neighbourhood of Kifri in the direction of Mosul. A line also runs westward from Baghdad to Feluja, on the Euphrates. When the

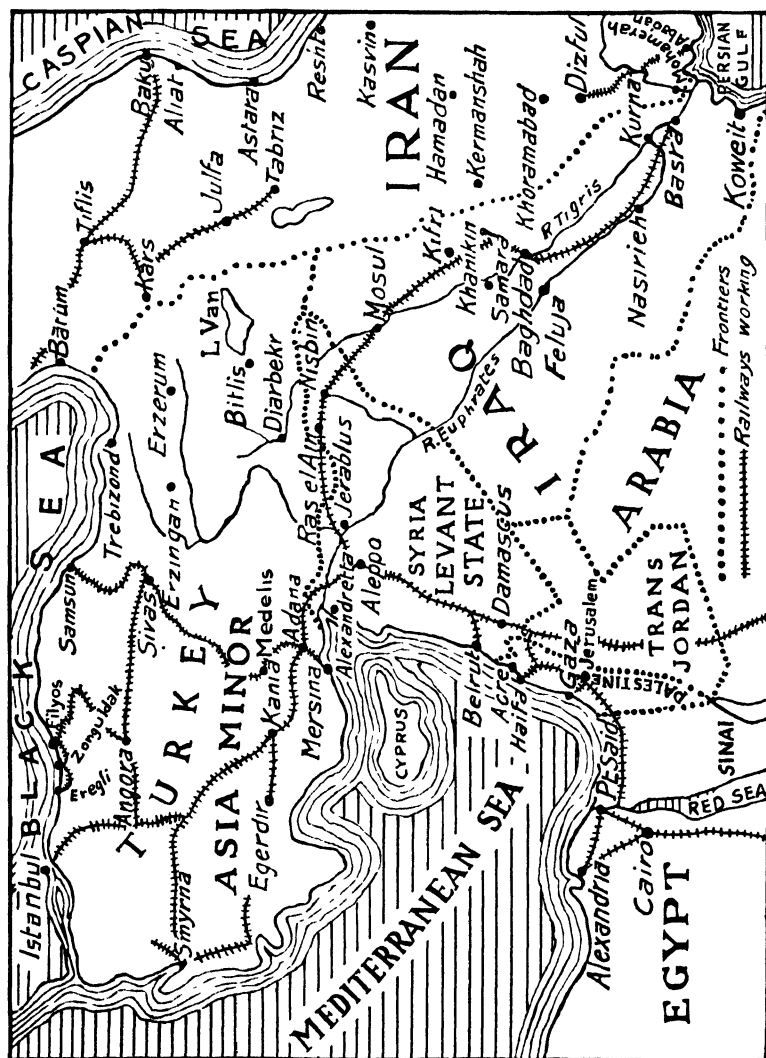

Turkish Nationalists gained control of Anatolia any question of the completion of the through Baghdad line became indefinitely delayed.

The Trans-Persian line to join the Russian Caucasian system and the Indian railways first assumed proportions of practical importance in the winter of 1911. Both the Russian and the Indian railway systems were by then well developed up to the point likely to be the termini of a Trans-Persian line. The Russian system reached Julfa, on the Russo-Persian frontier in the Caucasus. During the war this line was carried thence southward into the region east and south-east of Lake Urumia. The Indian railway system, on the borderland of India and Persia, was similarly much extended and improved during the war. A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic, but the agreement came to naught.

The Foreign Minister of Persia, or Iran as it is now called, visited New Delhi in November, 1935, for informal discussions with the Government of India with a view to enlisted British help in the development of rail communications in Eastern Persia. The development thus envisaged was of a new Persian railway system linked with the British line running from Quetta, through Nushki, towards the Baluchistan-Scistan frontier. The Quetta-Nushki line was extended across the Scistan border into Persia during the Great War. Its terminus was then Duzdab (or Zahidan), in Persia. It has long ceased to be used further towards Persia than Nokhundi, in Baluchistan. The informal discussions did not crystallize into an agreement of formal undertaking on either side.

There remains the possibility of linking the Russian and Indian railway system by way of Afghanistan. The suggestion has often been made in recent years that the Russian line from Merv to Herat, on the northern frontier of Afghanistan, should be linked to the Indian line which proceeds from Quetta to the Afghan border on Chaman. What the present Afghan Government think about the matter was not shown up to the time this article was written, but the strange situation in Central Asia and beyond the Indian North-West Frontier does not suggest the early removal of the strategic difficulties. The completion of a broad-gauge line extending the Indian railway system through the Khyber Pass to Landi Khana, at its western extremity, opens a prospect of further possible rail connections with Afghanistan.

Britain's special interests in regard to Persian communications have hitherto primarily been associated with lines running inland from the Persian Gulf, to supersede the old mule routes. Special importance has for many years been attached to the provision of a railway from Mohammerah, at the opening of the Karun Valley, where the Karun River runs into the Shat-el-Arab, just below Basra, northwards into the rich highland country of Western Persia, where the valuable West Persian oilwells also lie. Britain has long established special relations with the Karun Valley and as a large trade there.

The Army.

The great sepoy army of India originated in the small establishments of guards, known as peons, enrolled for the protection of the factories of the East India Company; but sepoys were first enlisted and disciplined by the French, who appeared in India in 1665. Before this detachments of soldiers were sent from England to Bombay, and as early as 1665 the first fortified position was occupied by the East India Company at Armagon, near Masulipatam. Madras was acquired in 1640, but in 1654 the garrison of Fort St. George consisted of only ten men. In 1661 Bombay was occupied by 400 soldiers, and in 1668 the number was only 285 of whom 93 were English and the rest French, Portuguese and Indians.

After the declaration of war with France in 1744 the forces were considerably increased, but this did not prevent the French capturing Madras in 1746. Following the French example, the English raised considerable sepoy forces and largely increased the military establishments. In 1748 Major Stringer Lawrence landed at Fort St. David to command the forces of the Company. The English foothold in India was then precarious and the French under Duplex were contemplating fresh attacks. It became necessary for the English Company to form a larger military establishment. The new commandant at once set about the organisation and discipline of his small force, and the garrison was given a company formation. This was the beginning of the regular Indian Army of which Lawrence subsequently became Commander-in-Chief. In Madras the European companies were developed into the Madras Fusiliers; similar companies in Bengal and Bombay became the 1st Bengal and 1st Bombay Fusiliers. The native infantry were similarly organised by Lawrence and Clive. By degrees Royal Regiments were sent to India, the first being the 39th Foot, which arrived in 1754.

Struggle with the French.—From this time for a century or more the army in India was engaged in constant war. After a prolonged war with the French, whom Duplex had by 1750 raised to the position of the leading power in India, the efforts of Stringer Lawrence, Clive, and Eyre Coote completed the downfall of their rivals, and the power of England was established by the battle of Plassey in Bengal, and at Wandewash in Southern India, where the French were finally defeated in 1761. A number of independent States, owning nominal allegiance to the Emperor at Delhi, had risen on the decline of the Mughal Empire, some ruled by Mahratta Princes and others by Musalman adventurers such as Hyder Ali of Mysore. A prolonged struggle ensued with the latter and his son and successor Tipu Sultan, which ended only with the defeat and death of Tipu and the capture of Seringapatam in 1799.

Reorganisation of 1796.—In 1796 the Indian armies, which had been organised on the Presidency system, were reorganised. The European troops were 13,000 strong and

the Indians numbered some 67,000, the infantry being generally formed into 75 regiments of two battalions each. In Bengal, regiments were formed by linking existing battalions of ten companies each with large establishments of English officers. The Madras and Bombay armies were at the same time reorganised on similar lines, and cavalry and artillery companies were raised.

In 1798, the Marquis Wellesley arrived as Governor-General, firmly imbued with the necessity of destroying the last vestiges of French influence. In pursuance of this policy he reduced Mysore, where Tipu was intriguing with the French, and then turned his attention to the Mahratta States, in which Sindhia had established power over the Mughal Emperor at Delhi by means of a large regular army officered by Europeans under the French adventurer Perron. In campaigns against Sindhia in Hindustan by a British Army under General Lake, and in the Deccan against that prince and the Raja of Berar by an army under General Wellesley, afterwards Duke of Wellington, the power of these Chiefs was broken in the battles of Laswari and Assaye. French influence was finally destroyed, and the Mughal Emperor was released from the domination of the Mahrattas. Subsequently Holkar also was reduced, and British power established on a firm footing.

Mutiny at Vellore.—The Indian Army had been from time to time subject to incidents of mutiny which were the precursors of the great cataclysm of 1857. The most serious of these outbreaks occurred at the fort of Vellore in 1806 when the native troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort, while the striped flag of the Sultan of Mysore, whose sons were confined there, was raised upon the ramparts. The mutiny was suppressed by Colonel Gillespie, who galloped over from Arcot at the head of the 19th Light Dragoons, blew in the gate of the fort, and destroyed the mutineers. This retribution put a stop to any further outbreaks in the army.

Overseas Expeditions.—Several important overseas expeditions were undertaken in the early part of the nineteenth century. Bourbon was taken from the French. Ceylon and the Spice Islands were wrested from the Dutch, and Java was conquered in 1811 by a force largely composed of Bengal troops which had volunteered for this service.

In 1814, the Nepal War took place in which the brave Gillespie, who had distinguished himself in Java, was killed when leading the assault on the fort of Kalunga. The Gurkhas were overcome in this war after offering a stout resistance.

In 1817, hostilities again broke out with the Mahrattas, who rose against the British during the progress of operations against the Pindaris. Practically the whole army took the field and all India was turned into a vast camp. The

Mahratta Chiefs of Poona, Nagpur, and Indore rose in succession, and were beaten, respectively, at Kirkee, Sitabadi, and Mehidpur. This was the last war in Southern India. The tide of war rolled to the north never to return. In the Punjab, to which our frontier now extended, our army came into touch with the great military community of the Sikhs.

In 1824, the armies were reorganised, the double-battalion regiments being separated, and the battalions numbered according to the dates they were raised. The Bengal Army was organised in three brigades of horse artillery, five battalions of foot artillery, two regiments of European and 68 of Indian infantry, 5 regiments of regular and 8 of irregular cavalry. The Madras and Bombay armies were constituted on similar lines, though of lesser strength.

First Afghan War and Sikh Wars.—In 1839, a British Army advanced into Afghanistan and occupied Cabul. There followed the murder of the British Envoys and the disastrous retreat in which the army perished. This disaster was in some measure retrieved by subsequent operations, but it had far-reaching effects on British prestige. The people of the Punjab had witnessed these unfortunate operations, they had seen the lost legions which never returned, and although they saw also the avenging armies they no longer regarded them with their former awe. Sikh aggression led to hostilities in 1845-46, when a large portion of the Bengal Army took the field under Sir Hugh Gough. The Sikhs were defeated after stubborn fights at Mudki and Ferozeshahr, the opening battles, but did not surrender until they had been overthrown at the battles of Aliwal and Sohraon. Two years later an outbreak at Multan caused the Second Sikh War when, after an indecisive action at Chillianwala, our brave enemies were finally overcome at Gujrat, and the Punjab was annexed. Other campaigns of this period were the conquest of Sind by Sir Charles Napier, and the Second Burmese War, the first having taken place in 1824.

The conquest of the Punjab extended over the frontier to the country inhabited by those turbulent tribes which have given so much trouble during the past sixty years while they have furnished many soldiers to our army. To keep order on this border the Punjab Frontier Force was established, and was constantly engaged in small expeditions which, while they involved little bloodshed, kept the force employed and involved much arduous work.

The Indian Mutiny.—On the eve of the mutiny in 1857 there were in the Bengal Army 21,000 British and 137,000 Indian troops. In the Madras Army 8,000 British and 49,000 Indian troops; and in Bombay 9,000 British and 45,000 Indian troops. The proportion of Indian to British was therefore too large for safety. The causes of the mutiny were many and various. Among these were the annexation policy of Lord Dalhousie, especially that of Oudh from which the greater part of the Bengal Army was drawn; interference with the privileges of the sepoy with respect to certain allowances; and lack of power on the part of commanding officers either to punish or reward. The final spark which fired the revolt was the introduction of a new cartridge. The muskets of those days were supplied with a cartridge

in which the powder was enclosed in a paper cover, which had to be bitten off to expose the powder to ignition. In 1857 a new cartridge was introduced with paper of a glazed texture which it was currently reported was greased with the fat of swine and oxen, and therefore unclean alike for Muhammadans and Hindus. This was interpreted as an attempt to destroy the caste and the religion of the sepoys. Skilful agitators exploited this grievance, which was not without foundation, and added reports that flour was mixed with bone-dust and sugar refined with the blood of oxen.

Disaffection culminated in mutiny at Barrackpore and in an outbreak at Barrackpore where sepoy Mangai Pande attacked a European officer. The next most serious manifestation was the refusal of men of the 3rd Bengal Cavalry at Meerut to take the obnoxious cartridge. These men were tried and sentenced to long terms of imprisonment, their fetters being riveted on parade on the 9th May. Next day the troops in Meerut rose, and, aided by the mob, burned the houses of the Europeans and murdered many. The troops then went off to Delhi. Unfortunately there was in Meerut no senior officer capable of dealing with the situation. The European troops in the place remained inactive, and the mutineers were allowed to depart unmolested to spread the flames of rebellion.

Delhi is the historic capital of India. On its time worn walls brood the prestige of a thousand years of Empire. It contained a great magazine of ammunition. Yet Delhi was held only by a few Indian battalions, who joined the mutineers. The Europeans who did not succeed in escaping were massacred and the Delhi Emperor was proclaimed supreme in India. The capital constituted a nucleus to which the troops who mutinied in many places looked to the standard of the Mughal. An army was assembled for the recovery of Delhi but the city was not captured until the middle of September. In the meantime mutiny had spread. The massacres of Cawnpore and Jhansi took place, and Lucknow was besieged until its relief on the 27th September. The rebellion spread throughout Central India and the territory that now forms the Central Provinces, which were not recovered until Sir Hugh Rose's operations in 1858 ended in the defeat of the Rani of Jhansi.

Minor Campaigns.—During the period until 1879, when the Second Afghan War began, there were many minor campaigns including the China War of 1860, the Armevya Campaign, and the Abyssinian War. Then followed the Afghan War in which the leading figure was Lord Roberts. There were expeditions to Egypt and China, and Frontier Campaigns of which the most important was the Tirah Campaign of 1897. There were also the prolonged operations which led up to or ensued upon the annexation of Burma, several campaigns in Africa, and the expeditions to Lhasa. But until 1914, since the Afghan War, the army of India, except that portion of the British garrison which was sent to South Africa in 1899, had little severe fighting, although engaged in many arduous enterprises.

Reorganisation after the Mutiny.—In 1857 the East India Company ceased to exist

and their army was taken over by the Crown. At this time the army was organized into three armies, viz: Bengal, Bombay and Madras, the total strength being 65,000 British and 140,000 Indian troops.

Several minor re-organizations took place during the following years, such as the linking of three Regiments together and the raising of Class Regiments and Companies. In 1895 the next large reorganization took place. This was the abolition of the three Armies and the introduction of the command system. Four Commands were formed, viz: Punjab, Bengal, Madras and Bombay.

Lord Kitchener's Scheme.—This system lasted until 1904 when under Lord Kitchener's re-organization the Madras Command was abolished and the Army divided into three Commands—the Northern, Eastern and Western, corresponding to the Punjab, Bombay and Bengal Commands.

In 1907, Lord Kitchener considered that consequent on the delegation of administrative powers to Divisional Commanders, retention of such powers by Lieutenant-Generals of Commands led to delay in the despatch of business. The Command system was therefore abolished and India was divided into two Armies—the Northern and Southern—each under a General Officer who was responsible for the command, inspection and training of the troops but was given no administrative responsibilities.

Early in the War both Army Commanders took the field and were not replaced until 1916 and 1917 when both had practically the same functions as their predecessors. It was now realised that administration was being unduly centralised at Army Headquarters and the machinery was becoming clogged with unnecessary details. To secure efficiency at A. H. Q., therefore, a certain measure of decentralisation was carried out in 1918. With the alteration of the designation "Army" to "Command" at this time, a considerable increase was made in the administrative staffs of the two Commands and the General Officers Commanding were given powers to deal with all administrative questions other than those dealing with matters of policy, new principles or war.

The Commands were increased to four in 1920, each under a General Officer Commanding-in-Chief.

Present System of Administration.

The essential features of the Army, as constructed on its present basis, will be found in "The Army in India and its Evolution," a publication issued in 1924 with the authority of the Government of India.

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the military administration in India.

The Secretary of State's principal adviser on Indian military affairs is the Secretary in the Military Department of the India Office. The post is filled by a senior officer of the Indian Army with recent Indian experience. The appointment is at present held by Lieutenant-General Sir John F. S. D. Coleridge, K.C.B., C.M.G., D.S.O., who was formerly

Commander of the Peshawar District from October 1930 to May 1933. The Military Secretary is assisted by one first grade staff officer, selected from the Indian Army. In order that he may keep in touch with the current Indian affairs, the Military Secretary is expected to visit India during the tenure of his office. In addition, by a practice which has obtained for many years, a retired Indian Army officer of high rank has a seat upon the Secretary of State's Council.

The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, who is required to pay due obedience to all such orders as he may receive from the Secretary of State. The Viceroy's Executive Council exercise in respect of Army administration the same authority and functions as they exercise in respect of other departments of the Government; in the first phase of the representative institutions conferred upon India by the Montagu-Chelmsford Reforms Scheme, Army expenditure and the direction of military policy have been excluded from the control of the Indian Legislature.

The Commander-in-Chief.—The next authority in the chain of administrative arrangements is His Excellency the Commander-in-Chief, who by custom is also the Defence Member of the Viceroy's Executive Council. The appointment is held by His Excellency General Sir Robert A. Cassels, G.C.B., C.S.I., D.S.O., Indian Army, who succeeded Field-Marshal Sir Philip Chelmsford. He is also a member of the Council of State. All the work connected with the administration of the Army, the formulation and execution of the military policy of the Government of India, the responsibility for maintaining every branch of the Army, combatant and non-combatant, in a state of efficiency, and the supreme direction of any military operations based upon India are centred in one authority,—the Commander-in-Chief and Defence Member. In addition, he administers the Royal Indian Navy and the Royal Air Force in India. The Commander-in-Chief is assisted in the executive side of his administration by 4 Principal Staff Officers, viz., the Chief of the General Staff, the Adjutant-General, the Quartermaster-General and the Master-General of Ordnance.

The Defence Department.—The Department is administered by a Secretary who, like other Secretaries in the civil departments, is a Secretary to the Government of India as a whole, possessing the constitutional right of access to the Viceroy, he is also for the purposes of Sub-section 4, Section 26 of the Regimental Debts Act, 1893 (56 Vict. C. 5) and the Regulations made thereunder Secretary to the Government of India in the Military Department. He also exercises the powers vested in the Army Council by the Geneva Convention Act, 1911, so far as that Act applies to India under the Order in Council No. 1551 of 1916. He is assisted by a Deputy Secretary (who is also Secretary of the Indian Soldiers' Board), an Under Secretary, a Director of Military Lands and Cantonments, a Director of Regulations and Forms, and two Assistant Secretaries (one of whom is also Joint Secretary of the Indian Soldiers' Board).

The Defence Department deals with all army services proper, and also the administration of the Royal Indian Navy and the Royal Air Force in India, in so far as questions requiring the orders of the Government of India are concerned. The Defence Department Secretariat has no direct relations with commanders of troops or the staffs of formations subordinate to Army Headquarters. It has continuous and intimate relations with Army Headquarters in all administration matters and is responsible for the administration of Cantonments, the estates of deceased officers and the compilation of the Indian Army List. The Army administration is represented in the Legislature by the Defence Member in the Council of State, and by the Defence Secretary in the Legislative Assembly.

The Military Council—Is composed of the Commander-in-Chief as President, and the following members, namely: The Chief of the General Staff, as Vice-President, the Adjutant-General, the Quartermaster-General, the Master-General of Ordnance, the Air Officer Commanding Royal Air Force, the Secretary to the Government of India in the Defence Department and the Financial Adviser, Military Finance, representing the Finance Department of the Government of India. The Under Secretary, Defence Department, acts as its Secretary. It is mainly an advisory body, constituted for the purpose of assisting the Commander-in-Chief in the performance of his administrative duties. It has no collective responsibility. It meets when convened by the Commander-in-Chief for the consideration of cases of sufficient importance and difficulty to require examination in conference. The heads of the minor independent branches of Army Headquarters and the directors of technical services attend when required.

Military Territorial Areas.

Indian Territory is divided in four commands each under a General Officer Commanding-in-Chief and the Independent District of Burma under a Commander. The details of the organisation are given in the table on the next page and it will be seen that Commands comprise 13 districts: 4 Independent Brigade Areas and 30 Brigades and Brigade Areas. The Northern Command, with its headquarters at Murree, coincides roughly with the Punjab and North-West Frontier Province; the Southern Command, with headquarters at Poona, coincides roughly with the Bombay and Madras Presidencies and part of the Central Provinces and Rajputana; the Eastern Command, with headquarters at Naini Tal, coincides roughly with the Bengal Presidency and the United Provinces; the Western Command, whose headquarters are at Karachi covers Sind and Baluchistan.

The General Officer Commanding-in-Chief of each command is responsible for the command, administration, training and general efficiency of the troops stationed within his area, and also for all internal security arrangements.

Apart from the four commands, the only formation directly controlled by Army Headquarters is the Burma district which, mainly because of its geographical situation, cannot conveniently be included in any of the four command areas. The Aden Independent brigade which was under the administrative control of the Government of India was trans-

ferred to the administrative control of His Majesty's Government from the 1st April 1927.

The distribution of the troops allotted to the commands and districts has been determined by the principle that the striking force must be ready to function in war, commanded and constituted as it is in peace. With this end in view, the Army in India is now regarded as comprising three categories of troops:

- (1) Covering Troops,
- (2) The Field Army,
- (3) Internal Security Troops.

The role of the Covering Force is to deal with minor frontier outbreaks and, in the event of major operations, to form a screen behind which mobilisation can proceed undisturbed. The force consists of approximately 12 infantry brigades with a due proportion of other arms.

The Field Army consists of 4 Divisions and 4 Cavalry Brigades. The Field Army is India's striking force in a major war.

Army Headquarters.

The organization of the Army Headquarters with the Commander-in-Chief as the head, is founded upon four Principal Staff Officers charged with the administration of—

- (a) The General Staff Branch;
- (b) The Adjutant-General's Branch;
- (c) The Quartermaster-General's Branch;
- (d) The Master-General of Ordnance Branch.

General Staff Branch.

C. G. S.—Lt. Genl. Sir William Bartholomew, KCB, C.M.G., D.S.O., Brit. Ser.

D. C. G. S.—Maj-Genl. E. de Burgh, C.B., D.S.O., O.B.E., I.A.

M. G. S.—Col (local Maj-Genl.) G. F. H. Brooke, D.S.O., M.C., Brit. Ser.

M. G. R.—Maj-Genl. J. M. R. Harrison, C.B., D.S.O., Brit. Ser.

S. O. in-C.—Brigr. C. J. S. LeCornu, O.B.E., M.C., Brit. Ser.

This Branch deals with military policy, with plans of operations for the defence of India, with the organization and distribution of the army for internal security and external war, the administration of the General Staff in India, the supervision of the training of the military forces for war, their use in war, the organisation and administration of the general staff in India; the education of officers, the supervision of the education of warrant and non-commissioned officers and men of the Army in India, and inter-communication services.

Adjutant-General's Branch.

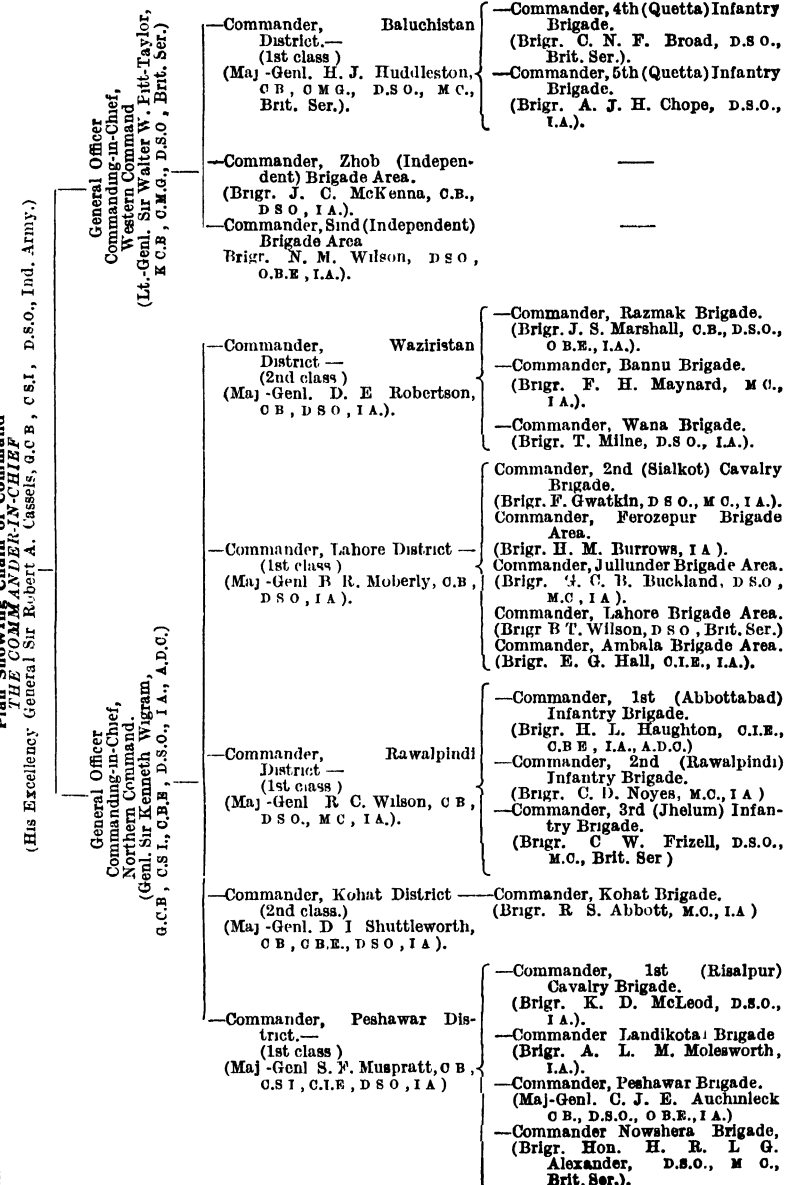

A. G.—Genl. Sir Walter S. Leslie, KCB, KBE, C.M.G., D.S.O., I.A., A.D.C.

D. A. G.—Maj-Genl. H. F. Salt, C.B., O.M.G., D.S.O., Brit. Ser.

D. M. S.—Maj-Genl. E. A. Walker, C.B., I.M.S., K.H.S.

This Branch deals with all matters appertaining to the raising, organising and maintenance of the military forces in officers and men, the peace distribution of the army, discipline, pay and pensions, martial, military and international law, medical and sanitary matters affecting the Army in India, personal and ceremonial questions, prisoners of war, recruiting, mobilization and demobilization. The Judge Advocate-General forms part of the Branch. The Director of Medical Services in India, who was independent before the war, is now included in the Adjutant-General's Branch.

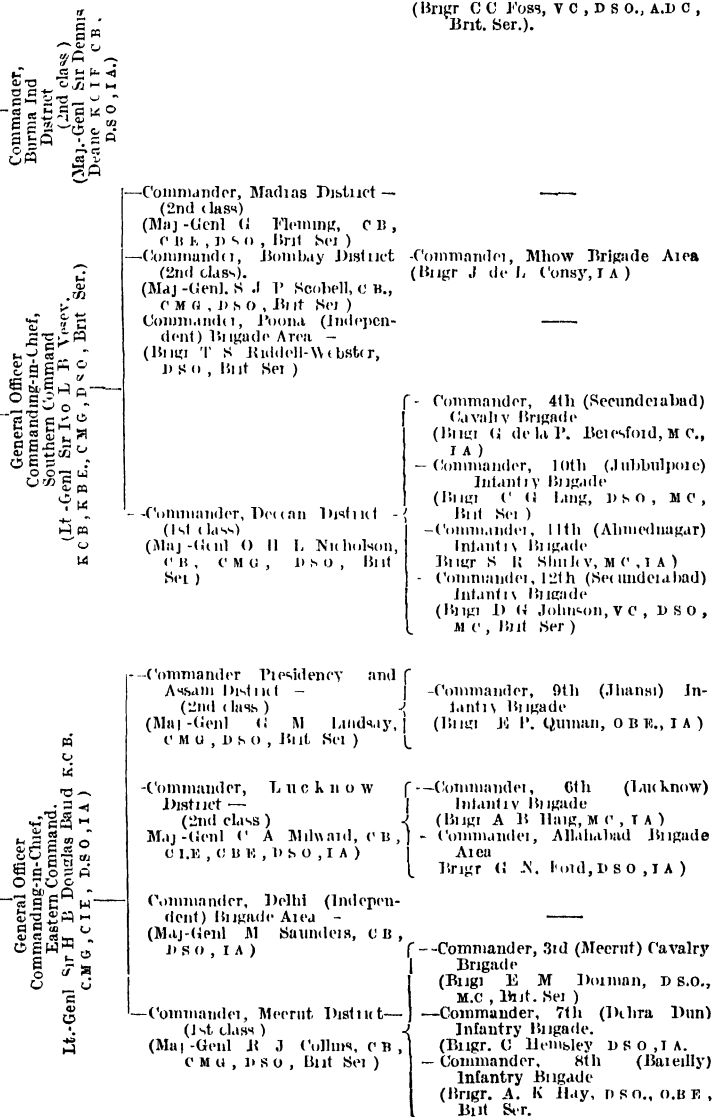

Plan Showing Chain of Command

Plan Showing Chain of Command.

THE COMMANDER-IN-CHIEF — could

(Has Excellency General Sir Robert A. (asent) G C B., C S I., D S O., Ind. Army.)

Quarter-Master General's Branch.

Q. M. G.—Genl Sir W. Edmund Ironside, KCB, CMG, D.S.O., Brit. Ser.

D. Q. M. G.—Maj-Genl C. B. D. Stretzell, O.B., I.A.

D. S. & T.—Maj-Genl E. M. Steward, C.B., O.B., I.A.

This Branch is concerned with the specification, provision, inspection, maintenance and issue of supplies, i.e., foodstuffs, forage, fuel, etc., and is responsible for the following Services—Transportation, Movements, Quartermaster, Supply and Transport, Military Farms, Remounts, Veterinary, Garrison and Regimental Institutes. Also for the purchase of grains and of minor supplies not provided in bulk by the authority responsible for production and provision.

Master General of the Ordnance Branch

M. G. O.—Lt-Genl Sir Henry E. ap Ithys Pryce, KCB, CMG, D.S.O., I.A.

D. M. G. O.—Maj-Genl R. K. Hezlet, C.B., C.B.E., D.S.O., Brit. Ser.

This Branch controls the ordnance and clothing factories and is concerned with the provision, inspection, maintenance and issue of equipment and ordnance stores, clothing, and necessities and conducts all matter relating to contracts in respect of food-stuffs, &c., and supply in bulk of general stores and materials. The Master-General is also responsible for the design, construction, and supply of guns, carriages, tanks, smallarms, machine guns, ammunition, chemical warfare appliances, etc. He also deals with questions regarding patents, royalties and inventions.

There are other branches of Army Headquarters administered by officers who are not classified as Principal Staff Officers, but are not directly subordinate to any of the four Principal Staff Officers.

These are—

(1) MILITARY SECRETARY'S BRANCH.

Mdy Secy.—Maj-Genl W. J. O. Twiss, C.B., C.B.E., M.C., I.A.

The Military Secretary deals with the appointment, promotion and retirement of officers holding the King's Commission, of officers of the Indian Land Forces, the selection of officers for staff appointments, and the appointment of officers to the Army in India Reserve of Officers. He is also the Secretary of the Selection Board.

(2) ENGINEER-IN-CHIEF'S BRANCH.

E.-in-C.—Maj-Genl G. H. Addison, C.B., CMG, D.S.O., Brit. Ser.

The Engineer-in-Chief is the head of the Corps of Royal Engineers in India. He is responsible for Engineer operations and Engineer Services during war and peace, the preparedness for war of the Engineering services. The supply of Engineer stores during war and peace. The construction and maintenance of all military works and the constructional efficiency, accuracy and economy of all projects and designs.

In addition to the above, the Army Headquarters staff includes certain technical advisers, viz., the Major-General, Cavalry, the Major-General, Royal Artillery, and the Adviser and Secretary, Board of Examiners.

The duties of the Inspector of the Army Educational Corps, India and the Inspector of Physical Training are carried out by the Commandants of Army School of Education, India, Belgaum and Army School of Physical Training, Ambala, respectively.

Regular British Forces in India.

The British cavalry and British infantry units of the army in India are units of the British service. No individual British service unit is located permanently in India. Units of the British Army are detailed for a tour of foreign service, of which the major part is as a rule spent in India. In the case of British infantry battalions the system is that one battalion of a regiment is normally on home service while the other is overseas. In the case of British cavalry the same arrangement cannot be applied, as one unit only comprises the regiment.

In Great Britain, in peace-time, units are maintained at an establishment smaller than that required for war. In India, the peace establishments exceed the war establishments in view of the fact that reserves of British personnel do not exist, and reinforcements must be obtained from Great Britain.

British Cavalry.—There are 5 British cavalry regiments in India. The establishment of a British cavalry regiment is 27 officers and 567 other ranks.

British Infantry.—The present number of British infantry battalions in India is 45, each with an establishment of 28 officers and 865 other ranks.

In 1921, an important change was made in the composition of a British infantry battalion in India by the inclusion of a proportion of Indian combatant ranks. Battalions had always maintained a quota of Indian followers, but up to 1921 the combatant personnel was entirely British. In 1921, on the abolition of the Machine Gun Corps, eight machine guns were included in the equipment of a British infantry battalion. This number was increased to twelve in 1927. In 1929, a change of organisation was introduced, and the battalion now comprises—*Headquarters Wing*—1 Support Company and 3 Rifle Companies. Each Rifle Company has 4 Lewis guns. The Support Company is organised into—*Headquarters* and 3 Platoons (all on pack) each of 2 Sections of 2 Vickers guns each. The peace establishment of Indian combatant personnel is fixed at one Indian officer and 42 Indian other ranks. The Support Company platoon, as it is called, is transferred *en bloc* to another British battalion when the battalion to which it was originally attached proceeds on relief out of India.

Royal Artillery.—Indians are employed as drivers and artificers in the Royal Horse Artillery and in field and medium batteries, as drivers, gunners and artificers in mountain batteries, and as gunners in heavy batteries.

The peace organisation of the artillery at the present day is as follows:

Royal Horse Artillery.—Comprises four independent batteries. Each battery is armed with six 13-pounder guns.

Field (Higher and Lower Establishment) Brigades.

—Four brigades on the higher establishment, each consisting of headquarters and four batteries. Four brigades on the lower establishment, each consisting of headquarters and four batteries. A brigade on the higher establishment consists of 2 batteries of six 18 prs each and 2 batteries of six 4.5" Howitzers. A brigade on the lower establishment consists of 2 batteries of four 18 prs. each and 2 batteries of four 4.5" Howitzers.

Field (Mechanised) Brigades.—Two mechanised brigades each consisting of two batteries with armed four 18-pounder guns, and two batteries armed with four 4.5" howitzers.

Indian Mountain Brigades.—Six brigades, each consisting of headquarters, one British light and three Indian mountain batteries, one unbrigaded mountain battery also one mountain Artillery Section for Chitral and one Survey Section. All batteries are armed, with four 3.7" howitzers. The armaments of the Frontier posts at Kohat, Fort Lockhart, Fort Milward, Fort Salop, Jhansi post, Arawali, Bannu, Wana Mir Ali, Wana Thal, Chaman, Hindubagh, Malakand, Landi Kotal, Shagal: Chakdara and Fort Sandeman are also manned by personnel of Indian Mountain Brigades, R.A.

Medium Brigades.—There are two such brigades. Three batteries in each brigade, two of which are armed with six 6" howitzers, and one battery with four 60-pounder guns.

Heavy Brigade.—One battery at Bombay and one at Karachi.

Anti-Aircraft.—Headquarters One battery, located at Bombay. The battery is armed with eight 3 inch, 20 cwt guns.

Indian Regiment of Artillery.—The first unit of this new corps has been raised as a field artillery brigade and is designated "A" Field Brigade, Indian Artillery. The establishment of this brigade consists of brigade headquarters, 2 batteries each of 18-pr. guns and 2 batteries each of four 4.5" howitzers.

Artillery Training Centres.—One centre at Muttra, for Indian ranks of R. H. A. and of field medium and anti-air craft batteries and another centre at Ambala for Indian ranks of Light, Mountain and Heavy Artillery. These centres were created for the recruitment and training of Indian personnel. There is also a R. A. Boys Depot at Bangalore.

Engineer Services.

The Engineer-in-Chief.—The head of the Corps of Royal Engineers in India is directly responsible to His Excellency the Commander-in-Chief. The Engineer-in-Chief is not a Staff Officer, but the technical adviser of the Commander-in-Chief on all military engineering matters and is responsible for:

(1) Engineer operations and engineer services during war and peace.

(2) The preparedness for war of the engineering services.

(3) The supply of engineer stores during war and peace.

(4) The execution and maintenance of all military works.

(5) The constructional efficiency, accuracy and economy of all projects and designs submitted by him.

The Organisation.—The Engineer organisation of the Army consists of two main branches, viz., the Sappers and Miners and the Military Engineer Services.

The composition of the Corps of Sappers and Miners is as follows:

Queen Victoria's Own Madras Sappers and Miners, with headquarters at Bangalore. King George's Own Bengal Sappers and Miners, with headquarters at Roorkhee Royal Bombay Sappers and Miners, with headquarters at Kirkee.

The personnel of the Corps consists of Royal Engineer officers, Indian Army Officers from the late Pioneer Corps, Indian officers holding the Viceroy's commission, a certain number of British warrant and non-commissioned officers, Indian non-commissioned officers and Indian other ranks. Each Corps is commanded by a Lieut.-Colonel, who is assisted by a Superintendent of Instruction, an Officer-in-Charge, Workshops, an Adjutant, three Quartermasters, three Subadar-Majors, a Jemadar Adjutant and a Jemadar Quartermaster.

Field Troops are mounted units, trained to accompany cavalry, and are equipped to carry out hasty bridging, demolition and watersupply work. Field Companies are trained to accompany infantry. Divisional Headquarters' Companies are small units containing highly qualified "tradesmen" and are trained to carry out technical work in connection with field workshops. Army Troops Companies are somewhat smaller units than field companies; they are required to carry out work behind divisions, under the orders of Chief Engineers, e.g., heavy bridging work, large water-supplies, electrical and mechanical installation.

The Military Engineer Services control all military works in India, and Burma except in the case of a few small outlying military stations, which are in charge of Public Works Department. They control all works for the Royal Air Force and all such works as are entrusted to them in respect of the Royal Indian Navy; and they are charged with all civil works in the North-West Frontier Province and Baluchistan under the orders, in each of these two areas, of the Governor and Agent to the Governor-General, respectively. They also control civil works in Bangalore, under the Mysore Government.

The Engineer-in-Chief is assisted by a Deputy Engineer-in-Chief (Works) and a Deputy Engineer-in-Chief (Electrical and Mechanical). In each Command there is a Chief Engineer, while in the Northern Command a Deputy Chief Engineer administers Military and Civil works in the N. W. F. P. and is Secretary, P. W. D., to the Govt. of N. W. F. Province. The Chief Engineer, Western Command, is the

Secretary, P. W. D., to the Agent to the Governor-General in Baluchistan. Both at Army Headquarters and in Commands there are Staff Officers, R. E., and Technical Officers. At the headquarters of each district there is a Commander, Royal Engineers, assisted in certain districts by A. Cs. S. R. E. Officers of the Barrack Department are also employed as District Stores Officers. Garrison Engineers are in charge of brigade areas and military stations, their charges being divided into sub-divisions under Sub-divisional Officers. The sub-divisions are Buildings and Roads, Electrical and Mechanical, and Furniture and Stores. There are sub-overseers for Buildings and Roads and the Barrack Department subordinates in charge of Furniture and Stores are assisted by store-keepers.

Royal Air Force in India.

The Royal Air Force in India is controlled by the Commander-in-Chief in India as part of the defence services of the Indian Empire. The Air Force budget is incorporated in the Defence Services Estimates. The Commander of the Air Force, the Air Officer Commanding in India is an Air Marshal whose rank corresponds to that of a Lieut.-General in the Army. The appointment is now held by Air Marshal Sir Edgar R. Ludlow-Hewitt, KCB, C.M.G., D.S.O., MC.

The headquarters of the Air Force is closely associated with Army Headquarters and is located with the latter at the seat of the Government of India. The Air Officer Commanding has a headquarters staff constituted in six branches, namely, air staff, personnel, technical, stores, medical, and chief engineer. The system of staff organisation is similar to the staff system obtaining in the Army. Broadly speaking, the duties assigned to the divisions mentioned are those which are performed by the General Staff Branch, the Adjutant-General's and Military Secretary's branches, the Quartermaster-General's Branch, the Medical Directorate and the Engineer in Chief's branch respectively, of Army Headquarters.

Subordinate formations.—The formations subordinate to the Royal Air Force Headquarters are:—

- (i) GROUP COMMAND, comprising 2 Wing Stations of two squadrons each, on a station basis.
- (ii) Wing Command comprising 2 squadrons not on a station basis.
- (iii) Station Commands.
- (iv) The Aircraft Depot.
- (v) The Aircraft Park.
- (vi) Heavy Transport Flight.
- (vii) R.A.F. Hill Depot, Lower Topa.

Group Command.—The Group Command is known as No. 1 (Indian) Group Headquarters, and is located at Peshawar. The Group Commander is a Group Captain, corresponding in rank to a Colonel in the Army. His staff is organised on the same system as that of the Headquarters of the R.A.F. in India. The establishment of the Group consists of 7 officers and 21 airmen.

The subordinate units to No. 1 (Indian) Group Headquarters are as follows:—

- No. 1 Wing Station, R.A.F., Kohat.
- No. 2 Wing Station, R.A.F., Risalpur.

Army Co-operation Squadron at Peshawar.

Wing Command.—There is one Wing Command only namely 3 (Indian) Wing, R.A.F., located at Quetta. The Wing Commander is an officer with Air Force rank corresponding to a Lieutenant-Colonel in the Army.

He is equipped with a staff organised on approximately the same system as the Headquarters of a Group. The Wing Establishment consists of 5 officers and 13 airmen.

Wing Station Commands.—There are 2 Wing station commands in India, one located at Peshawar and the other at Risalpur. Each station consists of two squadrons on a reduced squadron basis with one administrative head, i.e., Station Headquarters under the command of a Wing Commander. The strength of the Station Headquarters is 8 officers and 112 airmen, while that of the two squadrons totals 24 officers and 106 airmen. The Wing Station at Risalpur also administers the Parachute Section.

The Squadrons.—Of the 8 squadrons 7 are extended along the North West Frontier from Quetta to Risalpur, and one is stationed at Ambala.

The squadron is the primary air force unit, and it consists, normally, of a Headquarters and three flights of aeroplanes. A flight can be detached temporarily but not permanently from its squadron as repair facilities, workshops and stores cannot economically be organised on anything less than a squadron basis. The squadrons headquarters comprises the officers and other ranks required for the command and administration of the squadron as a whole; it includes the workshops and repair units, the armouries and equipment stores of the squadrons.

The number of aeroplanes in a squadron varies with the type of aeroplane with which the squadron is equipped; but speaking generally squadrons on a peace basis have twelve aeroplanes i.e., four in each of three flights. This does not however apply to the twin engine bombing squadrons.

Of the 8 squadrons 4 are equipped with Bristol Fighters and four with Wapitis and they are allotted for distant reconnaissance and bombing duties, of the other four, which are allotted for Army Co-operation duties, two squadrons are equipped with Bristol Fighters and two with Wapitis aircraft.

Squadron Establishment.—The establishment of officers in a squadron consists of seven officers in the Headquarters, and fifteen officers allotted to flying duties. This allows a reserve of one officer for each of the operative flights.

The establishment of other ranks is 123 airmen.

The Aircraft Depot.—The Aircraft Depot may be conveniently described as the wholesale store and provision department of the Royal Air Force. Technical stores are received from the United Kingdom, and in the first instance, held by this unit. It is the main workshop and repair shop of the Force, where all engine repairs, and aircraft repairs of any magnitude are carried out. New aeroplanes received from the United Kingdom are also erected here. The Depot is located at Drigh Road, Karachi.

The Aircraft Park.—Relatively to the Aircraft Depot, the Aircraft Park may be described as a central retail establishment, intermediate between the squadrons and the Aircraft Depot. It receives stores from the depot and distributes them to the squadron. The Stocks held in the Park are, however, usually limited to items necessary at short notice for operations, and the quantities held are kept as low as distance from the depot and local conditions will admit. In war, an Aircraft Park is intended to be a mobile formation, though the Aircraft Park in India cannot be made mobile under ordinary conditions. In peace, the Aircraft Park is located at Lahore. In addition to the above functions, practically the whole of the motor transport bodies required for R. A. F. vehicles and all other mechanical transport vehicles in the command are built or repaired at Aircraft Park. The Heavy Transport flight is administered by this unit.

Composition of Establishments.—The personnel of the Royal Air Force in India consists of officers, warrant officers, non-commissioned officers and men in the ranks of the R. A. F. of the United Kingdom, and Indian artificers, Mechanical Transport drivers and followers of the Indian Technical and Followers Corps, R. A. F. in India. The officers are employed on administration, flying and technical duties but all with the exception of officers of the store and medical branches are required to be capable of flying an aeroplane. A proportion of airmen are also trained and employed as pilots for a period of five years, after which period, they revert to their technical trades. Apart from these airmen all warrant officers, non-commissioned officers and aircraftmen are employed solely on technical duties. The only other flying personnel who are not officers or airmen pilots are air gunners and a certain percentage of wireless operators.

The warrant officers, non-commissioned officers and aircraftmen are employed at all units. The personnel of the Indian Technical and Followers Corps are employed as follows:—

- (a) Technical Section .. Aircraft Depot.
(Artificers) .. Aircraft Park.
(b) M. T. Drivers Section .. All Units.
(c) Followers Section .. All Units.

The total establishment of the Royal Air Force in India is as follows:—

Officers	..	265
Airmen	..	1,894
Indian Officers, other ranks and followers	..	992
Civilians	..	532

The Royal Air Force Medical Services.—In India, as in the United Kingdom, the Air Force has a medical service of its own. Flying is carried out under conditions which differ widely from those on the ground. With the growth of aeronautics therefore, it was found necessary to create a separate department of medical science whose functions, broadly stated are to study the effect of flying upon the human constitution both mental and physical, to study also the effects of different forms of illness and physical disability

upon flying efficiency and to apply in practical form the results ascertained. The essential object in view is to save life by ensuring, as far as possible that those who fly are physically and psychologically fit to do so. The present establishment of the Royal Air Force Medical Service in India consists of 10 officers and 2-airmen. The Medical Administration is controlled by the Principal Medical Officer of the rank of Group Captain, on the staff of the Air Officer Commanding the R. A. F. in India.

Indian Air Force.—This force came into existence on 8th October 1932, the date on which the first batch of six Indian cadets, after receiving training at Cranwell, obtained commission as Pilot Officers. These officers will form the first unit of the Indian Air Force. The training of cadets for the Indian Air Force cannot at present be undertaken in India, and arrangements have been made to continue their training at Cranwell.

Regular Indian Forces.

Indian Cavalry.—The present number of Indian cavalry regiments is 21

The peace establishment of an Indian cavalry regiment comprises:

- 14 British officers.
19 Indian officers.
492 Indian non-commissioned officers and men.

Indian Infantry.—The establishment of the Indian Infantry is constituted as follows.

		Battalions
19 Infantry Regiments consisting of	..	98
3 Regiment of Sappers and Miners	..	7
10 Gurkha regiments consisting of	..	20
32		125

The normal strength of an active battalion is—

	British Officers	Indian Officers.	Indian other ranks
Infantry ..	12	20	703
Gurkhas ..	13	22	898

The strength of an infantry training battalion depends upon the number of battalions forming the regiment. The average is as follows —

British Officers 10, Indian Officers 15, and Indian other ranks 780.

In 1932 it was decided that the Pioneer organization was no longer absolutely necessary as the duties on which Pioneers were employed e.g., road-making etc., were now generally performed by labour. The whole organization has therefore been disbanded, and the opportunity has been taken to make a much needed addition to the various Engineer units (Sappers and Miners).

Reserves for the various units of the Indian Army have to be sufficient to provide for an actual shortage on mobilisation as well as for the maintenance of the mobilised unit at full strength for the first 8 months after mobilisation.

Reserve.—The conditions of the reserve, are as follows:—

The Indian Army Reserve consists of private soldiers or their equivalent. It is comprised of class 'C' reservists for Indian Cavalry

Artillery, Sappers and Miners, Signals and Infantry and class 1 for Gurkha Rifles. The new class 'C' reserve was introduced for Indian Cavalry, Artillery, Sappers and Miners and Signals with effect from 1st October 1932 and for Indian Infantry with effect from 1st May 1932. There still remain a number of classes 'A' and 'B' reservists which count against the authorised establishment of the reserve but those will be gradually eliminated.

Training for Indian Cavalry, Infantry and Gurkha Rifles reservists is carried out biennially. Reserve pay at certain specified rates is admissible from the date of transfer to, or enrolment in, the reserve. When called up for service or training, reservists receive pay and allowances, in lieu of reserve pay, at regular rates according to their arm of the service.

The establishment of reservists is fixed at present as follows:—

Cavalry	2,940
Artillery	2,325
Engineers	2,350
Indian Signal Corps	625
Infantry	22,120
Gurkhas	2,000
Railway Nucleus Reserve	652
Supplementary Reserve	255
Total	33,267

The Indian Signal Corps.—The Corps is organised on the same lines as a Sapper and Miner Corps, with a headquarters for recruiting and training personnel, and detached field units for the various army formations. The head of the corps is the Signal Officer-in-Chief in the General Staff Branch at Army Headquarters. He acts as a technical adviser on questions connected with signals, and is also responsible for the technical inspection of all signal units. A chief signal officer with similar functions is attached to the headquarters of each Army Command. The British portion of the Corps has now been amalgamated with the Royal Corps of Signals.

The Signal Training Centre, India, is located at Jubbulpore, and is commanded by a Lieut-Colonel, assisted by a staff, British and Indian, organised on very much the same lines as the headquarters of a Corps of Sappers and Miners.

The establishments of the Royal Tank Corps formations are shown below:—

	British Officers.	British other ranks.	Followers.	Motor cars.	Motor cycles.	Armoured cars.	Lorries.
Tank Corps School	5	41	15	1	2	9	9
Armoured Car Company	12	145	32	2	6	16	10

Medical Services.—The military medical services in India are composed of the following categories of personnel and subordinate organisations:—

- (a) Officers and other ranks of the Royal Army Medical Corps serving in India;
- (b) Officers of the Indian Medical Service in military employment.

The various types of field units and the number maintained are:—

Corps Signals Headquarters including Line and Wireless Company	..	2
Cavalry Brigade Signal Troops	..	4
Divisional Signals	..	4
District Signals	..	3
Experimental Wireless Section	..	1
Zhob Signal Section.		

In addition, there is an Army Signal School which carries out the training of regimental signalling instructors.

The formation of the District signals units was effected in 1926 with the transfer of Communications on the North-West Frontier to the Posts and Telegraphs Department. This transfer of communications also made feasible the raising of the 'A' and 'C' troops of Cavalry Brigade Signals to include a Wireless Section each the formation of two Corps Signal Headquarters. The District Signals are located at Peshawar, Waziristan and Kohat.

Royal Tank Corps.—Six armoured car companies arrived in India in 1921. Two more companies arrived in 1925. Two Group Headquarters were sanctioned in 1925. They were located as follows:—the Northern Group at Rawalpindi, this Group Headquarters commanded companies in the Northern and Eastern Commands. The Southern Group at Poona. This Group Headquarters commanded companies in the Southern and Western Commands.

These have been abolished and their duties are carried out by the Commander, R. Tank Corps, Northern Command, so far as that command is concerned and by the Commandant, R. T. C. School, Ahmednagar, in respect of the other three commands. There is a school at Ahmednagar for the training of R. T. C. personnel and the conduct of experiments.

Organisations.—3 Light Tank Companies. Each company consists of Headquarters and 3 Sections and is armed with 25 Carden Lloyd Light Tanks, 4 for Company Headquarters and 7 per section.

5 Armoured Car Companies. Each company consists of Headquarters and 3 Sections and is armed with 16 armoured cars; 1 for Company Headquarters and 5 per section. The armoured cars at present in India are of various types

formations are shown below:—

- (c) The Indian Medical Department, consisting of two branches, viz., (i) assistant surgeons and (ii) sub-assistant surgeons.

(d) Queen Alexandra's Imperial Military Nursing Service.

(e) The Queen Alexandra's Military Nursing Service for India.

(f) The Army Dental Corps.

(g) The Indian Military Nursing Service.

(h) The Indian Hospital Corps.

Of these categories, the officers and men of the Royal Army Medical Corps and the Army Dental Corps, the assistant surgeons of the Indian Medical Department and the Queen Alexandra's Imperial Military Nursing Service and the Queen Alexandra's Military Nursing Service for India are primarily concerned with the medical care of British troops; while the officers of the Indian Medical Service, the sub-assistant surgeons of the Indian Medical Department and the Indian Military Nursing Service are concerned, primarily, with the medical care of Indian troops. The Indian Hospital Corps serves both organisations.

Civilians of miscellaneous classes employed by the Army in Waziristan are given medical treatment in military hospitals, and arrangements have been made with the Headquarters of the Indian Red Cross Society for the medical treatment and care of cases amongst Indian soldiers and followers of the Indian Army for chronic diseases, such as tuberculosis, leprosy and diabetes.

Indian Army Service Corps.—The Indian Army Service Corps is the counterpart of the Royal Army Service Corps of the British Army. It has developed from the Commissariat Department of an earlier period, and its immediate predecessor was the Supply and Transport Corps, by which name the service was known up to 1923. The Indian Army Service Corps which is under the control of the Quartermaster-General, is constituted in three main branches, namely: (a) Supply, (b) Animal transport, and (c) Mechanical Transport. The latter is constituted upon a special basis, which is, generically, a sub-division of the Royal Army Service Corps organisation.

The strength of the establishment is shown by categories in the following table.—

SUPPLY.

Officers with King's commissions	129
Indian officers	80
British other ranks	257
Civilians	615
Followers	1,574
Total	2,655

ANIMAL TRANSPORT

Officers with King's commissions.	48
Indian officers	129
British other ranks	39
Civilians	97
Indian other ranks	9,859
Followers	1,475
Total	11,647

There are also 1,576 driver reservists.

The total number of mules and camels maintained under the present organisation, including the depots and the detachment in Kashmir, are 13,258 and 3,946 respectively. There are also 401 ponies and 12 bullocks. Wheeled and pack transport are combined. The company on the lower establishment represent the pre-war "cadre," other companies being maintained in peace-time at full war establishment.

MECHANICAL TRANSPORT.

Officers with King's commissions.	87
Indian officers	60
British other ranks	165
Indian other ranks	2,751
Civilians	189
Followers	1,388
Total	4,640

There are also 3,235 reservists.

The mechanical transport establishment consists of the following:—

(a) Field units—

- 11 M. T. Companies, consisting of 11 headquarters, 37 sections (higher establishment), and 4 service sections (lower establishment).
- 5 M. T. Companies for motor ambulance convoys consisting of 5 headquarters, 1 section (higher establishment) and 11 sections (lower establishment).
- 2 M. T. Companies (Mobile Repair Units) consisting of 2 headquarters and 4 sections.

Headquarters, Chaklala.

(b) Maintenance units—

- 5 Heavy Repair shops.
- Central M. T. Stores Depot.
- Vehicle Reserve Depot.
- Experimental Section.

Apart from units and vehicles employed in the conveyance of military stores, the mechanical transport service also provides motor ambulance convoys for hospitals and field medical units, and vehicles for other miscellaneous purposes. The total establishment now consists of 2,068 vehicles with 109 motor cycles.

The mechanical transport was taken over by the Indian Army Service Corps in 1927. At present the officers of the service are mainly drawn from the Royal Army Service Corps since at present there are no facilities in India for training officers in every branch of mechanical transport duties. The establishment of officers includes, however, a certain number of King's commissioned officers belonging to the Indian Army. The British subordinates of the service are drawn entirely from the Royal Army Service Corps.

The Ordnance Services which are under the M.G.O. may be broadly described as the agency whose duty it is to supply the army with munitions of war, such as small arms, guns, ammunition and other equipment of a technical military character, and also, under an arrangement introduced in recent years, with clothing and general stores other than engineering stores. A central disposal organisation is in operation under the control of the Master General of Ordnance to dispose of the Surplus Stores and waste materials of the various services of the Army and the Royal Air Force in India to the best advantage of the State.

Army Remount Department—The following are among the most important duties for theremount service:—The provision of animals for the Army in India. The enumeration throughout India of all animals available for transport in war. The animal mobil-

zation of all units, services and departments of the army. A general responsibility for the efficiency of all the animals of the army both in peace and war. The administration of the remount squadron formed in 1922 as a nucleus for expansion into three squadrons on mobilization. Breeding operations of a direct character.

The department is organised on lines corresponding to the remount service in the United Kingdom. Its composition is as follows: The Remount Directorate at Army Headquarters consisting of one Director and a Deputy Assistant Director. 4 Remount officers, one attached to each Command Headquarters, 6 Superintendents of Remount Depots, 5 District Remount officers of horse-breeding areas and the Ahmednagar Stud, 10 Assistant Remount officers and 8 Veterinary officers.

Veterinary Services in India.—The Veterinary services are responsible for the veterinary care, in peace and war, of animals of British troops, Indian cavalry and artillery, I. A. S. C. units, the remount department (excluding horse-breeding operations), etc. The veterinary services include: The establishment of Royal Army Veterinary Corps officers, serving on a tour of duty in India and those of the continuous service cadre. The establishment of warrant and non-commissioned officers, India Unattached List, and veterinary assistant surgeons of the Indian Army Veterinary Corps.

The organisation consists of 20 veterinary hospitals, Class I, 25 veterinary hospitals, Class II, 25 branch veterinary hospitals, 9 sick lines and 12 Indian Army Veterinary Corps Sections of personnel posted to veterinary hospitals during peace and forming a cadre for expansion on mobilisation to provide technical personnel for all veterinary units.

Military Farms Department.—This department, which is under the control of the Quartermaster-General consists of two branches:—

(i) The military grass farms, which provide fodder for the army.

(ii) The military dairy farms, for the provision of dairy produce for hospitals, troops and families.

Educational Services.—The education of the army is under the control of the Army Educational Corps and of Indian officers borne supernumerary to the establishment of units of the Indian Army. The establishment is as follows including training schools:—

British officers.	Indian officers.	B. O.	I. O.	Civilians.
61	49	164	877	4,847

Terms of service in the Indian army are as follows:—

Cavalry, 7 years' service in army and 8 years in the reserve.

Artillery, 7 years' service in army and 8 in the reserve for gunners and drivers (horse); drivers (mechanical transport) 6 years in army and 9 years in the reserve; and 4 years' service in army for Heavy Artillery personnel.

S. & M. Corps, 7 years' service in army and 8 in the reserve.

Indian Signal Corps, 7 years' service in army and 8 in the reserve.

Infantry (except Gurkhas and trans-frontier personnel of the Infantry other than Orakzais),

7 years in army service and 8 years in the reserve.

Gurkhas and trans-frontier personnel of infantry, 4 years' service in army.

Indian combatant personnel of British Infantry 6 years in army.

Indian Military establishments of the Indian Army Ordnance Corps, 4 years' service in the army.

Animal transport personnel of the Indian Army Service Corps, drivers of mechanical transport and all combatants of the Army Veterinary Corps, 6 years' service in army and 9 in the reserve.

All combatants in the Works Corps, 2 years' service in army.

Bandsmen, musicians, trumpeters, drummers, buglers, fifers and pipers, 10 years' service in army.

Except in the case of those enrolled in the Works and of those who are non-combatants, all school-masters, clerks, artificers, armourers, engine drivers, farriers, carpenters, tailors and bootmakers, 10 years' service in army.

The period laid down for service in the army is the minimum and may be extended. Combatants may be enrolled direct into the Reserve, in which case there is no minimum period of service, but no one is allowed to serve in the reserve or in any class of the reserve for a longer period than is permitted by the regulations in force.

Frontier Militia and Levy Corps.—These forces are "Civil" troops, i.e., they are administered and paid by the Civil authorities and not by the Army. They are, however, officered by Officers of the Regular Indian Army. These forces were raised for duty on the North-West Frontier and at present consist of the following:—Kurram Militia, Tochi Scouts, South Waziristan Scouts, Chitral Scouts, Gilgit Scouts, Zhob militia and the Mekan Levy Corps.

The Auxiliary Force.

After the war, the question of universal training for European British subjects came up for consideration, and it was decided that in India, as elsewhere in the Empire, the adoption of compulsory military service would be undesirable. It was recognised, however, that India needed some adequate auxiliary force, if only on a voluntary basis, that could be trained to a fairly definite standard of efficiency; and in the result, an Act to constitute an Auxiliary Force for service in India was passed in 1920. Under this Act membership is limited to European British subjects, and the liability of members for training and service is clearly defined. Military training is graduated according to age, the more extended training being carried out by the younger members, the older members being obliged to fire a musketry course only. It was laid down that military service should be purely local. As the form of service that would be most suitable varies largely according to localities, the local military authorities, acting in consultation with the advisory committee of the Auxiliary Force area, were given the power of adjusting the form of training to suit local conditions.

The Auxiliary Force comprises all branches of the service, cavalry, artillery, engineers, infantry—in which are included railway bat-

talions,—machine gun companies, a Signal Company, and the Medical and Veterinary Corps. Units of the Auxiliary Force are under the command of the local military authority, and the latter has the power of calling them out for service locally in a case of emergency. Their role is to assist in home defence. Training is carried on throughout the year. Pay at a fixed rate is given for each day's training and, on completion of the scheduled period of annual training, every enrolled member of the force is entitled to a certain bonus. Men enrol in the Auxiliary Force for an indefinite period. An enrolled person is entitled to claim his discharge on the completion of four years' service or on attaining the age of 45 years. Till then he can only be discharged on the recommendation of the advisory committee of the area.

The duties connected with the Defence Light Sections at Calcutta, Bombay, Karachi and Rangoon are performed by the Field Companies B. E. (A. F. I.) at those stations, assisted by Indian ranks of Sapper and Miner Units.

Indian Territorial Force.

The Territorial Force is one of the several aspects of the Indianisation of the military services. The force is intended to cater, amongst other things, for the military aspirations of those classes of the population to whom military service has not hitherto been a hereditary profession. It is intended, at the same time, to be a second line to and a source of reinforcement for the regular Indian army. Membership of the force for this latter reason carries with it a liability for something more than purely local service or home defence. It may, in certain circumstances, involve service overseas. The force is the direct successor of the Indian section of the Indian Defence Force created during the war. It has been modelled on the old militia in England. The essence of its scheme of organisation consists in training men by means of annual embodiment for a short period in successive years. By this means Indian Territorial Force units can be given sufficient preliminary training in peace to enable them, after a comparatively short period of intensive training, to take their place by the side of regular units in war.

The Indian Territorial Force consists at present of three main categories, provincial battalions, urban units and the university training corps units. The last are recruited from the staff and students of Indian universities. They are trained all the year round by means of weekly drills during terms and a period of 15 days in camp and are equipped with a permanent staff of British instructors. On ceasing to belong to a university, a member of the corps is discharged. In the case of the university training corps units there is no liability to perform the liability to render actual military service. Their purpose is mainly educative, to inculcate discipline and form character. But, incidentally, they are expected to be a source of supply of both officers and men for the provincial and urban units.

The members of the provincial battalions accept the full liability for service which has been mentioned. Seven such battalions were constituted in the first instance. The number is now eighteen and, though the unit establish-

ment has not been completely filled in all cases, the movement has already achieved a greater degree of success than might have been anticipated at so early a stage. Although for the present the infantry arm only has been created with the addition of the I.T.F. Medical Branch, the force by law may include every other army service.

Men enrol in the provincial battalions for a period of six years, the period being reduced to four years in certain cases. On the completion of the first period they can re-enrol voluntarily for further specified periods. During his first year, every man does preliminary training for one calendar month and during every year he receives one month's periodical training. Members of urban units have only a provincial liability. 4 such units were constituted in 1928 in Bombay, Madras, and the United Provinces, one of which has since been disbanded. Members enrolled for a period of 6 years and train all the year round. During his first year every man does 32 days' preliminary training, and in every subsequent year 16 days' periodical training.

The Indian State Forces.

The Indian State Forces, formerly designated "Imperial Service Troops," consist of the military forces raised and maintained by the Rulers of Indian States at their own expense and for State service. It has been the custom in emergency for State troops to be lent to the Government of India, and the Government of India have on many occasions received military assistance of great value from this source. But the rendering of such aid is entirely at the discretion of the Ruling Princes and Chiefs. Government, on the other hand, provide permanently a staff of British officers, termed "Military Advisers and Assistant Military Advisers," to assist and advise the Ruling Princes in organising and training the troops of their States.

After the war had ended, the Indian States, like the Government of India, undertook a military reorganisation, which in a number of cases, has already been carried out. The principal feature of the new arrangements, as adopted more or less generally, is that in future the Indian State Forces should be composed of three categories of troops, namely:

Class A.—Troops in this class are organised on the present-day Indian Army system and establishments, and, with some exceptions, are armed with the same weapons as corresponding units of the regular Indian Army.

Class B.—These troops consist of units which are, in most cases, little inferior in training and discipline to troops of Class A; but they are not organised on present-day Indian Army establishments. They have, as a rule, retained the system of the pre-war formations. Their standard of armament is pitched lower than that of Class A troops.

Class C.—These troops consist in the main of militia formations, which are not permanently embodied. The standard of training, discipline and armament, prescribed for this class, is generally lower than the standard prescribed for Class B troops.

The authorized and actual strength of the

Indian State Forces on the 1st July 1935, amounted to—

	Authorized strength.	Actual strength.
Artillery	1,616	1,610
Cavalry	9,358	8,782
Infantry	38,072	30,642
Camel Corps	466	460
Motor Machine Gun Sections	180	88
Sappers	1,301	1,049
Transport Corps	1,538	1,497
Grand total ..	52,531	44,128

Officers.

There are two main categories of officers in the Indian Army: those holding the King's Commission and those holding the Viceroy's Commission. The latter are all Indians, apart from the Gurkha officers of Gurkha battalions, and have a limited status and power of command, both of which are regulated by the Indian Army Act and the rules made thereunder. Within recent years several Indians have received King's Commissions, on entry into the Indian Army through the Royal Military College, Sandhurst and the Royal Military Academy, Woolwich.

King's Commissioned officers for the Indian Army are obtained from two main sources: from among the cadets who pass through the Royal Military College, Sandhurst, and by the transfer to the Indian Army of officers belonging to British units. The former is the principal channel of recruitment, the latter being only resorted to when, owing to abnormal wastage or for some other special reason, requirements cannot be completed by means of cadets from Sandhurst. A third source is from among University candidates. When a cadet has qualified at Sandhurst and has received his commission, he becomes, in the first instance, an officer of the Unattached List, and is posted for a period of one year to a British battalion or regiment in India, where he receives a preliminary training in his military duties. At the end of the year, he is posted as a squadron or company officer to a regiment or battalion of the Indian Army. Administrative services and departments of the army draw their officers from combatant units, as it has hitherto been regarded as essential that every officer should, in the first instance, receive a thorough grounding in combatant duties, and acquire at first hand an intimate knowledge of the requirements of the combatant arms.

The promotion in rank of King's commissioned officers of the Indian Army is regulated by a time-scale up to the rank of Lieutenant-Colonel but is subject also to certain professional examinations and tests being successfully passed. The rank of Lieutenant-Colonel is in normal course attained at 26 years' service; promotion beyond this rank is determined by selection.

Indian Officers.—One of the most momentous decisions of the Great War, so far as the Indian Army is concerned, was that which rendered Indians eligible to hold the King's commission in the army. King's commissions are obtainable by Indian gentlemen in three ways: (1) By qualifying as a cadet through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich. Examinations are held twice a year in India for the selection

of suitable candidates for admission. (2) By the selection of specially capable and deserving Indian officers or non-commissioned officers of Indian regiments promoted from the ranks or those appointed direct as jemadar. These receive their commissions after training at the Royal Military College or Academy as Cadets and qualifying in the usual way. (3) By the bestowal of honorary King's commissions on Indian officers who have rendered distinguished service, but whose age and lack of education preclude their being granted the full King's commission. The first two avenues of selection mentioned afford full opportunity to the Indian of satisfying a military ambition and of enjoying a military career on terms of absolute equality with the British officer, who, as a general rule, also enters the army by qualifying at Sandhurst or Woolwich. Until 1931, ten vacancies at Sandhurst and three at Woolwich were reserved annually for Indian cadets.

A further measure adopted by the Government was the establishment of the Prince of Wales' Royal Indian Military College at Dehra Dun, a Government institution for the preliminary education of Indians who desire to qualify for the King's commission in the army through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich. The arrangements so far made enable a maximum of 70 boys to be in residence at the college at any one time, and the normal course of education is planned to occupy six years. In February 1923, it was decided that eight units of the Indian Army should be completely Indianized. The units selected for Indianization were 7th Light Cavalry; 16th Light Cavalry, 2nd Bn., Madras Pioneers; 4/19th Hyderabad Regiment, 5th Royal Battalion, 5th Mahratta Light Infantry; 1/7th Rajput Regiment (Q. V. O. L. I.), 1/14th Punjab Regiment; 2/1st Punjab Regiment.

In 1932 a considerable advance in the Indianization of the Army was made by the announcement that it was intended to Indianize a Division of all Arms and a Cavalry Brigade. In order to implement this decision, the following units have been marked for Indianization, 3rd Cavalry, 5/2nd Punjab Regiment, 5/6th Rajputana Rifles, 5/8th Punjab Regiment, 5/10th Baluch Regiment, 5/11th Sikh Regiment, 4/12th Frontier Force Regiment, and 6th Royal Battalion 13th Frontier Force Rifles, in addition to units of Indian Artillery, Engineers, etc., together with the usual complement of ancillary services, to make up a complete Division. The Indian Regiment of Artillery has been formed on the 15th January 1935 and the first unit of this new corps has been raised as a field artillery brigade. This brigade is designated "A" Field Brigade, Indian Artillery.

In order to train officers for the Indian Army of the future, the Indian Military Academy at Dehra Dun was opened in October 1932. It will provide officers for all arms cavalry, infantry, artillery and signals. The first batch of officers passing out of the Academy received their commissions on the 1st February 1935.

Training Institutions.

The following institutions exist in India for the higher training of military personnel and for the education of instructors for units:—

Staff College, Quetta.
Senior Officers' School, Belgaum.

School of Artillery, Kakul.

Equitation School, Saugor.

Small Arms Schools (India), at Pachmarhi and Ahmednagar.

Army School of Physical Training, Ambala.

Army Signal School, Poona.

Royal Tank Corps School, Ahmednagar.

Army School of Education, Belgaum.

Army School of Cookery, Poona.

Army Veterinary Schools, Ambala and Poona.

Indian Army Service Corps Training Establishment, Rawalpindi.

Indian Army Ordnance Corps School of Instruction, Kirkee.

The object of these Schools is to ensure to all the units throughout the army a constant supply of officers, warrant officers, non-commissioned officers and men, provided with a thorough up-to-date knowledge of various technical subjects, and with the ability to pass on this knowledge.

Following the procedure adopted at Home, the Small Arms and Machine Gun Schools were amalgamated in February 1927. Instruction in the rifle, light gun, etc., is carried out at Pachmarhi and in the machine gun at Ahmednagar.

The King George's Royal Indian Military Schools at Jhelum, Jullundur and Ajmere, and the Kitchener College, Nowgong, also exist for the education of the sons of Indian soldiers, with a view to their finding a career in the Indian Army. The latter at present assists in the training of Indian N.C.O.s for promotion to Viceroy's Commission. The Prince of Wales's Royal Indian Military College at Dehra Dun exists for the preliminary education of Indians who desire to qualify for the King's Commission in the Army through the Indian Military Academy.

Army in India Reserve of Officers.—Previous to the Great War there existed what was called the Indian Army Reserve of Officers, a body of trained officers available to replace casualties in the Indian Army. The war proved that for many reasons this reserve did not fully meet requirements and in 1922 the Army in India Reserve of Officers was constituted.

The revised Regulations for the A. I. R. O. published in 1934 provide that the following gentlemen may be granted commissions in the Reserve:—

(1) Ex-Officers who, having held King's commission in any Branch of His Majesty's British, Indian or Dominion Forces, either naval, military (including the Auxiliary Force (India) and Indian Territorial Force) Marine or Air, have retired therefrom and are no longer liable for service therein, and who are resident in India, Burma or Ceylon.

(2) Civil officials of gazetted status serving under the Government of India or a local Government, whose services can be spared in the event of general mobilization being ordered.

(3) Private gentlemen who are resident in India, Burma or Ceylon.

Ceylon Government officials are not eligible for appointment to the Army in India Reserve of Officers.

Applicants for Category-Medical (includes Dental) must possess a qualification registrable in Great Britain and Ireland under the Medical Acts in force at the time of their appointment.

Dental applicants must possess a qualification registrable in Great Britain and Ireland under the Dentists Acts in force at the time of their appointment.

Applicants for Category-Veterinary must be in possession of the diploma M.R.C.V.S.,

The strength of the Reserve on the 1st January 1936 was 781.

The Fighting Races.—The fighting classes that contribute to the composition of the Indian Army have hitherto been drawn mainly from the north of India, but the experiences of the great war have caused some modifications in the opinions previously held as to the relative value of these and other fighting men. The numbers of the various castes and tribes enlisted in the Army have since the war undergone fluctuations, and it is not possible at present to give exact information as to their proportions. Previous to the war the Sikhs contributed very large numbers both to the cavalry and infantry, and the contribution of the Gurkhas was also large. The Sikhs, who inhabit the Punjab originated in a sect founded near Lahore by a peasant in the early part of the sixteenth century and in the course of a hundred years grew into a formidable militant power. Muhammadans of various races contribute a still larger proportion to both the cavalry and infantry. These are drawn both from the north and the south of India, as well as from beyond the Frontier. They are all excellent fighting men, hardy and warlike, who have furnished soldiers to all the great powers of India for many hundreds of years. As cavalry the Muhammadans are perhaps unequalled by any other race in the East, being good horsemen and expert men-at-arms.

Next in point of numbers are the Gurkhas of Nepal, of whom there are twenty complete battalions, which during the war were considerably increased. As fighters in the hills they are unsurpassed even by the Pathans in the North-West Frontier, but the Garhwals and Kumaonis are equally good mountaineers.

The professional military caste of India from time immemorial has been the Rajput, inhabiting not only Rajputana but the United Provinces and Oudh. Of fine physique and martial bearing, these warriors of Hindustan formed the backbone of the old Bengal Army, and have sustained the English flag in every campaign in the East. Their high caste and consequent prejudices in no respect interfere with their martial instincts and efficiency in war. They furnish many battalions. The Garhwals are Hill Rajputs, good and gallant soldiers, who have proved themselves equal to any other troops on the field of battle and have established an imperishable record in the war both in Europe and in the East. The two battalions which existed in 1914 have since been increased to four. The Jats are a fine and warlike race of Hindus found in the Delhi and Rohtak districts and adjoining territory. It was these people who held out so bravely at Bharatpur and repelled Lord Lake's army in 1805. They have proved themselves good soldiers on the battlefields of Europe. Dogras are good and steady soldiers found in the hilly districts of the Punjab. They fought well in Flanders and in Mesopotamia.

Among those who have rendered signal and gallant service in the war are the Maharrates of the Deccan and the Konkan, who have revived the reputation held by their race in the days of Shivaji, the founder of the Maharrata Empire. It is probable that their proved efficiency in war will lead to their recruitment in larger numbers in future.

In addition to the castes that have been mentioned, other caste men from the south and other parts of India have filled the ranks of the

Rappers and Miners, and done their duty well in every campaign in which they have been engaged.

During the war the Victoria Cross was awarded for conspicuous gallantry to 2 Indian officers, 4 non-commissioned officers and 6 other ranks of the Indian Army.

The Military Cross was awarded to 96 Indian Officers for distinguished service rendered during the Great War and to 3 Indian Officers for service in Waziristan.

A large number of Indian Officers and men were also granted Foreign decorations.

Summary of India's Effort in the War—
In a despatch by the Commander-in-Chief published in July, 1919, the whole operations of the Indian Army during the war are reviewed.

His Excellency gives in it the following figures showing the extent of India's contribution in terms of men. On the outbreak of war, the combatant strength of the Indian Army, including reservists, was 194,000 Indian ranks; enlistments during the war for all branches of the service amounted to 791,000, making a total combatant contribution of 985,000. Of this number, 552,000 were sent overseas. As regards non-combatants, the pre-war strength was 45,000; an additional 427,000 were enrolled during the war and 391,000 were sent overseas. The total contribution of Indian personnel has thus been 1,457,000, of whom 943,000 have served overseas. Casualties amounted to 106,594, which include 36,696 deaths from all causes. The number of animals sent overseas was 175,000.*

Budget Expenditure on National Defence.

A part of the Defence expenditure on the Indian Budget is incurred in England, the nature of such expenditure being indicated in the detailed Tables of Army, Navy and Military Engineer Services expenditure. This expenditure is met by transfer of funds from India. From the 1st April 1920 to the 31st March 1927, the accounts were prepared on the basis of the rate of 2s per rupee for the conversion of English sterling transaction into rupees. From the 1st April 1927 the accounts

are being prepared at the standard rate of 1s 6d. per rupee.

As a rule, the receipts collected by the various departments are not set off against expenditure as appropriations in aid, but are shown separately on the receipts side of the budget. This is especially the case with the receipts of the Military Departments, which amount to considerable sums.

The Provincial Governments incur no expenditure for Military purposes.

SUMMARY OF DEFENCE EXPENDITURE (Gross.)

Grand Total	..			49,05,37	49,19,63	50,47,39

The amounts expended in England on effective services consist of such charges as payments to the War Office and Air Ministry in London in respect of British Forces serving in India, the transport to India of these forces, and payments on account of stores taken to India by British Forces, educational establishments in England for Indian Services, leave pay of Indian and British service Officers on the Indian Establishments, purchase of imported stores, etc. The expenditure on non-effective services consists of payments to the War Office in London for retired pay to British forces for services in India and to non-effective and retired officers of the Indian Service, and of various gratuities.

Although a sum of Rs. 449 millions only has been allotted in the Budget for 1935-36 to meet the net expenditure on Military Services Rs. 499 millions (including receipts) will be available for expenditure under the heading "Military Services" made up of Rs. 386·5 millions for expenditure in India and Rs. 112·5 millions in England.

The gross working expenses of military establishments, such as bakeries, pasture and dairy farms, army clothing factories, and storage depots, army ordnance factories and base mechanical transport workshops are included in the Budget.

The division of expenditure on *Military Engineer Services* between India and England is as shown below :—

							1933-34	1934-35.	1935-36.
							Closed Accounts.	Revised Estimates.	Budget Estimates.
							(Rupees	000's omitted)	
India	3,77,35	3,35,69	3,57,18
England	4,23	4,13	4,62
Total							3,81,58	3,39,82	3,61,80

Cost of the Army—A Tribunal was set up in 1932 to investigate the amount of India's contribution towards the recruiting and training expenses in England of the British troops and airmen who serve for a part of their time in India. The Tribunal has also examined India's counter-claim to a contribution towards the cost of her defence expenditure.

The Tribunal was an advisory body which met in November with instructions to report to the Prime Minister. The Chairman was Sir Robert Garian, until recently Solicitor-General in the Commonwealth of Australia. Lord Tomin and Lord Dunedin were nominated by His Majesty's Government, and Sir Shadi Lal, Chief Justice of the Punjab High Court, and Sir Muhammad Sulaiman, the Senior Pious Judge of the High Court of Allahabad, by the Government of India.

The matters on which the Tribunal will make recommendations have been subjects of controversy for many years, and, as was recognized in the Report of the Simon Commission, the issue bears upon the great constitutional problem now under consideration. One reason for the connexion is the heavy burden of the cost of defence upon India. Taking the Central and Provincial Governments together, it amounts to 29 per cent. of the total expenditure; and if the Central Government alone is considered it amounts to 54 per cent. These calculations take account of net receipts only from semi-commercial undertakings such as railways, posts, and telegraphs.

Capitation payments.—When, after the Mutiny, the troops of the East India Company were amalgamated with those of the Crown

a capitation rate of £10 on every British soldier sent to India was fixed. This worked out at an average annual sum of, roughly, £631,000.

In 1870 objections were raised by both sides to the £10 rate, and until 1878 India made payments on account averaging £440,000 per annum. An Act of Parliament confirmed these amounts as full payment, with the effect of writing off outstanding War Office claims. In 1890 the capitation rate was fixed at £7 10s. Meanwhile the British forces in India had been substantially increased, and the altered rate represented an annual expenditure of about £734,000. A committee presided over by Lord Justice Romer was appointed in 1907. It held that the capitation charge was justified in principle. In the following year the Secretaries of State for India and War (Lord Morley and Lord Haldane) agreed to a compromise whereby the rate was raised to £11 8s, the annual charge on India being thereby increased by about £300,000. During the War India met this liability as part of her normal military expenditure, and all extraordinary costs arising from the employment of Forces from India in the various theatres of War were met by the British Exchequer, in accordance with decisions of Parliament.

The great increases in rates of pay and cost of equipment led to the capitation rate being raised in 1920 to £28 10s. Since 1924 India has paid on account each year £1,400,000, compared with War Office claims, backed by elaborate details which amounted in 1926-28 to approximately £4,500,000 and would still exceed the provisional payments by about £300,000 annually. The Government of India has disputed the bill.

The Strength of the Army.

BRITISH TROOPS.

The following table gives the average strength of British troops, and the main facts as regards their health for the quinquennial periods 1910-14 and 1915-19 and for the years 1920 to 1929 :—

Period.	Average strength.	Admissions.	Deaths.	Invalids sent home.	Average constantly sick.
1910-14 average	69,440	39,389	303	488	2,094·57
1915-19	66,199	58,367	583	1,980	3,277·63
1920	57,332	61,429	385	2,314	3,488·08
1921	58,681	60,515	408	749	3,070·04
1922	60,166	37,836	284	714	1,902·32
1923	63,139	37,595	237	979	1,793·31
1924	58,614	38,569	246	879	1,857·95
1925	57,378	36,069	166	997	1,750·19
1926	56,798	36,893	171	910	1,758·60
1927	55,632	34,666	149	829	1,654·22
1928	56,327	33,034	166	556	1,635·99
1929	59,827	38,742	203	671	1,746·84

INDIAN TROOPS.

The average strength of Indian troops, including those on duty in China and Nepal and other stations outside India in 1928 was 131,290.

The following table gives below the actuals and ratios of sickness, deaths, and invaliding for the quinquennial periods 1910-14 and 1915-19 and for the years 1920 to 1929 :—

Period	Average strength.	Admissions.	Deaths.	Invalids.	Average constantly sick.	Ratio per 1,000 of strength.			
						Admissions.	Deaths.	Invalids	Average constantly sick.
1910-14 (average)	130,261	71,213	573	699	2,662	544·6	4·39	5·4	20·7
1915-19 (average)	204,298	161,023	3,435	4,829	7,792	788·2	16·81	23·6	38·1

THE VICTORIA CROSS.

The announcement, made at the Delhi Durbar in 1911, that in future Indians would be eligible for the Victoria Cross, gave satisfaction which was increased during the War and afterwards by the award of that decoration to the following:—

Subadar (then Sepoy) Khudadad Khan. 129th Baluchis.—On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

Naick Darwan Sing Negi. 1-39th Garhwal Rifles.—For great gallantry on the night of the 23rd-24th November 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range.

Subadar (then Jamadar) Mir Dast. 55th Coke's Rifles.—For most conspicuous bravery and great ability at Ypres on 26th April 1915, when he led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regiment (when no British Officers were left) and kept them under his command until the retirement was ordered. Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire.

Rifleman Kulbir Thapa. 23rd Gurkha Rifles.—For most conspicuous bravery during operations against the German trenches south of Maquisart. When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regiment behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German wire, and, leaving him in a place of comparative safety, returned and brought in two wounded Gurkhas one after the other. He then went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy's fire.

Havildar (then Lance-Naick) Lala. 41st Dogras.—Finding a British Officer of another regiment lying close to the enemy he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men. After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded. The enemy were not more than one hundred yards distant, and it seemed certain death to go out in that direction, but Lance-Naik Lala insisted

on going out to his Adjutant, and offered to crawl back with him on his back at once. When this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark when he returned to the shelter. After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant. He set a magnificent example of courage and devotion to his officers.

Sepoy Chatta Singh. 9th Bhopal Infantry.—For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then under cover of darkness, went back for assistance and brought the officer into safety.

Naick Shahamad Khan. 89th Punjabis.—For most conspicuous bravery. He was in charge of a machine-gun section in an exposed position in front of and covering a gap in our new line with in 150 yards of the enemy's entrenched position. He beat off three counter-attacks, and worked his gun single-handed after all his men, except two belt-fillers, had become casualties. For three hours he held the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostile fire he and his two belt-fillers held their ground with rifles till ordered to withdraw. With three men sent to assist him he then brought back his gun, ammunition, and one severely wounded man unable to walk. Finally, he himself returned and removed all remaining arms and equipment except two shovels. But for his great gallantry and determination our line must have been penetrated by the enemy.

Lance-Dafadar Govind Singh. 28th Cavalry.—For most conspicuous bravery and devotion to duty in three volunteering to carry messages between the regiment and brigade headquarters, a distance of 14 miles over open ground which was under the observation and heavy fire of the enemy. He succeeded each time in delivering his message although on each occasion his horse was shot, and he was compelled to finish the journey on foot.

Rifleman Karan Bahadur Rana. 23rd Gurkha Rifles.—For conspicuous bravery and resource in action under adverse conditions, and utter contempt of danger during an attack. He with a few other men succeeded, under intense fire, in creeping forward with a Lewis gun in order to engage an enemy machine gun which had caused severe casualties to officers and other ranks who had attempted to put it out of action. No. 1 of the Lewis gun party opened fire and was shot immediately. Without a moment's hesitation Karan Bahadur pushed the dead man off the gun, and in spite of bombs thrown at him

and heavy fire from both flanks, he opened fire and knocked out the enemy machine gun crew. Then switching his fire on the enemy bombers and riflemen in front of him, he silenced their fire. He kept his gun in action, and showed the greatest coolness in removing defects which had twice prevented the gun from firing. He did magnificent work during the remainder of the day and when a withdrawal was ordered assisted with covering fire until the enemy was close to him. He displayed throughout a very high standard of valour and devotion to duty.

Ressaldar Badlu Singh, 14th Lancers, attached 29th Lancers.—For most conspicuous bravery and self-sacrifice on the morning of the 23rd September 1918, when his squadron charged a strong enemy position on the west bank of the River Jordan, between the river and Kh. es Samarveh Village. On nearing the position Ressaldar Badlu Singh realised that the squadron was suffering casualties from a small hill on the left front occupied by machine guns and 200 Infantry. Without the slightest hesitation he collected six other ranks and with the greatest dash and an entire disregard of danger charged and captured the position, thereby saving very heavy casualties to the squadron. He was mortally wounded on the very top of the hill when capturing one of the machine guns single-handed, but all the

machine guns and infantry had surrendered to him before he died. His valour and initiative were of the highest order.

Rifleman Gobar Sing Negi, 2nd Battalion, 39th Garhwal Rifles.—For most conspicuous bravery on 10th March 1915 at Neuve Chapelle. During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engagement.

Sepoy Ishaw Singh, 28th Punjabls.—For devotion and bravery "quite beyond all praise" in Waziristan on 10th April, 1921. He received a severe gunshot wound in the chest while serving a Lewis gun, and when all the havildars had been killed or disabled he struggled to his feet, called to his assistance two men, and charged and recovered the gun, restoring it to action. He refused medical attention, insisting first on pointing out where the other wounded were and on carrying water to them. While the medical man was attending to these wounded he shielded him with his body and he submitted to medical attention himself only after he was exhausted through three hours' continual effort and by loss of blood.

THE EAST INDIES SQUADRON.

Since 1903 a squadron of the Royal Navy, known as the East Indies Squadron, has been maintained in Indian waters. It has naturally varied in strength from time to time. In 1903 the squadron consisted of one second class and three smaller cruisers and four sloops or gunboats. In 1906, it consisted of two second class and two third class cruisers, and remained at this strength until 1910: when one second class cruiser was withdrawn and two smaller vessels substituted, and three cruisers were lent from the Mediterranean to assist in the suppression of the arms traffic in the Gulf. By 1913 the position of the East Indies

squadron had considerably improved. The battleship *Swiftsure* had taken the place of the second class cruiser which had been *flagship*, and another, second class cruiser replaced the *Perseus*.

The present composition of the East Indies Squadron (Fourth Cruiser Squadron) is as follows:—

"Norfolk" (Flag), Cruiser, 9,850 tons; "Emerald," Cruiser, 7,550 tons; "Enterprise" Cruiser, 7,580 tons (temporarily replaced by "Colombo," Cruiser, 4,200 tons); Sloops, "Shorcham," "Bideford," "Fowey," and "Lutin."

India contributes £100,000 a year towards naval expenditure and approximately £3,000 a year on account of Indian Transport Service performed by the Admiralty, and also maintains the Royal Indian Navy.

India's Naval Expenditure.

Since 1869 India has paid a contribution of varying amounts to the Imperial Government in consideration of services performed by the Royal Navy. Under existing arrangements which date from 1896-7 the subsidy of £100,000 a year is paid towards the upkeep of certain ships of the East India Squadron, which may not be employed beyond prescribed limits, except with the consent of the Government of India. India's total naval expenditure is well under half a million pounds.

The question of a new distribution of the burden of the cost of Imperial Naval defence was discussed at the Imperial Conference in London in October—November 1926. The matter appeared to be one on which the delegates could form no new decision without further consultations in their respective capitals and no resolution was passed.

The Royal Indian Navy consists of a Depot Ship, 4 Sloops, 2 Patrol vessels and a Survey vessel. A fifth sloop has just been completed in England and will replace one of the Patrol vessels.

ROYAL INDIAN NAVY.

The Royal Indian Navy (The Sea Service under the Government of India) traces its origin so far back as 1612 when the East India Company stationed at Surat found that it was necessary to provide themselves with armed vessels to protect their commerce and settlements from the Dutch or Portuguese and from the pirates which infested the Indian coasts. The first two ships, the *Dragon* and *Hoseander* (or *Oslander*), were despatched from England in 1612 under a Captain Best, and since those days under slightly varying titles and of various strengths the Government in India have always maintained a sea service.

The periods and titles have been as follows:—

Hon. E. I. Co.'s Marine	..	1612—1686
Bombay	..	1686—1830
Indian Navy	..	1830—1863
Bombay Marine	..	1863—1877
H. M. Indian Marine	..	1877—1892
Royal Indian Marine	..	1892.
Royal Indian Navy	..	1934.

India's Naval Force has always been most closely connected with Bombay, and in 1686 when the E. India Co. took over Bombay, Captain Young of the Marine was appointed Deputy Governor. From then until 1877 the Marine was under the Government of Bombay, and although from that date all the Marine Establishments were amalgamated into an Imperial Marine under the Government of India, Bombay has continued to be the headquarters and the official residence of the Flag Officer Commanding.

During the War 1914-1918 Royal Indian Marine Officers were employed on many and various duties Royal Indian Marine Ships "*DUFFERIN*," "*HARDINGE*," "*NORTHBROOK*," "*LAWRENCE*," "*DALHOUSIE*" and "*MINTO*," had their guns mounted and served as Auxiliary Cruisers. Officers also served in the Royal Navy in the Grand Fleet, Mediterranean North Sea, North Red Sea and Caspian Sea Fleets.

In addition to transport duties in Indian Ports, Officers were sent to Marseilles, East Africa and Egypt for such duties, and on the entry of Turkey into the War were employed on duties towing and manning River Craft and Barges to and in Mesopotamia, and it was necessary to enlist a number of Temporary Officers, Warrant Officers and men to the numbers of approximately 240, 60 and 2,000 respectively for these and other duties.

Reorganisation Schemes.—After the War the Government of India asked Admiral of the Fleet Lord Jellicoe, who was visiting India, to draw up a scheme for the reorganisation of the Service. His valuable suggestions were unfortunately too ambitious for Indian finances and could not be accepted.

Shortly afterwards the Esher Committee arrived in India to report on the Indian Army and although the R.I.M. was not included in their terms of reference, they strongly recommended that the R. I. M. should be reorganised

as a combatant service. The Government of India in 1920 obtained from the Admiralty the services of Rear-Admiral Mawby as Director, R.I.M., to draw up a scheme of reorganisation within limited lines. His scheme, however, was not adopted, and Admiral Mawby resigned his appointment.

The R.I.M. then fell upon hard times; money was scarce, the report of the Inchcape Committee necessitated drastic retrenchments, and the working of the Montagu-Chelmsford reforms resulted in the Local Governments having to defray the cost of the work of R. I. M. ships on their various stations, on lighthouse duties, transport work, carrying of officials, etc. The Local Governments were naturally inclined to think that if they had to pay they would like to have a say in the management, and that if the work could be done cheaper locally, they should arrange to carry out the duties themselves. Further, the Inchcape Committee recommended that the three large troopships should be scrapped and all troopship carried out under contract, which would have left the Marine with only the Survey Department and the Bombay Dockyard.

A Combatant Service.—Happily for the Service, however, the Government of India in 1925 appointed a Departmental Committee under the Chairmanship of General Lord Rawlinson, in his capacity of Minister of Defence and Member of Council in charge of the Marine Portfolio, to submit a scheme for the reorganisation of the Service as a combatant force. This Committee recommended that the Service should be reorganised as a purely combatant Naval Service with the title of Royal Indian Navy, with a strength in the first instance of 4 armed sloops, 2 patrol vessels, 4 mine-sweeping trawlers, 2 surveying ships and a depot ship, the Service in the first instance to be commanded by a Rear-Admiral on the active list in the Royal Navy. The scheme was accepted by the Indian and Home Governments, and the necessary Act to permit India to maintain a Navy was passed through both Houses of Parliament.

To effect this change in the title, it was necessary to draw up a new Indian Naval Discipline Act and this had to be passed through the Assembly and Council of State in India.

In February 1928, the Bill was introduced but failed to pass in the Assembly by a narrow margin of one vote. In February 1934, the Bill was re-introduced to the Assembly with certain minor amendments but in response to a plea for circulation, the Government circulated the Bill.

In August, the Bill was re-introduced and passed by the Assembly and Council of State. On 2nd October 1934 the Royal Indian Navy was inaugurated, the historic ceremony taking place in Bombay.

The Royal Indian Marine which had rendered sterling service to India and the Empire in peace and war then ceased to exist.

The Royal Indian Navy which has been evolved from the late Royal Indian Marine is one of the Empire's Naval Forces and is under the command of a Flag Officer of the Royal Navy. Its work in addition to training its personnel for war, e.g., minesweeping, gunnery, communications, etc., includes fishery protection in the Bay of Bengal and other Naval duties. A close liaison is maintained between the Royal Indian Navy and the East Indies Squadron.

Personnel, 1936.

HEADQUARTERS STAFF,

Flag Officer Commanding, Royal Navy and P. S. T. O., East Indies	Vice-Admiral A. E. F. Bedford, C.B.
Naval Secretary	Paymaster Commander M. H. Elliott, M.B.E., R.N.
Flag Lieutenant	Lieut.-Comdr. J. Lawrence, R. I. N.

Chief of the Staff and Captain Superintendent of Dockyard	..	Captain A. G. Maundrell, C.I.E., R.I.N.
Staff Officer (Operations)	..	Commander P. A. Mare, R.I.N.
Commander of the Dockyard	..	Commander H. P. Hughes-Hallett, M.B.E., D.S.C. R.I.N.
Squadron Signal Officer	..	Lieut.-Comdr. M. H. St. L. Nott, R.I.N.
Squadron Gunnery Officer	..	Lieut. K. Durston, R.I.N.
Engineer Manager of the Dockyard	..	Engineer Captain G. L. Annett, R.I.N.
1st Assistant to the Engineer Manager of the Dockyard.	..	Engineer Commander F. Clark, R.I.N.
2nd Assistant to the Engineer Manager of the Dockyard	..	Engineer Lieut. G. W. A. Burgess, R.I.N.
Naval Store Officer	..	J. A. B. Hawes, Esq. (Tempy.)
Financial Adviser	..	R. Jagannathan, Esq., M.A., B.L.
Chief Superintendent	..	V. G. Rose, Esq.

MARINE TRANSPORT STAFF

Divisional Sea Transport Officer, Bombay	Commander T. M. S. Milne-Henderson, O.B.E., R.I.N.
Asst. Sea Transport Officer	Lieut.-Comdr. A. H. Watt, R.I.N.
Sea Transport Officer, Karachi	Lieut.-Comdr. E. G. G. Hunt, R.I.N.

CIVILIAN GAZETTED OFFICERS.

Constructor	W. G. J. Francis, Esq.
Assistant Constructor	E. J. Underhay, Esq.
Electrical Engineer	N. T. Patterson, Esq.
Assistant Naval Store Officer	F. Hearn, Esq. (Tempy.)

OFFICERS.

Captains	9
Commanders	16
Lieutenant-Commanders, and Sub-Lieutenants	43
Engineer-Captain	1
Engineer-Commanders	13
Engineer-Lieutenant-Commanders, Engineer-Lieutenants and Engineer-Sub-Lieutenants	35

WARRANT OFFICERS.

Gunners and Boatswains	16
Warrant Telegraphists	8
Warrant Mechanics	2
Schoolmaster (Warrant Rank)	2
Warrant Writers	9

PETTY OFFICERS AND MEN.

Who are recruited, in the main, from the Bombay Presidency and the Punjab, in almost equal proportions.

SHIPS.

Sloop Minesweeping	H. M. I. S. Olive	.. 2,050 tons	.. 1,700 Horse Power.
Sloop Cornwallis	.. 1,290 2,500 ..
Sloop Minesweeping Hindustan	.. 1,190 2,000 S. H. P.
Sloop Minesweeping Lawrence	.. 1,225 1,900 Horse Power.
	Indus		
Surveying Vessel Investigator	.. 1,574 11,376 ..
Depot Ship Dalhousie	.. 1,960
Patrol Vessel Pathan	.. 695 3,500 S. H. P.

In addition to the above there are 11 vessels composed of minesweeping and steam trawlers, service launches, target towing tugs, distributed at Bombay, Calcutta, and Karachi.

Dockyards.

There were two Royal Indian Marine Dockyards at Bombay and at Calcutta, the former being the more important. The one at Calcutta has been closed. There are 5 graving docks and a wet basin at Bombay, together with factories.

Medical Staff.

Medical Officer, G D Gripper, R.A.M.C.

Officer in Medical Charge of Dispensary,
Captain J. B. D'Souza, M.B.E., I.M.D.

R. I. N. Warrant Officers.

Officer-in-charge, Dockyard Police Force,
Gunner P. O'Hara, R.I.N.

Boatswain of the Dockyard, Boatswain A. H. Lovett, M.B.E., R.I.N.

Appointments.

In addition to the regular appointments in the ships of the Royal Indian Navy, and in H. M. I. N. Dockyard, the following appointments under the Government of India, Commerce Department, are held by the officers of the Royal Indian Navy:—

BOMBAY.

Principal Officer, Mercantile Marine Department, Bombay District, Nautical Surveyor, Mercantile Marine Department, Bombay District, Principal Engineer and Ship Surveyor, 2nd 3rd and 4th Engineer and Ship Surveyors,

CALCUTTA.

Principal Officer, Mercantile Marine Department, Calcutta District; Nautical Surveyor, Mercantile Marine Department, Calcutta District; Principal Engineer and Ship Surveyor, 2nd, 3rd, 4th and 5th Engineers and Ship Surveyors.

MADRAS.

Principal Officer, Mercantile Marine Department, Madras District, and Engineer and Ship Surveyor.

BURMA.

Principal Officer, Mercantile Marine Department, Rangoon District, Nautical Surveyor, Mercantile Marine Department, Rangoon District, and Engineer and Ship Surveyor, Rangoon.

KARACHI.

Principal Officer, Mercantile Marine Department, Karachi District.

ADEN.

Principal Officer, Mercantile Marine Department, Aden District.

CHITTAGONG.

Nautical Surveyor and Engineer and Ship Surveyor.

PORT BLAIR.

Engineer and Harbour Master.

Agriculture.

As crops depend on the existence of plant food and moisture in the soil so the character of the agriculture of a country depends largely on its soil and climate. It is true that geographical situation, the character of the people and other considerations have their influence which is not inconsiderable, but the limitations imposed by the nature of the soil and above all by the climate tend to the establishing of a certain class of agriculture under a certain given set of conditions.

The climate of India, while varying to some extent in degree, in most respects is remarkably similar in character throughout the country. The main factors in common are the monsoon, the dry winter and early summer months, and the intense heat from March till June. These have the effect of dividing the year into two agricultural seasons, the *Kharif* of Monsoon and the *Rabi* of winter season, each bearing its own distinctive crops. Between early June and October abundant rains fall over the greater part of the continent while the winter months are generally dry, although North-Western India benefits from showers in December and January. The south of the Peninsula, and especially the Madras Presidency, however, is more truly tropical especially in the south, and depends mainly on the N-E monsoon, here the two crop seasons can hardly be said to exist. The distribution of the rainfall throughout the year, which is of considerable importance to agriculture, is none too favourable, but is not quite so bad as is often represented. The rainfall is greatest at what would otherwise be the hottest time of the year, the mid-summer and when it is most needed. It should be remembered that in a hot country intermittent showers are practically valueless as evaporation is very rapid. Heavy rainfall concentrated in a limited period though it has its drawbacks and demands a special system of agriculture, has many advantages in hot countries.

Soils.—Four main soil types can be recognised in India, viz., (1) the Red soils derived from rocks of the Archaean system which characterise Madras, Mysore and the South-East of Bombay and extend through the East of Hyderabad and the Central Provinces to Orissa, Chota Nagpur and the South of Bengal. (2) The black cotton or *regur* soils which cover the Deccan trap and cover the greater part of Bombay, Berar and the Western parts of the Central Provinces and Hyderabad with extensions into Central India and Bundelkhand. The Madras *regur* soils, though less typical are also important. (3) The great alluvial plains, agriculturally the most important tract in India as well as the most extensive, mainly the Indo-Gangetic Plain embracing Sind, northern Rajputana, most of the Punjab, the plains of the United Provinces, most of Bihar and Bengal and half of Assam. (4) The laterite soils which form a belt round the Peninsula and extend through East Bengal into Assam and Burma.

The great alluvial plains are characterised by ease of cultivation and rapid response to irriga-

tion and manuring, broadly speaking there are few soils in the world more suited to intensive agriculture so long as the water supply is assured. The other soils are less tractable and call for greater skill in management and are less adapted to small holdings, of these the *regur* soils are the most valuable.

Agricultural Capital and Equipment.—India is a country of small holdings and the commonest type is that which can be cultivated with one pair of bullocks under local conditions. Large holdings are practically unknown, and are mainly confined to the planting industries. Farming is carried on with a minimum of capital, there being practically no outlay on fencing, and very little on buildings or implements. Many causes militate against the accumulation of capital and agricultural indebtedness is heavy and the interest on loans high. Great progress has been made by the co-operative credit movement during the last twenty years. There are now 105,083 Co-operative Societies in India with 4,304,309 members and a working capital of nearly 96 crores of rupees. Some 90 per cent. of these Societies are concerned with the financing of agriculture. Not only have these societies brought cheaper credit to the cultivator but they have striven to inculcate the lesson that cheap credit is only valuable if applied to productive purposes and have encouraged thrift.

Equipment.—Practically all cultivation is done by bullocks and the capacity of these as draught animals varies from district to district as well as depending on the cultivator's individual circumstances. The best types in common use are capable of handling what would be considered as light single-horse implements in Europe. In those tracts where irrigation is from wells, bullocks are also used for drawing water, they also drive the sugarcane crusher and tread out the grain at harvest, and they are still almost the sole means of transport in rural areas. His implements being few, a cultivator's bullocks form by far the most important item of his movable property.

Implements are made of wood although ploughs are usually tipped with iron points, and there is a great similarity in their shape and general design. Iron ploughs were being introduced in large numbers in the decade following the war, but the fall in the prices of agricultural commodities in recent years has lessened the demand for these implements. The levelling beam is used throughout the greater part of the country in preference to the harrow and roller, and throughout Northern India the plough and the levelling beam are the only implements possessed by the ordinary cultivator.

On black cotton soils the commonest implement is the *bakhar*, a simple stirring implement with a broad blade. Seed drills and drill hoes are in use in parts of Bombay, Madras and the Central Provinces, but throughout the greater part of the country the seed is either broadcasted or ploughed in. Hand implements consist of various sizes of hoes, the best known of which are the *kodali* or spade with a blade set at an angle towards the labourer who does

not use his feet in digging, and the *khurpi* or small hand hoe. Of harvesting machinery there is none; grain is separated either by treading out with oxen or beating out by hand, and winnowing by the agency of the wind; cultivators have come to recognize the efficiency of winnowers and simple reapers and these, like iron ploughs, are likely to become popular when conditions improve. Even motor tractor ploughs are now estimated to number hundreds and a few steam ploughing sets are at work reclaiming land from deep-rooted grasses.

Cultivation.—Cultivation at its best is distinctly good but in the greater part of the country there is plenty of room for improvement. As in any other country success in agriculture varies greatly with the character of the people depending largely as it does on thrift and industry. In most places, considering the large population, cultivation is none too good. Agriculture suffers through lack of organization and equipment. Two economic factors tend to keep down the standard of cultivation. Holdings are not only small but fragmented and the Indian laws of inheritance both perpetuate and intensify this evil. Very definite attempts are now being made in several provinces and states to amend matters and consolidate holdings but the process is necessarily slow. Secondly, cultivators rarely live on or near to their holdings but congregate in villages. The need for mutual protection is less than formerly and though tradition dies hard sub-villages are now springing up in many places.

For *rabi* crops which demand a fine seed-bed preparatory tillage consists mainly of repeated treatments with the indigenous plough (or on black soils the *vakhar*) which serves the purpose of plough, harrow and cultivator, combined with applications of the levelling beam. Crude as these implements are, they produce in Northern India a surface mulch and moist sub-soil which is the aim of all dry-farming operations. For *khari* crops the preparation is much less thorough as it is essential to sow without delay. Manure is generally applied to more valuable crops like sugarcane, cotton, tobacco, etc. Seeding is either done broadcast or by drilling behind a wooden plough or drill. Thinning and spacing are not usually so well done as they might be, and intercultivation is generally too superficial. Harvesting is done by sickle where the crops are cut whole, and there is little waste involved. At their best the ryot's methods are not ineffective but being uneconomical of both cattle and manpower, they are seldom carried out fully. The use of simple improved implements and of machines which lessen the strain on the bullocks, which the agricultural department is steadily fostering, is an important factor in raising the general standard of agriculture.

Irrigation.—The concentration of the principal rainfall in less than a third of the year, which is not the sowing period of the *rabi* crops, places a very definite limit on the yield which can be obtained from the principal cereal crops. Some other crops, e.g., sugarcane, can hardly be grown indeed without supplementary watering. With adequate irrigation the yield from the principal grain crops in Northern India is

doubled even in areas where the monsoon is generous, whilst in the great canal colonies and in Sind barren desert has become fertile land. The Indian canal system is by far the largest in the world. In 1932-33 the total length of the main and branch canals and distributaries amounted to some 75,000 miles irrigating an area of 33 million acres, and the value of crops irrigated from Government works was estimated at about 87 crores. It has been calculated that when works under construction are completed, and when the various new canals are developed fully, the irrigated area will probably reach 50 million acres. The protective effect of the canals in many areas is no less important than the enhanced yield. Protective irrigation works have made agriculture stable instead of precarious in many districts. The Indian canals are of two types—perennial and inundation—and the trend of irrigation practice is to replace the latter by the former wherever possible. The great perennial canals in the North of India draw their supply from snow-fed rivers; the inundation canals run only when the rivers rise with the melting of the snow in April-May and must close when supplies fall at the end of the monsoon. Other canals depend for their supply during the dry part of the year on water stored behind great dams thrown across suitable gorges and are in consequence less dependable than the larger snow-fed systems. Water rates are levied on the area of irrigated crops matured so that Government bears part of the risk of failure of crops. Different rates are charged for different crops and vary somewhat in different parts of India; rates are also lower when the water has to be lifted than when flow irrigation is given.

The Madras and Bombay presidencies possess some of the most spectacular irrigation schemes in the world. The Cauvery—Mettur irrigation system inaugurated in 1934 is considered to be the biggest in the British Empire and the largest single block masonry reservoir in the world, with a storage capacity of 93,500 million cubic feet. This project, together with the Kannambadi project in Mysore, is said to bring into productive use about 80 per cent. of the flow of the Cauvery river besides serving as a great moderator of floods. The Wilson Dam at Bhandardara, impounding 272 feet of water, is far and away the highest dam in India, whilst the Sukkur Barrage in Sind across the Indus irrigates a desert whose area far exceeds that of any other scheme conceived by engineers.

Irrigation from Wells.—About one quarter of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet. Their numbers have greatly increased in recent years largely through Government advances for their construction. The recurring cost of this form of irrigation has, however, greatly increased owing to the high price of draught cattle and the increasing cost of their maintenance.

All agricultural departments are now giving increased attention to the better utilisation of underground water supplies, existing wells being improved by boring and tube wells of large capacity installed and equipped with pumping machinery. Efficient types of water lifts are rapidly replacing the old-fashioned *motia*.

Tank irrigation is common in Central and Southern India. Large quantities of rain water are stored in lakes (or tanks) and distributed during the drier seasons of the year. Often the indirect effect of the tank in maintaining the sub-soil water level is as important as the direct irrigation.

Manures—Although the number of cattle maintained in India is very high and indeed excessive, there is everywhere a shortage of farm-yard manure. This is partly due to the small use of bedding, for which straw can ill be spared, and to the keeping of cattle in the open, but mainly to the use of dung as the principal source of village fuel. Hence the supply of organic matter to Indian soils is deficient. Unfortunately the Indian cultivator does not possess the skill of the Chinaman in the making of composts and much valuable manurial material is wasted in every Indian village and to the detriment of sanitation. Green-manure crops are spreading slowly and the use of oil-cakes, especially castor-cake, for the more valuable crops like sugarcane and tobacco is increasing.

The general trend of the results of experiments carried on by the various agricultural departments is to show that a better supply of organic manures is everywhere important, nitrogen is the most common limiting factor for India as a whole, phosphate manures are definitely advantageous in certain more limited tracts. Manuring for higher production is gradually spreading as the result of village demonstrations; at present prices of certain artificial fertilisers, notably ammonium sulphate and the newer types of soluble phosphatic manure are definitely profitable not only for tobacco, sugarcane and market garden crops but for some staple crops, but generally speaking the fall in the prices of agricultural produce has arrested progress in the use of fertilisers.

Rice.—Rice is the most extensively grown crop in India, although it preponderates in the wetter parts of the country, viz., in Bengal, Bihar and Orissa, Burma and Madras. The area fluctuates slightly around 80 million acres and the yield is about 30 million tons. The crop requires for its proper maturing a moist climate with well assured rainfall. The cultivated varieties are numerous, differing greatly in quality and in suitability for various conditions of soil and climate, and the people possess an intimate acquaintance with those grown in their own localities. The better qualities are sown in seed beds and transplanted in the monsoon. Broadcast rice is grown generally in lowlying areas and is sown before the monsoon as it must make a good start before the floods arrive. Deep water rice grows quickly and to a great height and are generally able to keep pace with the rise in water level.

For transplanted rice the soil is generally prepared after the arrival of the monsoon and is worked into a puddle before the seedlings are transplanted. The land is laid out into small areas with raised partitions to regulate the distribution of the water supply. The seedlings are planted either singly or in small bunches containing from 4 to 6 plants each, and are simply pushed into the mud at distances of 6 to 12 inches apart. Either by bunding

to retain rainfall or by artificial irrigation, the details varying with locality, the rice fields are kept more or less under water until the crop shows signs of ripening. The area under improved varieties of rice distributed by the agricultural departments is now well over 2 million acres. A scheme for the intensification of research on rice in all the principal rice-growing provinces financed by the Imperial Council of Agricultural Research and the Empire Marketing Board is in progress.

India (excluding Burma) consumes more rice than she produces, the balance in the past having been provided almost entirely by Burma. The year 1934-35 was marked by a phenomenal increase in the amount imported (3·94 lakhs of tons as compared with 0·88 of a lakh in the preceding year) and also by the fact that nearly the whole of the imports came from Siam and French Indo-China, mainly in the form of broken rice. These imports had such a depressing effect on prices in the Madras Presidency that it became necessary to impose an import duty of 12 annas a maund.

Wheat.—Wheat is grown widely throughout Northern India as a winter crop, the United Provinces and the Punjab supplying about two-thirds of the total area, and probably three-quarters of the total output in India. The majority of the varieties grown belong to the species *Triticum vulgare*. Indian wheats are generally white, red and amber coloured and are mostly classed as soft from a commercial point of view. As seen in local markets Indian wheats frequently contain appreciable quantities of other grains and even of extraneous matter due to the method of threshing employed. Wheat for export is well-cleaned and there has been great improvement in this respect of recent years. Most of the Indian wheats are soft weak wheats but there are some well known Macaroni wheats amongst them. The largest wheat acreage of recent years was that of 1933-34, namely, 36 million acres, but the yield did not come up to the record harvest of 1930 which exceeded 10½ million tons. The estimated area in 1935-36 is 32·76 million acres. Recent crops have averaged 9½ million tons per annum which is only slightly, if anything, above internal requirements. Exports of wheat amounted to 197,000 tons in 1930-31 but have since been nominal, Indian wheat having been well above world parity and the home market protected by an import duty on foreign wheat. With the development of irrigation from the Lloyd Barrage Canal in Sind and in the newer Punjab Canal Colonies a further increase in wheat production is practically certain and, although the internal consumption of wheat will increase with the growth of population, there is likely to be an exportable surplus in the not distant future. The crop is generally grown after a summer fallow and, except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. Rains in January and February are generally beneficial but an excess of rainfall in these months usually produces rust with a diminution of the yield. On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in March and April and the threshing and winnowing go on up till the end of May. The total area under

improved varieties of wheat is now 7 million acres. The Imperial Council of Agricultural Research has recently appointed two Standing Committees to advise on problems connected with rice and wheat.

The Millets.—These constitute one of the most important groups of crops in the country, supplying food for the poorer classes and fodder for the cattle. The varieties vary greatly in quality, height and suitability to various climatic and soil conditions. Perhaps the two best known varieties are Jowar (*Sorghum vulgare*) the great millet, and Bajra the Buirush millet (*Pennisetum typhoides*). Generally speaking the jowars require better land than the bajras and the distribution of the two crops follows the quality of the soil. Neither for jowar nor bajra is manure usually applied though jowar responds handsomely to high manuring and cultivation is not so thorough as for wheat. The crop is generally sown in the beginning of the monsoon and so it requires to be thoroughly weeded. It is often grown mixed with the summer pulses especially *Arhar* (*Cajanus indicus*—pigeon pea) and other crops, and is commonly rotated with cotton. The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards. In some provinces *rahi* guar is also an important crop. The produce is consumed in the country.

Pulses.—Pulses are commonly grown throughout India in great variety and form at once the backbone of the agriculture, since even the present moderate degree of soil fertility could not be maintained without leguminous rotations, and a primary necessity in the food of a vegetarian population. The yields on the whole are fairly good, mixed cropping is common. The principal pulses are *Arhar* (*Cajanus indicus*), gram (*Cicer arietinum*), various species of *Phaseolus* and *Pisum*.

Cotton—Is one of the most important commercial crops in India and despite the sharp fall both in quantity and values due to the trade depression raw cotton was first in the list of exports for 1934-35. The average area under cotton in the quinquennium ending 1929-30 was 26.2 million acres and the average yield 5.8 million bales. In the year following as a result of low prices, the area contracted to less than 23 million acres, but has again risen to over 25 millions in 1935-36. Indian mills now consume annually about 2,300,000 bales of Indian cotton and at present some 300,000 bales per annum of imported cotton (Egyptian, Sudan and African) of a staple longer than is produced in India. The principal export is of short staple cotton of $\frac{7}{8}$ staple but there is also in normal years an export of Indian medium $\frac{7}{8}$ to 1 $\frac{1}{16}$ staple cottons such as Punjab/American and Karunganni. The area under improved varieties of cotton is now estimated to be approximately 4 million acres. Of these 2.7 million acres represent long and medium staple cottons, the remainder being short staple varieties of improved yield and ginning percentage. There is no Indian cotton belt, Bombay, the Central Provinces, Hyderabad, Baroda, Madras, the Punjab and the United Provinces all have important cotton tracts

producing distinct types. Sowing and harvesting seasons are equally diverse, the former extending from May to December in different parts of the country and the latter from October to May and June. Yields vary greatly; in the best irrigated tracts the normal yield is about 200 lbs. of ginned cotton per acre and yields much above these have been recorded, whilst in the poorest unirrigated tracts 60 lbs. per acre is a good crop. Of recent years, as the result of the work of the agricultural departments and the Indian Central Cotton Committee, the quality and yield of the staple cottons has improved and also the yield and cleanliness of the short-staple tracts.

The Cotton Transport Act, the Cotton Ginning and Pressing Factories Act, the Bombay Cotton Markets Act, the C P Cotton Markets Act and the Madras (commercial crops) Market Act have all been passed at the instance of the Committee and are doing much to check adulteration and promote better marketing. In certain provinces legislation has been enacted, or is under consideration, with the aim of preventing the growing of very inferior varieties and of stopping certain malpractices which affect the quality and reputation of Indian cotton. Agricultural department have continued their campaign of cotton improvement apart from improvements in methods of cultivation.

Exports—The exports of raw cotton from India by sea to foreign countries for the last 5 fiscal years (ending March 31st) were as follows (in thousands of bales of 400 lbs. each):—

Countries	1930-31	1931-32	1932-33	1933-34	1934-35
United Kingdom	281	166	167	342	347
Other parts of the British Empire	6	6	7	3	6
Japan ..	1,686	1,080	1,085	1,022	2,011
Italy ..	302	183	150	261	278
France ..	232	81	124	163	148
China (exclusive of Hong Kong, etc.)	606	436	131	337	142
Belgium ..	217	121	128	145	153
Spain ..	106	45	52	61	60
Germany ..	309	166	152	247	153
Other countries	121	85	64	159	148

Japan is the most important buyer. An agreement came into operation in January, 1934, under which, for every million bales of Indian raw cotton taken by Japan, India will

import 325 million yards of Japanese piece goods. A strenuous and apparently successful effort is being made to increase the United Kingdom's consumption of Indian raw cotton, which has more than doubled during the last two years.

Sugarcane.—India, until recently a large importer of sugar, is one of the most important sugarcane growing countries in the world. The area in 1935-36 is estimated at 4,007,000 acres as against 2,980,000 acres, the average for the quinquennium ending 1934-35. The crop is mostly grown in the submontane tracts of Northern India, more than half the area being in the United Provinces. The indigenous hard, thin, low-sucrose canes have now largely been replaced by seedling canes of high quality mainly the productions of the Imperial Sugarcane Breeding Station, Coimbatore. The total area under improved varieties of cane in India in 1933-34 was estimated at 2.13 million acres, representing 61 per cent. of the total. In the United Provinces and Bihar and Orissa improved canes occupy more than 80 per cent. of the area. The effect of the improved varieties is clear from the fact that, while the area under cane in India in 1935-36 (4.01 million acres) represents only an advance of 34.3 per cent. over the quinquennial average the yield (5.91 million tons expressed as gum) represents an increase of 51 per cent. The protection afforded by the Sugar Industry Protection Act of 1932 has given a stimulus to the production of sugar by modern methods. By the end of 1934-35 there were 130 sugar factories in India making sugar by modern methods as against 51 factories prior to 1931-32 and it is expected that the season of 1935-36 will see 139 factories in operation. The total production of sugar, including that refined from cane, in 1934-35 was 679,000 tons as against 228,120 tons in 1931-32, and 681,000 tons are likely to be produced in 1935-36. Imports of sugar of all sorts in 1934-35 amounted to 223,000 tons as against 370,000 tons in 1932-33 and 901,200 tons in 1930-31. It is expected that within a few years India will not only provide her own requirements of sugar but will have a surplus for export.

The Sugar (Excise Duty) Act of 1934 has imposed an excise duty of 10 as per cent. on all other sugar except palmiasugar produced in factories.

Oilseeds.—The crops classified under the heading are chiefly groundnuts, linseed, sesamum and the cruciferous oilseeds (rape, mustard, etc.). Although oilseeds are subject to great fluctuation in price and the crops themselves are more or less precarious by nature, they cover an immense area.

Groundnut, though of modern introduction is already an important crop particularly in Madras, Bombay, Burma and Hyderabad. The area has not however achieved stability. It rose steadily from 1.5 million acres in the pre-war period to 8.23 millions in 1933-34. There have been successive drops in the past two years, the average for 1935-36 being 4.70 millions. The yield in 1934-35 was 1.9 million tons of which 511,200 tons were exported as compared with a pre-war average export of 12,000 tons.

Linseed requires a deep and moist soil and is grown chiefly in the Central Provinces, Bihar and Orissa and the United Provinces. The crops are grown for seed and not for fibre and the common varieties are of a much shorter habit of growth than those of Europe. The yield varies greatly from practically nothing up to 500 to 600 lbs of seed per acre. It is grown largely for export. At the beginning of the century India supplied practically the whole of the world's demand for linseed, the area having gone as high as 5 million acres with a yield of 630,000 tons. In recent years foreign competition, mainly from the Argentine, has contracted the market for Indian linseed and with it the area under the crop. Exports dwindled to 72,000 tons in 1932-33 as compared with the pre-war average of 379,000 tons. The preference granted to Indian linseed in the United Kingdom under the Ottawa Agreement, combined with two successive short harvests in the Argentine, helped India to regain her pre-war position in the British market in 1933-34 when Britain took 174,000 tons out of a total of 379,000 tons. Exports diminished however, in 1934-35 the British takings being 109,000 tons out of a total export of 238,000 tons.

Sesamum (Gingelly) is grown mostly in Peninsular India as an autumn or winter crop. In 1934-35 it occupied an area of 5.2 million acres with a yield of 404,000 tons. About 10 per cent. of the production is exported and the rest consumed locally.

The Cruciferous Oilseeds form an important group of crops in Northern India where they grow freely and attain a fair state of development. The area under rape and mustard, including an estimated figure for the area grown mixed with other crop is about 6½ to 7 million acres annually. Production in 1934-35 was estimated at 890,000 tons, of which 36,900 tons were exported as compared with 115,000 tons in 1932-33. Several species are grown and there are numerous local varieties. A large portion of the crop is crushed locally for domestic consumption.

Jute.—Two varieties of the plant are cultivated as a crop, *Capsularis* and *Olitorius*. Jute growing is confined almost entirely to Bengal, Assam, Bihar and Orissa. The crop requires a rich moist soil. Owing to river inundation this part of India receives a considerable alluvial deposit every year and the land is thus able to sustain this exhausting crop without manure. The crop is rather delicate when young, but once established requires no attention, and grows to a great height (10 to 11 feet). Before ripening the crop is cut and retted in water. After about three weeks submersion the fibre is removed by washing and beating. The areas in 1935-36 was estimated at 1,947,000 million acres as compared to 2,670,000 millions in the previous year, production in 1935-36 was 6,397,000 bales as against just over 8½ millions in 1934-35. The total weight of raw and manufactured jute exported during 1934-35 amounted to 1,437,000 tons. This is a distinct recovery over the exports of the three previous years. Although the present acreage is much less than some years ago a vigorous campaign is in progress to reduce it still further.

Tobacco is grown here and there all over the country chiefly, however, in Bengal, Bihar, Bombay, Madras and Burma. Of two varieties cultivated *Nicotiana Tabacum* is by far the most common. Maximum crops are obtained on deep and moist alluvium soils and a high standard of cultivation including liberal manuring is necessary. The crop is only suited to small holdings where labour is plentiful as the attention necessary for its proper cultivation is very great. The seed is germinated in seed beds and the young plants are transplanted when a few inches high, great care being taken to shield them from the sun. The crop is very carefully weeded and hoed. It is topped after attaining a height of, say, 2 ft., and all suckers are removed. The crop ripens from February onwards and is cut just before the leaves become brittle. The greater part of the tobacco grown in India is intended for *Hookah* smoking and is coarse and heavy in flavour. Lighter kinds are also produced for cigar and cigarette manufacture. Of recent years there has been important development in the production, in commercial quantities, of better quality cigarette tobacco both in Madras and in Bihar. The exports of unmanufactured tobacco during 1934-35 amounted to 26 million lbs compared to 29 million lbs in the previous year. The most important market is the United Kingdom which took 9 million lbs during 1934-35. The area in 1933-34 was 1,183,000 acres with an outturn of 556,000 tons. The production in India of bright flue-cured tobacco suitable for cigarette making has increased considerably, particularly in the Guntur District of the Madras Presidency and several thousands of flue-curing barns have been installed in recent years.

Livestock.—The livestock population of British India consists mainly of about 121 million cattle, 31 million buffaloes, 25 million sheep, 35 million goats and 3 million horses, mules and donkeys, and in the 61 Indian States for which figures are available, there are 113 million cattle and buffaloes, 28 million sheep and goats, 1 million horses, mules and donkeys and half a million camels. For draught purposes cattle are mainly used everywhere though male buffalo are important as draught animals in the rice tracts and damper parts of the country. Horses and mules are practically never used for agricultural purposes. For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk. The best known breeds are the Murra buffaloes of the Punjab, the Jafferbadi buffaloes of Kathlawar, and the Surti buffaloes of the Bombay Presidency. The cattle and buffalo population in India is abnormally high amounting to over 60 per cent. of the human population. The spread of cultivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle

are small, ill-fed and inefficient. Nevertheless the best Indian breeds have many merits. Of the draught types the best known breeds are the Hissar, Nellore, Amrit Mahal, Gujerat (Kankrej), Kangayam, Kheriyah and Malvi; the Sahiwal (Punjab), Gir (Kathlawar), Scindi and Hansi are amongst the best milking breeds. On the Government cattle-breeding farms pedigree herds are being built up and from these selected bulls are issued, preference being given to special breeding areas, to villages which undertake to exclude 'scrub' bulls and where serious efforts to maintain a good strain of cow are made. Once established such breeding areas rapidly produce a supply of superior bulls for general distribution and in this way the valuable bulls from Government herds are used to advantage. The premium bull system is also working well in some tracts. Cattle improvement is a slow process at the best and though a start on sound lines has been made in all provinces, continued effort and persistent endeavour are essential. There is no branch of agricultural improvement where the land-owners of India could render greater service.

Dairying.—Though little noticed hitherto dairying forms a very important indigenous industry throughout India. The annual cash value of dairy products has been estimated at over 800 crores of rupees and the importance of milk and dairy products to the health and development of the people cannot be over-estimated. Apart from liquid milk the best known products are native butter (ghee) and cheese (dahi). During recent years a considerable trade in tinned butter has sprung up and there seems to be no reason why an important industry should not be built up in other dairy products, such as milk-powder, condensed milk and casein. Pure ghee and milk can usually be procured in the villages but in towns dairy products can scarcely be bought unadulterated.

The Government of India maintain an Institute of Animal Husbandry and Dairying at Bangalore where students are given 2 year courses for the Indian Dairy Diploma but little provision has hitherto been made for the extensive industrial research into the handling and processing of milk and dairy products under Indian conditions, which is essential for the development of dairying as a village industry. This matter is now receiving the attention of the Imperial Council of Agricultural Research.

It is sufficient here to say that there is a growing recognition of the fact that as India's economic development proceeds a better balance between crop production and animal industry is needed and that the raising of crops for the feeding of dairy stock, instead of for sale as such, will be of increasing importance.

AGRICULTURAL PROGRESS.

Agricultural Progress—The historical aspect of agricultural development in India has been fully dealt with in the report of the Linlithgow Commission. The Famine Commission as long ago as 1866 made the first proposal for a separate Department of Agriculture but little resulted except the collection of agricultural statistics and other data with the object of throwing light on famine problems. The Famine Commission of 1880 by their masterly review of the possibilities of agricultural development revived interest in the matter and their proposal for a new Department for Agriculture and allied subjects in the Government of India and for provincial departments of agriculture bore fruit eventually. Dr. J. A. Voelker, Consulting Chemist to the Royal Agricultural Society, was invited to visit India and his book "Improvement of Indian Agriculture" is still a valuable reference book. In 1892 an agricultural chemist to the Government of India was appointed. Provincial Departments mainly concerned themselves at first with agricultural statistics but experimental farms were opened at Saidapet in 1871, Poona in 1880, Cawnpore in 1881 and Nagpur in 1883; there were various sporadic attempts at agricultural improvement but no real beginning was made until technical agricultural officers were appointed. Of these the earliest were Mollison in Bombay (subsequently Inspector General of Agriculture), Barber and Benson in Madras, Hayman in the United Provinces and Milligan in the Punjab. In 1901, the first Inspector General of Agriculture was appointed and in the same year an Imperial Mycologist was added followed by an Imperial Entomologist in 1903. The present departments of agriculture, however, owe their existence to the foresight and energy of Lord Curzon whose famous despatch of 1903 marked the commencement of the reorganisation which took place in 1905. That scheme provided for a central research institute at Pusa, completely staffed provincial departments of agriculture with agricultural colleges and provincial research institutes and an experimental farm in each important agricultural tract. To the establishment of the Imperial Agricultural Research Institute at Pusa, Lord Curzon devoted the greater part of a generous donation of £30,000 given by Mr. Henry Phipps of Chicago to be applied to some object of public utility preferably connected with scientific research. The Indian Agricultural Service was constituted in 1906. Since that date progress has been steady and continuous. With the advent of the reforms of 1919, agriculture became a provincial transferred subject but the Government of India retained responsibility for central research institutions and for certain matters connected with the diseases and pests of plants and animals. The addition of the Imperial Institute of Animal Husbandry and Dairying (with a branch farm at Wellington), the Imperial Cattlebreeding Farm at Karnal and the Anand Creamery enabled live stock work to be carried out on a scale not possible at Pusa. The Imperial Sugarcane-breeding station at Coimbatore is yet another branch of the Imperial Agricultural Research Institute. The Bihar Earthquake of

1934 caused considerable damage to the Pusa Institute and it has been decided to shift the Institute to a site near Delhi. It is expected that the new Institute will be opened during 1936. Provincial Governments have steadily developed and strengthened their agricultural departments. The total net expenditure of provincial agricultural departments now exceeds 105 lakhs rupees annually; the net annual expenditure on the Imperial Department of Agriculture is in the neighbourhood of 11 lakhs.

Parallel developments took place in the provision made for matters connected with animal health. The now world-famous Imperial Institute of Veterinary Research at Muktesar started in 1893 as a modest hill laboratory for research on rinderpest. It is now a fully equipped research institute which also manufactures protective sera and vaccines of which some 6 million doses are issued annually. The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector General. The departments were completely provincialised in 1916, the Government of India continuing to finance and control the Muktesar Research Institute and its branch station at Izatnagar (Bareilly).

Recent Progress.—As now constituted, the agricultural departments include a complete organisation for bringing the results of the application of science to agriculture into the village. At one end of the scale are the agricultural colleges and research institutes—at the other thousands of village demonstration plots where the effect of improved seed, methods, implements and manures is shown under the cultivators' own conditions. Intermediate links in the chain are the experimental farms, where scientific research is translated into field practice, demonstration and seed farms and seed stores. The ascertained results of the work of the agricultural department are striking enough. More than 16 million acres are known to be under improved crops—the further area due to natural spread is indeterminate. Improved methods of cultivation and manuring are steadily spreading, work is in progress on most of the major crops and each year brings new triumphs. The present position has been authoritatively reviewed by the Royal Commission on Agriculture which reported in 1928. Recognising how much has already been done in the 20 years since the agricultural departments were created, the Commission also emphasised the enormous field for future work to which all witnesses had drawn their attention. The agricultural departments having shown that the application of science to Indian agriculture is a practical proposition and further that the individual cultivator can be reached and his methods improved, the problem is now to develop and intensify such work so that a general advance in agricultural practice will result. At no time has there been a greater need for co-ordinated effort directed towards the solution of agricultural problems. Only by increased efficiency can India meet the situation caused by low

prices for all agricultural commodities and the intense competition in world markets arising from production in excess of effective demand.

The Government of India have recently announced their intention to render further

assistance to the agriculturists by providing better facilities for credit and for the marketing of agricultural produce. A central marketing section has been established under the Imperial Council of Agricultural Research which will work in collaboration with the special marketing staff appointed in the various provinces.

THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH.

In Chapter III of their Report, the Royal Commission on Agriculture stated that the most important problem with which they had been confronted was that of devising some method of infusing a different spirit into the whole organisation of agricultural research in India and of bringing about the realisation on the part of research workers in this country that they are working to an end which cannot be reached unless they regard themselves as partners in a common enterprise. They had found not only a lack of sufficiently close touch between the Pusa Research Institute and the provincial agricultural departments but also between the provincial departments themselves. After describing the way in which similar difficulties had been overcome in Canada, the United States and Australia and dismissing as inadequate the constitution of crop committees on the model of the Indian Central Cotton Committee or the constitution of a quasi-independent governing body for Pusa on which the provincial agricultural departments and non-official interests would be represented, the Commission proposed the establishment of an **Imperial Council of Agricultural Research.**

The primary function of the Council would be to promote, guide and co-ordinate agricultural, including veterinary, research in India and to link it with agricultural research in other parts of the British Empire and in foreign countries. It would make arrangements for the training of research workers, would act as a clearing house of information in regard not only to research but also to agricultural and veterinary matters generally and would take over the publication work at present carried out by the Imperial Agricultural Department. The Commission proposed that the Council should be entrusted with the administration of a non-lapsing fund of Rs. 50 lakhs to which additions should be made from time to time as financial conditions permit. Its Chairman should be an experienced administrator with a knowledge, if possible, of Indian conditions and, in addition, there should be two other whole-time members of the Council for agriculture and animal husbandry respectively. The Commission suggested that the Council should consist of thirty-six members, in addition to the Chairman and the two whole-time members. Of these, eight would be nominated by the Government of India, eighteen would represent the provincial, agricultural and veterinary departments, three would represent the Indian Universities, two would represent the Indian Central Cotton Committee and the planting community respectively and five would be nominated by the Council for the approval of the Government of India. The Council would largely work through a Standing Finance Committee and sub-committees. A provincial committee should be

established in each major province to work in close co-operation with it. The advisory duties of the Agricultural Adviser to the Government of India would be taken over by the Chairman and whole-time members of the Research Council, his administrative duties being taken over by a whole-time Director of the Pusa Institute.

Constitution of the Council—In a Resolution issued on May 23rd, 1929, the Government of India stated that whilst they were of opinion that the proposals of the Royal Commission were, on the whole, admirably designed to secure the objects for the attainment of which the establishment of the organisation outlined above was recommended, they considered a Council of thirty-nine members would be too large to be really effective and that it was not desirable that the Legislative Assembly should be deprived of its normal constitutional control over an activity which affects the staple industry of India. They had, therefore, decided that the central organisation should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the Council subject to the limitation in regard to the control of funds which is mentioned below and an Advisory Board the functions of which would be to examine all proposals in connection with the scientific objects of the Council which might be submitted to the Governing Body, to report on their feasibility and to advise on any other questions referred to it by the Governing Body. The Governing Body would consist of the Member of the Governor-General's Council in charge of the portfolio of Agriculture, who would be *ex-officio* Chairman, the Principal Administrative Officer of the Council, who would be *ex-officio* Vice-Chairman, one representative of the Council of State, two representatives of the Legislative Assembly, one representative of the European business community elected by the Associated Chambers of Commerce of India, one representative of the Indian business community elected by the Federation of Indian Chambers of Commerce and Industry, the Provincial Ministers of Agriculture, two representatives elected by the Advisory Board and such other persons as the Governor-General in Council might from time to time appoint.

The Advisory Board would consist of all those whose inclusion in the Council was recommended by the Royal Commission with the exception of the representatives of the Central Legislature and the representatives of the European and Indian commercial communities, who, under the modified scheme, would be members of the Governing Body. In view of their exclusion from the Advisory

Board, the university representation would be increased from three to four and the scientific representation by the addition of the Director of the Indian Institute of Science, Bangalore, a representative of the Forest Research Institute, Dehra Dun, and a representative elected by the Indian Research Fund Association. A representative of the Co-operative Movement would also be added. The Principal Administrative Officer to the Council would be *ex-officio* Chairman of the Advisory Board.

The Government of India further announced that for the lump grant of Rs. 50 lakhs recommended by the Royal Commission, they had decided to substitute an initial lump grant of Rs. 25 lakhs, of which Rs. 15 lakhs would be paid in 1929-30, supplemented by a fixed minimum grant annually. The annual grant would be Rs. 7-25 lakhs, of which Rs. 5 lakhs would be devoted to the furtherance of the scientific objects of the Council and the remaining Rs. 2-25 lakhs to the cost of its staff and secretariat. The Council would have an entirely free hand in regard to the expenditure of the grants made to it for scientific purposes subject to the condition that no liability in respect of such matters as leave or pension contributions after the research for which the grant had been given would be incurred. In regard to the grant to meet the cost of staff, establishment, etc., the Council would be in the same position as a Department of the Government of India Secretariat.

The Council has since been constituted a separate Department of the Government of India for the purpose of administering this grant.

The Government of India also stated their decision that the Council should not be constituted under an Act of the Imperial Legislature as recommended by the Royal Commission but should be registered under the Registration of Societies Act, XXI of 1860. In pursuance of this decision, a meeting of those who would constitute the Society was held at Simla in June, 1929, to consider the terms of a memorandum of association and the Rules and Regulations. At that meeting, it was announced that His Exalted Highness the Nizam's Government had offered a donation of Rs. 2 lakhs to the funds of the Council. This offer was

gratefully accepted and the Revenue Member of the Nizam's Government has been added to the Governing Body, the Directors of Agriculture and of Veterinary Services becoming members of the Advisory Board. Since then donations of one lakh each, payable in 20 equal annual instalments, have been made by the Mysore, Baroda, Cochin, Travancore and Kashmir States and each nominates one representative to the Governing Body of the Council and two technical members to the Advisory Board. The Bhopal State has also been admitted as a constituent member of the Council on payment of a donation of Rs. 50,000 in 20 equal annual instalments and has been allowed the same representation on the Council as has been granted to the other constituent States.

Personnel.—In addition to the 19 *ex-officio* members the Governing Body includes the following gentlemen:—

The Hon'ble Diwan Bahadur G. Narayanaswamy Chetty, elected by the Council of State, Pt. Sri Krishna Dutta Palwal, M.L.A. and Mr. Mohamed Azhar Ali, M.L.A., elected by the Legislative Assembly, Sir Joseph Kay and Mr. Chuni Lal B. Mehta representing the business community, Messrs. Carpenter and Kerr, elected by the Advisory Board, and the Hon'ble Sir Frank Noyce, and Diwan Bahadur Sir T. Vijayaraghavacharya, additional members appointed by the Governor-General in Council. The Chairman of the Council is the Hon'ble Member of the Council of His Excellency the Governor-General for the time being in charge of the portfolio of Agriculture. The Hon. Kinnwar Su Jagdish Prasad, K.I., C.S.I., C.I.E., C.B.E.

The whole-time officers of the Council are—The Vice-Chairman—Since the retirement of Diwan Bahadur Sir T. Vijayaraghavacharya on the 25th October 1935, the post has not been permanently filled. Sir Byree Burt, K.I., C.I.E., M.B.E., I.A.S., Agricultural Expert to the Council has been appointed to officiate as Vice-Chairman from that date. The Expert Advisers—Dr. F. J. F. Shaw, D.Sc., I.A.S. Colonel A. Oliver, C.B., C.M.G., R.C. V.S., Mr. A. M. Livingstone and the Secretary—Mr. N. C. Mehta, I.C.S.

SCHEME FOR THE IMPROVEMENT OF AGRICULTURAL MARKETING IN INDIA

In view of the importance of improved agricultural marketing as an aid to the general economic recovery of the country, the Government of India decided to give effect to the recommendations made by the Royal Commission on Agriculture, and generally endorsed by the Central Banking Enquiry Committee regarding marketing surveys. After consultation with Provincial Government it was decided that the first step should be the appointment for a limited period of a highly qualified and experienced Marketing Expert with practical knowledge of agricultural marketing in other countries. This officer and the necessary assistants should be attached to the Imperial Council of Agricultural Research and should undertake the investigation of marketing problems, formulate schemes for improvement,

make recommendations as regards standard grades for the various commodities and advise local Governments and provincial Department of Agriculture generally in regard to agricultural marketing.

2. In accordance with this decision the Office of the Agricultural Marketing Adviser to the Government of India was constituted with effect from 1st January, 1935, at the Old Secretariat Buildings, Civil Lines, Delhi. With Mr. A. M. Livingstone as Agricultural Marketing Adviser a Central Staff was appointed in February 1935 consisting of 3 Senior Marketing Officers, 3 Marketing Officers and 12 Assistant Marketing Officers. Arrangements were made at the same time to appoint a nucleus marketing staff in each of the Provinces. Naturally, a good deal of time was spent in the course of

the year getting the necessary staff together and in making a start with the work. By the end of September 92 full-time Marketing Officers were operating throughout India and Burma. Of these, 32 (Assistant Marketing Officers) were provided in the Provinces out of grants made by the Imperial Council of Agricultural Research, 12 Marketing Officers were appointed by the local Governments and 29 by the Durbars of the major Indian States. A list of the Central Marketing Officers, and Senior Marketing Officers in some of the Provinces and Indian States is given below. In provinces and States for which no Senior Marketing Officer is shown the Director of Agriculture supervises direct the work of the Marketing Staff. In addition to the full-time Marketing Staffs referred to, 223 officers were nominated to deal with marketing questions in the smaller Indian States and Minor Administrations.

3. Towards the close of the year, the Coffee Cess Committee arranged to appoint a Marketing Officer for Coffee and this Officer was attached to the Office of the Agricultural Marketing Adviser.

4. The programme of work which was agreed to by the Central and local Marketing Staff at a Conference held at Delhi in March 1935 involves a series of marketing surveys on a number of important commodities and covers the main cereals, fruit and livestock products.

5. The investigation work connected with the surveys ranges over the whole field of Marketing, but special attention is devoted to a study of prices and the quality of the products

concerned. In this latter connection a considerable amount of analytical work has been done at various research institutions in the country. Generally speaking, the market investigations have been carried out by means of personal interviews assisted by a standard list of questions in the form of questionnaires, and the Marketing Officers in the course of their work, apart from visiting the villages and mounds, interview representative members of different groups of persons concerned in the production and distribution of commodities, for example, producers, distributors, wholesalers, manufacturers, railway agents and so on.

6. The Central Marketing Staff are responsible for survey work in a large number of States which do not have staff of their own. They have also to advise and assist the local Marketing Staff in carrying out their work.

7. In the course of the year the Central Marketing Officers visited all the Provinces and 78 States. Altogether they spent 3,644 days on tour.

8. Although the work was in many cases late in starting, several of the Provinces and States have already submitted preliminary marketing survey reports on some of the commodities taken up for investigation this year, and the others are expected to complete the work shortly. As soon as this is finished, the Central Marketing Staff will undertake compilation of an All-India report on each of the commodities and make specific recommendations for improvements which will be followed up later by practical market development work.

List of the Central Marketing Officers, and the Senior Marketing Officers in Provinces and Indian States

A.—Central Marketing Staff

Agricultural Marketing Adviser to the Government of India—Major A. McD. Livingstone, M.C., M.A., B.Sc.

Senior Marketing Officers—C. B. Samuel, M.A., B.Sc. (Hons.), A. M. Thomson, H. C. Javaraya, L.A.G., F.I.S., F.R.H.S.

Marketing Officers—B. P. Bhargava, B.Sc., A. M. Inst. B.E., D. T. G. Shriname, B.A.G., Ph.D., F.R.S., F.R.Econ.S., D. N. Khurody, Ph.D. (Hons.)

Assistant Marketing Officers—Tiruguprasad, M.A., L.L.B., F. A. Shah, B.A., P. L. Tandon, B.Sc. (Wales), F.R.Econ.S. (London), Hukimat Khan, B.Sc. (Agriculture), K. Comarasamy Chetty, B.Sc. (Edin.), S. C. Chakravarti, B.A.G. (Bomb.), E. M. Bee, K. Gopalan, M.A., Ph.D. (Econ.), B. Com. (Mumbai), F.R.Econ.S., Shashikant, Ph.D. (Scot.), Fazal Haq, B.A., M.Sc. (Reading), Nurul Islam, Y. T. Desai, B.A.G., M.Sc. (Econ.), London, F.R.Econ.S.

B—Provinces

Madras—K. Gopalakrishnan Raju, L.A.G., Provincial Marketing Officer, Madras.

Bombay—E. J. Bruen, Marketing Officer and Livestock Expert to the Government of Bombay, Poona.

Bengal—A. R. Malik, M.A., B.Sc., Senior Marketing Officer, Bengal, Writers' Building, Calcutta.

United Provinces—J. A. Manjwani, M.A., B.Sc. (Edin.), M.S.A. (Texas), Provincial Marketing Officer, United Provinces, Lucknow.

Punjab—Kartar Singh, L.A.G., B.Sc. (Agriculture), Ph.D. (Reading), Marketing Officer, Punjab, Lahore.

Bihar & Orissa—B. N. Sarkar, L.A.G., Senior Marketing Officer, Bihar and Orissa, Patna.

Central Provinces—R. H. Hill, M.A. (Cambridge), Provincial Marketing Officer, Nagpur.

Burma—F. D. Odell, M.A., I.A.S., Marketing Officer, Burma, Secretariat, Rangoon.

Assam—L. K. Handique, B.Sc. Agriculture (Edin.), Senior Marketing Officer, Assam, Shillong.

C—Indian States

Hyderabad—Ahmed Mohiuddin, B.A., Marketing Officer, H. E. H. the Nizam's Government, Hyderabad (Deccan).

Mysore—V. Venkatachari, M.A., B.Com., Superintendent of Commercial Intelligence and Marketing Officer, Mysore State, Bangalore.

Kashmir—Captain R. G. Wileford, Chairman Jammu and Kashmir Marketing Board, Srinagar (Kashmir).

Patna—Haichand Singh, L.A.G., Senior Marketing Officer, Patna.

Bhopal—K. P. Haider, Marketing Officer, Bhopal State, Bhopal.

* Includes 333 000 acres for which details are not available.

From 10½ million acres in 1878-79 the area annually irrigated rose to 19½ million acres at the beginning of the century and to 31·5 million acres in 1933-34

The main increase has been in the class of productive works, which irrigated 4½ million acres in 1878-79 and rose to 20,756,209 acres in 1926-27. During the year 1932-33 the areas irrigated by productive and unproductive works amounted to 21,586,296 acres and 4,623,622, acres respectively.

The area irrigated in 1933-34 was largest in the Punjab, in which province 11·34 million acres were irrigated during the year. In addition about 674,810 acres were irrigated from channels which although drawing their supplies from British canals, lie wholly in the Indian States. The Madras Presidency came next with an area of 7·48 million acres, followed by Sind with an area of 4·7 million acres.

Capital and Revenue.—The total capital invested in the works has risen from Rs 42·36 lakhs in 1900-01 to Rs 118·76 crores in 1933-34. The gross revenue for the year was Rs 1,310 lakhs and the working expenses Rs 486 lakhs, the net return on capital being, therefore, 5·54 per cent. In considering the latter figure, it must be remembered that the capital invested includes considerable expenditure on two large projects, the Lloyd (Sukkur) project, and the Cauvery Mettur Project. The former project which was opened for irrigation in 1932 yielded a net revenue of Rs 25 lakhs against Rs 20 lakhs in the preceding year while the latter project which was still under construction during the year under review, yielded a net revenue of Rs 75,000 only.

Charges for Water.—The charges for water are levied in different ways in the various provinces. In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals. In others, as in parts of Madras and Bombay, different rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for water. These methods may however be regarded as exceptional. Over the greater part of India water is paid for separately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown. Lower rates are often levied in cases where irrigation is by "lift", that is to say where the land is too high for the water to flow on to it by gravity and consequently the cultivator has to lift it on to his field.

Various other methods of assessment have been tried, such as by renting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful. The cultivator fully understands the principle of "No crops, no charge" which is now followed as far as possible in canal administration, but has no confidence in a system under which his liability for water rate is independent of the area and quality of his crop.

The rates charged vary considerably with the crop grown, and are different in each province and often upon the several canals in a single

province. Thus in the Punjab, they vary from Rs. 7-8-0 to Rs. 12 per acre for sugarcane, from Rs. 4 to Rs. 7-8-0 per acre for rice, from Rs. 3-4-0 to Rs. 5-4-0 per acre for wheat, from Rs. 3 to Rs. 4-4-0 per acre for cotton and from Rs. 2 to Rs. 3-4-0 per acre for millets and pulses. Charge is made for additional waterings. Practically speaking, Government guarantees sufficient water for the crop and gives it as available. If the crop fails to mature, or if its yield is much below normal, either the whole or part of the irrigation assessment is remitted.

A somewhat different system, the long lease system, is in force in parts of Bengal and the Central Provinces under which the cultivators pay a small rate for a term of years whether they take water or not. In these provinces where the normal rainfall is fairly high, it is always a question whether irrigation will be necessary at all, and if the cultivators have to pay the full rate, they are apt to hold off until water becomes absolutely essential, and the sudden and universal demand then usually exceeds the supply. By paying a reduced rate every year for a term of years they become entitled to water when required; consequently there is no temptation to wait till the last possible moment, and the demand is much more evenly distributed throughout the season.

Taken as a whole, irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives.

Central Bureau of Irrigation.—An important event of the triennium 1930-33 was the establishment of a Central Bureau of Irrigation as an essential adjunct of the Central Board of Irrigation. This organization satisfies a want long felt by irrigation officers and has great potentialities in connection with the development of Indian irrigation. The Bureau came into being in May 1931. Its main objects are to ensure the free exchange of information and experience on irrigation and allied subjects between the engineer officers of the various provinces, to co-ordinate research in irrigation matters throughout India and to disseminate the results achieved, to convene at intervals general congresses at which selected irrigation matters will be discussed by officers from various provinces, and to establish contact with similar bureaux in other countries with a view to the exchange of publications and information. These objects necessitate among other things the maintenance of a comprehensive library of irrigation publications both Indian and foreign, and the expenditure on the establishment and on the library is considerable. The bureau was financed during the year 1931-32 by the Government of India, but local Governments have since consented to contribute towards its support, and it has thus achieved an independent existence under the Central Board of Irrigation, the Government of India contributing in the same manner as provincial Governments.

Triennial Comparisons.—The average area irrigated in British India by Government works of all classes during the triennium 1930-33 was 30·23 million acres

The results obtained in each province are given in the table below :—

Provinces.	Average area irrigated in triennium 1927-30.	Average area irrigated in triennium 1930-33.
Madras	7,277,967	7,484,466
Bombay (Deccan)	406,748	382,729
Sind	3,579,592	3,690,000
Bengal	90,054	63,740
United Provinces	3,639,867	3,805,205
Punjab	11,200,550	10,995,258
Burma	1,994,321	2,076,435
Bihar and Orissa	957,067	888,834
Central Provinces	400,438	405,184
North-West Frontier Province	403,064	395,089
Rajputana	31,984	25,098
Baluchistan	22,407	21,430
Total ..	29,954,059	30,231,468

Productive Works—Taking productive works only, a triennial comparison is given in the following table. It will be seen that the average area irrigated by such works during the triennium was approximately two hundred thousand less than in the previous period :—

Provinces.	Average area irrigated in previous triennium 1927-30.	Average area irrigated in triennium 1930-33.
Madras	3,821,815	3,825,277
Bombay-Deccan	2,637	6,080
Sind	2,661,519	2,705,647
United Provinces	3,372,506	3,508,892
Punjab	10,775,794	10,314,031
Burma	1,378,393	1,446,121
Central Provinces	21,889	nil
North-West Frontier Province	207,750	203,238
Total ..	22,242,303	22,009,295

Taking the productive works as a whole, the capital invested in them was, at the end of 1932-33, Rs. 14,623 lakhs. The net revenue for the year was Rs. 783 lakhs giving a return 5.35 per cent. as compared with 9 per cent. in 1918-19 and 9½ per cent. in 1919-20. In considering these figures it must be remembered that the capital invested includes the expenditure upon several works which have only lately come into operation and others which were under

construction, which classes at present contribute little or nothing in the way of revenue; moreover only receipts from water rates and a share of the enhanced land revenue due to the introduction of irrigation are credited to the canals, so that the returns include nothing on account of the large addition to the general revenues of the country which follows in the wake of their construction.

Unproductive Works.—Turning now to the unproductive works, the areas irrigated in the various provinces during the triennium were as below —

Provinces.	Average area irrigated in previous triennium 1927-30.	Average area irrigated in triennium 1930-33.
Madras	266,849	261,624
Bombay-Deccan	239,278	204,715

Rajputana	31,984	25,098
Baluchistan	22,407	21,430
Total ..	4,109,793	4,455,437

Non-capital Works—The results obtained from the non-capital works are given below :—

Provinces.	Average area irrigated in previous triennium 1927-30.	Average area irrigated in triennium 1930-33.
Madras	3,189,303	3,297,565
Bombay-Deccan	164,833	169,568
Sind	86,351	62,637
Bengal	22,252	21,673
United Provinces	14,717	21,748
Burma	76,676	68,145
Bihar and Orissa	2,764	2,484
Central Provinces	45,067	30,628
Total ..	3,601,963	3,674,448

Irrigated Acreage.—A comparison of the acreage of crops matured during 1933-34 by means of Government irrigation systems with the total area under cultivation in the several provinces is given below —

Provinces,	Net area cropped	Area irrigated by Government irrigation works	Percentage of area irrigated to total cropped area	Capital cost of Government irrigation & Navigation works to end of 1933-34 In lakhs of rupees	Estimated value of crops raised on areas receiving State irrigation In lakhs of rupees
	Acres	Acres			
Madras	38,930,000	7,489,000	19.3	2,001	3,113
Bombay Deccan Smd	25,811,000	388,000	1.5	1,063	180
Bengal	4,930,000	4,728,000	95.9	2,913	697
United Provinces	28,576,000	18,000	0.2	529	22
Punjab	35,381,000	3,786,000	10.7	2,590	1,212
Burma	34,494,000	11,343,000	39.2	3,430	3,068
Bihar and Orissa	18,239,000	2,125,000	11.7	671	482
C. P. (excluding Berar)	29,165,000	869,000	2.9	628	331
N. W. P. Province	21,084,000	352,000	1.7	684	88
Rajputana	2,653,000	390,000	15.3	297	113
Baluchistan	453,000	29,000	6.4	36	6
	119,000	21,000	1.7	36	4
Total	240,165,000	31,577,000	13.1	14,877	9,316

* In addition 674,810 acres were irrigated on Indian State channels on the Western Jumna canal and the Sirhind canal.

† Excluding 22,562 acres irrigated by the Baharputr canal for which at present no capital and revenue accounts are kept.

New Works.—The major works of exceptional importance are the Lloyd Barrage and Canals in Smd, the Ganges (Mettur) project in Madras, and the Sutlej Valley Canals in the Punjab. The Lloyd Barrage which was opened by His Excellency the Viceroy early in 1932, is the greatest work of its kind in the world, measuring 4,725 feet between the faces of the regulators on either side. The year 1933-34 was the second year of working of the Lloyd Barrage canals and the results obtained were generally satisfactory. The total area irrigated was 2,770,000 acres of which 1,570,000 acres were in *kharif* and 1,200,000 in *rabi*. The acreages under wheat and cotton were 1,000,000 and 567,000 respectively. The canals construction scheme has been almost completed, and the revenue account of the scheme was opened with effect from the financial year 1932-33.

The construction work carried out during 1933-34 chiefly consisted of the remodelling of the old channels, the excavation of the main and branch water courses, and the construction of modules and hume pipe culverts. Many new masonry works were constructed and additions and alterations were carried out to the existing structures, where such works were found to be necessary. A few additional regulators were sanctioned and constructed, and weak portions of the banks of the canals were strengthened. Satisfactory progress was made with the enlarged and comprehensive Flood Protective Bund Scheme which according to the accelerated pro-

gramme was to be completed in the financial year 1934-35. The work of raising the Bund to its full section in miles 0 to 39.6, and constructing the new Bund from miles 39.6 to 97.9 was in progress, and the total earth work completed up to and including the year under reference amounted to 10 crores cubic feet.

The Sutlej Valley Works which reached completion by the end of 1932-33 received the sanction of the Secretary of State for India in 1921-22. It falls into four natural groups centred on the Ferozepur, Sukmanke, Islam, and Panjnad Headworks. During the triennium ending 1932-33 all the State Canals taking off from the first three headworks, namely the Bikaner, Fordwah, Eastern Saduqa, Bahawalpur and Qampur Canals were handed over to the States. The remaining two Canals, namely the Abbasia and Panjnad canals taking off from the Panjnad Headworks, were also handed over to the Bahawalpur State during the year. The total expenditure on the Project to the end of 1932-33 amounted to Rs. 21.12 crores which include Rs. 11.63 crores contributed by the States of Bikaner and Bahawalpur—the co-partners in the Project. The total area to be irrigated is 5,108,000 acres, or nearly 8,000 square miles. Of this, 2,075,000 acres are perennial and 3,033,000 acres non-perennial irrigation. 1,942,000 acres are in British territory, 2,825,000 acres in Bahawalpur and 341,000 acres in Bikaner.

The Cauvery-Mettur Project was inaugurated on August 21, 1934. The dam which has some of its features is the largest in the world and took 9 years to complete. It is built across the river Cauvery at a point 240 miles from its source in Western Ghats. During the construction of the dam 206,000 tons of cement and 55 million cubic feet of masonry were used.

The scheme is designed to irrigate some 1,300,000 acres of rice fields 125 miles away from the dam in the Cauvery delta. The Mettur Reservoir has an effective capacity of 93,500 million cubic feet whilst the dam has an over-all length of a little over a mile. Irrigation will be assisted by about 70 miles of main canals together with no less than 600 miles of distributories. The Cauvery-Mettur Scheme also provides for hydro-electric power.

WELLS AND TANKS.

So far we have dealt only with the great irrigation schemes. They are essentially exotic, the products of British rule; the real eastern instrument is the well. The most recent figures give thirty per cent. of the irrigated area in India as being under wells. Moreover the well is an extremely efficient instrument of irrigation. When the cultivator has to raise every drop of water which he uses from a varying depth, he is more careful in the use of it; well water exerts at least three times as much duty as canal water. Again, owing to the cost of lifting, it is generally used for high grade crops. It is estimated that well-irrigated lands produce at least one-third more than canal-watered lands. Although the huge areas brought under cultivation by a single canal scheme tend to reduce the disproportion between the two systems, it must be remembered that the spread of canals increases the possibilities of well irrigation by adding, through seepage, to the store of subsoil water and raising the level.

Varieties of Wells.—Wells in India are of every description. They may be just holes in the ground, sunk to subsoil level, used 101 a year or two and then allowed to fall into decay. These are temporary or kacha wells. Or they may be lined with timber, or with brick or stone. They vary from the kacha well costing a few rupees to the masonry well, which will run into thousands, or in the sandy wastes of Bikaner, where the water level is three hundred feet below the surface, to still more. The means of raising the water vary in equal degree. There is the *picottah*, or weighted lever, raising a bucket at the end of a pivoted pole, just as is done on the banks of the Nile. This is rarely used for lifts beyond fifteen feet. For greater lifts bullock power is invariably used. This is generally harnessed to the *mot*, or leather bag, which is passed over a pulley overhanging the well, then raised by bullocks who walk down a ramp of a length approximating to the depth of the well. Sometimes the *mot* is just a leather bag, more often it is a self-acting arrangement, which discharges the water into a sunap automatically on reaching the surface. By this means from thirty to forty gallons of water are raised at a time, and in its simplicity, and the ease with which the apparatus can be constructed and repaired by village labour, the *mot* is unsurpassed in efficiency. There is also the Persian wheel, an endless chain of earthenware

pots running round a wheel. Recently attempts have been made, particularly in Madras, to substitute mechanical power, furnished by oil engines, for the bullock. This has been found economical where the water supply is sufficiently large, especially where two or three wells can be linked. Government have systematically encouraged well irrigation by advancing funds for the purpose and exempting well watered land from extra assessment due to improvement. These advances, termed *takari*, are freely made to approved applicants, the general rate of interest being 6½ per cent. In Madras and Bombay ryots who construct wells, or other works of agricultural improvement, are exempt from enhanced assessment on that account. In other provinces the exemption lasts for specific periods, the term generally being long enough to recoup the owner the capital sunk.

Tanks.—Next to the well, the indigenous instrument of irrigation is the tank. The village or the roadside tank is one of the most conspicuous features in the Indian scene. The Indian tank may be any size. It may vary from a great work like Lakes Eife and Whiting in the Bombay Presidency or the Periyar Lake in Travancore, holding up from four to seven billion cubic feet of water, and spreading their waters through great chains of canal, to the little village tank irrigating ten acres. They date back to a very early stage in Indian civilisation. Some of these works in Madras are of great size, holding from three to four billion cubic feet, with water spreads of nine miles. The inscriptions of two large tanks in the Chingleput district of Madras, which still irrigate from two to four thousand acres are said to be over 1,100 years old. Tank irrigation is practically unknown in the Punjab and in Sind, but it is found in some form or other in all other provinces, including Burma, and finds its highest development in Madras. In the ryotwari tracts of Bombay and Madras all but the smallest tanks are controlled by Government. In the zamindari tracts only the large tanks are State works. According to the latest figures the area irrigated from tanks is about eight million acres, but in many cases the supply is extremely precarious. So far from tanks being a refuge in famine they are often quite useless inasmuch as the rainfall does not suffice to fill them and they remain dry throughout the season.

Meteorology.

The meteorology of India like that of other countries is largely a result of its geographical position. The great land area of Asia to the northward and the enormous sea expanse of the Indian Ocean to the southward are determining factors in settling its principal meteorological features. When the Northern Hemisphere is turned away from the sun, in the northern winter, Central Asia becomes an area of intense cold. The meteorological conditions of the temperate zone are pushed southward and we have over the northern provinces of India the westerly winds and eastward moving cyclonic storms of temperate regions, while, when the Northern Hemisphere is turned towards the sun, Southern Asia becomes a super-heated region drawing towards it an immense current of air which carries with it the enormous volume of water vapour which it has picked up in the course of its long passage over the wide expanse of the Indian Ocean, so that at one season of the year parts of India are deluged with rain and at another persistent dry weather prevails.

Monsoons.—The all-important fact in the meteorology of India is the alternation of the seasons known as the summer and winter monsoons. During the winter monsoon the winds are of continental origin and hence, dry, fine weather, clear skies, low humidity and little air movement are the characteristic features of this season. The summer rains cease in the provinces of the North-West Frontier Province and the Punjab about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather conditions extend slowly eastward and southward so that by the end of October, they embrace all parts of the country except the southern half of the Peninsula, and by the end of the year have extended to the whole of the Indian land and sea area, the rains withdrawing to the Equatorial Belt. Thus the characteristics of the cold weather from October to February over India are:—Westerly winds of the temperate zone over the extreme north of India, to the south of these the north-east winds of the winter monsoon or perhaps more properly the north-east Trades and a gradually extending area of fine weather which, as the season progresses, finally embraces the whole Indian land and sea area. Two exceptions to these fine weather conditions exist during this period, viz., the Madras coast and the north-west of India. In the former region the north-east winds which set in over the Bay of Bengal in October coalesce with the damp winds of the retreating summer monsoon, which current curves round over the Bay of Bengal, and blowing directly on to the Madras coast gives to that region the wettest and most disturbed weather of the whole year, for while the total rainfall for the four months June to September, i.e., the summer monsoon, at the Madras Observatory amounts to 15·46 inches the total

rainfall for the three months October to December amounts to 31·78 inches. The other region in which the weather is unsettled, during this period of generally settled conditions, is North-west India. This region during January, February and part of March is traversed by a succession of shallow storms from the westward. The number and character of these storms vary very largely from year to year and in some years no storms at all are recorded. In normal years, however, in Northern India periods of fine weather alternate with periods of disturbed weather (occurring during the passage of these storms) and light to moderate and even heavy rain occurs. In the case of Peshawar the total rainfall for the four months, December to March, amounts to 5·75 inches while the total fall for the four months, June to September, is 4·65 inches, showing that the rainfall of the winter is, absolutely, greater in this region than that of the summer monsoon. These two periods of subsidiary "rains" are of the greatest economic importance. The fall in Madras is, as shown above, of considerable actual amount, while that of North-west India though small in absolute amount is of the greatest consequence as on it largely depend the grain and wheat crops of Northern India.

Spring Months.—March to May and part of June form a period of rapid continuous increase of temperature and decrease of barometric pressure throughout India. During this period there occurs a steady transference northward of the area of greatest heat. In March the maximum temperatures, slightly exceeding 100° occur in the Deccan; in April the area of maximum temperature, between 100° and 105°, lies over the south of the Central Provinces and Gujarat; in May maximum temperatures, varying between 105° and 110°, prevail over the greater part of the interior of the country while in June the highest mean maximum temperatures, exceeding 110°, occur in the Indus Valley near Jacobabad. Temperatures exceeding 120° have been recorded over a wide area including Sind, Rajputana, the West and South Punjab and the west of the United Provinces, but the highest temperature hitherto recorded is 127° registered at Jacobabad on June 12th, 1919. During this period of rising temperature and diminishing barometric pressure, great alterations take place in the air movements over India, including the disappearance of the north-east winds of the winter monsoon, and the air circulation over India and its adjacent seas, becomes a local circulation, characterised by strong hot winds down the river valleys of Northern India and increasing land and sea winds in the coast regions. These land and sea winds, as they become stronger and more extensive, initiate large contrasts of temperature and humidity which result in the production of violent local storms. These take the forms of dust storms in the dry plains of Northern India and of thunder and hailstorms in regions where there

is inter-action between damp sea winds and dry winds from the interior. These storms are frequently accompanied with winds of excessive force, heavy hail and torrential rain and are on that account very destructive being known as "Nor'westers" in Bengal.

By the time the area of greatest heat has been established over North-west India, in the last week of May or first of June, India has become the seat of low barometric pressures relatively to the adjacent seas and the whole character of the weather changes. During the hot weather period, discussed above, the winds and weather are mainly determined by local conditions. Between the Equator and Lat. 30° or 35° south the wind circulation is that of the south-east trades, that is to say from about Lat. 30° - 35° south a wind from south-east blows over the surface of the sea up to about the equator. Here the air rises into the upper strata to flow back again at a considerable elevation to the Southern Tropic or beyond. To the north of this circulation, i.e., between the Equator and Lat. 20° to 25° North, there exists a light, unsteady circulation the remains of the north-east trades, that is to say about Lat. 20° North there is a north-east wind which blows southward till it reaches the thermal equator where side by side with the south-east Trades mentioned above, the air rises into the upper strata of the atmosphere. Still further to the northward and in the immediate neighbourhood of land there are the circulations due to the land and sea breezes which are attributable to the difference in the heating effect of the sun's rays over land and sea. It is now necessary to trace the changes which occur and lead up to the establishment of the south-west monsoon period. The sun at this time is progressing slowly northward towards the northern Tropic. Hence the thermal equator is also progressing northward and with it the area of ascent of the south-east trades circulation. Thus the south-east trade winds cross the equator and advance further and further northward, as the thermal equator and area of ascent follows the sun in its northern progress. At the same time the temperature over India increases rapidly and barometric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea areas. Thus we have the southern Trades circulation extending northward and the local land and sea circulation extending southward until about the beginning of June the light unsteady interfering circulation over the Arabian Sea finally breaks up, the immense circulation of the South-east Trades, with its cool, moisture laden winds rushes forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by oceanic conditions—the south-west monsoon proper. This is the most important season of the year as upon it depends the prosperity of at least five-sixths of the people of India.

When this current is fully established a continuous air movement extends over the Indian Ocean, the Indian seas and the Indian land area from Lat. 30° S. to Lat. 30° N. the southern

half being the south-east trades and the northern half the south-west monsoon. The most important fact about it is that it is a continuous horizontal air movement passing over an extensive oceanic area where steady evaporation is constantly in progress so that where the current enters the Indian seas and flows over the Indian land it is highly charged with aqueous vapours.

The current enters the Indian seas quite at the commencement of June and in the course of the succeeding two weeks spreads over the Arabian Sea and Bay of Bengal up to their extreme northern limits. It advances over India from these two seas. The Arabian Sea current blows on to the west coast and sweeping over the Western Ghats prevails more or less exclusively over the Peninsula, Central India, Rajputana and north Bombay. The Bay of Bengal current blows directly up the Bay. One portion is directed towards Burma, East Bengal and Assam while another portion curves to south at the head of the Bay and over Bengal, and then meeting with the barrier of the Himalayas curves still further and blows as a south-easterly and easterly wind right up the Gangetic plain. The south-west monsoon continues for three and a half to four months, viz., from the beginning of June to the middle or end of September. During its prevalence more or less general though far from continuous rain prevails throughout India, the principal features of the rainfall distribution being as follows. The greater portion of the Arabian Sea current, the total volume of which is probably three times as great as that of the Bengal current, blows directly on to the west coast districts. Here it meets an almost continuous hill range is forced into ascent and gives heavy rain alike to the coast districts and to the hilly range, the total averaging about 100 inches most of which falls in four months. The current after parting with most of its moisture advances across the Peninsula giving occasional uncertain rain to the Deccan and passes out into the Bay where it coalesces with the local current. The northern portion of the current blowing across the Gujarat, Kathiawar and Sind coasts gives a certain amount of rain to the coast districts and frequent showers to the Aravalli Hill range but very little to Western Rajputana, and passing onward gives moderate to heavy rain in the Eastern Punjab, Eastern Rajputana and the North-west Himalayas. In this region the current meets and mixes with the monsoon current from the Bay.

The monsoon current over the southern half of the Bay of Bengal blows from south-west and is thus directed towards the Tenasserim hills and up the valley of the Irrawaddy to which it gives very heavy rain. That portion of this current which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low-lying districts of East Bengal and immediately thereafter coming under the influence of the Assam Hills is forced upwards and gives excessive rain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advance

from the southward over Bengal, is then directed westward by the barrier of the Himalayas and gives general rain over the Gangetic plain and fairly frequent rain over the lower ranges of the Himalayas from Sikhim to Kasbmir.

To the south of this easterly wind of the Bay current and to the north of the westerly wind of the Arabian Sea current there exists a debatable area running roughly from Hissar in the Punjab through Agra, Allahabad and part of Chota Nagpur to Orissa, where neither current of the monsoon prevails. In this area the rainfall is uncertain and would probably be light, but that the storms from the Bay of Bengal exhibit a marked tendency to advance along this track and to give it heavy falls of occasional rain.

The Total rainfall of the monsoon period (June to September) is 100 inches over part of the west coast, the amount diminishes eastward, is below 20 inches over a large part of the centre and east of the Peninsula and is only 5 inches in South Madras; it is over 100 inches on the Tenasserim and South Burma coast and decreases to 20 inches in Upper Burma; it is over 100 in the north Assam Valley and diminishes steadily westward and is only 5 inches in the Indus Valley.

The month to month distribution for the whole of India is—

May	3.1 inches.
June	7.9 "
July	11.2 "
August	10.3 "
September	7.0 "
October	3.3 "

Cyclonic storms and cyclones are an almost invariable feature of the monsoon period. In the Arabian Sea they ordinarily form at the commencement and end of the season, viz, May and November, but in the Bay they form a constantly recurring feature of the monsoon season. The following gives the total number

of storms recorded during the period 1877 to 1901 and shows the monthly distribution:—

	Jan.	Feb.	Mar.	Apl.	May	June
Bay of Bengal	1	4	13	28
	July	Aug.	Sep.	Oct.	Nov.	Dec.
Bay of Bengal 41	36	45	34	22	8	
	Jan.	Feb.	Mar.	Apl.	May	June
Arabian Sea	2	15	..
	July	Aug.	Sep.	Oct.	Nov.	Dec.
Arabian Sea 2	..	1	1	5	..	

The preceding paragraphs give an account of the normal procession of the seasons throughout India during the year, but it must be remembered, that every year produces variations from the normal and that in some years these variations are very large. This is more particularly the case with the discontinuous element rainfall. The most important variations in this element which may occur are:—

- (1) Delay in the commencement of the rains over a large part of the country, this being most frequent in North Bombay and North-west India.
- (2) A prolonged break in July or August or both.
- (3) Early termination of the rains, which may occur in any part of the country.
- (4) The determination throughout the monsoon period of more rain than usual to one part and less than usual to another part of the country. Examples of this occur every year.

About the middle of September fine and fresh weather begins to appear in the extreme north-west of India. This area of fine weather and dry winds extends eastward and southward the area of rainy weather at the same time contracting till by the end of October the rainy area has retreated to Madras and the south of the Peninsula and by the end of December has disappeared from the Indian region; fine clear weather prevailing throughout. This procession with the numerous variations and modifications which are inseparable from meteorological conditions repeats itself year after year.

INDIA METEOROLOGICAL DEPARTMENT.

Functions of the Department.—The India Meteorological Department was instituted in 1875 to combine and extend the work of various provincial meteorological services which had sprung up before that date. The various duties which were imposed on the Department at the time of its formation were from time to time supplemented by new duties. The main existing functions, more or less in the historical order in which they were assumed, may be briefly summarised as follows—

(a) The issue of warnings to ports and coastal districts of the approach of cyclonic storms.

(b) The issue of storm warnings by wireless to ships in the Indian seas, and the making of arrangements for the collection of meteorological data from ships.

(c) The maintenance of systematic records of meteorological data and the publication of climatological statistics. These were originally undertaken in order to furnish data for the investigation of the relation between weather and disease.

(d) The issue to the public of up-to-date weather reports and of rainfall forecasts. These duties were originally recommended by a Committee of Enquiry into the causes of famine in India.

(e) Meteorological researches of a general character, but particularly regarding tropical storms and the forecasting of monsoon and winter rainfall.

(f) The issue of seasonal rainfall forecasts.

(g) The issue of telegraphic warnings of heavy rainfall by special telegrams to district officers on departmental warning lists (e.g., canal and railway engineers), and by means of the ordinary daily weather telegram to the public in general.

(h) Supply of meteorological, astronomical and geophysical information in response to enquiries from officials, commercial firms or private individuals.

(i) Technical supervision of rainfall registration carried out under the control of provincial Government authorities.

(j) The study of temperature and moisture conditions in the upper air by means of instrument-carrying balloons and of upper winds by pilot balloons.

(k) The issue of weather reports and warnings to aircraft, civil and military, the latter being in collaboration with the Royal Air Force.

(l) The training and examination in meteorology of candidates for air pilots' licences.

(m) Study of meteorology in relation to agriculture, a subject on which the Royal Commission, on Agriculture in India made recommendations.

In addition to these meteorological duties the India Meteorological Department was from time to time made responsible for or undertook various other important duties, such as—

(n) Determination of time in India and the issue of time-signals, also the determination of errors of chronometers for the Royal Indian Navy.

(o) Observations and researches on terrestrial magnetism at Bombay and atmospheric electricity at Bombay and Poona.

(p) Regular study (mainly by spectroscopic examination) of the sun at the Solar Physics Observatory at Kodaikanal.

(q) Maintenance of seismological instruments at various centres.

ORGANISATION.

It is necessary to note that practical meteorology implies a meteorological organisation, not merely individual meteorologists relying upon their own personal and purely local observations. The making of a single forecast in any of the larger meteorological offices of the world requires the co-operation of some hundreds of persons. In India some 400 observers co-operate daily to take simultaneous observations at about 300 separate places and hand in their reports to telegraphists, who transmit them to forecast centres, where, for rapid assimilation, clerks decode them and chart them on maps. Meteorological experts then draw therefrom the conclusions on which their forecasts are based. There are other observations, which take observations for climatological purposes but do not telegraph them.

An efficient system of telegraphic communication of weather reports is an essential feature in all meteorological organisations. This is recognised in the International Tele-communication Convention.

While the above is true, in general, of all applications of practical meteorology, its application to aviation involves the existence of a specialised and particularly designed organisation. Aviators require detailed information about the weather, they wish to know winds at different levels, have information about visibility, fogs, dust-storms, thunderstorms, height of low clouds, etc., along with forecasts of changes in these elements. Many of these are local, short-lived and rapidly changing phenomena.

Definite recommendations regarding the nature of information to be supplied to aircraft, the exhibition of current weather information at aerodromes and the meteorological organisation of international airways have been embodied in Annex G of the International Convention of Air Navigation. In accordance with these recommendations, expert meteorologists should be stationed at aerodromes at reasonable intervals along the airway to supply to the aviation personnel current information and forecasts of weather conditions along the

routes up to the next aerodrome of the same class. Forecast centres should be established at least at each main aerodrome along aerial routes and forecasts prepared at such centres should be transmitted to the other aerodromes for the information of pilots. Other recommendations refer to hours and kind of observations and manner of codifying them.

In Europe practically all observatories record and telegraph readings at least thrice daily, while stations near air routes do so every three hours. In the United States of America readings are made at least twice daily at all observatories, every three hours at most observatories near air routes and every hour at observatories along air routes. In addition, every aerodrome receives by telewriter frequent regular reports from certain stations along the air routes a few of these at half-hourly and most at hourly intervals in order that the aviators may be supplied with current up-to-date information of actual weather on the air route itself. In India*, the meteorological service for aviation is for financial reasons, not able to attain the minimum recommended in annex G of the International Convention. The net-work of observatories in India is much sparser than that in Europe and America and the frequency of observations taken at each of them much smaller. The four-thousand-mile air route between Bahrain and Victoria Point is served by two forecasting centres at Karachi and Calcutta, which prepare two synoptic charts a day based on observations taken twice daily at observatories reporting to them. The sole forecasting centre in Southern India is at Poona where facilities are available for the issue of one forecast daily. The opening of a chain wireless stations along the main trans-India air route has enabled special meteorological facilities to be made available to airmen flying along that route. A system of exchange of current weather reports at specified hours between stations on the route and of voluntary reports of warning of adverse weather has been introduced with the co-operation of the Director of Wireless and the Director of Civil Aviation making it possible for each wireless station to have in a collected form the information regarding actual weather at neighbouring stations on the air-route for supply to fliers. Stations taking part in the scheme are Karachi, Jodhpur, Delhi, Allahabad, Calcutta, Chittagong, Akyab, Sandoway, Bassein, Rangoon and Victoria Point. Apart from routine observations at stated times, airmen can obtain information of current local weather at any time by wireless, by special permission. Further the transmission, along the wireless chain, twice daily, of the latest weather forecasts and upper wind and low cloud information for each part of the air route has been arranged. This enables the latest weather reports to be available to air-craft in flight as well as at the principal aerodromes on the route where they are displayed suitably on weather notice boards.

For the Karachi-Madras service, arrangements exist for communicating current weather in-

formation to aerodromes from a few observatories on the route to supplement the information available in the reports supplied by the forecasting centres.

In order to fulfil the various duties described above, the organisation of the department is made up of a central office, 7 sub-offices, 36 pilot balloon observatories and 328 weather observatories of various classes to distribute over a region stretching from Persia, Aden, Zanzibar on the west to Burma on the east. The central office at Poona is the administrative headquarters of the department. The control over weather observatories, including the responsibility for scrutiny of records and for checking and computation of data received from them is divided between the offices at Poona, Calcutta and Karachi. Forecasting for aviation is divided between these three offices and two offices at Peshawar and Quetta, the last two forecast for military flying and do not serve civil aviation. Storm-warning for shipping in the Bay of Bengal is carried on by the Meteorological Officer at Calcutta, while similar duties in respect of the Arabian Sea are undertaken at Poona. The Upper Air Observatory, Agra, is in administrative charge of all the pilot balloon observatories in India, Burma and the Persian Gulf. The Bombay and Alibag Observatories specialise in the study of Geophysics, particularly terrestrial magnetism and seismology while the observatory at Kodaikanal specialises in the study of the solar physics. The next section describes in somewhat greater detail, the general duties of the offices mentioned above.

GENERAL DUTIES OF THE MAIN OBSERVATORIES AND OFFICES.

(a) **Headquarters Offices, Poona (F U W').**—The general administration of the department is carried on by the Headquarters Office in Poona. In addition, it is in immediate and complete charge of all second, third, fourth and fifth class weather observatories in Kashmir, Gujarat, Central India, the Central Provinces and the Peninsula and is responsible for the scrutiny of records and checking and computation of data received from them. It receives telegraphic reports of morning observations collected at practically all pilot balloon and first, second, third and fifth class observatories in India and issues daily a telegraphic summary of general weather conditions with forecasts of probable changes in weather during the next 24 hours for the whole country. It undertakes the issue of heavy rainfall warnings for practically the whole country except north east India, and the issue of warnings for storms in the Arabian Sea. Its duties on behalf of aviation consist in the issue of weather reports to airmen on routes in central and southern India; for the Karachi-Madras air service, it issues forecasts for the major section viz., Ahmedabad to Madras. This office prepares and publishes the Daily, Weekly and Monthly Weather Reports, and an Annual Volume entitled the "India Weather Review," and issues two annual volumes containing rainfall data of about 3,000 stations in India. In collaboration with the Agra Observatory, it

* Fuller details of the aviation organisation are contained in the departmental pamphlet entitled "Meteorological Organisation for Airmen."

also publishes an annual volume containing all upper air data collected in India. It is responsible for the preparation of normals of rainfall, temperature, humidity, etc., for all observatories in India. It issues long-range seasonal rainfall forecasts for the country. It collects and examines weather logs from ships in the Arabian Sea. It supplies all weather observatories with instruments and stores from the stock, which it maintains. It is also responsible for the design, specification test and repair of all meteorological instruments. On its transfer from Simla to Poona the Headquarters Office was equipped as an upper air observatory and a first class weather observatory. It also has facilities for research in theoretical and practical meteorology. It is now one of the two main centres for the conduct of upper air research in India, sounding balloon work directed from there has been largely responsible for our present extension of knowledge of the free atmosphere over the Peninsula. Publications of meteorological research in the Department are edited and issued from Poona. This office also collects and compiles, for the International Commission, the upper air data collected over India, Ceylon, Siam, Indo-China, Malaya, the Dutch East Indies, Somaliland and British East Africa.

A branch for agricultural meteorology has been sanctioned temporarily and is financed by the Imperial Council of Agricultural Research. Its statistical investigations include a critical enquiry into the available data on the area and yield of crops for the various presidencies and districts in India and, after careful selection, the correlation of some of them with the accumulated meteorological data. On the experimental side, it aims to study microclimatology, evolve suitable instruments for such work, standardize methods of observations and in general undertake a detailed study of the air layer near the ground.

(b) Meteorological Office and Observatory, Alipore, Calcutta (F P. W¹ S T)—The Alipore Office serves as a regional forecast centre and is responsible for the publication of the Calcutta Daily Weather Report for stormwarning in the Bay of Bengal and for heavy rainfall warning in north-east India. It issues weather reports to airmen on routes lying in Burma, Assam, Bengal, Bihar and Orissa and the east United Provinces, on the trans-India route, its responsibility extends over the section Allahabad to Victoria Point. To meet the needs of aviation, an afternoon chart is prepared in addition to the long established morning chart, the area of the latter being extended to meet the new needs. It has charge of all second, third, fourth and fifth class observatories, in the area comprising Burma and the Bay Islands, Assam, Bengal, Bihar and Orissa and the east United Provinces including the checking and computation of data therefrom. It also supplies time signals by time ball to Fort William, by wireless to shipping at sea and by telegraphic signal throughout the Indian telegraph and railway

systems. It is also a first class weather observatory, pilot balloon observatory and seismological station.

(c) Karachi (F. W¹ P. A.)—This office was established primarily as a forecasting centre for aviation. It now issues weather reports for airmen on routes lying along the Persian Gulf and Mckran coasts and in Sind, Rajputana, the Punjab, west United Provinces and north Gujarat. On the empire and international air route across India its responsibility extends over the section between Bushire or Bahrain on the west and Allahabad on the east.

The forecasting office is temporarily located in Karachi Cantonment and will be transferred to Drigh Road Civil Aerodrome when buildings are provided there. Meanwhile, a first class weather observatory and pilot balloon station have been started at Drigh Road.

The Karachi Office administers all second, third, fourth and fifth class observatories in Persia and Arabia, Baluchistan, the North-West Frontier Province, the Punjab, Sind, Rajputana and the west United Provinces. As the basis of the weather reports and forecasts issued to aviators, it prepares two weather charts daily, drawn up mainly from observations received from the observatories under its own control. A daily weather report is also being published, as an experimental measure.

(d) Upper Air Observatory, Agra (U W¹ S)—Agra Observatory is the headquarters of all pilot balloon work in India. It is responsible for the maintenance and supervision of the work of the pilot balloon observatories in India, Burma and the Persian Gulf and supplies them with the equipment necessary to carry on their daily observations. These duties have necessitated the provision of a hydrogen factory to make hydrogen gas and compress it into tubes, as well as the provision of a workshop for the design, manufacture and repair of instruments, principally for upper air work. All data from pilot balloon observatories are collected, checked, and statistically summarised at Agra. This observatory is also a principal centre of upper air research work in India. The sounding balloon work there (in the course of which balloons have provided information of conditions up to as great a height as 90,000 feet) has been responsible for most of our present knowledge regarding the free atmosphere over India. There is a seismological station attached to this observatory.

(e) Colaba and Alibag Observatories (W¹ S T M)—These observatories specialise in the study of geophysics, particularly terrestrial magnetism and seismology, and in addition carry on the duties of a first class weather observatory. The routine magnetic work at Alibag, as well as the publication of the magnetic data, is arranged in accordance with the recommendations of the International Commission

† Classified into various classes, the number as it stood on 31st March 1934 would be distributed as follows:—

W¹=15, W²=166, W³=86, W⁴=22, W⁵=24 and W⁶=15.

for Terrestrial Magnetism. The observatories take star or sun observations for the determination of time; and the Colaba Observatory is responsible for the time-ball service at the Bombay Harbour and the rating of chronometers belonging to the Royal Indian Navy. In recent years researches on atmospheric electricity and microseisms in relation to major weather phenomena over the sea have also been undertaken there.

(f) **Kodaikanal (Sp W¹. S)**—The observatory at Kodaikanal specializes in the study of the physics of the sun and is specially equipped for spectroscopic observations and research. The routine work is decided in accordance with the recommendations of the International Astronomical Union which prevent any serious overlapping of work in the comparatively few solar physics observatories in the world. This observatory also undertakes the duties of a first class weather observatory and a seismological station.

(g) **Quetta and Peshawar (F. W¹. P. A.)** Aviation on a regular basis was first started in this country by the Royal Air Force in north-west India, and the need to arrange for local forecasting was first experienced there. Two forecast centres were accordingly started in 1925 at Quetta and Peshawar, each under an R. A. F. Meteorologist who was entrusted with the charge of issuing forecasts of weather over the Lahore-Peshawar-Quetta-Karachi air routes for R. A. F. aeroplanes and detailed local forecasts and warnings each for his own immediate neighbourhood. Route forecast for the Royal Air Force flying over the Punjab, Waziristan, North-West Frontier Province, Baluchistan and Sind are issued by these offices. The Meteorological Department has been exercising full technical control over the work of the two offices, supplying instruments, meeting the cost of the staff of clerks and observers at each centre and supplying data by telegram from its observatories. An officer seconded from the Indian Meteorological Service but paid by the Royal Air Force is now holding the post of the Meteorologist at Quetta, the office at Peshawar is in charge of a Royal Air Force officer who is under the technical, not administrative control of the Meteorological Department.

7. The auxiliary centres are situated at Rangoon, Akyab, Dumm Dumm*, Allahabad Jodhpur and Drigh Road. The professional or Meteorological Assistant stationed at these centres is authorised to add to the weather report received from the forecasting centres his own conclusions about the local weather situation. The latest information available regarding the local surface conditions and upper winds can also be obtained from him.

Meteorological Office, Poona.—Dr. C. W. B. Normand, M.A., D.Sc. (Edin.), Director-General of Observatories.

Meteorologists.—Dr. S. K. Banerji, M.Sc. (Calcutta), Mr. V. V. Sohoni, B.A., M.Sc. (Bombay) (on leave) Dr. K. R. Ramanathan, (Hons.) B.Sc. (Bombay) M.Sc. and Ph.D. (Lond.), Mr. S. Basu, M.Sc. (Allahabad), Mr. J. M. Sil, B.A. (Calcutta), B.Sc. (Eng.), (Boston Tech.); Dr. S. R. Savitri M.A. (Madras) Ph.D. (Lond.) and Mr. A. A. K. Roy B.Sc. (Cal.), B.A. (Oxon.), M.A., D.Sc. (Madras), Dr. K. J. Kabraji, B.A.

Assistant Meteorologists.—Mr. V. D. Iyer B.A. (Madras), Mr. Burkat Ali, B.A., M.Sc. (Punjab), Mr. B. N. Sreenivasiah M.Sc. (Calcutta), Dr. K. Das, M.Sc. (Punjab), Ph.D. (Lond.), Mr. S. S. Lal M.Sc. (Lucknow & Lond.) D.L.C. and Mr. P. N. Ghosh, M.Sc. (Ollg.)

Agricultural Meteorologist.—Dr. L. A. Rindas, M.A. Ph.D. (Calcutta)

Agricultural Assistant Meteorologist.—Dr. R. J. Kalamkar, B.A. B.Sc. (Nagpur), Ph.D. (Lond.)

Upper Air Observatory, Agra. Mr. G. Chatterji, M.Sc. (Calcutta), Meteorologist, in charge. Dr. N. K. Suri, D.Sc. (Allahabad) Meteorologist, Mr. S. L. Mahurkar, B.Sc. (Mys.), M.Sc. (Cantab.) Assistant Meteorologist, Mr. S. P. Venkateshwarani, B.A. (Hons.) (Madras) and Dr. A. K. Das, M.Sc. (Cal.), D.Sc. (Paris) Assistant Meteorologist

Meteorological Office, Alipore, Calcutta.—Dr. S. N. Sen, M.Sc. (Cal and Lond.), Ph.D. (Lond.) Meteorologist, Mr. B. K. Roy, M.Sc. (Calcutta) Assistant Meteorologist, Mr. S. K. Das, M.Sc. (Dacca and Lond.), D.L.C. (Lond.), F. R. Met. Soc. Sec. (Lond.), Assistant Meteorologist and Mr. C. Rinaswamy, M.A. (Hons.) (Madras) Assistant Meteorologist

Meteorological Office, Karachi.—Dr. S. K. Pramanik, M.Sc. (Lucknow), Ph.D. (Lond.), D.L.C. Meteorologist, Dr. B. N. Desai, M.Sc. (Bombay) Ph.D. (Edin.), B.A., LL.B. (Bombay), Assistant Meteorologist, and Dr. S. M. M. B.Sc. (Benares) Ph.D. (Lond.) D.L.C., Assistant Meteorologist

Meteorological Office, Bombay.—Dr. S. C. Roy, M.Sc. (Calcutta), D.Sc. (Lond.), Meteorologist

Solar Physics Observatory, Kodaikanal.—Dr. T. Royds, D.Sc. (Lond.) Director, and Dr. A. L. Narayan, M.A., D.Sc. (Madras), Meteorologist

Meteorological Office, R. A. F., Peshawar.—Mr. I. H. Starr, Meteorological Officer

Meteorological Office, R. A. F., Quetta.—Mr. P. R. Krishn Rao, B.Sc. (Mysore) (Offg.)

* At present the functions of this centre are being carried on by the Meteorological Office at Calcutta, for want of proper building accommodation at Dumm Dumm.

MONSOON OF 1935.

The S. W. Monsoon of the year was on the whole fairly normal in its incidence over the country except in the Sind Division where rainfall was in large defect which persisted almost throughout the season.

June.—The advance of the monsoon current over the Arabian Sea occurred much later than usual. It was incident on the Malabar coast on the 12th June and rapidly extended northwards along the west coast. A depression rising off the Konkan coast on the 17th and moving northwards towards Kathiawar strengthened the monsoon in Kanara and Konkan and extending it into the Bombay Deccan also helped to carry vast volumes of moisture-laden air inland provoking widespread thunderstorm rains in Guzrat. As the onset of the current however was weak throughout the month, the activity of this branch was mostly confined to the west coast of the Peninsula.

The monsoon advanced over the Bay of Bengal so far north as the Andaman Sea during the third week in May and carried widespread rains into Lower Burma. It extended into Upper Burma by the beginning of June but weakened thereafter and it was not till the end of the third week of the month that its activity reached Bengal and Assam. In the last week a low pressure area over the Bay rising off the Orissa-Ganjam coast and moving inland invigorated the current extending the monsoon rains into Bihar and Orissa, the central parts of the country east Guzrat and east Rajputana. About the end of the month both branches of the current revived carrying the monsoon into the United Provinces and temporarily into the Panjab Hills and Kashmir. Continued incursions during the month of four Western Disturbances typical of the winter season but unfavourable to the normal development of the S. W. current, formed a marked feature of the weather of the month. With the exception of Bombay, Assam, Mysore, and Hyderabad which were well served all other divisions returned more or less large deficiencies in their rainfall. The total rainfall for the month averaged over the plains of India was 7.61 inches—13 per cent in defect.

July.—Both branches of the current which had revived during the last week of June maintained their activity and by the first week in July the monsoon was established in the United Provinces, Rajputana, and Guzerat. A Bay depression which developed into a storm near the Saugor Island on the 8th and advanced as a heavy depression in its passage inland into Rajputana, further strengthened the monsoon in Orissa, Chota Nagpur, central parts of the country, Gujrat-Rajputana and the United Provinces, and extended it into the Panjab and Sind. Under the influence of another depression which formed off the Ganjam coast on the 15th and crossing the Orissa coast on the 22nd travelled inland, good rains were gathered in Orissa, the central parts of the country, the north Madras coast, the Deccan, Gujrat, and east Rajputana. In the last week the passage inland of yet a third low pressure area rising off the Bay kept

up the activity of the Bay current fully over its own field of action, and also strengthened the current over the west coast of the Peninsula which had weakened after the 18th. All Divisions of the country were well served during the month, Bengal and Sind only returning deficiency of 31 and 28 per cent respectively in their rainfall. The total fall for the month averaged over the plains of India was 13.12 inches, 15 per cent in excess of the normal.

August.—The monsoon continued active in the central parts of the country north east India, and Burma under the influence of a Bay depression which crossed the Orissa-Bengal coast on the 5th and advanced inland past Chota Nagpur into East Central India. The current remained well sustained thereafter for the first three weeks and east and north Panjab, west United Provinces and north east India were all well served. For a part of the third week it waxed strong in the central parts of the country, Guzerat and Rajputana. The monsoon however was generally weak for the first two weeks over the Peninsula where thunderstorm rains mostly prevailed, and though the current revived in the last week its activity was confined mainly to the west coast. An abnormal distribution simulating suspension of all monsoon conditions over the interior of the country was a marked feature of the weather of the month towards its end. The total rainfall for the month was 10.12 inches, 7 per cent in defect of the normal.

September.—Conditions reviving during the first week, the monsoon strengthened in the Deccan, north east India, and Upper Burma. Influenced by a depression formed at the head of the Bay on the 6th which passed inland into the Central Provinces, the monsoon waxed strong generally over the whole country except Northwest India. The activity continued till the 18th after which the monsoon weakened over strong generally over the whole country except Northwest India. The activity continued till the 18th after which the monsoon weakened over the Peninsula. Another low pressure area rising off the Orissa-Ganjam coast on the 19th which taking a northerly course filled up over Bihar, helped to carry widespread rains into northeast India, and local rainfall into Bihar and the east United Provinces. The S. W. monsoon generally weakened thereafter and by the end of the month its retreat from the country was complete. Averaged over the plains of India the total rainfall for the month was 8.43 inches 13 per cent in excess of the normal.

October.—Thunderstorm rains typical of the transition period between the cessation of the S. W. Monsoon and incursion and establishment of the N. E. monsoon, prevailed during the first week over the country chiefly over the western half of the Peninsula and Burma. The N. E. Monsoon was established in the second week of the month. The total rainfall for the month was 3.20 inches, which was in defect by 8 per cent.

The total rainfall for the season—June to September—averaged over the plains of India was 40.3 inches, 2 per cent. in excess of the normal. The following table gives detailed information of the seasonal rainfall of the period.

DIVISIONS.	RAINFALL, JUNE TO SEPTEMBER, 1935.

Famine.

To the student of Indian administration nothing is more remarkable than the manner in which great problems arise, produce a corresponding outburst of official activity to meet them and then fall into the background. This general truth is illustrated by a study of the history of famine in India. For nearly forty years it was the bogey of the Indian administrator. The forecasts of the rains were studied with acute anxiety. The actual progress of the rains was followed with no less anxiety, and at the first signs of a bad or poor season the famine relief machinery was furnished up and prepared for any emergency. The reason for this is clear if we examine for a brief space the economic condition of the Indian peasantry. Nearly three-quarters of the people are directly dependent on agriculture for their daily bread. Very much of this agriculture is dependent on the seasonal rains for its existence. Immense areas in the Bombay Presidency, Madras, the United Provinces and Central India are in a region of erratic and uncertain rainfall. The rainy season is short and if for any natural reason there is a weakness, or absence, of the rain-bearing currents, then there is either a poor harvest or no harvest at all. In Western lands everyone is acquainted with the difference between a good and a poor season, but western countries offer no parallel to India, where in an exceptionally bad year wide tracts of thickly populated land may not produce even a blade of grass. In the old days there were no railways to distribute the surplus of one part of India to the districts where the crop had failed. There were often no roads. The irrigation works were few and were themselves generally dependent on the rainfall for their reserves. The people lived from hand to mouth and had no store of food to fall back upon. Nor had they any credit. In the old days then they died. Commencing with the Orissa famine in 1865-67 the Government of India assumed responsibility for the saving of human life in such crises. After the famine of 1899-1900 this responsibility was also shouldered by the Indian States. Stage by stage this responsibility was expressed in the evolution of a remarkable system of famine relief covering the whole field. But now that machinery has reached a remarkable degree of perfection, it is rusting in the official armouries, because the conditions have changed. The whole of India is covered with a network of railways, which distributes the produce of the soil to the centres where food is required. The extension of irrigation has enormously increased the product of the soil and rendered large areas much less dependent on the monsoon rainfall. At the same time the scientific study of the problems of Indian agriculture has raised the capacity of even the "dry" zones. The peasantry has accumulated a certain reserve against the rainless days from the prosperity which accompanied the period of high prices. The rapid spread of the co-operative credit movement has mobilised and strengthened rural credit. The spread of manufacturing enterprise has

lightened the pressure on the soil. The relation of famine to the question of Indian administration has therefore changed. In an exceptionally bad year it may create administrative difficulties; it has ceased to be an administrative and social problem.

Famine under Native Rule.

Famines were frequent under Native rule, and frightful when they came. "In 1630," says Sir William Hunter, in the History of British India, "a calamity fell upon Gujarat which enables us to realise the terrible meaning of the word famine in India under Native rule. Whole cities and districts were left bare of inhabitants." In 1631 a Dutch merchant reported that only eleven of the 260 families at Swally survived. He found the road thence to Surat covered with bodies decaying on the highway where they died, there being none to bury them. In Surat, that great and crowded city, he could hardly see any living persons, but "the corpses at the corner of the streets lie twenty together, nobody burying them. Thirty thousand had perished in the town alone. Pestilence followed famine." Further historical evidence was adduced by Sir Theodore Morrison in his volume on the Economic Transition of India. It has come to be seen that whilst railways have checked the old-fashioned practice of storing grain in the villages they have made the reserves, where they exist, available for the whole of India. In India there is now no such thing as a food famine; the country always produces enough food for the whole of the population; famine when it comes is a money famine and the task of the State is confined to providing the means for those affected by drought to earn enough to buy food. The machinery whereby this is done will be examined after we have seen the experiences through which it was evolved.

History of Recent Famines.

The Orissa famine of 1865-67 may be taken as the starting point because that induced to first great and organised effort to combat distress through State agency. It affected 180,000 square miles and 47,500,000 people. The Bengal Government was a little slow in appreciating the need for action, but later food was poured into the district in prodigious quantities. Thirty-five million units were relieved (a unit is one person supported for one day) at a cost of 95 lakhs. The mortality was very heavy, and it is estimated that a million people or one-third of the population, died in Orissa alone. This was followed by the Madras famine of 1866, and the famine in Western India of 1868-70. The latter famine introduced India to the great migration from Marwar which was such a distinguishing feature of the famine of 1899-1900; it is estimated that out of a total population of a million and a half in Marwar, one million emigrated. There was famine in Behar in 1873-74, then came the great

South Indian Famine of 1876-78. This affected Madras, Mysore, Hyderabad and Bombay for two years and in the second year extended to parts of the Central and United Provinces and to a small tract in the Punjab. The total area affected was 257,000 square miles and the population 58,500,000. Warned by the excessive expenditure in Behar and actuated by the desire to secure economy the Government relief programme was not entirely successful. The excess mortality in this famine is said to have been 5,250,000 in British territory alone. Throughout British India 700,000,000 units were relieved at a cost of Rs. 8½ crores. Charitable contributions from Great Britain and the Colonies aggregated Rs. 84 lakhs.

The Famine Codes.

The experiences of this famine showed the necessity of placing relief on an organised basis. The first great Famine Commission which sat under the presidency of Sir Richard Strachey, elaborated the Famine Codes, which amended to meet later experience, form the basis of the famine relief system to-day. They recommended (1) that employment should be given on the relief works to the able-bodied, at a wage sufficient for support, on the condition of performing a suitable task; and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land-owning classes should be assisted by loans, and by general suspensions of revenue in proportion to the crop failure. In sending a Famine Code to the provincial governments, the Government of India laid down as the cardinal feature of their policy that the famine wage "is the lowest amount sufficient to maintain health under given circumstances. Whilst the duty of Government is to save life, it is not bound to maintain the labouring population at its normal level of comfort." Provincial codes were drawn up, and were tested by the famine of 1896-97. In that 307,000 square miles were affected, with a population of 69,500,000. The numbers relieved exceeded 4,000,000 at the time of greatest distress. The cost of famine relief was Rs. 7½ crores, revenue was remitted to the extent of Rs. 1½ crore, and loans given aggregating Rs. 1½ crore. The charitable relief fund amounted to about Rs. 1½ crore, of which Rs. 1½ crore was subscribed in the United Kingdom. The actual famine mortality in British India was estimated at 750,000. The experiences of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, comparable with it in severity, and that the expense was moderate. But before the Local Governments had been given time to digest the proposals of this Commission or the people to recover from the shock, the great famine of 1899-1900 supervened.

The Famine of 1899-1900.

This famine affected 475,000 square miles with population of 59,500,000. In the Central

Provinces, Berar, Bombay, Ajmer, and the Hisar district of the Punjab famine was acute: it was intense in Rajputana, Baroda, Central India, Hyderabad and Kathiawar. It was marked by several distinctive features. The rainfall over the whole of India was in extreme defect, being eleven inches below the mean. In several localities there was practically no rain. There was in consequence a great fodder famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train. Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be famine immune, were affected; the people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late to save life. A very large area in the Indian States was affected, and the Marwaris swept from their impoverished land right through Central India like a horde of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale. At the end of July 4,500,000 persons were supported by the State, Rs. 10 crores were spent on relief, and the total cost was estimated at Rs. 15 crores. The famine was also marked by a widespread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme responsibility of saving human life. Aided by loans to the extent of Rs. 3½ crores, the Indian States did a great deal to bring their administration into line with that in British India. Although actual deaths from starvation were insignificant, the extensive outbreaks of cholera, and the devastating epidemic of malaria which followed the advent of the rains induced a famine mortality of approximately a million. The experiences of this famine were collated by the Commission presided over by Sir Antony Macdonnell. This Commission reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines. The cardinal feature of their policy was moral strategy. Pointing out that if the people were assisted at the start they would help themselves, whilst if their condition were allowed to deteriorate it proceeded on a declining scale, they placed in the forefront of their programme the necessity of "putting heart into the people." The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans, the early suspension of revenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance, and a full enlistment of non-official help. The wage scale was revised; the minimum wage was abolished in the case of able-bodied workers; payments by results were recommended; and proposals were made for saving cattle.

The modern system.

The Government of India are now in possession of complete machinery to combat the effects of drought. In ordinary times Government is kept informed of the meteorological

conditions and the state of the crops: programmes of suitable relief works are kept up-to-date, the country is mapped into relief circles, reserves of tools and plant are stocked. If the rains fail, policy is at once declared, non-officials are enlisted, revenue suspended and loans for agricultural purposes made. Test works are then opened, and if labour in considerable quantities is attracted, they are converted into relief works on Code principles. Poor houses are opened and gratuitous relief given to the infirm. On the advent of the rains the people are moved from the large works to small works near their villages, liberal advances are made to agriculturists for the purchase of plough, cattle and seed. When the principal autumn crop is ripe, the few remaining works are gradually closed and gratuitous relief ceases. All this time the medical staff is kept in readiness to deal with cholera which so often accompanies famine, and malaria, which generally supervenes when the rains break.

Famine Protection.

Side by side with the perfection of the machinery for the relief of famine has gone the development of famine protection. The Famine Commission of 1880 stated that the best, and often the only means of securing protection from the extreme effects of famine and drought, are railways and irrigation. These are of two classes, productive and protective. Productive works being estimated to yield profits which will pay interest and sinking fund charges are met from loans; protective works, which do not pay, directly from revenue. In order to guarantee that there should be continuous progress with protective works, the Famine Insurance Grant was instituted in 1876. It was decided to set apart from the general revenues Rs. 1½ crores annually or one million sterling. The first charge on this grant is famine relief, the second protective works, the third the avoidance of debt. The chain of protective railways is now practically complete. Great progress is being made with protective irrigation. Acting on the advice of the Irrigation Commission an elaborate programme of protective irrigation works has been constructed, particularly in the Bombay Deccan—the most famine-susceptible district in India—and in the Central Provinces.

Under the Statutory Rules framed under the Government of India Act of 1919, Provincial Governments (except Burma and Assam) are required to contribute from their resources a fixed sum every year for expenditure on famine. These annual assignments can be expended on relief of famine only, the sum not required for this purpose is utilised in building up a Famine Relief Fund. The Fund provides, as its main and primary object, for expenditure on Famine Relief proper, the word "Famine" being held to cover famine due to drought or other natural calamities. The balance at the credit of the Fund is regarded as invested with the Governor-General in Council and is available for expenditure on famine, when necessary and, under certain restrictions, on protective and other works for relief of famine.

The Outlook.

Such in brief is the official programme and organisation which has been built up out of the experience and practice of the past. Yet everything goes to show that Government activity to save human life will never be wanted in the future on the colossal scale of former times, even so recently as 1899-1900. Each succeeding failure of the rains indicates that there has been in silent progress an economic revolution in India. In the year 1918 the rains failed more seriously and over a wider area than during any monsoon in the recent history of India. The deficiency in the rainfall was more marked than in the great famine of 1899. Yet such was the increased resisting power of the people that instead of a demand for State relief from over five millions, the maximum number at any time in receipt of public assistance was never so large as six hundred thousand. The shock to the social life of the community was insignificant; the effects of the drought completely disappeared with the good rains of the following year.

Increased Resisting Power.

The causes of this economic change in the conditions of India, whose influence is widespread are many. We can only briefly indicate them here. There is a much greater mobility in Indian labour. Formerly when the rains failed the ryot clung to his village until State relief in one form or another was brought almost to his doors. Now at the first sign of the failure of the rains he girds up his loins and goes in search of employment in one of the industrial centres, where the supply of labour is, when general economic conditions are normal, rarely equal to the demand, or on the constructional works which are always in progress either through State or private agency in the country. Then the ryot generally commands some store of value, often mustered a hoard. The balance of exports in favour of India in normal times is approximately £50 millions a year. The gold and silver bullion in which this is largely liquidated is distributed all over the country, in small sums or in ornaments, which can be drawn upon in an emergency. The prodigious coining of rupees during the last two years of the war, and the continuous absorption of gold by India, represent small diffused savings, which take this form owing to the absence of banking institutions and lack of confidence in the banking system. There has been a large extension of irrigation. More than one-third of the land in the Punjab is now under irrigation, and in other Provinces, particularly in the famine-susceptible tracts of the Bombay Deccan, irrigation works have been constructed, which break the shock of a failure of the rains. The natural growth of the population was for some years reduced by plague and famine diseases, followed by the great influenza epidemic of 1918-19, which swept off five millions of people. This prevented the increase of congestion, but brought some areas particularly in the Indian States, below their former population-supporting capacity. (The 1931 census showed an increase of over 30 million in the population since 1921.) The increase of railways distributes the resources of the country with ease; the spread

of the co-operative credit movement has improved rural credit. Finally, there is the considerable development of manufacturing industry, which is generally short of labour and helps to absorb the surplus of a famine year. Whilst the Government is completely equipped with a famine code, there is no reason to suppose that there will ever recur such an emergency as that of 1899. Famine can now be efficiently met by the liberal distribution of tagavi, the suspension and remission of the land revenue demand, the relief of the aged and others who cannot work, the provision of cheap fodder for the cattle, with possibly some assistance in transporting the affected population of the famine-affected tract to the industrial centres.

The increased resisting power of the people was effectively demonstrated during the famine of 1920-21, which was due to the failure of the monsoon towards the end of the year 1920. The distress which appeared in the end of 1920 persisted during the early months of 1921 and regular famine was declared in parts of Madras, Bombay, Central Provinces and Baluchistan. Local distress prevailed also in Bengal, Punjab and Central India. The largest number of persons on relief of all kinds did not exceed 0.45 million which was considerably less than 3% of the total population of the area affected by the failure of the monsoon.

The Indian People's Famine Trust.

Outside the Government programme there is always scope for private philanthropy, especially in the provision of clothes, help for the superior class poor who cannot accept Government aid, and in assisting in the rehabilitation of the cultivators when the rains break. At every great famine large sums have been subscribed, particularly in the United Kingdom, for this purpose, and in 1899-1900 the people of the United States gave generous help. With the idea of providing a permanent famine fund, the Maharaja of Jaipur gave in 1900 a sum of Rs. 15 lakhs, in Government securities to be held in trust for the purposes of charitable relief in seasons of general distress.

This Trust Fund in a few years increased to Rs. 28,10,000. During 1934 it increased further to Rs. 32,59,600 the invested balances of the United Provinces Famine Orphans' fund being transferred to the Trust. It is officially called the Indian People's Famine Trust, and was constituted under the Charitable Endowment Act, 1890. The income of the Trust is administered by a board of management consisting of 13 members appointed from different provinces and Indian States, Sir Ernest Burdon, K.C.I.E., C.S.J., I.C.S., Auditor-General in India, is the

Secretary & Treasurer of the Trust. The endowment of Rs. 32,59,600 above mentioned is permanently invested and the principal never taken for expenditure. The income from it is utilised for relief work as necessary and unexpended balances are temporarily invested, so as to make available in years of trouble savings accumulated when expenditure is not necessary. The temporary investments—in Government Securities—at the end of 1935 stood at Rs. 3,144-0-0 and the cash balance at the same time was Rs. 23,549-10-8, so that the total available for expenditure at the commencement of 1936 was Rs. 26,70-10-8.

The whole conditions to meet which the Trust was founded have changed in recent years. This is the result of the improved policy of Government in regard to famine relief and of the difference in the meaning of the word famine in consequence of the improvement of transport communications and other factors affected by modern progress. An area stricken by failure of seasonal rains now obtains supplies from other regions in a manner impossible before the development of railways and of modern marketing practice and Government help its people by loans given direct or through Co-operative Societies to tide them over the period of scarcity. The experience of successive visitations of scarcity in different parts of the country also proves that the general economic progress of the people makes them able to meet temporary periods of stress in a manner formerly unimaginable. Famine in the old terrible sense of the term has in fact ceased to occur. This was well illustrated by the events of 1919, when the land suffered from a failure of the rains more general throughout India and worse in degree than any previously recorded by the Meteorological Department but the crisis was borne with a minimum of suffering. The demands upon the Famine Trust have consequently so greatly diminished in their original sense that hardly any money is now distributed from it for the relief of famine in the proper sense of the word, resulting from rain failure and expenditure has mainly become grants of assistance to sufferers from floods. The total expenditure upon real famine in the old sense was only Rs. 50,000 during the year 1929, while expenditure on relief of distress caused by floods was Rs. 4,75,000 in the same year. The terms of the Trust fortunately, permit of management on lines according with modern needs.

In 1931 a grant of Rs. 8 lakhs was given for the relief and distress caused by the great Earthquake in Bihar & Orissa and in 1935 a grant of Rs. 50,000 was given to the Quetta Earthquake Relief operations.

Hydro-Electric Development.

India promises to be one of the leading countries of the world in regard to the development of hydro-electric power and great strides in this direction have already been made. India not only specially lends itself to projects of the kind, but peremptorily demands them. Cheap motive power is one of the secrets of successful industrial development and the favourable initial conditions caused by the war, the enthusiasm for industrial development which has seized nearly all classes of educated Indians, and the special attention which the circumstances of the war have compelled Government to direct towards the scientific utilisation of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years. Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way. India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil. These commodities are all difficult to obtain, and costly in India except in a few favoured areas. Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy. Water power and its transmission by electricity offer, on the other hand, immense possibilities, both as regards the quantity available and the cheapness at which the power can be rendered, in all parts of India.

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year. Perennial rivers with sufficient water throughout the year are practically non-existent in India. Water, therefore, must be stored for use during the dry season. Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfalls occur and the progress already made in utilising such opportunities by the electrical transmission of power affords high encouragement for the future. Further, hydro-electric schemes can frequently be associated with important irrigation projects, the water being first used to drive the turbines at the generating stations, and then distributed over the fields.

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India. On this recommendation the Government of India in 1918 appointed the late Mr. G. T. Barlow, C.I.E., then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr. J. W. Meares, M.I.C.E., Electrical Adviser to the Government of India. Mr. Barlow died, but Mr. Meares issued a preliminary report in September, 1919, summarising the state of knowledge of the problem in India and outlining a programme of investigation to be undertaken in the course of the inquiry. Mr. Meares showed that industries in India absorbed over a million horse

power, of which only some 285,000 h. p. is supplied by electricity from steam, oil or water the water power so far actually in sight amounts to 1½ million horse-power, but this excludes practically all the great rivers, which are at present uninvestigated. Thus the minimum flow of the seven great rivers eastward from the Indus is stated to be capable of giving not less than three million horse-power for every thousand feet of fall from the Himalayas, while similar considerations apply to rivers in other parts. Some doubt is expressed as to the estimate of seven million horse-power in the Irrawaddy and Chindwin rivers, given in the report of the London Conjoint Board of Scientific Studies.

The Report points out that the Bombay Presidency holds a unique position owing to its great existing and projected schemes at Lonavla, the Andhra Valley, the Nila Mula and the Koyna Valley and has the still greater advantage of possessing a firm ready to develop its resources.

Bombay Hydro-Electric Works.

The greatest Hydro-Electric undertakings in India are the three schemes developed and brought into operation by Tata Sons, Ltd. and continued under their management until 1929, when they were transferred to the management of the Tata Hydro Electric Agencies, Ltd., in which Messrs. Tata Sons retained a substantial interest. These undertakings are—

- (a) The Tata Hydro Electric Power Supply Company, Ltd. . . . Started in 1915.
- (b) The Andhra Valley Electric Power Supply Company, Ltd. . . . , 1922.
- (c) The Tata Power Company, Ltd. . . . , 1927.

These Hydro Electric schemes have a combined normal capacity of 246,000 H.P. and provide electrical energy for the City of Bombay, Bombay suburbs, Thana, Kalyan and Greater Poona.

Bombay, after London, is the second largest City in the British Empire and is the largest manufacturing centre in India. Its population including suburbs at the 1931 census was 1,326,813 with a total population of approximately 1,600,000 in all of the areas served by these companies. Its cotton mills and other factories consume about 150,000 H.P., which until these Hydro Electric schemes came into operation, was entirely produced by thermal stations using fuel coming from great distances.

The favourable position of the Western Ghats which rise to a height of more than 2,000 feet above sea-level within a few miles of Bombay City, situated on the shores of the Arabian sea with their heavy rainfalls was taken full advantage of for providing Bombay City and vicinity with an adequate and economical power supply.

The hydraulic works of the Tata Hydro Electric Power Supply Company are situated near Lonavla at the top of the Bhore Ghats. The monsoon rainfall is stored in three lakes, namely, Lonavla, Walwan and Shrawta, from which it is conveyed in open masonry canals to the Forebay at Khandala and thence through steel pipes to the Power House at Khopoli at the foot of the Ghats, where the head at turbine nozzles is 1,750 feet or approximately 750 lbs per sq inch. The normal capacity of the Power Station at Khopoli is 48,000 KW or 64,300 H.P. This scheme was formally opened by H E The Governor of Bombay on the 8th of February 1915.

Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the North of the Tata Hydro Electric Supply Company's lakes, where an additional 48,000 KW (or 64,300 H.P.) could be developed. These investigations resulted in the formation of the Andhra Valley Power Supply Co and the construction of the schemes, the principal features of which consist of a reservoir formed by a dam about 190 feet high, across the Andhra River and a tunnel 8,700 feet long driven through solid trap rock to the scarp of the Ghats, from which the water is taken in steel pipes 4,600 feet long to the turbines in the generating station at Bhivpuri. The head of water at turbine nozzles is 1,750 feet or approximately 750 lbs. per sq inch. The electrical energy is transmitted to Bombay over a transmission line 56 miles long for augmenting the supply from Khopoli.

The Tata Power Company's scheme on the Nila-Mula River to the South-East of Bombay was investigated and developed along lines similar to the Andhra Valley scheme and has a normal installed capacity of 87,500 KW or 117,000 H.P. The power is transmitted to Bombay over a transmission line 76 miles long and is used to augment the supply of the two earlier companies to mills, factories and railways.

The Tata Hydro Electric Power Supply Co. The Andhra Valley Power Supply Co. and the Tata Power Company operating as a unit under one management supply the whole of the electrical energy required by the Bombay Electric Supply & Tramways Co. Ltd., the majority of the mills and industries in Bombay City, the B. & C. I. Railway for their suburban electrification the whole of the energy required by the G. I. P. Railway in Bombay City and for their main line traction up to Kalyan, the whole of the electrical energy required by the Poona Electric Supply Company and the distributing licensees in Thana, Kalyan and the Bombay suburbs.

These three schemes operating as a unit under one management provide an adequate and economical power supply in the areas mentioned above for all purposes. The rate for energy delivered to the Mills, Factories and Railways has, for several years, shown a steady decrease and now averages 0.61 of an anna per unit, which downward trend will continue as industries develop and individual consumptions increase.

This power supply greatly enhances the natural advantages Bombay has as a great manufacturing, trading and shipping centre.

The fact that the Bombay Electric Supply and Tramways Company has shut down its steam-driven generating plant and now takes its supply in bulk from the various Tata companies is of note, and it is of more than passing interest to note that the Poona Electric Supply Company has recently adopted a similar course. This is a phase of hydro-electric distribution which is quite in its infancy in India, but it is possible to foresee the time when every village within a couple of hundred miles of a hydro-electric power station will receive its supply of electric current in bulk, thus greatly reducing capital and administrative charges and minimising the price of current to the consumer. It is a system which has become something of a fine art in California, where current is transmitted by overhead wires for many hundreds of miles at a pressure of 200,000 volts or double the pressure commonly employed in India for overhead long-distance transmission.

Mysore Hydro Electric Works.

The first Hydro Electric Scheme of any magnitude undertaken in India or indeed in the East, was that on the Cauvery River in Mysore State, which with its generating station, transmission line and distributing system was inaugurated in 1902.

The Cauvery River rises in the district of Coorg in the Western Ghats and flows across Mysore State. The principal object of this scheme was the supply of power to the Mining companies on the Colar Gold Field, about 92 miles from Sivasamudram, the site of the generating station. This transmission line was for a number of years the longest line in Asia. Since 1902 the supply of electrical energy from Sivasamudram has been provided for Bangalore and Mysore cities and about 200 other towns and villages in the South-Eastern Half of the State.

The initial undertaking has constantly been expanded so that its total capacity now stands at 46,000 H.P. This is the maximum obtainable from the water available. This great increase has been made possible by the construction of the Krishnarajasagar reservoir near Mysore City, which has a capacity of 44,000 million cubic feet of storage above the minimum draw off.

The number of the consumers of all classes continues to increase rapidly every year with greatly increased demands. The Government of Mysore have encouraged this growth in the use of electrical energy and have made a survey of Hydro Power resources of the State and prepared plans for the construction of a second generating station at the most economical site.

The more important sites where a Hydro Electric power station can be constructed are Mekadatu, the Shimshaw Falls, the Krishnarajasagar and the Jog Falls (the Gersoppa Falls). These power sites provide Mysore State with ample hydro power resources to meet the requirements of the State for a long time to come.

Works in Madras.

The Pykara Hydro-Electric Scheme an undertaking of the Madras Government, was commenced at the end of 1929, the first stage of the project being completed at the end of 1932. The waters utilised for the development of the scheme are taken from the Pykara river which drains from the Nilgiri Plateau having a catchment area of nearly 42 sq. miles. The average rainfall in the area is 110 in. per annum, the rainfall varying considerably at various points.

The natural head available exceeds 4,000 ft. which is higher than any other in the British Empire of America. A number of suitable reservoir sites are available with a total capacity of about 3,000,000,000 cubic ft., which will be utilised as required by the loadgrowth. With full storage, 90,000 H.P. can be developed in addition to the 30,000 H.P. from the tail water at a lower site where a further drop of 1,000 ft. can be obtained.

The present head utilised is only 3,080 ft., developing a maximum of 22,000 H.P. A large forebay of 58,000,000 cubic ft. capacity and another reservoir of 26,000,000 cubic feet provide the requisite storage. Water from the intake of the river is led by a flume to the forebay from whence it is led through a single steel pipe to a surge pipe at the head of the penstock consisting of two pipes, each in three sections of 27 in., 24 in., and 21 in. in diameter and 9,100 ft. in length.

Three sets of direct coupled turbo-generators of 10,900 H.P. each generate 3 phase, 50 cycles, 11,000 volts, which is taken through 110/66/11 K.V., 7,810 K.V.A. transformers and switchgear in the yard of the generating station, and transmitted to the receiving station at Combarator 50 miles away by a double circuit transmission line.

The engineering features of the Mettur Hydro Electric Scheme provide an interesting contrast to the Pykara Hydro Electric Scheme now in operation. The Mettur (Stanley) Dam, one of the largest structures of its kind in the world, is 176 feet high and can impound a total of 93,500 million cubic feet of water. This storage is primarily for irrigation purposes, but the water let down for irrigation is also to be utilised to the best advantage for the generation of hydro-electric power.

During the construction of the dam four pipes 8.6 feet in diameter were built into the structure and equipped with the necessary valves, gates, screens, and other fittings. The function of these pipes was for surplussing from the reservoir during the latter part of the construction period, and for power generation afterwards. Each of these pipes represent about 15,000 horse-power awaiting development. Each pipe is designed to discharge a maximum of 1,250 cusecs for power purposes.

The operating head will vary from 160 feet at full reservoir level to a normal minimum of 80 feet. The average head will be 135 feet. Under such water conditions a minimum demand of 19,200 or 7,680 H.P. continuously may be met without the assistance of other plants.

It is proposed to instal four double horizontal Francis turbo-generator sets of 15,000 horse-power each, one of which will be spare. Only two units are to be provided at first, the third will be added in the third, and the fourth in the seventh year of operation, should load conditions justify the additional generating capacity.

The original scheme included four single vertical units of 13,000 horse-power each but the Consulting Engineers to the Secretary of State for India preferred the arrangement outlined above and then recommendation was adopted. The plant when completed will thus be capable of a maximum output of 60,000 horse-power.

The generators will operate at 11,000 volts, 50 cycles, having a normal rating of 12,500 K.V.A. each. They will be specially designed for transmitting power eventually to Madras.

Works in Kashmir.

A scheme of much importance from its size, but more interesting because of the developments that may be expected from it than for the part which its current supply already plays in the life of the countryside, is one installed a few years ago by the Kashmir Durbar, utilising the River Jhelum, near Baramulla, which lies thirty-four miles north-west of Srinagar. The head works of the Jhelum power installation are situated six and a half miles from the power house and the main connection between the two is a great timber flume. These works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the generation of 20,000 electrical horse power. Four pipes 600 feet long lead from the forebay to the power house, and from forebay to water-wheel there is an effective head of 395 feet. There are four vertical waterwheels, each coupled on the same shaft to a 1,000 k.w., 3-phase, 2,300 volt, 25-period generator running at 500 r.p.m., and each unit is capable of taking a 25 per cent. overload, which the generator end is guaranteed to maintain with safety for two hours. The power house is of sufficient capacity to allow of 15,000 k.w. generating plant being installed within it. Two transmission lines run side by side as far as Baramulla, 21 miles distant, at which point one terminates. The other continues to Srinagar, a further 34 miles. The installation at Baramulla was originally utilised for three floating dredgers and two floating derricks, for dredging the river and draining the swampy countryside and rendering it available for cultivation. The lighting of Baramulla has been taken in hand with satisfactory results and it is expected that the lighting demand will rapidly increase and that a small demand for power will soon spring up. At Srinagar, the line terminates at the State silk factory, where current is supplied not only for driving machinery and for lighting, but for heating. The greater part of Srinagar city is now electrically lighted.

Recent Progress.

Apart from the development of the projects outlined above, the past few years have witnessed comparatively little progress in hydro-electric

works. The Mandi Project in the Punjab, which utilises the water of the Uhi river for the generation of power with which a large number of towns in that province will be electrified came into operation in 1933. The scheme has been formulated in three stages. The first is to develop 48,000 horse-power from the ordinary discharge of the river; the second involves the formation of a storage reservoir by the construction of a dam and would double the electrical output; whilst the third would utilize the same water several miles down-stream and provide an additional 64,000 horse power. Another interesting project is the hydro-electric grid scheme in the United Provinces which will carry electric power to a large number of towns and villages and will, it is anticipated, assist greatly in the development of rural areas.

A small plant was completed and put into operation at Naini Tal during 1923, and the erection of another small plant was commenced at Shillong, but otherwise there is nothing to record. It is interesting to note, however, that preliminary investigations are proceeding with a view to the erection of hydro-electric plants in various parts of India. In the tea districts of Kalimpong and Kurseong, for example, it is proposed to harness a promising water-power site and to supply current to an important area in which are situated more than two hundred tea factories.

The Sutlej Hydro-Electric Project, at one time appeared to be one of the most promising propositions in the country, but owing to financial considerations it has now been indefinitely shelved.

Local Self-Government.

A field of the administration of India profoundly affected by the Reforms of 1919 is that of local government. This is one of the subjects transferred to Indian ministers, and under their leadership considerable developments have been essayed. On the whole, the progress of local government in India for the past quarter of a century has been disappointing. The greatest successes have been won in the Presidency towns, and particularly by the Municipality of Bombay. The difficulties in the way of progress were manifest. Local government had to be a creation—the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration. Again, the powers entrusted to local bodies were insignificant and the financial support was small. There are however many indications that the dry bones of the moribund are stirring.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from the villages are built up the larger administrative titles—*tahsils*, sub-divisions, and districts.

"The typical Indian village has its central residential site, with an open space for a pond and a cattle stand. Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood-cutting. . . The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a little community with its own organisation and government, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, *e.g.*, in the greater part of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads."—(*Gazetteer of India*.)

The villages above described fall under two main classes, *viz.*—

Types of Villages.—“(1) The ‘severalty’ or *raiyatwari* village which is the prevalent form outside Northern India. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers, though some of the non-cultivated lands may be set apart for a common purpose, such as grazing, and waste land may be brought under the plough only with the permission of the Revenue authorities, and on payment of assessment. The village government vests in a hereditary headman, known by an old vernacular name, such as *patel* or *reddi*, who is responsible for law and order, and for the collection of the Government revenue. He represents the primitive headship of the tribe or clan by which the village was originally settled.”

“(2) The joint or landlord village, the type prevalent in the United Provinces, the Punjab and the Frontier Province. Here the revenue was formerly assessed on the village as a whole,

its incidence being distributed by the body of superior proprietors, and a certain amount of collective responsibility still, as a rule, remains. The village site is owned by the proprietary body, who allow residences to the tenantry, artisans, traders and others. The waste land is allotted to the village, and, if wanted for cultivation, is partitioned among the shareholders. The village government was originally by the *punchayet* or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities; but the artificial character of this appointment, as compared with that which obtains in a *raiyatwari* village is evidenced by the title of its holder, which is generally *lanbardar*, a vernacular derivative from the English word ‘number.’ It is this type of village to which the well-known description in Sir H. Maine’s *Village Communities* is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants of labourers under them.”

Village Autonomy.—The Indian villages formerly possessed a large degree of local autonomy, since the native dynasties and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now disappeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the increase of communications, the growth of individualism, and the operation of the individual *raiyatwari* system, which is extending even in the north of India. Nevertheless, the village remains the first unit of administration; the principal village functionaries—the headman, the accountant, and the village watchman—are largely utilised and paid by Government, and there is still a certain amount of common village feeling and interests.

Punchayets.—For some years there was an active propaganda in favour of reviving the village council-tribunal, or *Punchayet*, and the Decentralisation Commission of 1908 made the following special recommendations:—

“While, therefore, we desire the development of a *punchayet* system, and consider that the objections urged thereto are far from insurmountable we recognise that such a system can only be gradually and tentatively applied, and that it is impossible to suggest any uniform and definite method of procedure. We think that a commencement should be made by giving certain limited powers to *Punchayets* in those villages in which circumstances are most favourable by reason of homogeneity, natural intelligence, and freedom from internal feuds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages. Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination between the circumstances of different villages:

and there is a considerable consensus of opinion that this new departure should be made under the special guidance of sympathetic officers."

This is, however, still mainly a question of future possibilities, and for present purposes it is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too early to say what *lie they have*. The Punjab Government has passed a Village Panchayat Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judicial power, both civil and criminal of a minor character, may be assigned. In Bihar a Village Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases. Other Governments are taking steps in the same direction.

Municipalities.—The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts, a large number of municipalities were founded in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self-government, these Acts did not proceed far. It was not until after 1870 that much progress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, medical, charity, and local public works. New Municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced. In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government. Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of municipal bodies, a wide extension being given to the elective system, while independence and responsibility were conferred on the committees of many towns by permitting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility, some items of provincial revenue being allotted to and capable of development under local management being transferred, with a proportionate amount of provincial expenditure, for local objects. The general principles thus laid down have continued to govern the administration of municipalities down to the present day.

The Present Position—There are some 781 municipalities in British India, with something over 21 million people resident within their

limits. Of these municipalities, roughly 710 have a population of less than 50,000 persons, and the remainder a population of 50,000 and over. As compared with the total population of particular provinces, the proportion resident within municipal limits is largest in Bombay, where it amounts to 20 per cent., and is smallest in Assam where it amounts to only 2 per cent. In other provinces it varies from 4 to 9 per cent. of the total population. Turning to the composition of the municipalities, considerably more than half of the total members are elected and there is a steady tendency to increase this proportion. Ex-officio members are only 7 per cent. and nominated 25 per cent. Elected members are almost everywhere in a majority. Taking all municipalities together, the non-officials outnumber the officials by nearly six to one. The functions of municipalities are classed under the heads of Public Safety, Health, Convenience and Instruction. For the discharge of these responsibilities, there is a municipal income of Rs. 14.03 crores derived principally from taxation, just over one-third coming from municipal property, contributions from provincial revenues and miscellaneous sources. Generally speaking, the income of municipalities is small, the four cities of Calcutta, Bombay, Madras and Rangoon together providing over 40 per cent. of the total. The heaviest items of this expenditure come under the heads of "Conservancy" and "Public Works" which amount to 14 per cent. and 13 per cent. respectively, "Water-supply" comes to 13 per cent., "Drainage" to 4 per cent. and "Education" to over 11 per cent. In some localities the expenditure on education is considerably in excess of the average. In the Bombay Presidency, excluding Bombay City, for example, the expenditure on education amounts to more than 21 per cent. of the total funds, while in the Central Provinces and Berar it is over 17 per cent.

District Boards.—The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards. In almost every district of British India save in the province of Assam, there is a board subordinate to which are two or more sub-district boards; while in Bengal, Madras and Bihar and Orissa, there are also Union Committees. Throughout India at large there are some 207 district boards with 584 sub-district boards besides 455 Union Panchayats in Madras. This machinery has jurisdiction over a population which was over 221 millions in 1930-31. Leaving aside the Union Committees and Union Boards or Panchayats the members of the Boards numbered over 16,000 in 1930-31, of whom 73 per cent. were elected. As in the case of municipalities the tendency has been throughout India to increase the elected members at the expense of the nominated and the official members. The Boards are practically manned by Indians, who constitute 96 per cent. of the whole membership. Only 11 per cent. of the total members of all boards are officials of any kind. The total income of the Boards in 1930-31 amounted to Rs. 16.57 crores, the average income of each board being Rs. 2,00,000. The most important item of revenue is provincial rates, which represent a proportion of the total

income varying from 25 per cent. in Bombay and in the N. W. F. Province to 63 per cent. in Bihar and Orissa. The principal objects of expenditure are education which has come remarkably to the front within the last three years and civil works such as roads and bridges. Medical relief is also sharing with education though in a less degree the lion's share of the available revenue.

Improvement Trust.—A notable feature in the recent sanitary history of India is the activity played by the great cities in the direction of social improvements. In Bombay and Calcutta the Improvement Trusts developed important activities which are described in a separate chapter (q.v.). In Bombay the work of the Improvement Trust is carried forward by the Bombay Development Directorate. Other cities are beginning to follow the examples of these great cities and Improvement Trusts were constituted in Cawnpore, Lucknow and Allahabad in the United Provinces and in several of the larger cities of the Provinces of India. Their activities were, however, severely curtailed by the financial stress.

Provincial Progress.—There was passed in Bengal in 1919 a Village Self-Government Act embodying the policy of constituting Union Boards at the earliest possible date for groups of villages throughout the province. The number of these boards continues to increase, rising from 1,500 to more than 2,000. In 1930-31 the number of Union Boards rose to 4,510. There are also 12 Union Committees. Though they are in their infancy as yet, many of them show a remarkable aptitude for managing their own affairs.

In *Bombay* the development of village self-government is also proceeding, as the result of an Act for constituting, or increasing the power of village committees which was passed in 1920 by the Legislative Council. In this presidency, some 145 out of 155 municipalities had a two-thirds elected majority of councillors in the year 1930-31; and a distinct step forward has been projected by the administration in the direction of liberalizing the constitution of all municipal bodies. The policy of appointing a non-official president has been extended both to district and sub-district boards, and a large number of non-officials have also been appointed presidents of sub-districts (taluka) boards. In *Madras* also the institutions of local self-government continued to progress in an encouraging manner. The number of district boards in the Presidency in 1931 was 25 with 1,005 members. The number of sub-district boards was 130. The total number of Municipal Councils during the year 1930-31 continued to be 81 and the proportion of Indian to European and Anglo-Indian members further increased. In 1930-31 there were 54 municipal councils, consisting entirely of Indian members, as against 61 in the previous year. The average imposition of taxation per head of population is still very low, being only about Rs 2-8

In the *United Provinces* the new District Boards, which consist of non-official members only with elected non-official Chairman, were plunged straight-way into financial difficulties. In some cases the necessity for retrenchment was immediate, resulting in the curtailment of medical relief and of allotments for the ordinary repairs of roads. Additional taxation has so far not been generally imposed and the Boards are still suffering from inexperience in husbanding public money and obtaining the full value for their expenditure. In the case of Municipal Finances, there has been some change for the better. The new municipalities have shown a great interest in all forms of civic activity but they are still hampered in their work by political and communal obsessions. They are reluctant to impose new taxation but a considerable programme of expenditure lies before them.

In the *Punjab* municipal administration continued to show improvement, the general attitude of the members in regard to their responsibilities being promising for progress in the future. Generally speaking the finances are in a more satisfactory position than was the case in previous years. Expenditure on water-supply schemes is steadily increasing.

In the *Central Provinces*, the year 1920 witnessed the passing of a Local Self-Government Act intended to guide into proper channels the undoubtedly growing interest in public matters. The continued reduction of official members and chairman, and the wider powers of control given to local bodies have been an incentive to the development of local self-government, leading to an increased sense of public duty and responsibility. Another very important measure regulating municipalities was passed into law in 1922. Its chief features are the extension of the Municipal franchise, the reduction of official and nominated members, the extension of the powers of Municipal Committees and the relaxation of official control.

In the *North-West Frontier Province*, the institution of local self-government is somewhat of a foreign growth. Certain of the municipal committees are still lax in the discharge of their responsibilities, and meetings are reported to be infrequent, but the attendance of non-official members is gradually increasing. Concerning Municipal administration the Local Government reports that the members continue to take a very great interest in their duties and that their attitude towards the responsibility is imposed upon them is on the whole satisfactory. Communal feeling shows itself in certain localities; but is in many instances off-set by the public spirit and initiative of individual members and there are considerable symptoms of advance in independence of action and in the smooth working of the Committees. An important extension of the elective principle has recently been made and it is hoped that this is proving a success.

Calcutta Improvement Trust.

The Calcutta Improvement Trust was instituted by Government in January, 1912, with a view to making provision for the improvement and expansion of Calcutta by opening up congested areas, laying out or altering streets, providing open spaces for purposes of ventilation or recreation, demolishing or constructing buildings and re-housing the poorer and working classes displaced by the execution of improvement schemes.

The origin of the Calcutta Improvement Trust must, as in the case of the corresponding Bombay body, upon which the Calcutta Trust was to a large extent modelled, be looked for in a medical enquiry which was instituted into the sanitary condition of the town in 1896, owing to the outbreak of plague. It was estimated that the Trust might in the ensuing 30 years have to provide for the housing of 225,000 persons. The population of Calcutta proper, which includes all the most crowded areas, was 649,995 in 1891, and increased to 801,251, or by 25 per cent., by 1901. The corresponding figure according to the 1921 Census was 993,508 and this had increased by 1931 to 1,196,734.

The problem of expansion was difficult, because of the peculiar situation of Calcutta, which is shut in on one side by the Hooghly and on the other by the Salt Lakes.

Preliminary investigations continued for several years, so that it was only in 1910 that legislation was eventually introduced in the provincial legislature and the Trust instituted by it. The Bill provided for a large expenditure on improvement schemes and the provision of open spaces and for special local taxation to this end. It also provided for the appointment of a whole-time chairman of the Board of Trustees and the membership of the Trust was fixed at eleven.

The following constituted the Board of Trustees at 31st March 1934 :—Mr. J. A. L. Swan, C.S.I., C.I.E., I.C.S., Chairman; Mr. Mukherjee, Bar-at-Law, Chief Executive Officer, Calcutta Corporation (*ex-officio*), Mr. S. C. Ghosh, elected by the Corporation of Calcutta under Section 7 (1) (a) of the Calcutta Improvement Act, 1911; Mr. Prabhudayal Himatsingh, elected by the elected Councillors, Corporation of Calcutta, under Section 7 (1) (b) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. Charu Chandra Biswas, C.I.E., elected by Councillors other than elected Councillors of the Corporation of Calcutta, under Section 7 (1) (c) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. W. H. Thompson, elected by the Bengal Chamber of Commerce; Sir Hari Sankar Paul, Kt., elected by the Bengal National Chamber of Commerce; Mr. Unsud Dowla, Sir Badridas Goenka, Kt., C.I.E., Rai Bahadur Dr. Haridhan Dutt,

Mr. A. J. Thompson, A.R.I.B.A., appointed by the Local Government.

During the 22 years that it has now been at work, the Trust have decided, and partly or entirely carried through, many improvement schemes for opening up congested areas, laying out or widening streets and providing open spaces.

In Central Calcutta many highly insanitary *bustees* have been done away with and several roads of an improved type laid out, the most important of which is the Chittaranjan Avenue, 100 ft. wide, which at present extends from Beadon Street to Chowringhee, Shambazar. It is intended ultimately to extend it up to the Chitpur Bridge. But at present there is no direct connexion between Chitpur Bridge and the Barrackpore Trunk Road, as Lockgate Road has been severed by the sidings of the Eastern Bengal Railway. In these circumstances the Board considered that traffic would be better served by postponing the extension to Chitpur Bridge and constructing a road to Shambazar which is the terminus of the Barrackpore Trunk Road and of the Dum-Dum-Jessore Road. A scheme known as Scheme No. XXXVII has been sanctioned by Government under Section 48 of the Calcutta Improvement Act which provides *inter alia* for the extension of Chittaranjan Avenue up to Raja Rajballab Street and for the construction of a new 84 feet new road connecting it with Cornwalls Street. The Section of Chittaranjan Avenue near the Chowringhee end is well placed for commerce and trade and is likely before long to gain increased importance by being linked up with Dalhousie Square on the West by means of a new road 84 feet wide which the Trust propose to construct between Mission Row and Mangoe Lane. A further extension of this road from Chittaranjan Avenue to Wellington Street on the east was sanctioned by Government after the close of the year.

In the north of the City, two large and thirteen small parks have been constructed in different quarters. Of the two large parks one is named Deshabandhu Park and the other Cossipore-Chitpore open space measuring 53 bighas and 156 bighas respectively. The Cossipore-Chitpore Park has a small artificial lake and the layout of the area surrounding the lake has been completed. Four football grounds have been provided for schools and clubs of North Calcutta. Some tennis courts are also being made. The Deshabandhu Park has also been provided with play-grounds. Several wide roads have been driven through this highly congested area. The approaches to the City have also been adequately widened.

Some progress has also been made with that highly congested area to the west of the City by opening up new roads and widening the existing ones. This Scheme is known as Maydapat, Scheme No. XXVII.

The new 84 ft. road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Ghat has been completed so that there is now a continuous main traffic route with the same width of roadway as Chittaranjan Avenue, extending right across Calcutta from Strand Road on the west to Upper Circular Road on the east. The widening of Maniktala Road between Upper Circular Road and Maniktala Bridge which has been completed forms a further extension of this main roadway which will eventually continue at a width of 100 ft. to the extreme eastern limit of Maniktala. Another important scheme which is now complete is the new 60 ft. road between Darpanarayan Tagore Street and Pathuriaghata Street which, with its side roads, opens up a very congested area and forms a portion of a main projected north and south road through Bara Bazar from Harrison Road to a new main east-and-west diagonal road through Ahiritollah.

The passing of the Calcutta Improvement (Amendment) Act, 1931, which empowers the Board of Trustees in certain cases to levy betterment fees on properties which abut on to a new or widened street instead of acquiring the properties has made it financially possible for the Trust to proceed with some portion of its original programme for the improvement of Bara Bazar. The Kalakar Street scheme in Bara Bazar which forms the southern section of the aforesaid road is one of the schemes to which the new Act is to be applied. It has been published under Section 43 of the Calcutta Improvement Act, and sanctioned by Government. Another scheme which has received the sanction of Government and to which the new Act is to be applied is the widening of a short length of Darmahatta Street and it will be interesting to see how the methods of assessment provided for in the Act will work out in practice.

The Suburban Areas to the south and south-east of Calcutta required greater attention and extensive development schemes were undertaken. Several open spaces and squares have been made in various parts. Insanitary tanks requiring approximately 2 crores c.ft. of earth have been filled up. Russa Road which forms the southern approach to the town has been widened to 150 ft. for a length of one mile and 100 ft. for a length of another mile. It now gives a most pleasant drive from Chowringhee to Tollygunge. To improve the drainage of this area a 100 ft. wide East to West road, from Ballygunge Railway Station to Chetla Bridge, and for recreation an artificial lake of 167 bighas with adequate grounds has been completed.

Another small lake has also been completed and a road is being constructed round it to link up with the road surrounding the main lake. The road round the main lake has been surfaced with asphalt and lighted with electricity and is much frequented in the evenings. Sites for club houses adjoining the main lake have been allotted to several clubs. Excavation has been continued in a new section of the lake which is to be attractively laid out with an island to which the public will have access by means of a footbridge. The Calcutta Tramways Co.,

Ltd., have now extended tram tracks from Russa Road along New Sewer Road to Ballygunge Station.

The Board of Trustees have framed a scheme for the extension southwards of Lansdowne Road which has received Government sanction, acquisition of land was completed and all the new and widened roads have been completed and opened to traffic; surplus lands are now ready for sale; the Board in pursuance of its policy of carrying out schemes in the centre of the town and in the suburbs simultaneously, so as to have an adequate supply of suburban sites for residential buildings to meet the needs of those displaced from overcrowded areas in the centre of the town has also framed a scheme known as Scheme No. XXIII for the improvement of another section of the undeveloped area between Russa Road and the Lake District. This too has received sanction of Government and land acquisition has made good progress and engineering works have been taken in hand.

To the east of the city, several new roads have been constructed in Scheme No. VIII (New Ballygunge Road—Park Circus to Old Ballygunge Road). They are now open to traffic, and the majority of them are surfaced with asphalt. Arrangements have been made for lighting the roads with electricity. The development of Calcutta east of Lower Circular Road, between Park Circus and Middle Road, Entally, is a pressing need, but the work can only proceed slowly in small sections. The Trust in the execution of this scheme cannot ignore the bustee dwellers, who are pushed further east, as the development from bustee conditions to blocks of masonry buildings proceeds. The utilisation of highly-improved lands for bustee purposes is not an economic proposition, but at the same time, it is necessary to provide the essentials of sanitation for the working classes.

The linking up of Amherst Street with London Street by a broad thoroughfare has commenced in two small sections. The Trust has constructed a large park near Park Circus Scheme No. VIII, known as Eastern Park, measuring 65 bighas, with a large playing field for football and tennis. The Gorachand Road Scheme provides for the completion of the northern portion of this park and the commencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally. As the scheme involved the demolition of a large number of bustees, investigations were made to ascertain the best means of reducing the displaced bustee population as a result of which a Rehousing Scheme at Christopher Road which will cost the Trust Rs. 2,70,000 for land acquisition and Rs. 1,97,000 for engineering works has been framed and has received the sanction of Government. Acquisition of land was completed and the raising of land is in hand.

The public squares vested in the Calcutta Corporation in 1911 had a total area of about 96 acres. In 1912, Mr. Bompas, the first Chairman of the Trust, pointed out that in the ratio, viz., about 9 per cent. of its public open

spaces which measured about 1,250 acres (including the Maldan, the Horticultural and the Zoological Gardens) to its total acreage, Calcutta was almost on a par at that time with London possessing 6,675 acres of public parks or gardens while its percentage exceeded that of New York, Berlin and Birmingham. But about 1,000 acres of Calcutta's 1,250 was accounted for in the Maldan and new open spaces in other parts of Calcutta was an urgent need. Up to date the Trust had added (including the new lake at Dhakuria)—another 250 acres.

Lastly for the housing of the displaced population the Trust has undertaken on a large scale the following schemes.—

In the early stages three blocks of three storied tenement buildings containing 252 lettable rooms were built in Wards Institution Street for persons of the poorer classes. It was found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect *bastis* of their own, the class of structures they were accustomed to live in. These chawls were then filled with persons of limited means, e.g., school masters, poor students, clerks and persons of the artisan class. As many as 1,200 people are housed in these chawls, these buildings, including land, cost Rs. 2,44,368 and are let at very low rents—ground floor rooms at Rs. 5 per mensem and top floor rooms on Rs. 6 per mensem, each room measuring 12' x 12' with a 4 ft. verandah in front opening on to a central passage 7 ft. wide. The total collection of rent during the year 1933-34 including previous year arrear was Rs. 14,213.

As these chawls failed to attract the people for whom they were meant, the Board next tried an experiment in providing sites for bustees. Two sites with a lettable area of 16 bighas were acquired within the area of Maniktola Municipality, but they failed to attract because they were out of the way and were expensive.

Kerbala Tank Lane Re-housing Scheme.—In this scheme 4 detached and 35 semi-detached houses were built. The detached houses were sold as this scheme never became popular with the class of tenants for whom they were originally intended. Owing to this unpopularity the Board further decided to throw open to tenants of all classes 18 out of the remaining 35 semi-detached houses. This change of policy, however, produced no effect on the letting.

Owing to want of suitable tenants the entire dwellings in Kerbala Tank Re-housing scheme had been sold by private sale shortly after the 31st March 1927.

Bow Street Re-housing Scheme.—Seven blocks of buildings containing one-roomed, two-roomed and three-roomed suites have been constructed to re-house Anglo-Indians displaced by the operations of the Trust. This scheme

has proved a striking success. There are 132 suites for letting and the rent received from these suites during the year 1933-34, amounted to Rs. 32,666.

Pailpara Re-housing Scheme.—This scheme has an area of 36 bighas well laid out in 96 building sites. A new re-housing scheme has been undertaken by the Board, as already stated, at Christopher Road for the bustee population to be displaced by the execution of scheme No. XXXV (Eastern Park to Gorachand Road). A special feature of the new scheme is that the land is to be developed as a model bustee for displaced bustee dwellers. Special facilities are offered to dislodged persons for securing land in various improved areas for reinstatement purposes.

Bridges.—Some progress has been made in replacing the old bridges of Calcutta, which is hemmed in by canals and railway lines inadequately bridged, by modern and up-to-date bridges to suit the growing traffic requirements. The opportunity is being taken of widening the Maniktala, Narikeldanga and Bellaghata Bridge approaches on both sides—on the west (in the case of Maniktala and Narkeldanga Bridges) right up to Circular Road. The new bridges of the city will in their traffic capacity compare favourably with those of London. The new Bridges at Maniktala, Bellaghata and at Shambazar have roadways of 37 feet, with two footpaths each 10 feet in width. The Chitpore Bridge reconstruction of which has been completed has been redesigned as a reinforced concrete bridge capable of accommodating four lines of fast traffic and two lines of slow traffic. The Alipore Bridge, the reconstruction of which has been completed, has a roadway of 30 feet (3 traffic widths) and 2 footpaths of 6 feet each, and these are also to be the probable widths of the Tollygunge and Hastings Bridges which need re-building. The Chelsea, Hammer-smith and Waterloo Bridges have all-over widths of 45, 39 and 42 feet, respectively, the roadways being 29, 27 and 23 feet, that is 3 traffic widths. Even London Bridge with an all-over width of 65 feet has only a 37-foot roadway (4 traffic widths) and Westminster Bridge which is 84 feet in width spares only 54 feet (i.e., 6 traffic widths, like the 60 feet of Kidderpore Bridges for wheeled traffic.

Financial.—Capital charges during the year 1933-34 amounted to Rs. 61.34 lakhs which included Rs. 50.50 lakhs spent on land acquisition and Rs. 8.97 lakhs on engineering works. The gross expenditure of the Trust on Capital Works up to the end of the year 1933-34 was Rs. 14,20,80,000. To meet this large expenditure, the Trust has borrowed Rs. 2,48,50,000; other Capital receipts (mainly from the sale of land and buildings) have yielded Rs. 7,05,20,000 and the revenue fund from its annual surplus (after providing for the service of loans) has contributed Rs. 4.67 crores to Capital Works.

The Indian Ports.

The administration of the affairs of the larger ports (*Calcutta, Bombay, Madras, Karachi, Rangoon and Chittagong*) is vested by law in bodies specially constituted for the purpose. They have wide powers, but their proceedings are subject in a greater degree than those of municipal bodies to the control of Government. At all the ports the European members constitute the majority and the Board for Madras consists mainly of European members.

Figures for 1933-34 relating to income, expenditure and capital debt of the six principal ports managed by Trusts (Aden is excluded from the tables) as obtainable from the Department of Commercial Intelligence and Statistics (India) are shown in the following table.—

	Income.	Expenditure.	Capital Debt.
	Rs.	Rs.	Rs.
Calcutta	2,88,29,623	2,97,41,777	24,92,39,501
Bombay	2,65,61,288	2,66,54,167	20,45,17,753
Madras	30,65,074	30,00,595	1,54,41,246
Karachi	64,99,408	64,21,028	4,28,59,000
Rangoon	70,88,855	72,12,288	5,24,28,667
Chittagong	8,12,351	6,83,862	* 26,70,607

* Includes the first instalment of Rs. 15 lakhs, the second instalment of Rs. 5 lakhs, the third instalment of Rs. 2 lakhs, and the fourth instalment of Rs. 3 lakhs, of a loan of Rs. 50 lakhs from Government.

CALCUTTA.

The Commissioners for the Port of Calcutta are as follows—

Mr. T. H. Elderton, *Chairman*.

Mr. W. A. Burns, Deputy Chairman and Traffic Manager.

Elected by the Bengal Chamber of Commerce—

Mr. A. O. Brown, Mr. A. L. B. Tucker, Mr. M. A. Hughes, Mr. W. Hunter, Mr. J. Reid Kay.

Elected by the Calcutta Trades' Association—
Mr. C. H. Pratt.

*Elected by the Bengal National Chamber of Commerce—*Mr. J. C. Banerjee, Mr. Nalin Ranjan Sarkar.

*Elected by the Indian Chamber of Commerce—*Mr. D. P. Khaitan

*Elected by the Muslim Chamber of Commerce—*Mr. Kassim A. Mohammad.

*Elected by the Municipal Corporation of Calcutta—*Mr. Rajendra Narayan Banerjee,

*Nominated by Government—*Captain L. W. R. T. Turbett, O.B.E., R.N., Mr. J. A. Bell, Mr. A. F. Harvey, Mr. V. E. D. Jarrad, Mr. W. J. Ward.

The principal officers of the Trust are—

*Secretary—*Mr. C. W. T. Hook

*Traffic Manager—*Mr. W. A. Burns.

*Chief Accountant—*Mr. J. Dand, C.A.

*Chief Engineer—*Mr. J. R. Rowley, A.R.C. M. Inst. C.E.

*Deputy Conservator—*Commander C. V. L. Norcock, O.B.E., R.N. (Retd.)

*Medical Officer—*Lt.-Col. F. J. Anderson, M.B., B.S., F.R.C.S., I.M.S.

*Consulting Engineer and London Agent—*Mr. J. Angus, M. Inst. C.E.

The traffic figures and the income of the Trust for the last fifteen years are as follows —

Year	Docks			Jetties.	Stream.		Nett tonnage of shipping entering the Port.	Income.
	General Exports	Coal Exports	Imports	Imports	Exports.	Imports		
	Tons.	Tons	Tons.	Tons.	Tons.	Tons.	Tons.	Rs.
1914-15	920,659	2,633,805	700,133	917,978			3,714,314	1,44,50,340

BOMBAY.

BOARD OF TRUSTEES OF THE PORT OF BOMBAY.—Mr. G. Wiles, C.S.I., C.I.E. I.C.S., (Chairman) Nominated by Government.—Vice Admiral A. E. Bedford, C.B., R.N., Mr. Syed Munawar, Mr. C. W. E. Arbuthnot, C.I.E., Major-Generals J. P. Scobell, C.B., C.M.G., D.S.O., Mr. I. H. Taunton, I.C.S., Sir Maurice Brinsford, Kt., Mr. L. Wilson, Mr. M. Slade, I.C.S. Elected by the Bombay Chamber of Commerce.—Mr. G. L. Winterbottom, Mr. G. H. Cooke, Mr. J. J. Lockhart, Mr. F. H. French, Mr. R. C. Lowndes, Elected by the Indian Merchants' Chamber.—Sir Purshotamdas Thakurdas, Kt., C.I.E., M.B.E.; Mr. Lakhmadas Bhowjee Talwar, Mr. Gordhandas Goculdas Motani, Mr. A. D. Shroff; Mr. M. C. Mattani, Elected by the Municipal Corporation.—Mr. Meyer Nissim, Mr. Hoosenally M. Rahimtoola, Elected by the Millowners' Association.—Mr. A. Poddis

The following are the principal officers of the Trust:—

Secretary, N. M. Morris, Deputy Secretary, A. S. Bakre, M.A., Bar-at-Law.

ACCOUNTS DEPARTMENT.

Chief Acct., J. F. Pereira, B.A. Deputy Acct., C. F. Lynn, M.A., A.S.A.A. Secy. Acct., V. D. Jor, Asst Acct., A. N. Moos; O. Hyde, Junior Asst Acct., R. Cour-Palais, A. R. Javeri; Cashier, H. N. Bhatt, Ry. Audit Inspectors, M. J. Murzello, J. P. D'Souza, Supdt. Establishment Branch, F. N. T. Misquita.

ENGINEERING DEPARTMENT.

Chief Engineer, G. E. Bennett, M.Sc., M. Inst. C.E., M.I. Mech. E., M.I.P. Deputy Chief Engineer, A. Hale-White, M.A., M.Inst. C.E. Executive Engineers, G. E. Torrey, A.M.I.C.E., J. A. Rolfe; A.M.I.C.E.,

A.M.I.E.E. *Senior Asstt. Engineers*, P. E. Vazifdar, L.C.E., F. M. Surveyor, B.Sc. (Glas.), A.M.I.C.E., P. L. Everatt, A.M.I.C.E., H. N. Baria, L.C.E.; *Chief Draftsman*, L. B. Andrew, M.I. Struthers, E.; *Personal Asst. to the Chief Engineer*, S. D'Mello; *Mechanical Superintendent*, R. B. McGregor, A.M.I.M.E.; *Asstt. Mechanical Superintendents*, B. C. Sharpe, A.M.I.M.E., S. J. Watt, M.I.M.E., D. V. Kohli, B.Sc., and A. C. Strelley, M.I. Mar. E., A.M.I.M.E., A.M.I.E. *Chief Foreman*, B. Shaw.

DOCKS DEPARTMENT.

Manager, F. A. Borislaw; *Deputy Managers*, W. G. H. Templeton, F. Seymour Williams, D.S.O., P. A. Davies and E. C. Jolley; *Asstt. Managers*, 1st and 2nd Grade, A. Mattos, L. E. Walsh, F. J. Warder, E. J. Kall, D. L. Lynn, C. O. A. Martensz, P. B. Penner, Nanabhooy Framji, Ardeshr Manekji, A. R. Jaywant and G. K. Dukes *Cash Supervisor*, T. D'Silva; *Cashier*, Robert Fernandez.

RAILWAY DEPARTMENT.

Manager, D. G. M. Mearns M. Inst. T., *Deputy Managers*, A. F. Watts and H. A. Gaydon; *Asstt. Manager*, S. G. N. Shaw, P. M. Boyce and M. E. A. Kizilbash; *Asstt. Traffic Supdt.*, W. H. Brady; *Office Supdt.*, Subrahmanya Raghunathan.

PORT DEPARTMENT.

Deputy Conservator, Captain A. G. Kinch, D.S.O., R.I.N. (Retd.); *Dock Masters*, *Alexandra Dock*, J. L. Williams and C. B. M. Thomas; *Dock Masters*, *Prince's & Victoria Dock*, G. England and J. S. Nicholson; *Port Department, Inspector and Supdt. of Police, Harbour Patrol*, W. P. Bigg; *Office Supdt.*, Moses Samuel.

PILOT ESTABLISHMENT.

Harbour Master, C. T. Willson, *Master Pilots*, R. C. Vint and A. M. Thomson.

Pilots, H. W. L. T. Davies, H. H. Church, W. E. Brown, W. L. Friend, R. H. Friedlander, W. Sutherland, H. Lloyd Jones, J. Cook, G. E. Firth, H. T. Elliott, T. B. G. Wariland, J. S. Hawkes, C. J. R. Williams and D. Meikle.

LAND AND BUNDERS DEPARTMENT.

Manager, F. H. Taylor, F.S.I., M.R.S.I., *Deputy Manager*, B. C. Durant; *Personal Asstt.*, R. G. Deshmukh, B.A., LL.B.; *Office Supdt.*, D. A. Pereira; *Asstt. Managers*, W. H. Cummings, C. P. Watson and W. O'Brien; *Chief Inspector*, H. J. Amies.

STORES DEPARTMENT.

Controller of Stores, H. E. Lees; *1st Assistant*, W. J. Wilson; *2nd Assistant*, B. F. Davidson; *Statistical Supdt.*, H. L. Barrett.

MEDICAL DEPARTMENT.

Administrative Medical Officer, Dr. F. D. Bana, M.B., M.R.C.S.; *Medical Officers*, (North District), Dr. A. D. Karkhanawalla, M.B.B.S. *Superintendent, Antop Village*, Dr. M. Vijayakar, L.M. & S.

The revenue of the Trust in 1934-35 amounted to Rs. 2,43,87,249 and the expenditure to Rs. 2,46,76,465. The result of the year's working was a deficit of Rs. 3,83,062 under General Account which has been met from the Revenue Reserve Fund, and a surplus of Rs. 91,846 under Pilotage Account, which has been transferred to the Vessels Replacement Fund. The balance of the Revenue Reserve Fund at the close of the year amounted to Rs. 50,32,477. The aggregate capita expenditure during the year was Rs. 1,68,545. The total debt of the Trust at the end of the year amounted to Rs. 20,30,34,349, repayment of which is provided for by annual sinking fund contributions from revenue, the accumulation of the sinking fund as at 31st March 1935 was Rs. 500.20 lakhs, in addition to this part from property appreciation, the Reserve and other funds total Rs. 84.01 lakhs.

The trade of the Port of Bombay during the last official year aggregated Rs. 193 crores in value.

The number of steam and square-rigged vessels which during recent years have entered the docks or been berthed at the harbour walls and paid dues, excluding those which have unloaded and loaded in the stream:—

Year.	Number.	Tonnage nett.
1916 to 1921 (average)	2,086	4,758,888
1921 to 1926 ..	1,962	4,574,817
1926 to 1931 ..	1,954	4,749,570
1931-32 ..	1,866	4,588,577
1932-33 ..	1,836	4,601,183
1933-34 ..	1,913	5,099,247
1934-35 ..	1,904	5,030,637

The two dry docks were occupied during the year by 146 vessels, the total tonnage amounting to 489,027 a decrease of 75,441 tons from the previous year.

KARACHI.

TRUSTEES.

Chairman.—Colonel D. S. Johnston, C.I.E. (*Vice-Chairman, Elected by the Board*)—F. Buckney, B.A., *Collector of Customs, Karachi*, appointed by Government.

APPOINTED BY GOVERNMENT

Engr.-Comdr. J. Beggs, R.I.N. (*Principal Officer, Mercantile Marine Department, Karachi District*); A. K. Hom an (*Divi-*

sional Superintendent, North Western Railway), Major J. C. Gain, M. C. (D.A.A. & Q.M.G. Sind Independent Brigade Area), Khan Sahib Alla Buksh Khudadad Khan (Abol).

ELECTED BY THE KARACHI CHAMBER OF COMMERCE

A. P. Darlow, (Gill & Co.), J. W. Anderson (Grahams Trading Co., (India), Ltd.), G.

H Raschen, (Forbes, Forbes Campbell & Co., Ltd.); H S Bigg-Wither, OBE (Burmah-Shell Oil Storage & Distributing, Co. of India, Ltd)

ELECTED BY THE KARACHI INDIAN MERCHANTS, ASSOCIATION.

Isardas Varindmal, (Jeramdas Naumal).
Lala Jagannath Balaram Tandon, BSC,
(R B. Brijlal Jagannath & Co.)

ELECTED BY THE BUYERS & SHIPPERS' CHAMBER
Haridas Lalji, (Lalji Lakhmidas) Rochiram
Thakurdas

ELECTED BY THE KARACHI MUNICIPAL
CORPORATION.

Tikamdas Wadhmal, M.A. (Oxon), Bar-at-Law.
PRINCIPAL OFFICERS OF THE PORT TRUST.

Chief Engineer—W. P. Shepherd-Barron,
M.C., Inst. M.C.E.

Deputy Chief Engineer.—H. A. L. French,
M Inst C.E.

Chief Accountant—B. A. Inglet, B.A., C.A.
Traffic Manager—A. A. L. Flynn, C.I.E., V.D.,
C.M.S.

Deputy Conservator—Lt-Comdr R R Caws,
R.N.

Chief Storekeeper.—R. A. Donde.

Secretary—L. J. Mascarenhas.

Revenue Receipts and Expenditure of the

Port of Karachi for the year 1934-35.

Revenue Receipts Rs. 69,60,000.

Revenue Expenditure Rs. 66,23,000.

Surplus Rs. 3,37,000.

Reserve Fund Rs. 52,15,000 (Securities at

cost price)

SHIPPING

Number of vessels which entered the Port during the year 1934-35 exclusive of vessels put back and fishing boats was 3,713 with a tonnage of 2,560,715 as against 3,119 with a tonnage of 2,378,403 in 1933-34. 924 steamers of all kinds entered the Port with a tonnage of 2,405,404 against 878 and 2,257,280 respectively in the previous year. Of the 924 steamers 715 were of British Nationality.

The imports during the year totalled 781,000 tons against 724,000 tons in the previous year. The shipments were 1,175,000 tons in 1934-35 against 893,000 in 1933-34

The total volume of imports and exports was 1,956,000 tons against 1,617,000 tons in the previous year.

MADRAS.

The following gentlemen are the Trustees of the Port of Madras:—

Officials.—G. G. Armstrong, O.B.E., M.C., V.D., M. Inst. T., (Chairman and Traffic Manager), Mr G. N. Bower, B.A., (Collector of Customs), Captain B Gordon R.N. (Presidency Port Officer).

Non-Officials.—(1) Nominated by Government Mr. H. N. Colam; M. Inst. C.E., Mr C. A Muthhead.

Representing Chamber of Commerce, Madras—Mr. G. L. Orchard; Mr. H. S. Town, Mr. D M. Reid and Mr. R. D. Denniston.

Representing Southern India Chamber of Commerce, Madras.—M. R. Ry. M. Ct. M. Chidambaram Chettiyar Avergal, M. R. Ry G. Janakiram Chetty Garu.

Representing Madras Trades Association.—Mr. S. W. Edwards, Mr. E. A. Hoath.

Representing Southern India Skin & Hide Merchants' Association.—Mr. B. S. Zackariah Sahib.

Representing Madras Piece-Goods Merchants' Association.—M. R. Ry. A. Doraisawmy Chetty Garu.

Principal Officers are:—Port Engineer—Mr. G. P. Alexander, A.M. I.C.E.

Deputy Conservator of the Port of Madras—Lt-Commander A. D Berrington, R.N.R., (Retd.) on leave, Mr.A. Mackenzie, (Acting).

Deputy Traffic Manager.—Mr J.G Lord. (On leave.)

Chief Accountant.—M. R. Ry. G. Venkataraya Pal Avergal, M.A.

Mechanical and Electrical Engineer.—Major E. G. Bowers, M.C., M.I.E.E.

Assistant Mechanical Engineer.—Mr. S. W. White, M.I. Mar. E., A.M.I.N.A.

1st Engineer and Dredging Master Dredger "Madras".—Mr. J. E. Burke, (on leave), Mr F. G. Cooper.

Assistant Engineers.—M. R. Ry. V. Dayananda Kamath Avergal, B.A., B.E., M. R. Ry S. Nagabushanam Aiyer Avergal, B.A., M.E., A.I.E.E.

Assistant Engineer (Electrical).—M. R. Ry. K. Subramania Aiyer Avergal, M.E., A.I.E.E.

Harbour Master—Mr A Mackenzie on other duty as Deputy Port Conservator, Mr I. T. Lewis, (Acting Harbour Master).

Assistant Harbour Masters—Mr I. J. Whitlock, Mr B Hennin; Lieutenant, C.M. Best, R.N.R., Assistant Traffic Managers

Assistant Traffic Managers.—M. R. Ry. M. S Venkataraman Avergal, B.A., Mr. L. A. Abraham, B.A., F.C.I.

Deputy Chief Accountant.—M. R. Ry. R. Rangaswami Aiyer Avergal, B.A.

Deputy Chief Accountant (Engineering).—M. R. Ry. V. Mathuswami Aiyer Avergal, B.A.

Office Manager.—M. R. Ry. G. M. Ganapathi Aiyer Avergal.

The receipts of the Trust during 1934-35 on Revenue Account from all sources were Rs. 33,93,966 as against Rs. 30,65,074 in 1933-34, and the gross expenditure out of revenue was Rs. 30,31,734 as against Rs. 30,00,505 in 1933-34. A contribution of Rs. 3,30,000 was made to Reserve Funds during 1934-35, 784 vessels with an aggregate net registered tonnage of 26,09,138 tons called at the port during the year against last year's figure of 729 vessels with a net registered tonnage of 24,78,301 tons.

RANGOON.

The personnel of the Commissioners for the Port of Rangoon is comprised of seventeen members—

Appointed by Government—A. N. Strong, M. A. Bai-at-Law (Chairman); T. Cormack, C.A., Captain H. W. B. Livesay, O.B.E., R.N., and G. S. Taunton

Ex-Officio.—Messrs W. H. Payton, I.C.S. (Chairman, Rangoon Development Trust), P. W. Singleton (Collector of Customs); and J. E. M. Rowland (Agent Burma Railways).

Elected by the Burma Chamber of Commerce—Messrs M. L. Burnet (Vice-Chairman), C. G. Wodehouse, M.L.C., J. Tait, M.L.C., and Sir Kenneth Harper

Elected by the Rangoon Trades Association—W. C. Penn

Elected by the Chinese Chamber of Commerce—Khoo Ee Khwet

Elected by the Burma Indian Chamber of Commerce—S. N. Hajj and A. W. Adamjee

Elected by the Burmese Chamber of Commerce—U Them Maung, B.A., M.M.F. (on leave), U Aye Maung

Elected by the Corporation of Rangoon—U Htoon May.

Principal Officers are—
Secretary—C. Witcher.

Chief Accountant—S. A. Wetherfield, B.A., A.O.A.

Chief Engineer.—W. D. Beatty, B.A., B.A.I. M. Inst. O.E.

Deputy Conservator.—Commander C. M. L. Scott, R.N. (Retd.)

Traffic Manager.—W. P. Bush.

Port Surveyor.—Commander C. Stewart-Lockhart, R.N. (Retd.)

The income and expenditure on revenue account for the Port of Rangoon in 1934-35 were—

Income	Rs.	75,34,972
Expenditure	Rs.	67,33,811

The capital debt of the port at the end of the year was Rs. 5,04,28,667. The balance (including investments at cost) at the credit of the different sinking funds on 31st March 1935, was Rs. 2,20,93,135-1-6.

The total sea-borne trade of Rangoon during the year 1934-35 was 5,58,139 tons of which 1,267,685 tons were imports, 4,298,672 tons exports and 21,782 tons transhipment. The total number of vessels (excluding Government vessels) entering the port was 1,609 with a total net registered tonnage of 4,297,929 showing a decrease in the number of vessels and an increase of 82,026 tons in the net tonnage as compared with the previous year.

CHITTAGONG.

Chittagong in Eastern Bengal, lying on the right bank of the river Karnafuli at a distance of 12 miles from the sea, was already an important Port in the sixteenth century, when the Portuguese gave it the name of Porto Grande.

The construction of the Assam-Bengal Railway has facilitated the transport of trade with Assam and Eastern Bengal for which the Port of Chittagong is the natural outlet.

Chittagong, Bengal Lat. 22° 21'N; Long 91° 50'E, 1933 Pop 53,156.

TRADE

Imports—Salt, mineral oil, machinery, tea estate stores, rice, coal and railway material.

Exports—Wax, jute, tea, hides, cotton, capes, rice, paddy, eggs, poultry and livestock

Accommodation—Vessels of any size can proceed 9 miles up the Karnafuli to Chittagong at H.W.O.S draught of 23 ft to 26 ft.

There are 5 berths for ocean-going vessels at the Assam-Bengal Railway jetties, also two sets of fixed moorings.

Jetties are 2,100 ft. long, provided with hydraulic cranes 17 to lift 35 cwt and 4 to lift 10 tons, ample shed accommodation, and jetties are in direct rail communication with the Assam-Bengal Railway system, cargo in bulk being dealt with direct into wagons. Depth at jetties about 26 feet

Provisions—Fresh provisions, good drinking water and coal obtainable.

There are three river bars affecting navigation controlled by large suction dredger.

Night pilotage is in force except during the S.W. monsoon

Charges—Port dues 4 annas 6 pies, per reg ton. Hospital dues 2 pies per reg ton. Harbour Master's fee Rs. 32. Mooring and unmooring in fixed berths Rs. 32, swinging berths Rs. 16. Berth alongside jetties Rs. 40, per day, night work and holidays extra.

Pilotage not exceeding—	Rs. a.	Rs. a.
10 ft. to 20 ft from ..	67	8 to 304 4
21 ft.	337	8
22 ft.	385	4
23 ft.	439	4
24 ft.	486	0
25 ft.	553	8
26 ft.	631	8

Towage by Port Commissioners' Tug

Port Authority: Port Commissioners, Chittagong.

Officials—Deputy Conservator, Commander, F. W. Angell, R.N., Port Engineer, F. J. Green, B.Sc., M.I.C.E., &c., Secretary. A. V. Rasawubbi Aiyar, B.A., A.S.A.A., Lloyd's Agents James Finlay & Co.

VIZAGAPATAM HARBOUR PROJECT.

The question of creating a harbour at Vizagapatam to supply an outlet for a large area of fertile country adjacent to the east coast of India, hitherto undeveloped, with considerable mineral resources and without suitable access to the outside world, was first formulated in the days of the East India Company. That the creation of such a port would have beneficial influence on this area was unquestioned. Vizagapatam, lies in front of the only practicable gap in the barrier of the Eastern Ghats, is formed by nature to be the outlet of the Central Provinces, from which a considerable amount of trade has taken this route in the past, even with the imperfect communications, hitherto available. A necessary complement of the scheme was the construction of the proposed railway from Parvatipuram to Raipur now completed which, with the existing coastline of the Bengal-Nagpur Railway would make a large and rich area tributary to the proposed port, and obviate the long and expensive circuit by Calcutta. A link has also been supplied in the most direct route to Rangoon from Europe by way of Bombay, while, from an imperial point of view, the provision of a fortified port on the long and almost unprotected stretch of coast between Colombo and Calcutta is held to be a consideration of great importance. The lofty projecting headland of the Dolphin's Nose would offer facilities for this purpose.

The Government of India with the approval of the Secretary of State and the Legislative Assembly, sanctioned the construction of the new railway line from Raipur to Parvatipuram. The work is completed and the line opened to traffic. They also decided to develop the port of Vizagapatam under their direct control and the port has accordingly been declared to be a major Port.

The work was carried out by a staff of Engineers under the direct charge of an Engineer-in-Chief who comes under the administrative charge of an Administrative Officer for the development scheme, a post which is held ex-officio by the Agent of the B. N. Railway. An Advisory Committee consisting of the above mentioned officers and representatives of the Local Government, the Vizagapatam Port Administration and the commercial interests concerned, was constituted to advise on the development of the Harbour.

The scheme for the construction and development of the Harbour will be carried out in stages according to the demand of trade. The first stage is now very nearly complete. Ships started using the Harbour in October 1933 and the official opening by His Excellency the Viceroy took place on 19th December 1933.

The present provision includes a 1,000 ft. diameter Turning Basin together with access

to the steamer Berths and an Entrance Channel dredged out to afford a passage 300 ft wide at the bottom. Vessels of 27 ft. 6 ins. draft and 530 ft. length are admitted at present and deepening is in progress to allow vessels of 28'-6" maximum draft to enter in the near future.

A quay wall comprising three 500 ft. Berths has been completed and equipped with 3-ton electric cranes. Storage accommodation aggregating 140,000 sq. ft. of covered area, in three single storied sheds has been provided in the vicinity of the quay, equipped with full railway and road facilities. One additional Shed with lighter Berths has been completed and one more shed is nearing completion for export cargo. Special facilities have been provided for the storage and shipment of manganese ore. In addition to the quays, four Mooring Berths have been installed, around the Basin and additional facilities provided for dealing with lightered cargo.

A large area of land has been reclaimed in the course of the dredging operations and it has been laid out in blocks served by broad roadways. Plots are available for office sites and for industrial concerns. Water supply and electric lighting have been arranged for.

The floating equipment of the Harbour comprises five tugs of 1,500, 600, 450 and 100 H.P. respectively and 22 lighters.

A graving dock with an entrance 60 ft. 6 in. broad has been provided; but though adapted for future extension and for use by vessels larger than the dredging craft which now use it, length of ships is at present restricted to 300 feet.

The port is at present capable of dealing with lifts of 50 tons on the quays but cannot lift more than 3 tons into and out of vessels.

The sea entrance channel is protected on the South side by the provision of a sand trap and protecting breakwater.

At present ships enter and leave the Harbour during day time only and pilotage is compulsory.

The Port is administered by the Government of India through the Agent of the Bengal-Nagpur Railway who is represented at Vizagapatam by a Deputy Administrative Officer.

The principal officers are:—

Administrative Officer—V. E. D. Jarrad

Calcutta.

Deputy Administrative Officer & Traffic Manager,—E. G. Lilley Vizagapatam.

Port Engineer and Deputy Conservator,—E. F. Johnson. Vizagapatam.

Education.

Indian education is unintelligible except through its history. Seen thus, it affords the spectacle of a growth which, while to one it will appear as a blunder based on an initial error easily avoided, to another it stands out as a symbol of sincerity and honest endeavour on the part of a far-sighted race of rulers whose aim has been to guide a people alien in sentiments and prejudices into the channels of thought and attitude best calculated to fit them for the needs of modern life and western ideals. There is to-day no subject in the whole area of administrative activity in India which presents greater complexities and differences of opinion than education. Government, local bodies and private persons of learning have in the past devoted their limited funds to meeting the demands of those who perceived the benefits of education, rather than to cultivating a desire for education where it did not exist. The result is that the structure has become top-heavy. The lower classes are largely illiterate, while the middle classes who constitute the bulk of the *intelligentsia* are in point of numbers at least educated to a pitch equal to that of countries whose economic conditions are more highly developed. As might be expected from this abnormal distribution of education, the form which it has eventually assumed contains corresponding defects. In recent years, however, strenuous efforts have been made to remedy these defects. Primary Education Acts have been passed in the several provinces in favour of the expansion of primary education among the masses. On the other hand, the numbers of students in colleges and universities have grown apace; and, especially during the period of financial depression, the volume of middle class unemployment has reached alarming proportions. A movement has therefore set in with the object of stemming the drift of unsuitable students to universities by means of a radical reconstruction of the school system of education.

The Introduction of Western Learning—In the early days of its dominion in India, the East India Company had little inclination for the doubtful experiment of introducing western learning into India. Warren Hastings, the dominating figure of the time, was a genuine admirer of the laws and literature of the East. His policy was to enable the ancient learning to revive and flourish under the protection of a stable government, and to interfere as little as possible with the habits and customs of the people. Even the Act of 1813 which set apart a lakh of rupees for the introduction and promotion of a knowledge of the sciences was interpreted as a scheme for the encouragement of Sanskrit and Arabic. In the following year the Court of Directors instructed the Governor-General to leave the Hindus "to the practice of usage, long established among them, of giving instruction in their own homes, and to encourage them in the exercise and cultivation of their talents by the stimulus of honorary marks of distinction and in some cases by grants of pecuniary assistance."

It was from sources other than Government that the desire for western knowledge arose in India. In 1816, David Hare, an English watchmaker in Calcutta, joined hands with the enlightened Brahmin, Mohan Roy, to institute the Hindu College for the promotion of western secular learning. The new institution

was distrusted both by Christian missionaries and by orthodox Hindus, but its influence grew apace. Fifteen years later, the Committee of Public Instruction in Bengal reported that a taste for English had been widely disseminated and that independent schools, conducted by young men reared in the Hindu College, were springing up in every direction. In Bombay, the Elphinstone Institution was founded in memory of the great ruler who left India in 1827. A still more remarkable innovation was made in 1835 by the establishment of the Calcutta Medical College, whose object was to teach "the principles and practice of medical science in strict accordance with the mode adopted in Europe." Many pronounced the failure of the undertaking to be inevitable; for, under the Hindu custom the higher castes were forbidden to touch the dead. This obstacle was surmounted by Madhusudan Gupta who, with a few courageous pupils, began the dissection of a human body. From that time onward Indians of the highest castes have devoted themselves with enthusiasm and with success to the study of medicine in all its branches.

Another impetus to the introduction of western learning was the devotion of Christian missionaries. The humanitarian spirit, which had been kindled in England by Wesley, Burke and Wilberforce, influenced action also in India. Carey, Marshman and Ward opened the first missionary College at Serampore in 1818, and twelve years later, Alexander Duff reversed the whole trend of missionary policy in India by his insistence on teaching rather than on preaching, and by the foundation of his school and College in Calcutta. In Madras, the missionaries had been still earlier in the field; for as early as in 1787 a small group of missionary schools were being directed by Mr. Schwarz. The Madras Christian College was opened in 1837. In Bombay, the Wilson School (afterwards College) was founded in 1834.

Lord William Bentinck's minute of 1835 (based upon Macaulay's famous minute) marks of somewhat tardy acceptance by Government of the new policy. Government then determined, while observing a neutrality in religious matters to devote its available funds to the maintenance of secondary schools and colleges of western learning to be taught through the medium of English. But this decision did not entail that Oriental learning should be neglected; still less that the development of the vernaculars should be discouraged. Other changes powerfully contributed to the success of the new system. The freedom of the press was established in 1835; English was substituted for Persian as the language of the Courts in 1837, and in 1844 Sir Henry Hardinge ordained that preference in Government appointments should be given to those who had received a western education. In the following decade the new learning took firm root in India; and, though the Muhammadans still held aloof, the demand for English schools outstripped the means of Government for providing them. Fortunately there has been of late a marked appreciation among Muslim leaders of the need of improving the instructional level of their co-religionists; and in many of the provinces of India a great impulse towards educational advance among the Muhammadan community is now noticeable.

GROWTH AND ORGANISATION OF ENGLISH EDUCATION.

An epoch in Indian educational history is marked by Sir Charles Wood's despatch in 1854. Perhaps its most notable feature was the emphasis which it laid on the importance of primary education. The old idea that the education imparted to the higher classes of society would filter down to the lower classes was discarded. The new policy was boldly "to combat the ignorance of the people which may be considered the greatest curse of the country." For this purpose Departments of Public Instructions were created on lines which do not differ very materially from the Departments of the present day. The despatch also broke away from the practice followed since 1835 whereby most of the available public funds had been expended upon a few Government schools and colleges, and instituted a policy of grants-in-aid to private institutions. "Such a system as this, placed in all its degrees under efficient inspection, beginning from the humblest elementary institution and ending with the university test of a liberal education would impart life and energy to education in India, and lead to a gradual but steady extension of its benefits to all classes of people." Another feature of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Madras and Bombay three years later. The affiliating type of university then became the pivot of the Indian education system. It has undoubtedly been of value in several ways. It enabled Government to select recruits for its service on an impartial basis; it did much, through the agency of its Colleges to develop backward places; it accelerated the conversion of Indians to a zeal for western education; and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scholars, but corporations of administrators; they did not deal directly with the training of men, but with the examination of candidates; they were not concerned with learning, except in so far as learning can be tested by examination. The colleges were fettered by examination requirements and by uniform courses; their teachers were denied that freedom which teachers should enjoy and their students were encouraged not to value training for its own sake but as a means for obtaining marketable qualifications. In certain important respects the recommendations in the despatch were not followed. The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts; they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions; they recommended the establishment of university chairs for advanced study. They were aware of the dangers of a too literary course of instruction; they hoped that the system of education would rouse the people of India to develop the vast resources of their country... and gradually, but certainly, confer upon them all the advantages which accompany the healthy increase of wealth and commerce. The encouragement of the grant-in-aid system was

advocated to an even greater extent by the Education Commission of 1882, which favoured the policy of withdrawing higher education from the control of Government within certain limits and of stimulating private effort. In theory the decision was correct, but in practice it was irretrievably wrong. In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay. And, in the course of time, an unworkable system of dual control grew up, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eye on the private institutions and to be content with the development of a few favoured Government institutions. There can be little wonder that, under such a system of neglect and short-sightedness, evils crept in which are now being removed gradually by the establishment of independent Boards of Intermediate and Secondary Education charged with the administration of the high school and intermediate stages of education.

The Reforms of 1902-4.

In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universities over the schools and colleges. The Chancellors of the Universities were empowered to nominate 80 per cent. of the ordinary members of the Senates and to approve the election of the remainder; the Government retained the power of cancelling any appointment, and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sanction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, the inspection of schools being ordinarily conducted by the officers of the Department of Public Instruction. Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government sanction, for these objects; but their scope was in practice limited to post-graduate work and research. The territorial limits of each university were defined, so that universities were precluded from any connexion with institutions lying outside those boundaries. Neither the Commission nor the Government discussed the fundamental problems of university organisation, but dealt only with the immediate difficulties of the Indian system. They did not inquire whether the affiliating system could be replaced by any other mode of organisation, nor whether all schools might be placed under some public authority which would be representative of the universities and of the departments. They assumed the permanent validity of the existing system, in its main features, and set themselves only to improve and to strengthen it.

* High Schools include vernacular high schools also in some provinces.

(a) Includes scholars in University Departments and in the Intermediate and Second Grade Colleges (including Intermediate colleges of the new type.)

N.B.—In the educational tables of most provinces the new census figures of 1931 have been used; hence the percentages for 1931 are not strictly comparable with those for 1930.

Recent Developments.

Government of India Resolutions on Indian Educational Policy.—The Indian Universities Act of 1904 was followed by two important resolutions of the Government of India on Indian Educational Policy—one in 1904 and the other in 1913. The resolution of 1904 was comprehensive in character and reviewed the state of education in all its departments. The following passage from it summarises the intentions of Government:—

“The progressive devolution of primary, secondary and collegiate education upon private enterprise and the continuous withdrawal of Government from competition therewith was recommended by the Educational Commission in 1883 and the advice has generally been acted upon. But while accepting this policy, the Government of India at the same time recognise the extreme importance of the principle that in each branch of education Government should maintain a limited number of institutions, both as models for private enterprise to follow and in order to uphold a high standard of education. In withdrawing from direct management it is further essential that Government should retain a general control, by means of efficient inspection, over all public educational institutions.” The comprehensive instructions contained in this resolution were followed in the next few years by the assignment to the provinces of large Imperial grants, mainly for University, technical and elementary education. The resolution of 1913 advocated, *inter alia*, the establishment of additional, but smaller Universities of the teaching type; it affirmed the policy of reliance on private effort in secondary education; it recommended an increase in the salaries of teachers and an improvement in the amounts of grants-in-aid; and it insisted on proper attention being paid to the formation of character in the education given to scholars of all grades. It further discussed the desirability of imparting manual instructions and instruction in hygiene; the necessity for medical inspection, the provision of facilities for research, the need for the staffing of the girls' schools by women teachers and the expansion of facilities for the training of teachers. The policy outlined in 1913 materially accelerated progress in the provinces, but the educational developments foreshadowed were in many cases delayed owing to the effects of the Great War.

The Reforms Act.—The Reforms Act of 1919 has altered the conditions of educational administration in India. Education is now a ‘transferred’ subject in the Governors’ provinces and is, in each such Province, under the charge of a Minister. There are, however, some exceptions to this new order of things. The education of Europeans is a ‘Provincial reserved’ subject, i.e., it is not within the charge of the Minister of Education, and to the Government of India are still reserved matters relating to Universities like Aligarh, Benares and Delhi and all such new universities as may be declared by the Governor-General in Council to be central subjects. The Government of India are also in charge of the Chiefs’ Colleges and of

all institutions maintained by the Governor-General in Council for the benefit of members of His Majesty's Forces or of other public servants or of the children of such members or servants.

Administration.—The transfer of Indian education to the charge of a Minister responsible to the Provincial Legislative Council, of which he himself is an elected member, has brought the subject directly under popular control in the ten major provinces. Generally speaking, education, excluding European education, is not, however, under the charge of a single Minister in all the provinces of India. Certain forms of education have been transferred to the technical departments concerned and come within the purview of the Minister in charge of those departments. In each province, the Director of Public Instruction is the administrative head of the Department of Education and acts as adviser to the Education Minister. He controls the inspecting staff and the teaching staff of Government institutions and is generally responsible to the local government for the administration of education. The authority of Government, in controlling the system of public instruction, is in part shared with and in part delegated to Universities as regards higher education and to local bodies as regards elementary and vernacular education. In some provinces, boards of secondary, or of secondary and intermediate, education have also been set up and have to some extent relieved the Universities in those provinces of their responsibilities in connection with intermediate education and with entrance to a University course of studies. Institutions under private management are controlled by Government and by local bodies by ‘recognition’ and by the payment of grants-in-aid, with the assistance of the inspecting staffs employed by Government and in rarer cases by local bodies.

Department of Education, Health and Lands of the Government of India

—In 1910 a Department of Education was established in the Government of India with an office of its own and a Member to represent it in the Executive Council. The first Member was Sir Harcourt Butler. In 1923, the activities of the Department were widened, in the interests of economy, by absorption in it of the Department of Revenue and Agriculture. The enlarged Department has been designated the Department of Education, Health and Lands. The Hon'ble Kunwar Sir Jagdish Prasad and Sir Ghia Shankar Bapna are the present Member and Secretary, respectively. The Department possesses an educational adviser styled Educational Commissioner. The present Educational Commissioner is Sir George Anderson, Kt., C.S.I., C.I.E., M.A., who is an eminent educationist of wide experience and has served on several Commissions and Committees on education in India. It is largely through his efforts that a *Central Advisory Board of Education* has been established in India. The main functions of the Board are to serve as a clearing house of ideas and a reservoir of information. The first meeting of the Board was held in

December 1935. The most important question discussed by the Board was that of unemployment and educational reconstruction and a number of important and far-reaching recommendations were made by it in respect to this matter. It is to be hoped that the activities of this Board will prove of great value to the development of education in India on right lines. The constitution of the Board is as follows —

The Hon'ble Member in charge of the Department of Education, Health and Lands (*Chairman*)

The Educational Commissioner with the Government of India

Ten nominees of the Government of India
One member elected by the Council of State
Two members elected by the Legislative Assembly

Three members nominated by the Inter-University Board, India

One representative of each local Government (*either the Minister for Education or his deputy or the Director of Public Instruction or his deputy*)

There is also Secretary to the Board, who is appointed by the Government of India

Educational Services.—Until recently, the educational organisation in India consisted mainly of three services—(i) the Indian Educational Service, (ii) the Provincial Educational Service, and (iii) the Subordinate Educational Service. The Indian Educational Service came into existence as a result of the recommendations made by the Public Services Commission of 1886, and in 1896 the Superior Educational Service in India was constituted with two divisions—the Indian Educational Service staffed by persons recruited in England and the Provincial Educational Service staffed by persons recruited in India. These two divisions were originally considered to be collateral and equal in status, though the pay of the European recruit was higher by approximately 50 per cent. than the pay of the Indian recruit. Gradually, however, status came to be considered identical with pay and the Provincial Educational Service came to be regarded of inferior status to the Indian Educational Service. Later as a result of the recommendations of the Islington Commission of 1912-16, the Indian Educational Service was formed into a superior educational service and all posts were thrown open to Indian recruitment. The Provincial Educational Service was simultaneously reorganised and a number of posts, generally with their Indian incumbents, were transferred to the superior service. This reorganisation resulted in a considerable Indianisation of the superior educational services in India. It was then held down that the proportion of Indians in this service should on an average be 50 per cent. of the total strength, excluding the posts in Burma

In 1924, all recruitment to the Indian Educational Service was stopped as a result of the recommendations of the Royal Commission on the superior services in India. The Commission recommended that "for the purposes of local Governments no further recruitment should be made to the all-India services which operate

in transferred fields. The personnel required for these branches of administration should in future be recruited by local Governments". The Commission further recommended in regard to the question of the future recruitment of Europeans that "it will rest entirely with the local Governments to determine the number of Europeans who may in future be recruited. In this matter the discretion of local Government must be unfettered but we express the hope that Ministers on the one hand will still seek to obtain the co-operation of Europeans in these technical departments and that qualified Europeans on the other hand may be no less willing to take service under local Governments than they were in the past to take service under the Secretary of State". As a result of the acceptance of these recommendations, the Indian Educational Service is dying out and with the gradual retirement of its existing members, the history of the service which has had a brief but fine record will be brought to an end. The present organisation of education in the provinces is largely the work of members of this service; while in the sphere of higher education, it has trained many men of more than ordinary attainments.

The new Provincial Educational Services, which function under provincial control as the superior educational services, have been constituted in most provinces. These schemes vary from province to province, but it may be generally remarked that, while the rates of pay are not uniform, they consist of two main classes—class I into which the existing Indian Educational Services have been merged for the time being, and class II which may be said to represent the old Provincial Educational Service.

The existing Provincial and Subordinate Educational Services in the provinces have been affected, more in some provinces than others, by the changes which have taken place since 1919. Communal interests have influenced recruitment, and in some places they have influenced promotions also, in a direction which has not always tended towards service contentment. But these results are the natural consequences of the devolution of control of education and power of recruitment to provincial and local authorities and will for some time continue to affect the efficiency of the Education Departments in the provinces.

Hartog Committee on Education.—The most notable event in recent years has been the appointment of the Auxiliary Committee of the Indian Statutory Commission, under the Chairmanship of Sir Philip Hartog, to report on the growth of education in India. The report of the Committee, which was published in 1929, constitutes a valuable document on the present state of education in India.

Lindsay Commission.—Another Commission, which deserves mention, was appointed in 1929 by the International Missionary Council to investigate the various problems connected with the higher education provided by the various Missionary bodies working in India. It was presided over by Dr A. D. Lindsay, Master of Balliol College, Oxford. The Commission visited India in 1930-31 and its report was published in 1931.

Statistical Progress.

The two tables given below afford useful comparisons with previous years and serve to illustrate the growth and expansion of education in India.

(a) STUDENTS.

Year	In Recognised Institutions			In All Institutions (Recognised and Unrecognised)		
	Males	Females	Total	Males	Females	Total
1921-22	6,401,434	1,340,842	7,742,275	6,962,979	1,418,422	8,381,401
1926-27	8,777,739	1,751,611	10,529,350	9,315,140	1,842,356	11,157,496
1927-28	9,260,266	1,899,890	11,160,156	9,778,737	1,996,445	11,775,222
1928-29	9,515,109	2,032,388	11,547,497	10,028,086	2,137,753	12,165,839
1929-30	9,749,749	2,149,853	11,898,602	10,256,914	2,258,212	12,515,128
1930-31	9,796,683	2,260,154	12,056,837	10,313,493	2,375,598	12,689,086
1931-32	9,752,937	2,369,529	12,122,466	10,273,888	2,492,649	12,766,537
1932-33	9,715,753	2,476,384	12,192,137	10,247,062	2,606,470	12,853,532
1933-34	9,866,619	2,625,177	12,491,796	10,417,839	2,755,031	13,172,890

(b) EXPENDITURE.

Year.							Total expenditure on education in British India.	
							Public Funds	Total
							Rs.	Rs.
1921-22	11,49,61,173	18,37,52,969
1926-27	15,59,23,968	24,58,47,572
1927-28	16,45,80,915	25,82,78,819
1928-29	17,12,24,514	27,07,32,253
1929-30	17,50,03,644	27,42,82,018
1930-31	17,99,26,248	29,31,61,446
1931-32	16,84,19,016	27,18,56,622
1932-33	15,42,56,219	25,78,75,868
1933-34	15,66,36,461	26,17,65,186

In 1933-34 the total expenditure on education in British India amounted to Rs. 26,17,85,186 of which 43.8 per cent. came from Government funds 16.0 per cent. from District Board and Municipal funds 24.8 per cent. from fees and 15.4 per cent. from all other sources.

The average annual cost per scholar amounted to Rs. 20-15-3 as follows: to Government funds Rs. 9-2-11, to local funds Rs. 3-5-8, to fees Rs. 5-3-0 and to other sources Rs. 3-3-8.

It may be noted that, out of a total of 9,530,380 pupils in primary and secondary schools for boys, 3,858,177 pupils were enrolled in Class I or the lowest class alone. In the case of primary and secondary schools for girls, the corresponding figures were 2,599,859 and 1,508,266. There is thus much wastage and stagnation in the lowest classes. Efforts are being made in all provinces to check this wastage, but the evil cannot be eradicated so long as the number of single-teacher schools is not appreciably reduced.

The different types of institutions with the scholars in attendance at them are shown in the following table:—

Types of Institutions.	Number of Institutions.		Number of Scholars	
	1933.	1934.	1933.	1934.
<i>Recognised Institutions</i>				
Universities	16	16	10,041	10,762
Arts Colleges	252	255	75,329	78,669
Professional Colleges .. .	72	69	18,391	18,917
High Schools	3,224	3,356	978,702	1,007,544
Middle Schools	16,537	10,574	1,318,365	1,314,720
Primary Schools	199,706	200,924	9,531,970	9,406,356
Special Schools	6,759	6,648	259,339	254,828
Total of Recognised Institutions	220,566	221,852	12,192,137	12,491,796
Unrecognised Institutions ..	34,781	34,872	661,395	681,094
Grand total of all Institutions	255,347	256,724	12,853,532	13,172,890

Primary Education.—The primary schools are mainly under the direction of the local boards and municipalities. In recent years, eight provincial legislatures have passed Primary Education Acts authorising the introduction of compulsory education by local option. All the Acts are drafted on very similar lines. If a local body at a special meeting convened for the purpose decides by a two-thirds majority in favour of the introduction of compulsion in any part of the area under its control, it may then submit to Government, for approval, a scheme to give effect to its decision. The scheme must be within the means of the local body to carry out with reasonable financial assistance from Government. Ordinarily the age limits of compulsion are from six to ten years though provision is made for prolonging the period. Provision is also made in all the Acts for the exemption of particular classes and communities and for special exemption from attendance in cases

of bodily infirmity. Walking distance to a school is generally defined as one mile from the child's home. The employment of children, who should be at school, is strictly forbidden and a small fine is imposed for non-compliance with an attendance order. The Acts generally provide that, subject to the sanction of the local Government, education where compulsory shall be free. The Madras Elementary Education Act of 1920 contained such provision, but it has recently been amended so as to allow fees to be charged in schools under private management situated in areas where education is compulsory, reserving however a number of free places for poor pupils in such schools in areas where there are no free schools. Such in brief are the ordinary provisions of the various provincial Education Acts. Local bodies have not however shewn as yet any great alacrity in availing themselves of the opportunity afforded them by these Acts.

Compulsory Primary Education.—The following tables shows the urban and rural areas in which compulsion had been introduced by the year 1933-34:—

Province	Acts	Areas under "Compulsion."		
		Urban areas.	Rural areas.	No of Villages in Rural areas.
Madras ..	Elementary Education Act, 1920 ..	26	7	104
	Primary Education (District Municipalities Act, 1918) ..	4
Bombay ..	City of Bombay Primary Education Act, 1920 ..	1
	Primary Education Act, 1923 ..	5	2	150
Bengal ..	Primary Education Act, 1919 & 1930 ..	1
	Primary Education Act, 1919 ..	36
United Provinces.	District Boards Primary Education Act, 1926	24	351
Punjab ..	Primary Education Act, 1919 ..	57	2,908	6,238
Bihar and Orissa	Primary Education Act, 1919 ..	1	2	15
Central Provinces and Berar	Primary Education Act, 1920 ..	25	431	431
Assam ..	Primary Education Act, 1926
Delhi ..	(Punjab Act extended to Delhi, 1925) ..	1	10	14
	Total ..	157	3,384	7,303

N.B.—This table does not include areas for which schemes of compulsory primary education are under consideration or have been sanctioned but not yet introduced. It includes, on the other hand, areas in which such schemes have been partially introduced.

The poverty of local bodies is usually the cause assigned to their diffidence to introduce compulsory education to any appreciable extent.

Secondary and High School Education.—

Some attempts have been made to give a greater bias towards a more practical form of instruction in these schools. The Commission of 1882 suggested that there should be two sides in secondary schools, "one leading to the entrance examination of the universities, the other of a more practical character, intended to fit youths for commercial and other non-literary pursuits." Some years later, what were called B and C classes were started in some schools in Bengal but, as they did not lead to a university course, they have not been successful. In more recent years the Government of India have advocated the institution of a school *final* examination in which the more practical subjects may be included. Efforts have also been made to improve the conduct of the matriculation and to emphasise the importance of oral tests and of school records. In Madras, this examination, which was placed under the direction of a Board representative of the University and of Government, proved somewhat cumbrous and certain modifications were made. In the United Provinces and the Central Provinces the control of secondary education has been made over to special Boards created for this purpose. Similarly, the Administration of Delhi has established a Board of Secondary Education for that province and the Government of India have established a Board of Intermediate and High School Education, with headquarters at Ajmer, for Rajputana, Central India and Gwalior. In

the Punjab the school leaving examination is conducted by a Board. But the main difficulty has not yet been touched. The University which recognises the schools has no money wherewith to improve them; and the Department of Public Instruction, which allots the Government grants, has no responsibility for the recognition of schools, and no connexion whatever with the private unaided schools. This dual authority and this division of responsibility have had unhappy effects. The standard of the schools also is very low so that the matriculates are often unable to benefit by the college courses. In some provinces an endeavour has been made to raise the standard of the schools by withdrawing from the University the intermediate classes and by placing them in a number of the better schools in the State.

As has already been stated, there is now a widespread desire to cure these evils by a radical reconstruction of the school system of education. The main defect of the present system is that all pupils, even those in the primary stages, are educated on the assumption that they will ultimately proceed to a university. In consequence, very many pupils drift on to a university and prolong unduly their purely literary studies. In order to counteract this tendency, the school system should be divided into separate stages, each with a clearly defined objective released from the trammels of a university. On the successful completion of each stage, pupils should be encouraged either to join the humbler occupation of life or to proceed to separate vocational institutions, which should be provided in more ample measure than at present.

Reconstruction along these general lines was first proposed by the Punjab University Committee, and was subsequently endorsed by the Universities Conference which met in Delhi in 1934. Its details have been worked out in greater detail in an important Resolution of the Government of the United Provinces later in the same year. The matter was also considered by the Central Advisory Board of Education, which generally endorsed the views expressed by the Universities' conference and suggested that expert aid should be obtained to work out the scheme of school reconstruction in the provinces.

Anglo-Indian and European Education.—There are schools for Europeans and Anglo-Indians which are placed under the control of special inspectors for European Schools. The education of the domiciled community has proved to be a perplexing problem, and in 1912 a conference was summoned at Simla to consider the matter. The difficulty is that European Schools are very remote from the general system of education in India. But efforts are being made to bring these schools more into line with the ordinary schools, and Indian Universities generally are affording special facilities for Anglo-Indian boys who may proceed for higher education in Indian colleges.

Recently, as a result of the recommendations made by the Irwin Sub-Committee of the Third Indian Round Table Conference, Provincial Boards for Anglo-Indian and European Education have been constituted in almost all Provinces; and an Inter-Provincial Board has also been constituted, the first meeting of which was held in January 1935 under the auspices of the Government of India.

Medium of instruction in public schools—The position of English as a foreign language and as a medium of instruction in public schools was discussed by a representative conference which met at Simla in 1917 under the Chairmanship of Sir Sankaran Nair, the then Education Member. Although it was generally conceded that the teaching of school subjects through a medium which was imperfectly understood led to cramming and memorising of text-books, the use of English medium was defended by some on the ground that it improved the knowledge of English. The result of the conference was therefore inconclusive. Some local authorities have since then approved of schemes providing for the recognition of local vernaculars as media of instruction and examination in certain subjects. There seems to be no doubt that the use of the vernacular as the medium of instruction and examination is gradually increasing all over India.

The main difficulty, however, is that school classes have often to be split up at considerable expense into a number of language sections. The problem needs further investigation, especially in the direction of evolving a common script for at least a single province, if not for the whole of India. In this connexion, Mr. A. Latif, I.C.S., has done good pioneer work in respect to the Romanised Urdu Script.

Boy Scout Movement.—A happy development in recent years has been the spread of the

boy scout movement which has had an excellent effect in all provinces in creating amongst boys an active sense of good discipline.

It is gratifying that intimate contact is being established between the Boy Scout Movement and the Junior Red Cross and St. John's Ambulance Associations, as well as with movements for social uplift and improvement of village conditions.

Girl Guide Movement.—This movement is making steady progress. There is, however, a lack of those competent and willing to give instruction.

Medical Inspection.—Arrangements have been made for medical inspection of scholars but progress has been hampered by the shortage of funds and the continued indifference of parents. In the United Provinces, schools are now inspected by officers of the Public Health Department. In Madras, the scheme of medical inspection of schools has been made compulsory in all Government institutions, and it has been made a condition of recognition that all secondary schools should introduce the scheme. In Burma, the grants-in-aid for medical inspection have been temporarily suspended on account of retrenchment, but most medical officers have continued the inspection of pupils without remuneration. In Bihar & Orissa, certain posts of school medical officers were abolished in 1932, for the same reason, but it has since been found possible to revive them. There is, however, still need for adequate facilities for the treatment of children suffering from diseases. In a few towns in the Punjab, satisfactory arrangement exist not only for medical inspection but also for effective treatment, and an extension of this useful scheme is under contemplation.

The activities of Junior Red Cross and St. John Ambulance Societies have been particularly beneficial in improving the health of school children and in interesting them in the health of others.

Professional and Technical Education.—A research institute in agriculture was started by Lord Curzon at Pusa in Bihar, which has done valuable work. Its buildings were seriously damaged by the Bihar earthquake in 1934. The Institute has therefore been transferred to New Delhi, where new buildings are being constructed for it. Conferences have been held at Pusa, Simla and Poona, with the object of providing a suitable training in agriculture. A Royal Commission on Agriculture has submitted its report and as a result of its recommendations an Imperial Council of Agricultural Research has been established by the Government of India at their headquarters. Among commercial colleges, the most important is the Sydenham College of Commerce in Bombay. Industrial institutions are dotted about India, some maintained by Government, others by municipalities or local boards, and others by private bodies. The most important are the Victoria Jubilee Technical Institute in Bombay. The Indian Institute of Science at Bangalore, the product of generous donations by the Tata family. The tendency in recent years has been

to place these institutions under the control of the Departments of Industries. In addition to a number of engineering schools, there are Engineering Colleges at Roorkee, Sibpur, Poona, Madras, Rangoon, Patna and Benares each of which except that at Roorkee is affiliated to a university. The engineering colleges maintain a high standard and great pressure for admission is reported from several provinces. There are schools of art in the larger towns where not only architecture and the fine arts are studied, but also practical crafts like pottery

and iron work. There are two forest colleges at Dehra Dun and Coimbatore and a Technical Institute is in existence at Cawnpore and a Mining School at Dhanbad. Mining and Metallurgy are also taught by the Mining and Metallurgical College at Benares which provides a 4-year course leading to a B.Sc. degree in each subject. Provision has been made by the Government of India for the training of cadets for the Mercantile Marine Service and a ship "I.M.M.T.S. Dufferin" has been stationed for this purpose in Bombay waters.

The following table shows in summary form the number of such institutions and of students attending them :—

Type of Institution	1933.		1934.	
	Institutions.	Students.	Institutions.	Students.
I. Colleges—				
Training	22	1,590	22	1,696

GRAND TOTAL ..	1,320	88,567	1,329	90,515

Universities.

The first University in India, that of Calcutta, was founded in 1857. Between 1857 and 1887 four new Universities, at Bombay, Madras, Lahore and Allahabad were added. These five universities were all of the affiliating type. The Government of India had recognised in their resolution of 1913 the necessity of creating new local teaching and residential universities in addition to the existing affiliating universities. The development of this policy was accelerated by the strength of communal feeling and the growth of local and provincial patriotism, leading to the establishment of a number of teaching universities. The new type of universities has since been strongly advocated by the Calcutta University Commission which has offered constructive proposals as to the lines to be followed in university reform.

Calcutta University Commission.—The Report of the Calcutta University Commission

was published in August 1919

The Commission gave detailed suggestions for the reorganisation of the Calcutta University, for the control of secondary and intermediate education in Bengal and for the establishment of a unitary teaching University in Dacca. These measures concerned only Bengal, but it was generally recognised that some of the criticism made by the Commissioners admit of a wider application. Committees were consequently appointed by the Universities of Madras, Bombay, Patna, and the Punjab to consider the findings of the Commission. In the United Provinces two committees were appointed, one to prepare a scheme for a unitary teaching University at Lucknow, the second to consider measures for the reorganisation of the Allahabad University and the creation of a Board to control secondary and intermediate education.

The Punjab University Enquiry Committee was appointed in 1932 and submitted its report in the following year. The committee reported that "the University is overburdened by the immense area of its jurisdiction and by the ever-increasing number of its students many of whom are ill-fitted for such education." The main recommendation was that the school system should be re-adjusted so that many pupils would be diverted at an earlier age to vocational and other forms of education.

Statistics of Universities—1934.

There are now 18 Universities in India, of which two are situated in Indian States. The following table gives the latest available figures and certain other particulars about these Universities:—

University.	Type (a)	Original date of foundation.	Facilities in which degrees are awarded (b)	No of Members of Teaching Staff		No of Institutions			No of Students.			No. of Students in Arts and Science.

18 Annamalai (i)	Unitary	1929	A, Sc, O	78	.	.	1	.	.	612	.	.	57

(a) An "Affiliating" University is a University which recognises external colleges offering instruction in its courses of studies; a "Teaching" University is one in which some or all of the teaching is controlled and conducted by teachers appointed by the University; a "Unitary" University is one, usually localised in a single centre, in which the whole of the teaching is conducted by teachers appointed by and under the control of the University.

(b) Faculties: A = Arts; Ag = Agriculture; Com = Commerce; Ed = Education (Teaching); Eng = Engineering; F. = Forestry; F.A. = Fine Arts; L = Law; M = Medicine; O = Oriental Learning; Sc = Science; Tech. = Technology; Th = Theology.

(c) Reconstituted in 1904

(d) Reconstituted in 1923

(e) Reconstituted in 1921

(f) Reconstituted in 1933

(g) Situated at Hyderabad (Deccan)

(h) Situated at Waltair (South India).

(i) Situated at Annamalai Nagar, Chidambaram

Intermediate Colleges.—One important part of the Calcutta University Commission's recommendations has been accepted by the Government of the United Provinces and the Government of India and incorporated in the Acts establishing the Lucknow and Dacca and reconstituting that of Allahabad, namely, the separation of the intermediate classes from the sphere of university work and of the two top classes of night schools from the rest of the school classes. The separated classes have been combined together and the control over them has been transferred from the University to a Board of Secondary and Intermediate Education. Such a Board was constituted for the Dacca University area by a notification of the Government of Bengal in 1921.

The United Provinces Board was constituted by an Act passed in the same year. The Allgarh Muslim University has, however, reverted to the old system under which the Intermediate classes form part of the University, and the separate Intermediate College has been abolished. In Ajmer-Merwara, the Intermediate classes are under a separate Board which operates in Rajputana, Central India and Gwalior. Intermediate Colleges of the new type have also been established in the Punjab, but they are affiliated to the Punjab University.

Inter-University Board.—The idea put forward by the Indian Universities Conference in May 1924 for the constitution of a central agency in India took practical shape and an Inter-University Board came into being during 1925. Twelve out of fifteen universities joined the Board. Its functions are:—

- (a) to act as an inter-university organisation and a bureau of information;
- (b) to facilitate the exchange of professors;
- (c) to serve as an authorised channel of communication and facilitate the co-ordination of university work;
- (d) to assist Indian universities in obtaining recognition for their degrees, diplomas and examinations in other countries;

(e) to appoint or recommend, where necessary, a common representative or representatives of India at Imperial or International conferences on higher education;

(f) to act as an appointments bureau for Indian universities;

(g) to fulfil such other duties as may be assigned to it from time to time by the Indian Universities.

The Board has not yet had much influence on University policy in India but it has done a considerable amount of useful work in collecting information and in stimulating thought regarding current University problems.

Education of Indian Women and Girls.—There is still a leeway to be made good. All the influences which operate against the spread of education amongst the boys are reinforced in the case of women by the *purdah* system and the custom of early marriage.

Arts colleges, medical colleges, and the like admit students of both sexes, and a few girls attend them. The Lady Hardinge Medical College for Women at Delhi gives a full medical course for medical students. The Shree-mati Nathibai Damodhar Thackersey Indian Women's University was started some ten years ago by Professor Karve. It is a private institution and is doing good pioneer work.

The All-India Women's Conference on Educational Reform, which holds its meetings annually and has constituent conferences established all over the country, is also doing much useful work. An All-India Women's Education Fund Association has also been established in connection with this Conference. This association appointed in 1930 a special committee to enquire into the feasibility of establishing a central Teachers' Training College of a specialised Home Science character. This committee recommended the establishment of such a college "on absolutely new lines, which would synthesise the work of existing provincial colleges by psychological research". The proposal was adopted by the Association and a college, called the Lady Irwin College, has since been established in New Delhi.

The comparative statement below shows the state of women's education during 1933-34:—

	No. of Institutions.		No. of Scholars.	
	1933.	1934.	1933.	1934.
Recognized Institutions—				
Arts Colleges	24	24	1,640	1,817

(a) Includes both District Board and Municipal Funds.

Education in the Army.—The Army in India undertake the responsibility of the education of certain sections of the community. Its activities are directed into various channels with certain definite objects, which may be summarised as follows —

(i) The education of the soldier, British and Indian, in order to :—

- (a) develop his training faculties ;
- (b) improve him as a subject for military training and as a citizen of the Empire ;
- (c) enhance the prospects of remunerative employment on his return to civil life.

(ii) The fulfilment of the obligations of the State to the children of soldiers, serving and ex-service (British and Indian).

(iii) The provision, as far as possible, of training for the children of soldiers, who have died in the service of their country.

(iv) The creation of a body of Indian gentlemen educated according to English public school traditions, which should provide suitable candidates for admission to the Royal Military College, Sandhurst.

Deen School.—The efforts of the Indian Public Schools Society, which owes its origin to the initiative and enthusiasm of the late Mr S R Das, have culminated in the establishment of a School at Dehra Dun. The school will attempt to develop, in an atmosphere of Indian culture and social environment, the best features of English Public Schools. It was opened by His Excellency the Viceroy (Lord Willingdon) in October, 1935. The Society has been fortunate in securing the Chand Bagh Estate at Dehra Dun for the location of the school. In February, 1936, there were

188 boys in the school, who were distributed between three houses. Mr. A E Foot, who was formerly a master at Eton, has been appointed as headmaster, he is assisted by fourteen masters, of whom five have been appointed from England. The Board of Management of the Society includes the Hon'ble Sir Frank Noyce (*Chairman*), the Hon'ble Sir Jagdish Prasad, the Hon'ble Malik Sir Feroze Khan Noon, Sir Pheroze Sethna, Sir George Anderson and Mr M W. Yeatts, I C S (*Honorary Secretary*).

Indigenous Education.—Of the 13,172,890 scholars being educated in India 681,094 are classed as attending 'private' or 'unrecognised' institutions. Some of these institutions are of importance. The Gurukula near Hardwar and Sir Rabinendra Nath Tagore's school at Bolpur have attained some fame ; and the numerous monastery schools of Burma are well-known. There is also an Indian Women's University at Poona, to which reference has been made under the education of Indian women and girls. This University provides instruction through the medium of vernacular, English, being, however, a compulsory subject. Four colleges are affiliated to the University, which are situated at Bombay, Poona, Ahmedabad and Baroda. Connected with every big mosque in northern India there is some educational organisation and the schools attached to the Fatehpuri and Golden Mosques at Delhi and the Dar-ul-Ulm, Deoband, are noted. These institutions generally have a religious or 'national' atmosphere.

The Ayurvedic and Unani Tibbia College, Delhi, founded by the late Hakim Ajmal Khan, is an important unrecognised institution. It provides instruction in the indigenous system of medicine up to the highest standard and also gives some training in surgery.

BOY SCOUTS.

The Boy Scouts movement, initiated in England by Lord Baden Powell (the Chief Scout), has spread widely in India, both among Europeans and Indians. The Viceroy is Chief Scout of India and the heads of Provinces are Chief Scouts in their own areas. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance—inculcating loyalty and thoughtfulness for others—and teaching them services useful to the public and handicrafts useful to themselves.

INDIAN HEADQUARTERS.

Chief Scout for India.—His Excellency The Most Honourable the Marquess of Linlithgow, I. C. S., G. M. S. I., G. M. I. E.

Chief Commissioner.—Captain Nawab Sir Muhammad Ahmad Said Khan, K. C. S. I., K. C. I. E., V. R. E., of Chhatari.

Deputy Chief Commissioner.—Rai Sahib G. Dutta.

General Secretary for India.—N. N. Bhose Esq., B.A. (Cantab.), Bar-at-Law, D. C. C.

Travelling Secretary for India.—G. T. J. Thaddaeus, Esq., B.A., D. C. C. (S. & R.) ; Ak. L. (for India).

Headquarters Council for India.—

President.—The Chief Scout for India

Chairman.—The Chief Commissioner (ex-officio).

Members.—The Treasurer (ex-officio).

The Deputy Chief Commissioners (ex-officio)

Six Members elected by the Provincial Delegates to the Triennial All-India Conference.

Six members elected by State Delegates to the Triennial All-India Conference.

Secretary.—The General Secretary (ex-officio)

The Boy Scouts Association in India,

The Co-operative Movement.

Rural Poverty.—The outstanding feature of Indian rural economy that is bound to arrest the attention of any observer is the appalling poverty of the rural population. The various estimates, official and non-official, that have been made of the income per head of population in India at various times leave the matter absolutely in no doubt. The Central Banking Enquiry Committee estimates that the average income of an agriculturist in British India does not work out at a higher figure than Rs. 42 a year. The vast magnitude of this evil will be better realised when we take into account the predominance of the agricultural population in India. In 1891 61 per cent. of the total population of the country lived on agriculture, this percentage rose to 66 in 1901 and to 73 per cent. in 1921, in 1931, the percentage has fallen a little to 67. The poverty of the agriculturist may be due to a variety of causes, but we cannot ignore the fact that agriculture has in a large measure ceased to be an industry worked for profit, the cultivator labours not for a net return but for subsistence. The extent of an **average holding** which works out at about 6 acres for an agricultural family of 5 persons is too inadequate to maintain it in ordinary comfort even with the low standard of living which is so characteristic of the rural population of India. Moreover the Indian cultivator is in a large measure exposed to the vicissitudes of seasons and the **vagaries of the monsoon**. In every 5 years there is but one good year, one bad year and three indifferent years. These unfavourable conditions might be mitigated to some extent by a well conceived policy of **irrigation** by the State; but so far, of the total cultivated area in the country about 16 per cent. only has irrigation facilities from rivers, tanks or wells while the remaining 84 per cent. depends merely on rainfall. Thus the frequency of failure of crops, owing to drought and floods and pests, coupled with the low vitality and high mortality of the live stock, render the economic position of the cultivator worse still. The inadequacy of the **subsidiary occupations** to supplement the slender income from agriculture contributes further to his extreme economic weakness. He has sufficient spare time on his hands to devote himself to subsidiary occupations but he has been exposed to the full blast of competition of forces from the rest of the world and many of the industries on which he relied in the past have suffered largely from or been wiped out by the competition of machine-made articles. The recent fall in the world prices of agricultural produce has affected him powerfully for he is now being drawn steadily into the sphere of influence of markets both national and international and he has neither the organisation nor the credit facilities to help him as in countries like the United States of America and Canada and several European countries. In addition to these numerous difficulties, the Indian agriculturist has another serious handicap in this that he is largely **illiterate**. The percentage of literacy

in India is still very low being only 8 per cent. and any progress in agriculture is well nigh impossible without the background of general education. All these factors lead to the most outstanding feature of Indian rural economy—the chronic and almost hopeless **indebtedness** of the cultivator. The Central Banking Enquiry Committee has estimated that the total rural indebtedness in India is about Rs 900 crores. Though indebtedness of the agricultural population has been there from old times, it is acknowledged that the indebtedness has risen considerably during the last century and more especially during the last 50 years. This colossal burden of debt is the root problem which has got to be faced in any attempt towards the economic regeneration of the masses. Numerous causes have been advanced to account for rural indebtedness and we already have pointed out some of the general causes which give rise to it. A peculiarity, however, that we notice is that the debt which remains unpaid during the lifetime of the cultivator who contracted it passes on as a burden to his heirs so that many agriculturists start their career with a heavy burden of ancestral debt which they in their turn pass on with some further increase to their successors. Ignorance and improvidence, extravagance and conservatism have further been held forth as the reasons for the continued growth of this heavy load. A marriage festival in the family tempts him to launch out into extravagance while funeral feasts prove no less costly. All these factors—the uneconomic nature of the agricultural industry, chronic and heavy indebtedness and illiteracy form a thoroughly depressive background of Indian rural economy.

Genesis of the Movement.—It is no wonder under the circumstances detailed above to find that the Indian agriculturist has constant recourse to borrowing and that too not only for any land improvement that he may contemplate but for his current agricultural needs as also for periodical unproductive purposes such as weddings and funeral feasts. The absence of any banking organisation in the country-side has driven him into the arms of the **sowcar** or the mahajan who, while proving a very accommodating person, has exercised a grip on him from which it has been found almost impossible to extricate him. The usurious rates of interest charged, coupled with various devices which increase still further the actual rate of interest, and the numerous services which the sowcar performs as a retail tradesman and the buyer of his produce, make him the dominant force in the village, reducing the agriculturist to the position of a serf, toiling for generation after generation, without ever hoping for a release from his clutches, getting bare subsistence as a reward for all the trouble that he might take and therefore becoming listless, fatalistic and absolutely unprogressive. In 1883 the Land Improvements Loans Act was passed and this was followed in the next year

by the Agriculturists Loan Act enabling Government to advance loans repayable by easy instalments and at low rates of interest for improvements and also for current agricultural needs. In 1892 Sir Frederick Nicholson submitted a report to the Madras Government on the possibility of introducing land and agricultural banks and the discussion thus initiated by him was continued by Mr. Dupernex of the U. P., in his "Peoples' Banks for Northern India". The caste system of the Hindus had the ideas of common brotherhood among the Moslems were evidences of the peoples' natural aptitude for co-operation and the *madras* of Southern India furnished a practical proof of this aptitude. The Government of India in 1901 appointed a committee to consider the question of the establishment of agricultural banks in India and the report of this committee resulted in the passing of the Co-operative Credit Societies' Act of 1904. The co-operative movement was thus launched in India on the 25th March, 1904. The Act aimed at encouraging thrift, self-help and co-operation amongst agriculturists, artisans and persons of limited means and the societies that were to be started were intended to be small simple credit societies for small and simple folks with simple needs and requiring small sums only. Knowledge of and confidence in their fellow members which are the keynote of success were ensured by providing that a society should consist of persons residing in the same town or village or group of villages and should be members of the same tribe, class or caste. In order to provide facilities in urban areas for the small man, urban societies were also permitted. The Act introduced the principle of unlimited liability for rural societies following the Raiffeisen system in Germany, though it permitted urban societies to choose the Schulze-Delitzsch model. The local Governments were empowered to appoint special officers called Registrars of Co-operative Societies, whose duty it would be to register societies formed under the Act, to get the accounts of such societies audited by a member of their staff and in general to see that the societies worked well. The seed thus sown has grown to-day in the course of 36 years into a fine tree with twigs and branches, spread out in many directions. In spite of several weaknesses in the co-operative movement in India to-day, it is beyond dispute that the movement has been a powerful instrument towards the awakening of the country-side and has led to a steady improvement in various directions of the life of the Indian cultivator. Moreover, the use of the vote, the elective system, self-help, self-reliance, compromises, gives and takes, work on an organized plan, rounding of angularities are great items in the training up of a citizen and the co-operative societies have been great schools for political and civic education. Since the launching of the movement in 1904, there have been amendments of the co-operative law and committees and commissions, of enquiry to remedy defects and to suggest further lines of action. These we shall note later on.

Growth of Co-operation.—In the first few years of the movement the number of societies grew up very slowly but the growth was considerably accelerated from 1910 and the average

number of societies from 1910 to 1915 was about 1,100. The pace of growth still further quickened and now there are 92,467 agricultural societies and about 11,124 non-agricultural ones. Table 1 shows the distribution of these societies by provinces. It will appear from the table that progress in different parts of India has not been uniform. Bengal, the Punjab and Madras have the largest number of Societies—while the other major provinces like Bombay, Bihar and Orissa, the United Provinces and the Central Provinces, Burma and Assam show distinctly smaller figures. The Punjab with over 21,000 societies stands first in the number of societies (91) per one lakh inhabitants, while Bengal which has a larger number of societies than the Punjab stands second in that respect with 47. The progress in smaller areas, like Coorg and Ajmer-Merwara, must be regarded as very satisfactory in view of their small population, since the number of societies per one lakh inhabitants works out in their case at 125 and 118 respectively. It is satisfactory to note that the co-operative movement has spread not only among the British Indian Provinces but also in Indian States and compared to the total population, Bhopal and Gwalior lead in this matter though the premier States of Kashmir, Mysore, Baroda and Hyderabad have also made considerable progress. Even more instructive are the figures in Table 2. The total number of members of primary societies stands on the 30th of June 1934 at 43 lakhs. Taking the normal family at a little under 5, it is clear, therefore, that more than two crores of the people of India are being served by this movement. There is no single movement in the country fraught with such tremendous possibilities for the uplift of masses as the co-operative movement and there is no single movement with such a large percentage of the population affected by it. Though the Punjab leads in the number of members of societies (30) per one thousand inhabitants, Bombay comes next with 26.8, while Madras and Bengal rank thereafter. This shows that the size of societies varies in different provinces and that Bombay, while having a smaller number of societies, has a larger average of membership per society as compared with the other provinces of British India. Of the smaller areas, Coorg takes a leading place with 74 members per one thousand inhabitants, while Travancore has an average of 44.5. Membership is a much better test in many respects of progress than the number of societies and from this point of view, the progress in Bombay, the Punjab, Coorg, Travancore and Bhopal must be regarded as distinctly satisfactory. There is, however, a third aspect also of the growth of the movement. Merely the number of societies, or the membership in the societies is not an index of the work that is being done and of the benefits which are being conferred by the movement on the population affected. The societies are predominantly credit organisations or rather small banking institutions and the part that they play can be better appreciated from their working capital than from merely the number of members. In this direction also we must note the marvellous progress so far achieved by the movement. From about Rs. 68 lakhs, which was the average up to 1910, the working capital has advanced very rapidly and stands to-day at about Rs. 96

crores. It is pleasing to note from Table 3 that this large sum has been derived mostly from non-Government sources. The share capital, the reserve fund and the deposits from members together contribute about Rs. 35 crores and this is really owned capital or the members' own money. The provincial or central banks and other societies contribute a little less—30 crores while the non-members or the outside public contribute about 30 crores. This latter item shows to a remarkable extent the growth of public confidence in co-operative institutions and speaks well in general of the management of the societies and the very useful purpose they serve in the banking organisation of the country. The distribution of the working capital by provinces and States gives us a further insight into the progress made in this direction by the co-operative movement in different parts of India. The Punjab leads in this respect also with 125 annas per head of population while Bombay comes next with 118. Madras and Bengal fall behind with 55 and 56 respectively. Among the smaller areas, Ajmer-Merwara comes out first with 144 annas per head of population while Coorg follows with 107. Of the Indian States, Indore takes the first place with 88, while Mysore, Baroda and Bhopal follow with 53, 51, 48 respectively. Bombay stands an easy first in the matter of deposits from members which amount to over three crores out of a total working capital of about 16 crores and this is one of the best tests of the success of a co-operative society. It is obvious from a glance at the figures in the tables that there has been very rapid progress in the number of societies, in their membership and in the working capital of these societies. The Punjab, generally speaking, leads in many respects with Bombay coming close behind. The smaller areas and the Indian States have also achieved considerable progress though the movement there started comparatively later. The agricultural societies predominate in all the provinces and States while non-agricultural, that is, urban societies show a much slower development. While there is much room for satisfaction at the phenomenal growth of the movement in rural and urban areas, it must be admitted, however, that merely the figures of the number, membership and working capital are not enough to base conclusions upon. But before we proceed further, we must now explain the chief component parts of the structure, as it has now been built up, of the co-operative movement in the country.

Financial Structure of the Movement.—Apart from the comparatively few co-operative societies at present working in India for non-credit purposes, it must be recognised that whether in urban or rural areas, a co-operative society largely means a small bank or a credit institution for providing financial accommodation to its members on a co-operative basis. Of these credit institutions, by far the greater proportion is rural. The rural credit society has, for its main purpose, the financing of the agriculturist and as such it needs funds. The original idea of co-operative credit lies in making available to the needy the surplus of the well-to-do brethren through the medium of the society, but in Indian villages, the well-to-do and the

needy rather form distinct groups, the former playing or trying to play the sower. Thus instead of comprising more or less all sections of the population of the village, the society is rather made up of the needy section only, at any rate, very largely. Even otherwise, the slender savings of the well-to-do would not be enough to meet the wants of the needy and each village society is not, therefore, able to be self-sufficient, making available the deposits of its well-to-do members as loans for the needy ones. The heavy load of unproductive debt of the average Indian farmer, his habit of investing his savings, if any, in lands and ornaments, and his illiteracy and consequent lack of the banking habit, soon made it apparent that the rural credit societies could not be expected to raise the required funds in deposits either from members or locally. The question of funds for the working of a rural co-operative Society thus becomes a vital question indeed. Central banks have therefore been brought into existence at the district head-quarters in order to raise money from towns and make them available to the primary rural societies. Following up the idea further, it has been found necessary to have a provincial bank at the provincial head-quarters to serve as a balancing centre for the central banks and to make available larger funds for the primary societies through the central banking institutions. The financial structure of the co-operative movement is thus largely composed of three parts—(i) the Agricultural Credit Society, (ii) the central financing agencies, and (iii) the provincial banks. Obviously one more part in the structure seems possible and desirable, namely, an Apex All-India Co-operative Bank. So far, however, such an All-India Bank has not been started and the provincial banks have been content with an All-India Provincial Co-operative Banks' Association.

Agricultural Credit Societies—The success of these societies is closely related to their very peculiar constitution. In an ordinary joint stock company, a member is liable only to the extent of the value of his share holding and his liability is therefore limited; but in the case of agricultural credit societies, the liability is unlimited, that is to say, members are jointly and severally liable to the creditors of the society for the full amount of the debts incurred by it. Such a liability would never be acceptable to any person, unless he was imbued with the broader vision of brotherhood between members and unless he himself had an active voice in the management of the society and had a more or less full knowledge of the character and antecedents of his fellow members. Co-operative credit is the capitalisation of character and unlimited liability is the great instrument to secure the admission into a society as members of these persons only, who by their character and antecedents deserve to be taken into that brotherhood which imposes such an obligation as unlimited liability on all, so that they either swim or sink together. To secure success, therefore, the proper selection of members is of the utmost importance; and it has been unfortunate that in India this has not been in practice as well kept in view as it should have been, in the eager desire to promote the formation of more and yet more societies.

Credit is a blessing only if turned to productive account; if used up for unproductive purposes, it is a curse. It would enrich the producer but it would only impoverish the consumer. It is capable of fruitful employment by the intelligent but it leads the illiterate and the ignorant towards perdition. The Indian agriculturist needs money for productive purposes, such as his current agricultural needs, land improvement, purchase of stock and implements, manures and seeds as also for unproductive purposes, such as repayment of old debts, weddings and funerals. He thus requires credit not only as a producer but also as a consumer—a producer who hardly makes profits from his industry and a consumer who has no past savings to enable him to tide over a bad period, but who is a perpetual borrower ready to live for to-day and letting the to-morrow take care of itself. He is besides ignorant and illiterate and though sufficiently conversant with the routine of his industry, hardly awake to the need or scope for improvements in his methods. Under such circumstances, it is imperative for the management of the rural co-operative society very carefully to scrutinise the loan applications and examine the purpose for which loans have been asked and to see carefully that the loan when sanctioned is used for the specific purpose. And yet, it is in this respect that there is considerable scope for improvement.

The funds of an agricultural credit society are raised from entrance fees, share capital deposits or loans from non-members, loans from the central or provincial banks, loans from Government and the reserve fund. The income from entrance fees and share capital is small compared with the financial requirements of the members. The large sources from which funds are derived are deposits and loans. The volume of deposits which a society is able to secure on terms offered by it is an index of the measure of the public confidence it has inspired and the soundness and the stability of its financial position. The ideal placed before these societies is the development of members' deposits to the extent of making the society financially self-sufficient. These deposits by members further serve the purpose of stimulating thrift and saving habit among them, and are, therefore, eminently desirable. Attempts are everywhere made to encourage them, but the response has been small, except in the province of Bombay, where it forms about $\frac{1}{4}$ of the total working capital. Loans from central banks therefore furnish the bulk of the working capital of these agricultural credit societies at present.

Low dividends and voluntary services resulting in low cost of management have made it possible to divert a substantial proportion of the profits of these societies to reserve funds, and thereby provide against unforeseen losses, bad debts and losses on the realisation of certain assets such as by investment depreciation. The general practice in regard to the use of the reserve fund in the business of the societies is that it is used as ordinary working capital.

The funds collected by the agricultural credit societies in India at present are by no means negligible. They aggregate to about 34 crores

of rupees. Their financial position as on the 30th of June 1933 stood thus:—

	In thousands of rupees.
Share capital	4,37,19
Reserve Fund	8,56,40
Deposits	3,15,57
Loans	17,89,02
Total Working Capital	33,98,78

The figures show that these tiny agricultural societies in India work with over Rs. 16 crores of their own capital (including members' deposits in this head) as against their outside borrowed capital of about Rs. 18 crores. The owned capital was thus about 47 per cent. of their total working capital, and this proportion is rising steadily as years pass by.

Central Financing Agencies.—The formation of banks in urban areas on co-operative principles, with the sole object of raising funds for advances to societies having been found necessary to place the financial structure of the movement on a sound basis, the Co-operative Act of 1904 was amended in 1912 and the Co-operative Societies Act II of that year provided for the registration of central banks with the sole object of financing societies. Soon thereafter the number of central financing agencies grew rapidly all over the country, especially in the United Provinces. The function of these central societies was not only to supply the required capital to the primary societies but also to make the surplus resources of some societies available for other societies suffering from a deficiency of funds and to provide proper guidance and inspection over them. On the 30th June 1934 the number of central banks was 603.

There are four main sources from which a central bank derives its working capital which stood in 1933-34 at 30.9 crores: (a) Share capital, (b) Reserve, (c) Deposits, (d) Loans.

The paid up share capital and reserves of central banks constitute the owned resources of these banks as distinguished from borrowed resources and provide the guarantee fund against which additional funds are raised by them in the shape of deposits or loans. It is usual to prescribe a suitable proportion between the owned and borrowed resources of central banks in each province. The most usual proportion observed in practice between the borrowed and owned resources in all parts of the country is 1 to 8. Deposits from members and non-members constitute the bulk of the borrowed capital of central banks. The total amount of deposits held by central banks in the year 1933-34 from individuals and other sources amounted to Rs. 18.4 crores, and from primary societies to Rs. 3.1 crores. Deposits in central banks are mainly of two kinds, viz., savings and fixed. Current deposits are not universal but confined only to selected central banks in selected areas. The principle usually observed by these banks is not to grant loans to societies for periods longer than those for which deposits are available and where loans for long periods are advanced, the periods of deposits are also comparatively

long. In addition to funds obtained by deposits, central banks raise loans either from outside banks from other central banks, from the local provincial bank or from Government. The total amount of loans held by the central banks in 1933-34 from outside banks, from other co-operative banks and from the provincial banks was Rs. 30 crores and from Government Rs. 49 lakhs. Excepting in Burma and recently in Bombay in connection with land mortgage banking operations central banks in other provinces of British India do not directly borrow loans from Government; the central banks of Indian States, excepting Mysore, do to a greater or less extent hold loans from Government, while in Gwalior, loans from Government constitute the most important item of the total working capital. Borrowings from outside banks are generally confined to accommodation obtained from the Imperial Bank of India against Government Securities or Promissory Notes executed by societies in favour of the central bank and endorsed by the latter in favour of the Imperial Bank. This accommodation is, however, limited and advances from other joint stock banks are also now rare. The main source of loans is, therefore, the provincial bank, and where a provincial bank exists, the central banks are generally prohibited from having any direct dealings with either the Imperial Bank or any other joint stock bank or with one another. This rule is however not rigidly observed in the Punjab and Madras. Several central banks in the country, due to their long standing, now possess sufficient resources to be independent of any outside financial assistance but they all continue credit arrangements mainly with the provincial bank on which they rely for emergencies.

In the initial stages, several central banks developed from ordinary urban societies which granted advances to individual shareholders. A few of such central banks have continued the practice and the amount advanced by central banks to individual members during the year 1933-34 was Rs. 99 lakhs chiefly in the Punjab, Bombay and Madras. This practice, however, is gradually being abandoned as the chief function of a central bank is to finance societies and to serve as their balancing centre. The total advances made by central banks to societies at the end of the year 1933-34 amounted to over Rs. 8.4 crores.

After meeting management expenses the profits of central banks are distributed as allocations to reserves and dividends to shareholders. The combined net profits of the 603 central banks of the country during the year 1933-34 amounted to Rs. 40 lakhs on the total working capital of Rs. 31 crores; the rate of dividend paid varied from 8 to 10 per cent. in different parts of the country but the most usual rate paid was 6 per cent. per annum.

Provincial Co-operative Banks.—In India, at present, all the major provinces except the United Provinces have apex banks functioning in them. There are apex institutions in two of the Indian States, Mysore and Hyderabad, though in the others also there are institutions corresponding to the apex bank or functioning as such. The Bank in Burma being in liquidation, there are nine such institutions in all out of

which, seven are in British India and two in the Indian States. The constitutions of these institutions vary considerably; but the functions of all these institutions are more or less the same, namely, the co-ordination of the work of the central banks and provincialization of finance in them. It is found that in a large majority of the apex banks, the constitution is a mixed one, that is, both in the general body of the banks as well as in the directorate, there are individual shareholders as well as representatives of co-operative societies and central banks.

All apex banks both in British India and in the Indian States depend for their working capital largely on deposits from the affiliated co-operative societies as also from the public. It is, therefore, thought necessary to insist upon the maintenance of fluid resources on a certain scale and in some provinces the Government of the province has prescribed definite rules with regard to the maintenance of fluid resources. The period for which deposits are accepted determine the maximum period for which they can lend out these borrowed funds to their clients, and in every province the apex bank has fixed for itself a maximum term, beyond which no loans are, in general sanctioned to the borrowing client. The following figures will clearly show the position and transactions of the apex banks in 1933-34.—

Provincial Banks, 1933-34.

	In thousands of rupees.
Working Capital—	
Share Capital	67.75
Reserve and other funds	62.51
Deposits and loans—	
from Individuals	4,97.02
from Provincial and Central banks	3,97.31
from societies	64.34
from Government	11.22
Total ..	11,01.06
Loans made during the year to—	
Individuals	3,86.14
Banks and societies	2,20.69
Total ..	6,06.83
Loans due by—	
Individuals	8.00
Banks and societies	4,20.70
Total ..	4,28.70

While accepting deposits from co-operative banks and the general public, most of the apex banks have also dealings in current account with the latter. The Punjab bank does not encourage such accounts with individual non-members, as it does not wish to enter into competition with central banks. Apex banks also generally carry on ordinary banking business, such as collecting hundis and dividends from companies and collecting the pay and pensions of public servants. The provincial banks of Bombay, Madras and the Punjab have floated long-term debentures. The Bombay bank has so far issued debentures of the value

of Rs. 9.8 lakhs and these debentures are recognised as a trustee security. The bank at Madras has floated debentures of the value of 2.18 lakhs on the security of a floating charge of the general assets of the bank, while the Punjab bank has issued debentures of the value of 5 lakhs. As in every banking institution, these banks also are frequently troubled with surpluses and deficits, though at different times in the different institutions. There is therefore interlending of surplus funds between these apex banks, and during the period of shortage of funds, deposits are accepted from surplus banks, and some of them call for special season deposits allowing favourable rates of interest to tide over the period of shortage. The All-India Provincial Co-operative Banks' Association enables the member banks to ascertain which of them are surplus in the period and by correspondence to arrange for inter-provincial borrowings.

Overdues.—Among the most important tests of the success or otherwise of a co-operative

credit society is undoubtedly the promptness in repayment of loans by members and it is in this respect that one has to recognise that in India, the societies have not attained any very great measure of success. On the 30th June 1934, the overdue loans in agricultural societies amounted to Rs. 13,01,26,983 as compared with Rs. 13,00,76,376 the year before; the working capital of the agricultural societies was Rs. 33,98,77,947; the loans due by individuals were Rs. 27,03,7,921. The overdue loans were therefore 38 per cent. of the working capital and 48 per cent. of the total loans due by individuals. The position is however rendered more serious when one realises that the figures are considerably obscured by book entries and extensions of the date of repayment and in some cases, by the farmers' borrowing from the sowcar to pay the society's dues and that the percentages represent merely an average for all-India. The following table shows the position by different provinces on the 30th June 1934.

Overdue Loans in Agricultural Societies, 1933-34.
(in lakhs of rupees.)

Province.	Working Capital	Loans due by individuals	Overdue loans by individuals.	Percentage of overdue loans to	
				Working capital.	Loans due.

Others90	.77	.12	13	16
Total	33.99	27.03	13.01	38	48

The position has since June 1933 grown more serious, since the fall of prices of agricultural produce and the world crisis and trade depression have reduced the repaying capacity of the agricultural borrower considerably and increased the terrible load of overdue loans in rural credit societies. This continued growth of overdue loans is an ominous portent and reflects very badly on the soundness of the co-operative structure. The loans having been based on the basis of the assets of members, the ultimate solvency of the societies is beyond dispute, but severe pressure on members and the consequent wholesale liquidation of societies would react very seriously both politically and economically. The causes that have led to this

phenomenon, which menaces the entire existence of the co-operative movement are chiefly to be found in not basing the loans sanctioned on the repaying capacity of the borrowing member, in sanctioning loans for unproductive though perhaps necessary social or domestic purposes or for the redemption of old debts and generally in the uneconomic nature of the agricultural industry. The loose scrutiny of the purposes stated in the loan applications and the absence of a careful watch on the way the loan is spent by the members, which must be the case, where almost every member is a borrower or a surety to other borrowers and where the societies are composed almost wholly of the needy section of the village, the well-to-do standing aloof, the

remissness in exerting pressure and in taking action against the defaulter, even when he is wilfully defaulting, add considerably to the growth of this menace of excessive overdues. The central financing agencies are more concerned with the assets that in the last resort are the security for their lendings and, with more funds than they could use, are more eager even than the Registrar himself for organising new credit societies.

Land Mortgage Banks.—The loans advanced by co-operative societies to their members and by the central financing agencies to their constituent societies are, from the very nature of the source from which they derive the bulk of their finance, for short or intermediate terms only. By concentrating upon the growth and multiplication of rural credit societies and thus upon facilities for short and intermediate term loans, the co-operative movement did not provide for the redemption of old debts or for increasing the earnings of agriculturists which alone would prevent any further increase in their debts and pave the way for the paying off of the old ones. It does not seem to have been adequately realised that the removal or the lightening of the heavy load of indebtedness does not depend so much upon the easy terms on which co-operative finance can be made available, as upon the ascertainment of the amount of individual indebtedness to the sowcar, upon so fully financing the agriculturists that they could be prevented from resorting to the sowcar any more, and above all on making agriculture an industry sufficiently paying to leave a little saving after all legitimate current expenditure on agriculture and the household has been met, so that this saving could be applied to the liquidation of old debts. The mistaken notion associated with the start of the movement that co-operative credit could serve this purpose and which has clung more or less till now as evidenced by permitting this purpose to be regarded as a legitimate purpose for loans is largely responsible for increasing the load yet further. Short or intermediate term loans can, if judiciously employed, prevent any further increase in the burden, though even that in the present state of uneconomic agriculture seems scarcely possible; but it cannot leave any adequate margin of saving which could be employed to redeem past follies or misfortune. The sowcar, it is often forgotten, is the village retailer as also the purchaser of the villagers' produce and what he cannot recover from the borrower by way of interest or the part payment of the principal of the loans, he can more than make good on the threshing floor or in his shop. The co-operative movement by concentration on the credit side has attacked him on one front only, so that the risks of non-payment are saddled on the society while the profits of the merchant and the retail shop-keeper are still enjoyed by the sowcar, the attack ought to have been on all fronts. However, under the circumstances, the clarification of the situation of indebtedness is most desirable as a preliminary towards tackling the important questions of the redemption of old debts. The Indian Central Banking Enquiry Committee has wisely emphasised the need for a vigorous policy of debt conciliation on a voluntary basis and for exploring the possibility of undertaking legislation to secure, if need be, the

settlement of debts on a compulsory basis. A simple Rural Insolvency Act as recommended by the Royal Commission on Agriculture and endorsed by the Central Banking Committee would also be an important step towards liberating those, who have already given up all their assets, from the incubus of ancestral and old debts, so that at least they and their heirs could start with a clean slate. In any case, the need for long term loans to the agriculturists for land improvement and for the redemption of old debts seems obvious, and it has now been recognised that the time has come for the provision of this facility by the starting of land mortgage banks.

There are three main types of such banks. The strictly co-operative type is an association of borrowers who raise credit by the issue of mortgage bonds bearing interest and made payable to bearer and is well illustrated in the German *Landschaften*. The commercial type is represented by the *Credit Foncier* of France, which works for profit and declares dividends. The third type—the quasi co-operative has a mixed membership of borrowers and non-borrowers, operating over fairly large areas and formed with share capital and on a limited liability basis. The banks organised so far in India are in a sense of the co-operative type, though strictly speaking they belong to the quasi co-operative variety, admitting as they do to the membership a few non-borrowing individuals for attractive initial capital as well as business talent, organising capacity and efficient management.

At present there are 12 co-operative land mortgage banks in the Punjab. Two of these operate over whole districts, the rest confine their operations to a single tehsil. Bombay has 15 land mortgage societies, which have only recently started their operations. Bengal has two, Assam has five, while Madras has 38 primary land mortgage banks and a central land mortgage bank has been started recently. It is too early to pronounce on the success or otherwise of these few banks. Among the objects for which these banks advance loans are the redemption of old debts, improvement of land and method of cultivation and the purchase of land in special cases. The Central Banking Committee think however that for a long time to come the resources of these institutions will be mainly required for enabling the cultivator to redeem his land and his house from mortgage and to pay off his old debts. One feels, however, extremely doubtful whether the emphasis should not be laid on the intensive and extensive development of agriculture, since as pointed out above, unless agriculture becomes a paying industry, the redemption is impracticable and illusory. The bulk of the funds of these banks will have to be raised by debentures and for these purposes, there will have to be in the provinces central land mortgage banks as in Madras and in Bombay. Government will have also to render assistance to these institutions for the success of the debenture issue, and its guaranteeing the interest as in the Punjab ought to meet all reasonable needs, though in special cases there would not be much harm in the Government purchasing debentures of a certain value. While mutual knowledge of and control over one another among members is the

insistent feature in the case of the unlimited liability credit society, the insistence in the case of a land mortgage bank with limited liability is on the capacity and business habits of the directorate, in order to ensure sound valuation of security, careful investigation of titles, correct assessment of borrower's credit and repaying capacity and on the efficient management of affairs.

Propaganda, Education and Training.—

In the initial stages of the movement, it fell on the Registrar to carry on propaganda and organize co-operative societies. For this purpose the assistance of non-official honorary workers was imperative and in the various provinces a band of such workers was brought into existence, who as honorary organisers of the district or talukas actively co-operated with the officials in carrying on propaganda, organising new societies as a result thereof and looking after the societies so started in some measure. With the rapid growth of co-operative societies, however, it was felt that for the further propagation of the movement it was desirable to carry on work by the non-officials in a more organised manner and for that purpose co-operative institutes were started in the various provinces. In some provinces, like Bombay, these institutions are mixed institutions with a membership of individual sympathisers and workers and of co-operative societies. In others, like Madras and the United Provinces, individuals were not admitted as members and the institutions became provincial unions of co-operative societies. In some provinces, like Bihar and Orissa, they became federations of co-operative societies, while in others, like Bengal and Assam, they are known as co-operative organisation societies. Whatever the exact form assumed by these provincial institutions, their functions were more or less the same in all provinces, comprising propaganda and the focussing of non-official co-operative opinion on the various problems that confronted the movement from time to time. They have come to be regarded in an ever increasing measure as the third arm of the movement, the Registrar and his staff representing the administrative side performing more or less the functions assigned to them under the statute, the provincial bank with the central banks and banking unions representing the financial side and as such concerned more with the financing of the movement and the institutes, unions, federations or organisation societies representing the propagandist side and as such concerned more with educating popular opinion and representing non-official views to the authorities. A few years back, the All-India Co-operative Institutes' Association was established, with a view to co-ordinate the activities of the provincial institutes, to formulate non-official co-operative opinion on important co-operative problems from time to time and to encourage the growth of co-operative literature.

It was soon perceived that one of the serious handicaps to the successful working of co-operative societies was the ignorance of the members and the absence of trained men as office-bearers of societies. Illiteracy of the rural population, however, has been found too big a problem for these institutes and they have, therefore, at-

tempted only to spread knowledge of co-operation and co-operative principles to the members of societies and to train up the office-bearers in various ways. Education has thus developed into an important function of these institutes. In Bombay, the Institute has created a special education board which maintains co-operative schools at different centres and conducts periodically training classes suitable for different types of workers and employees of co-operative societies. In the Punjab, however, co-operative education has been organised by the Co-operative Department, though the Punjab Co-operative Union renders active assistance therein. In Bihar and Orissa a permanent Co-operative Training Institute has been established at Sabour in the Bhagalpur Division which is controlled by a governing body which includes the Registrar, and a few representatives of the Co-operative Federation. Madras has organised 6 training institutes. In the United Provinces, Bengal and the Central Provinces, arrangements for co-operative training and education have not yet been properly made, though there also it is the Department assisted by the provincial union which organises the training classes. The need for proper co-operative training and education has been felt in an increasing degree in recent years and the Central Banking Enquiry Committee has recommended very strongly the establishment of provincial co-operative colleges and an All-India Co-operative College for the higher training of more important officials in the Department, banks or societies. No action apparently has been taken till now on these recommendations, but there is no doubt whatever that any serious attempt at improvement of the co-operative societies in the country must include a proper organisation of co-operative education not only for the office-bearers of societies or the managers and inspectors of central and provincial banks but also for the inspectors, auditors and assistant registrars of the co-operative departments. The Government of India have for the last two years have placed at the disposal of each of the Provincial Governments about one lakh of rupees which were being devoted to a better organisation of co-operative training and education for the staff of the co-operative departments as also of other institutions.

In some provinces, like the Punjab and Bihar and Orissa, the provincial union or federation has been actively associated in discharging the Registrar's statutory function of the audit of societies and the Second All-India Co-operative Institutes' Conference held at Hyderabad (Deccan) in 1931 also expressed an opinion that the Registrar's statutory obligation in this matter could be discharged by a system of licensing and that audit should be a function entrusted to the provincial unions or federations. If this idea of a uniform system of audit through the provincial unions be accepted, it will naturally follow that they will also have to assume the responsibility for supervision of the co-operative societies. The departmental audit or inspection by the central banks cannot dispense with the need of careful supervision, which to be effective must be from within and the provincial federation or union is obviously the best agency for this friendly and efficient supervision. The combination of the functions of audit and of supervision as suggested by the

village uplift and carried on an intensive propaganda in that behalf which has led to the formulation of a scheme whereby the work is being carried on earnestly by District Committees under the guidance of the District Collectors, the work being co-ordinated by Divisional officers. The Punjab has appointed Mr. Brayne of Gurgaon fame as Commissioner for Rural Reconstruction and Bengal has made a similar appointment, and it appears that all provincial Governments are devoting considerable thought to this very important work.

Better Living Societies.—The Punjab has been responsible for introducing this very desirable type of co-operative society to promote better living among its members. There are about 800 such societies in that province and they have been doing quite important work in their own way. The societies do not collect any levy from their members, except the small entrance fee and they lay down a programme of work and make rules for carrying it out from year to year, violation of which is punishable with fine under the by-laws. Though these societies in the first instance have for their object the curtailment of ruinous expenditure on marriages and other social occasions, they have also helped in various other matters, so that apart from saving to their members thousands of rupees each year, they are contributing to the general village uplift in some measure. Some of these societies have levelled and paved and swept the village lands, some have promoted sanitation, some have induced the villagers to improve ventilation in their houses, some have repaired and roofed the village drinking well, some have arranged that all manure should be pitte, some have discouraged expenditure on jewellery, and some have stopped waste on farms. Thus in a variety of ways these societies generally have been great factors in the improvement of conditions in the life of the village. It is earnestly hoped that such better living societies will be started in large numbers in the various provinces of India or better still that the co-operative credit societies would take upon themselves the function performed by these societies and that the term better living be given as wide a connotation as possible so that the co-operative movement would be doing good to itself and the nation by carrying on the general work of village uplift, as well as its own economic objective of strengthening the position of the agriculturist.

Urban Credit Societies.—While the chief objective of the co-operative movement was from the first to do service to the rural population, it must be remembered that the Act of 1904 permitted two classes of societies,—rural and urban, recognising thus the suitability of the co-operative method for solving the problems of urban population also. At present there are in all 11,118 non-agricultural societies with a membership of 13,19,151. Of these, 5,319 are credit societies, the rest being societies for other purposes.

An important class of the urban population is that of the merchants and traders, and though the joint-stock banking system that has so far developed in India is quite well suited in many respects for them, from the point of view of the

small trader, it is co-operative banking that is obviously wanted. The importance of **Peoples' Co-operative Banks** promoted for the benefit of urban people without any distinction of caste or creed is, therefore, very great, for the finance of small merchants, artisans and craftsmen for the stimulation of trade and industries in and around district and taluka towns. The principal business of these banks is short-term credit and in this respect they resemble the ordinary commercial banks. In the absence of any industrial co-operative bank, it is also for the peoples' bank to finance small industrialists and help the development of cottage industries, which still play a very considerable part in the industrial economy of India. Another very important function which falls to peoples' banks is the financing of the marketing of the produce of the land from the field to the port or to the principal market centres and thus assist in the development of the internal trade of the country. It is only, however, in the Bombay and Bengal Presidencies that we meet with some good institutions functioning as peoples' banks. In Madras there are 1,074 non-agricultural credit societies but most of these are not real peoples' banks. The Punjab has 1,000 unlimited liability societies and only 107 with limited liability. Even here we hardly find any development of real peoples' banks. In Bengal the limited liability urban credit societies number 500 and though these societies seem to have won public confidence the more important of them are salary earners' credit societies. Some of the divisions especially the Chittagong divisions have several big concerns, however, working on sound lines. The question of starting Peoples' Banks in Bihar and Orissa has not yet been seriously taken in hand. In the Bombay Presidency, institutions with a working capital of Rs. 50,000 and more are classed as urban banks. Since 1922 co-operators in this Presidency have been very keen on having a full-fledged peoples' bank in every taluka town, for it has been realised that with the proper development of urban co-operative banking, there is no doubt that the various units will come into touch with one another and that mutual settlement of terms and co-ordinated and harmonious work will greatly assist the development of inland trading agencies. Peoples' banks are a repository of peoples' savings, a nucleus for co-operative activity and an institution giving facilities for internal remittance and it is quite necessary therefore that their share capital must be pretty large. In the Bombay Presidency on the 31st March 1932 there were 91 urban banks most of which are fairly successful. The total membership was 1,39,379, the working capital was Rs. 3,57,60,347 and the reserve fund amounted to Rs. 19,44,622. It can be said without exaggeration that the development of urban banking has been a distinct contribution of Bombay to the co-operative movement in India and other provinces might well follow Bombay's example in this direction.

An important variant of the urban co-operative society is the **Thrift Society**. The system adopted is to collect regular savings every month for a continuous period of two to four years. Invest the collected amount to the best advantage and pay back to the subscriber his amount at the

end of the term with interest. In many societies, loans are advanced also but not exceeding a certain fixed proportion, usually $\frac{1}{2}$ of the deposits. The Punjab has about 1,000 such societies and the bulk of the members are school masters. There are about 125 thrift societies for women only having a membership of about 2,000. Madras has also more than 100 thrift societies and Bombay has half a dozen. Recently however **Life Insurance Societies** have been started in Bombay, Bengal and Madras. The Bombay society was started in July 1930 and for a few months worked as a provident society only, issuing policies of Rs. 150 to Rs. 500 and that too without medical examination, the idea being to bring life insurance within easy reach of the small man in the village as in the town. It has no share capital and works on a mutual basis. It has now, however, widened its scope and has been writing policies for larger amounts under its ordinary branch, while under the rural branch, besides the ordinary small policies, it has recently issued a scheme for decreasing term insurance, which will, it is hoped, meet the needs of the primary societies and their borrowing members much better. It has by now written a business of over Rs. 20 lacs. The Bengal society is yet a provident society issuing small policies, while the Madras society—the South India Co-operative Insurance Society—has started vigorously as a full fledged life insurance society with share capital and comparatively low rates of premia, and has already written a large business of about Rs. 20 lacs.

Review.—The Co-operative Societies Act of 1904 had limitations which were soon recognised and at a conference of the Registrars, a bill was drawn up which became the **Co-operative Societies Act of 1912**. This Act remedied the defects of its predecessor, authorized the registration of societies for purposes other than credit, substituted a scientific classification based on the nature of the liability for the arbitrary one into rural and urban and legalised the registration of Unions and Central Banks.

In 1914 the Government of India reviewed the situation in a comprehensive resolution and recommended a change in the policy regarding the grant of loans to members, so that they might lend money for domestic purposes as well as for agricultural ones in order that the members might confine their dealings with the Co-operative Societies and be weaned from the sowcars. In 1914, the **Maclean Committee** on Co-operation was appointed and its report in 1915 led to the reorganisation and overhauling of the whole administration of co-operation. Punctual repayment of loans was insisted upon, and all those societies that failed to live up to the ideal of co-operation were sought to be eliminated. From this time onwards the share of non-officials in the movement assumed increasing importance and it came to be realized that for the success of the movement, deofficializing of the same was necessary. The Government of India Act of 1919 made co-operation a provincial transferred subject and the local Governments were left free to adapt the 1912 Act to their own requirements.

The steady growth of the **Central Financing Agencies** relieved the Registrars partly of the need for attending to this very important matter

in the development of co-operation; but propaganda still remained the function of the Registrar and his staff, paid or honorary, and it was perceived that non-official institutions should be established to take over this function from official hands. Accordingly **Co-operative Institutes** were started in various provinces, in some cases as unitary societies reaching down to the village through their branches in the divisions and the district, in other cases as a federation or union more or less complete of the primary societies. The part these non-official bodies began to play henceforth became increasingly important, some adding to the primary function of propaganda, others such as co-operative education, supervision over societies and even audit.

The steady progress of the movement—sometimes even too rapid—for nearly 20 years, however, was found hardly to lessen the colossal burden of the indebtedness of the ryot, for co-operative credit necessarily confined itself to short-term loans. It was in the Punjab that the first *Co-operative Land Mortgage Bank* was started at Jhang in 1920. Soon after other provinces also followed suit.

While the movement was developing at a rapid pace it was found that financially the situation was worsening. Defaults in repayment were becoming increasingly common and **Co-operative Committees of Enquiry** were instituted in various provinces. The Central Provinces thought it necessary to have such a committee in 1922, while Bihar and Orissa followed with a similar committee in 1923. A few years after the Oakden Committee made similar inquiries for the U. P., the Townsend Committee for Madras and the Calvert Committee for Burma. These Committees have carefully analysed the position in their respective provinces and have made recommendations for the consolidation and rectification of the co-operative credit organisation and the extension of the non-credit side of agricultural co-operation. The powers conferred upon the Local Government by the Act of 1919 to modify the Act of 1912 have been exercised so far in but few provinces such as Bombay, Burma, Madras and Bihar and Orissa. Bombay passed the **Co-operative Societies' Act of 1925** incorporating the suggestions made from time to time for the amendment of the previous All-India Act. This new Act made the object of the movement still wider than that of its predecessor and its preamble refers to "better living, better business and better methods of production" as the aim of the movement. The chief features of the Bombay Act of 1925 are the adoption of a scientific system of classification of societies, the improvement of the procedure for liquidation of cancelled societies, the extension of summary powers of recovery to the awards of arbitrators and the provision of penalties against specified offences. The Burma Act came into force in 1927 and the Madras Act in July 1932. Bihar and Orissa has also now passed a similar Co-operative Act of its own recently. The progress of the movement in forms other than credit has not been very remarkable and credit societies still predominate, especially the Agricultural Credit Societies.

The non-credit movement has had naturally more obstacles to overcome than the credit but he former is slowly gathering force in the shape of sale societies for cotton in Karnatak, Gujarat and Khandesh, cattle insurance societies in Burma and Irrigation societies in Bengal and the Southern Division of the Bombay Presidency. Perhaps the most remarkable instance of the co-operative movement in India is to be found in the Punjab where consolidation of holdings has been successfully attempted through co-operation. In the non-agricultural non-credit sphere, a still smaller headway has been made. There are a number of housing societies especially in Bombay, Madras and Mysore, and artisans' societies and unskilled labour societies in Madras. It may be noted that on the agricultural side, co-operative farming has hardly been touched and on the non-credit side the consumers' movement has made but meagre progress.

In 1926, the *Royal Commission on Agriculture* was appointed and co-operation formed only a part—though an important one—of its extensive enquiry. Recently, in consequence of the appointment of the provincial committees under the *Indian Central Banking Enquiry Committee* the co-operative movement in the different provinces has been surveyed. But the provincial committees, for obvious reasons, confined their inquiries to banking in relation to agriculture, small industries and trade. Thus only those aspects of the co-operative movement which have an intimate bearing on the credit needs of the population and the development of banking facilities have been examined, while the need for separate enquiries into the whole movement in the different provinces of the lines of those undertaken in C. P., U. P. and Madras and emphasised by the Royal Commission on Agriculture is still to be met. Bihar and Orissa recently got its movement examined by a committee which has published its report last year. The Government of Bombay convened in June 1933 a Round Table Conference of official and non-official Co-op raters to discuss the problems that confronted the Movement in Bombay. As a result of this Conference, three Committees were appointed, one to examine the system of supervision over Co-operative societies by the Supervising Unions in the Presidency, another to report on the best way to help the agriculturists in these times of falling prices and trade depression, and the third to examine the problem of extension of land mortgage banking on a Co-operative basis. These Committees have not yet submitted their reports, but there is little doubt that their recommendations would lead to a tightening up of supervision, an extension of land mortgage banking and efforts to meet the growth of overdue loans.

The growing difficulties of the Co-operative Movement throughout India in these times of unprecedented depression led the Government of India to hold an All-India Co-operative Conference at New Delhi on the 29th January 1934. This Conference was unique in so far as it was not restricted only to the Registrars

of Co-operative Societies and their advisers from the various provinces and States, but it also included some ministers in charge of Agriculture and Co-operation from the provinces and a representative of each of the two All-India Co-operative organisations—the Institutes' Association and the Provincial Banks' Association. This Conference recommended the enactment of an All-India Co-operative Societies Act so as to permit the registration of Co-operative Societies working in the whole of India or in more provinces than one. It also recommended earnest efforts for the development of land mortgage banks by the Government guaranteeing not only the interest on their debentures but also the capital and suggested the creation of a Central Co-operative Board under the Imperial Government with a small establishment to bring about a closer co-ordination of work between the different provinces and States of India. This last suggestion has met with some opposition, since after the provincialisation of Co-operation under the Montford Reforms of 1914, the provinces do not much fancy the imposition of control from the centre. And yet, there seems to be nothing wrong in the idea of a central organisation, which would be a clearing house for authentic information and stimulate progress through a careful study of experiments and efforts in particular areas and drawing attention of other areas to the success achieved or the deficiencies revealed.

It may also be mentioned that the **Indian States** were not slow in introducing the co-operative movement within their limits, and the movement in some of the more important of the States, such as Hyderabad (Deccan), Mysore, Baroda, Gwalior and Indore has made considerable progress, more or less on the same lines as those followed in the neighbouring British Indian Provinces.

The landmarks in the history of the co-operative movement in India are, the Co-operative Credit Societies Act of 1904, the Co-operative Societies Act of 1912, the MacLagan Committee Report, 1915, the provincialisation of co-operation, 1919, the establishment of institutes, unions and federations for propaganda; the Committees of Enquiry into the co-operative movement in several provinces; provincial legislation; the Report of the Royal Commission on Agriculture, 1928; Reports of the Indian Central and Provincial Banking Enquiry Committees, 1931; and marketing surveys, debt conciliation schemes and land mortgage banking.

The movement has thus developed rapidly and the **stages of its evolution** may be briefly summarised as—agricultural credit, urban credit; central credit organisations, apex co-operative banks; propaganda by non-officials; non-credit agricultural co-operation; urban co-operative banking; long-term loans and debt redemption schemes, land mortgage banks, co-operative education, rectification and consolidation of the credit movement; organisation of supervision over primary societies and rural reconstruction.

Societies : Literary, Scientific and Social.

AGRICULTURAL AND HORTICULTURAL SOCIETY (THE ROYAL) OF INDIA (Calcutta).—Founded 1820. A Class Annual subscription Rs. 32. Entrance fee Rs. 8. B Class Annual subscription Rs. 12. *Secretary* : S Percy-Lancaster, F.L.S., F.R.H.S., M.R.A.S. 1, Alipore Road, Alipore.

AGRI-HORTICULTURAL SOCIETY OF BURMA.—*Superintendent* : T P Joyce, Agri-Horticultural Gardens, Kandawglay, Rangoon.

AGRI-HORTICULTURAL SOCIETY OF MADRAS.—Established 1835. Quarterly subscription for members in Class A Rs. 7, in Class B Rs. 3. *President* : H. E The Governor of Madras; *Chairman* : Mr C. A. Henderson, ICS *Hon. Secretary* : Mr. B. S. Nirody, BA *Hon. Treasurer* : Mr H A Buller, Teynampet, S. W. Madras.

ANTHROPOLOGICAL SOCIETY OF BOMBAY —Founded 1886, to promote the prosecution of Anthropological research in India; to correspond with Anthropological Societies throughout the world; to hold monthly meetings for reading and discussing papers; and to publish a journal containing the transactions of the Society. Annual subscription Rs 10 *President* : K P Masani, MA *Hon. Secretary* : Dr. N. A. Thootli, BA, D Phil. (Oxon). *Office Address* : 172, Hornby Road, Bombay.

BENARES MATHEMATICAL SOCIETY.—Founded in 1918 for the encouragement and promotion of research in the various branches of Pure and Applied Mathematics, and in the History of Mathematics. It conducts a journal "The Proceedings of the Benares Mathematical Society" in which original papers on Mathematics are published and maintains a library. There are about 60 members from all parts of India. Admission fee Rs 10. Annual subscription Rs 12 (Resident members) and Rs 5 (non-resident members). *President* : Dr Lakshmi Narayan, M.A., D.Sc.; *Secretary* : Prof. Chandni Prasad, M.A., B.Sc.; *Treasurer* : Prof. Pashupati Prasad, M.A., B.Sc. 22, Sanpura, Benares City.

BHANDARKAR ORIENTAL RESEARCH INSTITUTE, POONA.—The Institute was inaugurated on the 6th of July 1917, the 80th birthday of late Sir R. G. Bhandarkar, at the hands of H. E. Lord Willingdon, who became its first President. Its objects are to publish critical editions of texts and original works bearing on Oriental Antiquities, to provide an up-to-date Oriental Library, to train students in the methods of research and to act as an information bureau on all points connected with Oriental Studies. The valuable library of the late Dr. Sir R. G. Bhandarkar, which he had bequeathed already to the Institute, was after his demise handed over by his executors to the Institute, and is now located in the Central Hall of the Institute. Since the 1st of April 1918 the Government of Bombay have transferred to the custody of the Institute

the unique collection of nearly 20,000 manuscripts formerly in charge of the Deccan College, together with a maintenance grant of Rs. 3,000 a year. Government have likewise entrusted to the Institute a grant of Rs. 10,000 a year for the publication of the B. S. S. and the Government Oriental Series. The Institute has undertaken to edit *Mahabharata* critically (*Editor-in-Chief* : Dr V. S. Sukthankar), at the request of the Chief of Aundh who has promised a total grant of Rs. one lakh for that purpose. Grants are being received from the Government of India (Rs. 4,000 a year), the University of Bombay (Rs. 3,000 a year) and the Government of Bombay (Rs. 6,000 a year). Burma, Hyderabad (Deccan), Jaroda and Mysore as well as several Southern Mahratta States. The Institute has a Journal called "Annals of the Bhandarkar Oriental Research Institute" published four times a year. It also held under its auspices the First Oriental Conference on the 5th, 6th and 7th of November 1919 under the patronage of H. E. Sir George Lloyd and the presidency of Sir R. G. Bhandarkar. Thanks to liberal donations from the Tatas and the Jain community, supplemented by Grants-in-Aid from the Government of Bombay, the Institute is housed in a fine building near the hills behind the Home of the Servants of India Society. Since August 1927 the Institute has been conducting regular M.A. classes in Sanskrit, Pali, Ardhamagadhi and Ancient Indian Culture. Lectures by Eminent scholars are also delivered occasionally. Membership dues Rs 10 a year or Rs 100 compounded for life. Members can, subject to certain conditions, borrow books from the library and get the "Annals" free and other publications (a list covering about 100 titles sent free upon request.) at concession rates. *Secretary* : Dr. V. S. Sukthankar, MA, Ph D.

THE BHARATA TRITHASA SANSHODHAKA MANDALA, POONA.—Founded in 1910 by the late Mr. V. K. Rajwade and Sardar K. C. Mehendale and registered under Act XXI of 1860 in 1916 with the object of collecting and conserving historical materials, erecting suitable buildings for preserving and exhibiting them, publishing such materials and other works of historical research and generally to encourage and foster critical study of and research in Indian history. Has a building of its own, possesses the best collection of Persian and Marathi historical papers owned by any private society. Has a rare collection of about a thousand Indian paintings, maintains a coin cabinet and an armoury of old weapons. Has a section for Copper plates, sculpture and archaeology and has a library of rare books. Holds fortnightly and annual meetings where notes and papers based on original documents are presented, discussed and afterwards published. Has published 5 volumes of original historical letters and other historical

and literary books whose total number exceeds 75. Conducts a quarterly journal devoted to research. Work done mostly in Marathi. has celebrated the Silver Jubilee by calling an all-India Modern History Congress and is shortly publishing a Commemoration volume. Depends entirely on public subscriptions. Is supported by many chiefs, Jagahdars, Sardars and the public. The late Dr J E Abbot of New Jersey, U.S.A., left by will a gift of 30,000 dollars to the Mandala for buildings and other purposes. Annual membership fees for various classes are Rs 3, 6, 12, 25, 125 and 300 which can be compounded for life by paying ten times the annual subscription of a particular class in a single year. *President* Mr C V. Vaidya, M.A., LL.B., *Vice-Presidents* - Mr N C Kelkar, B.A., LL.B., Shrimant Balasaheb Pant Pratimidihi, B.A., *Ruler of Aumdi Secretaries* Prof D V Potdar, B.A., *Saidar* G. N. Mujumdar, C.I.E. *Treasurer* Mr A V Patwardhan, B.A., *Readers* Mr S N Joshi and Mr. G. H. Khare. *Address* 312-13, Sadashiv Peth, Poona City.

Popat and Dr. M. B. Thakore. *Blavatsky Lodge Building, French Budge, Chowpatty, Bombay.*

BOMBAY NATURAL HISTORY SOCIETY. (Registered under Act XXI of 1860).—Founded 1883 to promote the study of Natural History in all its branches. The Society has a membership of about 1,400 all over the world and a museum with a representative collection of the different vertebrates and invertebrates found in the Indian Empire and Ceylon. In 1921 the Society was entrusted with the management of the Natural History Section of the Prince of Wales Museum, and a great part of the Society's collections have been transferred to that Museum. A Journal is published at varying times during the year which

contains articles on natural history and sport as well as descriptions of new species and local lists of different orders. The Society's library is open to members and books may be borrowed under special arrangement by members residing in the metropolis. The Society's Taxidermist Department undertakes the curing and mounting of trophies for members. Annual subscription Rs 25. Entrance fee Rs 10. *Patrons* H E The Viceroy of India, H. R. H the Prince of Wales. *Vice-Patrons*: H. H. The Maharao of Cutch, G.C.S.I., G.C.I.E., H. H the Maharaja of Jodhpur, K.C.S.I., K.C.V.O., H H the Maharaja of Rewa, K.C.S.I., H H the Maharaja of Bhavnagar, and Mr F V. Evans, Liverpool; Sir David Ezra, Kt., Mr. A. S. Vernay, London. Lt Col. K G Gharpure I.M.S., *Dhulia President* H E The Rt Hon Lord Brabourne, G.C.I.E., M.C., *Vice-Presidents* The Hon Sir Robert Bell, Kt C.I.E. C.S.I., I.C.S., H. H The Maharao of Cutch, G.C.S.I., G.C.I.E. *Honorary Secretary* Mr P M. D. Sanderson, F.R.S. *Curator* S. H. Prater, C.M.Z.S., M.L.C., J.P., *Asst Curator* C. McCann, *Head Clerk* Mr. A F Fernandes, *Gallio-assistant* Mr P F. Gomes. *Offices* 6, Apollo Street, Bombay.

BOMBAY SANITARY ASSOCIATION.—Founded to create an educated public opinion with regard to sanitary matters in general; (b) to diffuse the knowledge of sanitation and hygiene generally, and of the prevention of the spread of disease amongst all classes of people by means of lectures, leaflets and practical demonstrations and, if possible, by holding classes and examinations; (c) to promote sanitary science by giving prizes, rewards or medals to those who may by diligent application add to our knowledge in sanitary science by original research or otherwise, (d) to arrange for homely talk or simple practical lectures for mothers and girls in the various localities and different chawls, provided the people in such localities or chawls give facilities. The Sanitary Institute Building in Princess Street, which has lately been built by the Association, at a cost of nearly Rs. 1,00,000 the foundation stone of which was laid by Lady Willingdon in March, 1914, and opened in March, 1915, is a large and handsome structure with a large Lecture Hall, Library, Museum, etc., and also provides accommodation for King George V. Anti-Tuberculosis League Dispensary transferred to the Municipality in 1924 and Museum and the office of the Assistant Health Officer, (and D Wards, and the Vaccination Station. *Hon. Secretary*: Dr. J. S. Neurker, B.Sc., L.M. & S., D.P.H. (Cantab.), Executive Health Officer, Bombay.

BRITISH AND FOREIGN BIBLE SOCIETY.—Since 1811 the British and Foreign Bible Society has been at work in this country. It has 6 Auxiliaries in India and an Agency in Burma. The first Auxiliary was established in Calcutta, in 1811, then followed the Bombay Auxiliary in 1813, the Madras Auxiliary in 1820, the North India Auxiliary in 1845, the Punjab Auxiliary in 1860, the Bangalore Auxiliary in 1875, while the Burma Agency was founded in 1899. The

Bible or some portion of it is now to be had in over 100 different Indian languages and dialects and the circulation throughout India and Burma reached 1,140,258 issues in 1934. The Bibles, Testaments, and Portions in the various vernaculars are sold at rates which the very poorest can pay and at considerable loss to the Society. Grants of English Scriptures are made to Students who pass University examinations, as under —

The New Testament and Psalms to Matriculates and the Bible to Graduates.

Portions of Scriptures in the important vernaculars have been prepared in raised type for the use of the Blind and large grants of money are annually given to the different Missions, to enable them to carry on Colportage and Bible Women's work. Besides the British and Foreign Bible Society, there is Bible work carried on in India, and Burma in a much smaller way by the Bible Translation Society—which is connected with the Baptist Missionary Society—the National Bible Society of Scotland, the American Bible Society and the Tranquebar Tamil Bible Society.

The following table shows the growth in the British & Foreign Bible Society's work during the past few years in India and Burma :—

TABLE OF CIRCULATION OF THE B.F.B.S. IN INDIA.

INDIA SUNDAY SCHOOL UNION—The India Sunday School Union is an interdenominational organisation having for its object the strengthening of religious and moral education in the Christian schools throughout the Indian Empire. It has six full time workers, both Indian and European. It was founded in Allahabad in 1876. Its General Committee is composed of representatives from the National Christian Council, from the Provincial Representative Councils and from local Sunday School Unions which are Auxiliaries of the I. S. S. U.

The headquarters of the Union are at Coonoor on the Nilgiri Hills, where besides the office and well-stocked book shop, there is the St. Andrew Teacher Training Institution. In this Institution Summer Schools are held where a short but intensive course of study and training is offered to leaders in religious education from all parts of India.

Besides the activities at headquarters, the Union offers courses of lectures in any part of the country, delivered by members of its staff. A Quarterly Journal is published in English, and Lesson Notes for teachers in English and several vernaculars. Text-books on subjects connected with the work of Bible teaching are also published in various languages, and Scripture examinations are organised.

The officers of the Union are as follows:—

President The Hon. Sir David Devadas, Madras.

Vice-President Prof B. B. Malvea, Ph. D. Allahabad.

Treasurers: W. H. Warren, Madras, and J. G. Fritschl, Coonoor, *General Secretary*: E. A. Annett, Coonoor: *Assistant Secretary*: Rev. N. Franklin, Madras.

The most recent statistics show that there are in India 18,322 Sunday Schools with 30,428 teachers, and 707,204 scholars.

INSTITUTION OF ENGINEERS (INDIA)—The organisation of the Institution began in 1919 and it was inaugurated by J. E. Lord Chebassford early in 1921. Its objects to promote and advance the science, practice and business of engineering in India on the same lines as are adopted by the institutions of Civil, Mechanical and Electrical Engineers, in the United Kingdom. The standard of qualification is the same. Membership is divided into five classes, viz. Ordinary Members, Associate Members, Companions, Honorary Life Members and Honorary Members. There are also additional classes, viz. Students, Associates and Subscribers. *President* Rai Bahadur B. P. Sarma, M. I. E., (Ind), *Secretary*: C. C. Seal, Offices: 8, Gokale Road, P. O. Elgin Road, P. O. Box 669, Calcutta.

MADRAS FINE ARTS SOCIETY.—*Patron* H. F. The Governor of Madras, *President* K. Kay, Esqr., *Hon. Secretary*: C. A. Henderson, Esqr., I. O. S., C/o Development Secretariat, Fort St. George, Madras.

MADRAS LITERARY SOCIETY AND AUXILIARY OF THE ROYAL ASIATIC SOCIETY.—The Society's Library has got 100,000 books which are circulated to Members. *Patrons*: His Excellency Lord Erskine, Governor of Madras and the Lord Bishop of Madras.

President: The Hon'ble Mr Justice C. Madhavai Nair, *Hon. Secretary*: Dr. J. Eisel, *Librarian*: Mr. U. S. Plannuel, *Address*: College Road, Nungumbakam, Madras.

THE SOCIETY'S LIBRARY—Possesses a fine library containing more than 97,000 volumes. Admission by Subscription.

NATIONAL HORSE BREEDING AND SHOW SOCIETY OF INDIA—Formed in 1923, by Major-General Sir Bernard James, C. B., C. I. E., M. V. O., who was President from 1923 to 1925. *Objects*: To form a national body of public opinion on horse-breeding matters, to encourage and promote horse-breeding in India; to protect and promote the interests of horse-breeders and to give them every encouragement; to improve and standardise the various types of horses bred in India; to prepare an Indian stud book; and to promote uniformity in all matters connected with horse shows in India. *Patron-in-Chief*: H. E. The Viceroy; *President* (for 1934-35) Brigadier Sir Terence Major, C. I. E., C. S. I., C. M. G.; *Secretary*: Major-General Sir Bernard James, C. B., C. I. E., M. V. O. The Society issues the following publications: "Horse Breeding." An Illustrated Quarterly Journal in English, Stallion Register and Supplement, Indian Stud Book, Record of Country Breed Kaceng, Show Judging Pamphlet. The Second Volume of the Indian Stud Book was published at the end of 1930. The Society holds the Imperial Delhi Horse Show annually in February. *Registered Office*: Delhi.

NATIONAL INDIAN ASSOCIATION—Founded in 1870. Its objects are:—(a) To extend in England, knowledge of India, and interest in

the people of that country. (b) To co-operate with all efforts made for advancing Education and Social reform in India. (c) To promote friendly intercourse between English people and the people of India. In all the proceedings of the Association the principle of non-interference in religion and avoidance of political controversy is strictly maintained. It has branches in Bombay, Madras, Ahmedabad, Nagpur and Calcutta. *Hon. Secretary*, Miss Beck, 21, Cromwell-road, London. Publication *The Indian Magazine and Review*, (8 numbers a year) which chronicles the doings of the Association in England and in India, and takes note of movements for educational and social progress. It publishes articles about the East to interest Western readers, and articles about the West to interest readers in the East. *Life Members*—Ten Guineas. Annual Subscriptions. Members one Guinea, County Members, Ten Shillings; Associate Students, Seven shillings and Six pence.

PASSENGERS AND TRAFFIC RELIEF ASSOCIATION. (Established in 1915). *Head Office*—Albert Building, Hornby Road, Fort, Bombay. *Objects*. (a) To ascertain and endeavour generally to obtain redress of grievances of passengers travelling either by Railways, Steamers, Tramways or Motor Buses. (b) To deal with problems of transport in general. (c) To represent to Government, Local Bodies and other authorities as also to Railway Steamship Companies, Tramway Company, carrying passengers and traffic to take all proper and necessary steps to obtain redress of such grievances. (d) To take all proper and necessary steps to obtain redress of grievances and tackling of problems relating to transport in general and (e) To hold or join with other Associations, organisations or Institutions, having similar aims and objects, in holding lectures, gatherings, public meetings etc. and to carry on propaganda to further the objects of the Association and to educate the travelling public and the mercantile community with regard to their rights and remedies.

President Behram N. Karanja, F.P.
Vice-Presidents—Sir C. C. Chubbuck, Elphinstone Road and J. M. Karanjia, Solicitor. *Hon. Joint Secretaries*—Khan Bahadur P. E. Ghamat and Girdhadas G. Munaji. *Asst. Secretary* P. S. Dikshit.

PHILATELIC SOCIETY OF INDIA—Formed March 1897; Annual subscription Rs. 10. *Secretary*, Dr. K. D. Cooper, Candy House, Apollo Bunder, Bombay 1.

PHOTOGRAPHIC SOCIETY OF INDIA (Calcutta)—Annual subscription Rs. 30 (Town members) and Rs. 15 (Mofussil members). Entrance fee Rs. 20 and Rs. 10. The Society is affiliated to the Royal Photographic Society of Great Britain, London, and holds annual exhibitions, distributes a monthly journal to members, and undertakes developing, printing and enlarging work from its members only. There are excellent work-rooms apparatus and reading room at the Society's Headquarters at 229, Lower Circular Road, Calcutta. *Hon. Secretary*, A. Hearn, 229, Lower Circular Road, Calcutta.

POONA SHVA SADAN SOCIETY.—This Institution was started in 1909 by the late Mrs. Ramabai Ranade, the late Mr. G. K. Devadhar, and a few other ladies and gentlemen in Poona and registered in 1917. Its main object is to make women self-reliant and to train them for missionary work undertaking educational and medical activities for their sisters and brethren, especially the former in backward areas and working on a non-sectarian basis. Nominal fees are now being charged for instruction in all classes. There are eight different departments sub-divided into 60 classes. Arrangements are made for training Nurses and Midwives and women Sub-Assistant Surgeons at the Sassoon Hospitals, Poona, and a hostel is maintained for the former and another for those attending the Sub-Assistant Surgeon's Classes. There is a Public Health School affiliated to the Lady Chelmsford League for Maternity and Child Welfare, Delhi, with a hostel. The total number of women and girls including about 150 duplications on the rolls, at these various Centres of the Society is over 1,500. There are in Poona five hostels, three of which are located at the headquarters and the other two in the Somwai Peth for Nurses, etc., under training at the Sassoon Hospital. The number of resident students is above 200 in these five hostels. In connection with the medical branch a Committee has been formed in England, which will enable the Society to send fully qualified Nurses there to undergo further training. Two fully qualified Nurses have so far been sent by the Society for their post-graduate course in Public Health Nursing at Bedford College for women, London, with the partial help of a scholarship of the League of Red Cross Society, Paris. There is an active Infant Welfare centre and ante-natal clinics with the average daily attendance of 50 (excluding expectant mothers). The Society has extended its medical activities in Bombay by undertaking, with the help of two charitable Trusts in Bombay, to work out the scheme of Maternity, Infant Welfare, Child Welfare and General Nursing for the women and children of the Bhatia Community. This scheme has a Maternity Hospital and Nursing Home, and three Infant Welfare centres. Besides, there are Maternity Hospitals and Nursing Homes at Ahmednagar, Ahabag, Nasik, and Sholapur under the management of the society in connection with other organizations. The institution is largely dependent upon public contributions and Government assistance. The annual expenditure of the whole organization now exceeds Rs. 2,50,000. *President*: Shrimant Saubhagyavati H. H. the Tanisashob of Sangli, *Local Secretary and Treasurer*: Mrs. Yashunabai Bhat, *Lady Superintendent and Secretary for Development and Collections*: Mrs. Janakibai Bhat (Kaiser-i-Hind Silver Medal), *Joint Lady Superintendents*: Mrs. Saralabai Nalk, M.A., and Miss Dwarkabai Bhat, B.A., B.T., *Hon. Secretaries, Nursing and Medical Education Committee*: *Joint Hon. Secretaries*: Dr. V. C. Gokhale, M.B.B.S., Dr. N. L. Ranade, B.A., M.B.B.S., and Dr. V. R. Dhamdhare, M.B.B.S.

PRESS-OWNERS' ASSOCIATION, Bombay.—Started on 30th April 1919 to promote the interests of the printing and litho presses and allied trades, to bring about harmony and co-operation among press owners and proprietors and to take such steps as may be necessary in furtherance of the above objects.

Office:—Galwadi, Girgaum, Bombay 4.

President:—Shot Pandurang Javjee, J.P.

Secretary:—Mr. Manilal C. Modi.

RANGOON LITERARY SOCIETY.—*Patron:* H. E. The Governor of Burma, *President:* Sir Thomas Couper I.C.S., *Vice-President:* Dr H. B. Osborn, *Hon. Secretary:* Mrs. C. Peacock, 35, York Road.

RECREATION CLUB INSTITUTE.—This Institution was started in 1912-13 by the members of the Ismaili Dharimic (religious) Library in Bombay. Its central office is in Bombay with branches at Ahmedabad, Ahmednagar, Karachi, Hyderabad (Sindh), Poona, Warangal, etc. The aims and objects of the society are to elevate and improve the social, economic and spiritual condition of the depressed and poor classes of people and with that intent to found primary schools, associations and such departments and to take all constructive means to achieve the above objects. The Institute has 2 orphanages with 150 inmates, industrial works, domestic industries, sales depots, clubs, libraries, etc. It also issues two Anglo-Vernacular papers, *The Ismaili* (a weekly) and *The Nizari* (a monthly). *Hon. Secretary:* Gulamhussein Virjee

ROYAL SOCIETY OF ARTS, INDIAN SECTION.—This Society was founded in 1754 "for the encouragement of Arts, Manufactures and Commerce," and devotes itself primarily to the application of science and art to practical purposes. The Society ranks as one of the three oldest learned societies in England, and numbered among its early members most of the famous Englishmen of the 18th century. During its long history it has been the source of many reforms and improvements in all branches of art and industry, and it is from its activities that most of the more specialised British societies have sprung.

The Society has from its earliest days extended its interests and membership to all parts of the British Empire, and in 1869 it founded an Indian Section, and a little later a *Dominions and Colonies Section*. The Indian Section is under the control of a Committee composed largely of former Lieutenant-Governors of Provinces, and others who have held the highest Indian administrative posts. Under its auspices a series of important lectures on Indian subjects is given each year, which, with the other lectures delivered before the Society, are published in the weekly "Journal" and circulated to members of the Society all over the world. There are a large number of Fellows resident in India. *Patron* H.M. the King, *President* H.R.H. the Duke of Connaught, *Chairman of Council* Colonel Sir A. Henry McMahon, G.C.M.G., G.C.V.O., K.C.I.E., C.S.I.; *Chairman, Indian Section Committee* Shri Atul C. Chatterjee, G.C.I.E., K.C.S.I., *Secretary:* W. Perty, M.A., *As-*

stant Secretary and Secretary, Indian and Dominions and Colonies Sections K.W. Luckhurst, M.A.; *Society's House:* 18, John Street, Adelphi, London, W.C.2.

SERVANTS OF INDIA SOCIETY.—The Servants of India Society, founded by the late Hon. Mr. G. K. Gokhale in 1905, is a body of men who are pledged to devote all their lives to the service of the country on such allowances as the Society may be able to give. Its objects are to train national missionaries for the service of India and to promote, by all constitutional means the interests of the Indian people. Its present strength is 23 Ordinary members, 7 members under training, 1 permanent assistant, and 6 probationers. The Society has its headquarters in Poona with branches at, Madras, Bombay, Allahabad and Nagpur and other centres of work at Dohad in Gujarat; Mayanur, Coimbatore, Mangalore and Calicut in the Madras Presidency, Lucknow in U.P., Lahore in the Punjab and Cuttack in Orissa.

The Society's work is primarily political but as it believes in all round progress of the Indian people, it has always laid equal emphasis on social, economic, educational, labour and depressed class activities and has worked in these fields. The political work is done through the legislatures, the non-official political organizations, deputations to foreign countries and propaganda.

In the field of social, economic and educational work, the Society's activities are equally varied. Some of its members are practically the founders of such institutions as the Poona Seva Sadan, Bombay and Madras Social Service Leagues, the U.P. Seva Samiti, the Bilal Seva Mandal catering for the needs and uplift of the aboriginal tribes in Gujarat. The Seva Sadan has been a model institution for the education of women which gives training to over 1,500 girls and women in all useful directions. It has many branches in different parts of India carrying on social and educational work. The Social Service League has done good co-operative, educational and welfare work for the mill workers in Bombay by starting Co-operative Societies, adult night and technical schools and conducting welfare centres. The Seva Samiti is an unique organization in Upper India doing service to the pilgrims going to religious places such as Hardwar and Benares, and working in times of epidemics. Its Boy Scouts organization is a well-knit body recognised both by the public and Government. Mr. Chitlala conducts the Bhagini Samaj for social, educational work among the Gujarati ladies. The Society has been conducting a model Depressed Class Mission in Mangalore and the Devadhar Malabar Reconstruction Trust activities at Calicut. In the Co-operative movement the Society has done the pioneering work in the Bombay and Madras presidencies. During natural calamities such as floods, famines and epidemics, the Society has done relief work in every part of India. By its work in the Moplah rebellion, the Society has become a household name in Malabar. Mr. Sastri was for many years a member of the Madras University Senate. Mr. Kunzru is a member of the Allahabad and Benares Univer-

sity Senates and Syndicates and Mr. Dube, a member of the Lucknow University Court and of the Lucknow District Local Board.

The Society conducts three papers—*The Servant of India*, an English weekly of which Mr. S. G. Vaze is Editor, the *Dnyan Prakash*, the oldest Marathi daily of which Mr. Lamaye is the Editor and the *Huawad*, a bi-weekly. Mr. Parulekar conducts the *All-India Trade Union Bulletin*, and Mr. A. V. Patwardhan, the *Sanshami Swaraj*, a Marathi weekly for the benefit of the subjects of Indian States. The Society has also published several pamphlets on public questions of the day.

The question of the subjects of the Indian States has also engaged the attention of the Society and some of its members, particularly Messrs. A. V. Patwardhan, S. G. Vaze, and A. V. Thakkar are devoting a part of their energies for that work.

Mr. H. N. Kunzru, is the Vice-President and Mr. S. G. Vaze, the Secretary Messrs. V. Venkatasubbiah, Joshi, Kunzru and David are senior members of the four branches.

The Society is a non-communal, non-sectarian body which does not recognise any caste distinctions.

SEVA SADAN—The Seva Sadan Society was started on the 11th of July 1908 by the late Mr. B. M. Malabari and Mr. Dayaram Gidumal. It is the pioneer Indian ladies' society for training Indian sisters ministrant and serving (through them) the poor, the sick and the distressed. To spread its Gospel far and wide, the first branch was opened at Poona as early as 1909. The Society has its headquarters in Gamdevi, Bombay. The Society maintains the following departments of work. (1) Home for the Homeless (2) Ashrams (Framing Homes); (3) Marathi Normal Classes with a primary School (4) Home Education Classes, (5) Industrial Department including a workroom, Sewing, Cutting, Hosiery, Cooking and Pastry and machine and hand Embroidery are among the chief industries taught. Total number of women in the different classes is nearly 300. Secretary, Miss B. A. Engineer, M.A., LL.B., M.B.E., J.P.

CONSUMPTIVES' HOMES SOCIETY—This Society was started by the late Mr. B. M. Malabari and Mr. Dayaram Gidumal on the 1st of June 1909. It was registered under Act XXI of 1860. Mr. Malabari secured a large grant of land in a Himalayan pine forest in Dharanpur (Simla Hills) from H. H. the Maharaja of Patiala, for a Sanatorium for Consumptives. His Highness also gave a donation of Rs. one lakh. In 1911 by special permission the Sanatorium was named "The King Edward VII Sanatorium." The Sanatorium has its special water works known as the Lady Hardinge Water Works, presented by the late Sir Chinnubhai Madhavai, Bart., of Ahmedabad. The Sanatorium has a Guest House. The Noshirwan Adul Guest House for visitors to Dharampur. It has accommodation for 90 patients including the special Punjab Block built from a grant of the Punjab Government and reserved

for European patients. Most of the blocks and cottages are built by Parsis. The Sanatorium has its own dairy and is called the Bai Pirojbai R. H. Patuck Dairy. The Sir Chinnubhai Madhavai Dispensary has an out-patient department. The Recreation Hall is called "The Sir Bhupinder Singh Recreation Hall" after the name of the Maharaja of Patiala. Mr. Malabari collected an Endowment Fund of about Rs. 67,000 lodged with the Treasurer, Charitable Endowments, under Act VI of 1890. Nearly Rs. 3,06,000 have been spent on laying out the sites, buildings, etc., and the current annual expenditure is about Rs. 56,000. The Senior and Junior Medical Officers are in charge of the Sanatorium. The Office of this Society is situated at the Seva Sadan Buildings, Gamdevi, Bombay. Mr. S. P. Wadia is the Hon. Secretary and Diwan Bahadur K. M. Jhaveri is the Hon. Treasurer.

SOCIETY FOR THE PROTECTION OF CHILDREN IN WESTERN INDIA.—Office and Homes at King's Circle, Matunga.

Founded—To prevent the public and private wrongs of children and the corruption of their morals; to take action for the enforcement of the laws for their protection, and, if necessary, to suggest new laws or amendments of the existing laws; to provide and maintain an organization for these objects; to promote education; and to do all other lawful things incidental or conducive to the attainment of the foregoing objects. Honorary Secretaries: Dr. Mrs. D. A. D'Monte, Mrs. R. P. Masani, Mrs. K. Kania and Mrs. G. B. Soervel Hon. Treasurer: Khan Bahadur H. S. Katrak.

WESTERN INDIA AUTOMOBILE ASSOCIATION—(8, Queen's Road, Bombay).—The objects of the Association include: the encouragement and development of motoring, the improvement of road communications, the provisions for its members of a centre of information and advice on matters pertaining to motoring, the provision for its members of protection and defence of their rights as motorists, free legal advice and defence, facilities for touring abroad and the use of International Touring Documents. Tel. Address — "Windautas" Phone No. 22482.

Patron H. E. The Right Hon'ble Lord Brabourne, G.C.I.E., Governor of Bombay, **President** H. E. Ormerod, J.P.; **Vice-Presidents**. N. M. Chmoy and S. Guevrek, **Members of the Managing Committee**: A. W. Barker, Ranchhodas Harkisondas, Gordhandas Jadavji, J. M. Kamadar, P. P. Kapadia, F. R. B. A., B. E., J. P., M. D. Karaka, T. R. S. Kyneresley, M.C., M.T.C.E., E. A. Nadirshah, B.A., B.E., B.Sc., A. G. A. Norman, S. N. C. Fatuck, A. M. D. Pitt, M. W. R. Sell, and C. H. Reynolds **Secretary**: A. H. C. Sykes, B.A., Assistant Secretary J. J. K. Patel, B.A., R.A., A.C.B.A.

Other Motoring Associations in India, Burma and Ceylon, are: The Automobile Association of Bengal, 40, Chowringhee, Calcutta; Burma Motor Association, Grahams Building, No. 80 Strand Road, Rangoon; The Automobile Association of Ceylon, Chamber of Commerce Building, Port, Colombo; Nilgiris Automobile Association, Ootacamund, Nilgiris; The Automobile Association of Northern India, 75, The Mall, Lahore; Automobile Association of Southern India, Post Box No. 352, Madras; and The United Provinces Automobile Association, 32, Canning Road, Allahabad.

WESTERN INDIA NATIONAL LIBERAL ASSOCIATION—(Founded in 1919).—The Association was formed, in pursuance of clause (b) of Resolution XI of the First Session of the All-India Conference of the Moderate Party, with a view to do sustained work for the political progress and the moral and material welfare of the people; to give expression from time to time to the considered opinion of the Party on matters of public interest; and to inform and educate public opinion in this premiss in support of its views, policy and methods.

The objects of the Association are the attainment by constitutional means of full Dominion Status for India at the earliest possible date. For the promotion of these objects, the Association shall adopt constitutional methods of agitation and work and shall foster a spirit of broadminded liberalism based on principles of liberty, equality and fraternity among the different classes and communities of the people. For the fulfillment of these objects the Association shall carry on educative, and propagandist work by means of leaflets, pamphlets and other publications, (a) representations to Government, (c) meetings or conferences, lectures and all such methods as may be deemed practicable and expedient to educate public opinion, and (d) for advancing the interests of the Liberal Party by organizing and influencing elections to the legislatures, Central and Provincial, to Municipalities and District Local Boards.

The affairs of the Association are conducted by a Council consisting of 46 members who are elected every two years.

President Sir Chimanlal H. Setalvad, K.C.I.E., LL.D., *Vice-Presidents* The Hon. Sir Philozer C. Setluna, K.T., O.B.E. and Sir Cowaji Jehangir (Jr.), K.C.I.E., *Hon. Secretaries* Mr. Kazi Kabiruddin, Mr. J. R. B. Jeejeebhoy and Mr. A. D. Shioff, *Assistant Secretary* Mr. V. R. Bhende.

Office—107, Esplanade Road, Fort, Bombay

WOMEN'S INDIAN ASSOCIATION ("EVERETT." MYLAPORE, MADRAS).—This Association was started in Madras, in July 1917, with aims of service.

Aims and Objects—To present to women their responsibilities as daughters of India. To secure for every girl and boy the right of Education through schemes of Compulsory Primary Education, including the teaching of religion. To secure the abolition of child-

marriage and to raise the Age of Consent for married girls to sixteen. To secure for women the vote for Municipal and Legislative Councils on the same terms as it is or may be granted to men. To secure adequate representation of women on Municipalities, Taluk and Local Boards, Legislative Councils and Assemblies. To secure for women the right to vote and to be elected for the Council of State. To establish equality of rights and opportunities between men and women. To help women to realise that the future of India lies largely in their hands; for as wives and mothers they have the task of training, guiding and forming the character of the future rulers of India. To band women to groups for the purpose of self-development and education and for the definite service of others.

It has 48 branches and over 4,000 members. Each branch is autonomous and works according to the needs of the locality.

The Association grants scholarships to girls, interests women in maternity and child-welfare work in the uplift of the depressed class and in other social and welfare activities for the general betterment of Indian society, has worked successfully for securing Franchise for women in India, (see pages 93 and 94 of the Simon Report, Vol. II) and compulsory education for girls and also actually helped in the passage of Child-Marriage Restraint Act in the Assembly and the Acts for the Suppression of Traffic in women and children and the abolition of the Devadasi system, in the local legislature. Holds regular meetings of women to educate them as to their duties as wives, mothers and citizens, publishes a monthly magazine titled *Stri-Dharma*, now edited by Di (Mrs.) S. Muthulakshmi Reddi for carrying out of the above objects. The Association is an All-India body. Its largest branch being in Bombay and its branches are spread throughout India and flourishing as far as Kashmir and Lashkar. It is found that women everywhere welcome the opportunities given for their self-development and self-expression. The Association is affiliated to all the important progressive women associations in India and throughout the world. It was the initiator of the All-India Women's Conference and the First All-Asian Women's Conference at Lahore. The Madras Seva Sadan and the Madras Children's Aid Society, the Montessori School owe their origin to the efforts of this Association. The Association have now opened a Rescue Home to facilitate the working of the Rescue Section of the Immoral Traffic Act, which have been enforced by Government. The Home was opened on 21st March 1934 by Lady Beatrice Stanley.

YOUNG MEN'S CHRISTIAN ASSOCIATION.—This Association, which was founded by the late Sir George Williams in 1844, is now a world-wide movement, well established in almost every country in both the hemispheres. The aim of the Association is, through its religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men and boys.

The Young Men's Christian Association, though relatively new to India, is spreading rapidly. The 'local' Associations are autonomous and governed by local Boards of Directors. These Associations in Convention elect a National Council which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and Ceylon.

There are now over 60 Associations affiliated to the National Council and many other village Associations with many thousands of members of all races and creeds. The following Associations own one or more buildings which serve as the local headquarters—Allahabad, Alleppey; Bangalore; Bombay, Calcutta; Calicut; Coimbatore; Colombo, Delhi; Galle; Hyderabad; Jubbulpore; Kandy; Karachi; Kunnarakulam; Kottayam; Lahore, Madras; Madurai; Nagpur; Naini Tal; Ootacamund; Poona; Rangoon; Risalpur; Secunderabad; Simla; Trivandrum; Wellington. The others are rented or rent-free buildings.

The work of the National Council and of the local Association is carried on by numerous voluntary workers and Committees, assisted by 85 specially trained full-time Secretaries. A feature of the Y. M. C. A. in India is the international character of its Secretariat. It is made up of 7 Americans, 2 Canadians, 5 Englishmen, 3 Scotchmen, 1 Swiss, 1 Swedih, 4 Anglo-Indians, 1 Dane, 2 Australians, 1 Burman and 58 Indians and Ceylonese.

The work of the National Council (excluding that of the 50 local Y.M.C.As.) called for a Budget of Rs. 1,25,662 in 1933. Of this sum Rs. 28,790 had to be raised from the public in India.

The Headquarters of the National Council is 5, Russell Street, Calcutta. The officers are:—

Patron:—His Excellency the Earl of Willingdon, G.M.S.I., G.M.I.E., G.M.G., G.B.E., Viceroy and Governor-General of India.

President of the National Council:—The Most Rev. Dr. Foss Westcott, Metropolitan of India.

General Secretary:—B. L. Rallia Ram, B.Sc., B.T.

The Bombay Association now possesses four well-equipped buildings:—Wodehouse Road, Lamington Road, Rebbs Street, and Reynolds Road. The President is Mr. C. G. Preke, M.A., B.Sc., J.P., F.R.S., I.C.S. and the General Secretary is Mr. Joseph Callin. In connection with each branch there is a well managed hostel providing accommodation for over 200 young men. These branches are managed by a Committee working under the Board of Directors. Each Branch organisation directs many and varied activities designed to meet the physical, spiritual, social, and mental needs of their members. A Welfare Service agency for labourers started in 1924 is now conducting eight centres, serving mill workers, Municipal menial employees, Port Trust and Railway employees. A programme of education, lectures, physical culture, play and general uplift, profitably fills up the leisure time of the workers and their families. The Association is responsible for the direction of three public playgrounds in the city, which are financed by the Municipality.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION OF INDIA, BURMA AND CEYLON.—This Association founded in the year 1875 was organised nationally in 1896.

The aim of the Association is to unite women and girls of India, Burma and Ceylon in fellowship and mutual service for their spiritual, intellectual, social and physical development. The Association exists for Indian, Anglo-Indian and European girls and women. There are members in the following branches: General 35, Schoolgirl 22, Student 29, Girl Guide Companies 35. The needs of girls are met by physical drill, recreation, clubs and classes, lectures, commercial classes, Bible Study and devotional meetings, and meetings for Social intercourse. Hostels, some of them holding as many as 70 girls, are established where there is a demand for them and the Association, at present, owns 21 including 8 Holiday Homes in the hills. These hostels accommodate working girls, teachers, nurses, students and apprentices. Rates vary according to the residents' salaries and accommodation, though all equally receive the benefits of a comfortable home, good food and wholesome surroundings. The holiday homes provide cheap holidays in healthy surroundings and also accommodate girls who work in the hills during the hot season. In addition to holiday homes Summer Conferences are held annually at Anandagiri, the Conference estate owned by the Association, in Ootacamund. Special Girls' Camps are arranged from time to time in many centres.

Traveller's aid work is done in the large ports, especially Colombo, and a large number of transient guests and visitors are accommodated in the Homes in these centres. The Association also runs employment bureaux through the agency of which many girls find positions. The commercial schools train girls for office and business life. These large Associations are manned by a staff of trained secretaries, some of whom come from Great Britain, America, Australia, New Zealand and Canada. The others are found and trained in India. In many of the smaller branches where the work is of a simpler nature, it is carried on by voluntary workers who render faithful service year by year. The Student Department is affiliated to the World's Student Christian Federation and has 43 branches in the various Schools and Colleges.

The Association, which is affiliated to the World's Young Women's Christian Association is international and interdenominational. Active membership is open to all who declare their faith in our Lord Jesus Christ and desire to serve others in His spirit of love, and Associate membership is open to any girl or woman, regardless of what her religion may be, who wishes to join the world-wide fellowship of the Y. W. C. A. and declare her sympathy with its purpose, and to share in its activities.

The Patroness of the Association is H. E. The Lady Willingdon.

Copies of the Annual Reports and other printed matter can be obtained from the National Office which is at 134, Corporation Street, Calcutta. The official organ of the Association is the leaflet "Everymember" which is issued each month and sent to members and friends of the Association.

ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA.

The Association of British University Women in India was established in 1913. Its objects are —

(1) To facilitate Intercommunication and co-operation between women belonging to the universities of the United Kingdom, resident in India.

(2) To provide a means of keeping in touch with the universities of the United Kingdom, by communication with the British Federation of University Women, and otherwise as may seem expedient.

(3) To act as an organisation which shall afford opportunity for the expression of united opinion and for concerted action by university women.

Membership is open only to those women who hold degrees in any university in the United Kingdom, or hold Oxford or Cambridge Honours Certificates; but Associate Membership is open to women who have studied at a British University for two years and each Branch may admit as Honorary Members women who have advanced the higher education and interests of women.

The Association of British University Women has two branches. The addresses of the Honorary Secretaries are as follows:—

Hon. Local Secretaries.

Bombay	.. Mrs. C. M. Scott, Divisional Engineer's Quarters, Central Telegraph Office, Bombay.
Punjab	.. Mrs. Skemp, Race Course Road, Lahore.

The Delhi and Punjab Branches came into existence in 1918. The Calcutta and Bombay Branches are influential and have repeatedly intervened with good effect to educate public opinion with regard to subjects affecting women. All Branches have, for instance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc., and have supplied, through the International Federation of University Women, information on Secondary Education in India to the League of Nations. They have been the means of introducing women on to University Senates and Municipalities. The Calcutta Branch carried through an important exhibition of Food Products.

The Bombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special sub-committee, organized public meetings for women on subjects affecting their interests about which legislation was being or had been recently enacted.

A valuable part of the work of the Association was the establishment of Women's Employment Bureau in Calcutta and Bombay. They were remarkably successful. The Bombay Bureau was eventually merged into the employment Bureau established by the Women's Council; the Calcutta Bureau has ceased to exist.

As a means of promoting friendships between women from various parts of the United Kingdom, with widely differing tastes and interests and spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform.

This Association is Federated to the "Federation of University Women in India," and thus forms one of the Units of the Indian Federation.

Federation of University Women in India.

This is an organization conceived to unite for service and fellowship all University Women of whatever race or University who may be resident in India. Units representing British Universities, Indian Universities and American Universities severally have existed since 1913 (Britain) and 1920 (India and America) respectively.

These Units are now affiliated to the F. U. W. I. and are as such affiliated to the International Federation of University Women which embraces 31 countries of the world and has its headquarters at Crosby Hall, Cheyne Walk, London.

This International Federation is then a kind of League of Nations in which the University is the Unit: and the opportunities it affords for better understanding for world-friendship, and world-service, will easily be imagined.

As forming one Family, its Members help the common cause of women: they help one another by inspiration and interchange of service they help the country for which as individual Units they stand, inasmuch as that country is swept forthwith by reason of its place within the International Federation alone, into world statistics and the dignity of recognition by the League of Nations at Geneva.

The benefit to Members individually also is great. The Club Houses of the Federation all over the world are open to them. Equally so are all Scholarships and Fellowships offered by the Federation.

During 1929 these last have included. Scholarships from Great Britain and America which gave free tuition, board and residence at certain Colleges to students for a degree residential scholarships at Crosby Hall, valuable Fellowships and Prizes offered chiefly for Medical or Scientific research by Australia and America.

A special scholarship was offered in 1929 by Barnard College, Columbia University to under-graduates from India.

Membership is open to Women Graduates of any University through the Unit representing that University. Colonial Graduates are at present attached to the British Unit.

The Federation has Branches in Bombay, Lahore, Madras, Kodaikanal. Each Branch has its local Committee. But as a whole the Federation is under a Central Committee composed of a President, Hon. General Secretary, Hon. Treasurer, and one corresponding member from each unit.

OFFICE BEARERS, CENTRAL COMMITTEE.

Pending the formation of a Central Committee for 1936, all communications, till further notice should be sent to—

Mrs. Mckenzie, M A., J P,
Wilson College,
Chowpatty,
Bombay 7.

Applications for membership should be made to the Honorary General Secretary who will forward the same by the Local Secretary to whose Unit it may appertain.

ASSOCIATION OF COLUMBIA UNIVERSITY ALUMNI IN INDIA—This is an organization conceived to unite for service and fellowship all Columbia alumni who may be resident in India. It was founded in 1931, and is a constituent member of the Alumni Federation of Columbia University, New York, U S A. There are more than fifty such Columbia Associations including one in London, Paris, Madrid and Berlin. The India Association has its Headquarters in Bombay.

President of the Association : Dr. Jal Dastur C. Pavry, M A., Ph D., 63, Pedder Road, Malabar Hill, Bombay.

SOLO (SOERAKARTA), JAVA *President:* A. T. Jansse *Honorary Secretary:* W. A. Vawder Voordaa, Post Office Every Wednesday at 8-30 p.m., Sociëteit de Harmonie.

The Church.

The Church of England in India became on March 1, 1930, a self-governing branch of the Anglican Communion. Until that date it had been an integral part of the Church of England and its bishops were considered to be suffragans of the Archdiocese of Canterbury. This legal bond was severed by the passing of the Indian Church Act and Measure in 1927, and from the date of severance appointed under the Act, the Church of India, Burma and Ceylon has been free to manage its own affairs, although, as it states in the Preamble to its Constitution, it has no intention or desire "to renounce its obligations to the rest of the Holy Catholic Church and its fundamental principles, but on the contrary acknowledges that if it should abandon those fundamental principles it would break spiritual continuity with its past and destroy its spiritual identity."

Like all the other branches of the Anglican communion the Church of India, Burma and Ceylon is Episcopal. It is composed of fourteen sees, Calcutta, Madras, Bombay, Colombo, Lahore, Rangoon, Travancore and Cochin, Chota Nagpur, Lucknow, Tinnevely and Madura, Nagpur, Dornakal, Assam and Nasik. Of these the first to be erected was Calcutta in 1814 and the last was Nasik in 1930. Vacancies on the Episcopal Bench are filled by election, each diocese electing its own bishop. The bishops rule the Church and to them is reserved the final word in all matters of faith and order, but they rule in conjunction with a system of Councils which has been framed so as to give the greatest possible amount of representation to the whole body of the faithful. The foundation of the system is the **Parochial Council** of which the Parish Priest is the convener and chairman. Every baptised, and confirmed member of the Church residing in the parochial area who contributes, in some recognised way, to the financial support of the Church, is a member of the Parochial Council of the ecclesiastical area in which he resides and is called a Qualified Elector.

Above the Parochial Councils come the **Diocesan Councils**. All Priests holding the Bishop's license are members of the Diocesan Council and to it are sent Lay Representatives elected by the Qualified Electors of every Parochial Council. The Diocesan Councils manage all purely domestic matters and have the right of petitioning the General Council about any subject of wider importance which may interest them. They elect a given number of priests and laymen to be their representatives on the General Council. General Councils are held not less than every three years and usually at Calcutta. They consist of three "Houses," Bishops, Priests and Laymen. Every Diocesan Bishop has a place in the House of Bishops. The other two Houses are formed by the elected representatives of the Diocesan Councils. The three Houses usually sit and vote together,

but any House has the right to meet alone if it desires to do so in order to formulate its policy or classify its opinions. A "Canon" of the Church is a Resolution passed with additional precautions ensuring due consideration by all three Houses. In all questions touching faith or Order the position of the episcopate as the divinely authorised teacher of the Church is most carefully safeguarded and the Bishops alone, without the concurrence of the other Houses, can issue Determinations about both subjects. But no Determination of the Bishops can be the subject of disciplinary action until it has become a Canon.

Every priest before being licensed to work in the Church of India, Burma and Ceylon takes an oath of obedience to the Canons.

The Ecclesiastical Establishment—At the time of the passing of the Indian Church Act and Measure the Government of India acknowledged that it was responsible for providing for the spiritual needs of the Soldiers and Civilians whom it brought out to India. These responsibilities it discharges by maintaining an establishment of chaplains and churches for the four principal denominations of Christians—Anglican, Presbyterian, Roman Catholic and the Free Churches. The Chaplains of the two first named groups are appointed by the Secretary of State for India, the Anglicans on the recommendation of a Selection Committee of which the Archbishop of Canterbury is the Chairman. They are paid by Government and pensioned after a covenanted period of service. Although they form a definite Department of Government they are not subject to the orders of anyone save their own ecclesiastical superiors. The Presbyterian Chaplains are sometimes appointed to stations and sometimes to regiments. The Anglican chaplains are always chaplains of stations and have the pastoral care of all the inhabitants of the station who do not deliberately withdraw themselves from their ministrations, but when troops are included in the number of their parishioners Government orders that they shall have the first claim on their services. The chaplains and their congregations are members of the Church of India, Burma and Ceylon during their residence in India and have full rights of representation in the Councils of the Church. Their right to the use in worship of the Prayer Book of the Church of England is not only acknowledged in the Constitution of the Church but is also safeguarded by clauses in the Indian Church Act.

Government gives to the Metropolitan an annual block grant which is divided between the seven bishops whom Government recognises as having jurisdiction over the Establishment Chaplains and their congregations. These are the Bishops of Calcutta, Madras, Bombay, Lahore, Lucknow, Rangoon and Nagpur.

before 1930 they formed part of the Establishment. One of the difficulties which the Church is facing is that the Government Block Grant is not large enough to provide for all the needs of these bishops. In consequence the Church is struggling to raise Diocesan Endowment Funds to make up deficits. More serious still, however, is the situation brought about by the action of Government in 1924, when in pursuance of a general policy of economy necessitated by post-war conditions it cut down the number of its chaplains by sixty. This set the dioceses a very difficult task. It became necessary suddenly to provide the salaries of Diocesan Chaplains and to furnish funds for the upkeep of the churches of many civil stations previously maintained by Government. Realising the magnitude of this burden Government agreed to help for a period of seven years by means of a very generous Block Grant. The question of the reduction of this grant is now under consideration. If the grant is considerably reduced the situation in most dioceses will be very serious. Either the Church must raise and devote to its European work a greatly increased sum of money or many of the churches in up-country stations will have to be closed. The chief sufferers will be the Anglo-Indian and Domiciled community which on account of "Indianisation" is less able than ever to carry the burden which it seems must inevitably be laid upon it. The difficulty of raising funds for the education of the children of this community and of obtaining priests to work for it becomes greater year by year. Nevertheless the Domiciled Community is the backbone of the Church in India and it is through this community that the conversion of India must come.

The Churches in India have not been wholly blind to these facts and have made desperate attempts to cope with the needs of the community in spite of lack of real support from home. The education of its children is very largely in the hands of the Christian denominations though there are a few institutions such as the La Martinière Schools, on a non-denominational basis, but they are exceptional. In all the large centres there exist schools of various grades as well as orphanages, for the education of Europeans and Anglo-Indians under the control of various Christian bodies. The Roman Catholic Church is honourably distinguished by much activity and financial generosity in this respect. Her schools are to be found throughout the length and breadth of the Indian Empire; and they maintain a high standard of efficiency. The Anglican Church comes next, and the American Methodists have established some excellent schools in the larger hill-stations. The Presbyterians are also well represented in this field, particularly by the admirable institution for destitute children at Kalimpong, near Darjeeling. Schools of all denominations receive liberal grants-in-aid from Government, and are regularly inspected by the Education Departments of the various provinces. Thanks to the free operation of the denominational principle and its frank recognition by Government, there is no "religious difficulty" in the schools of the European and Anglo-Indian communities.

Christian Missions.

The tradition that St. Thomas, the Apostle, was the first Christian missionary in India is by no means improbable. History, however, carries us no further back than the sixteenth century, when a community of Christians is known to have existed in Malabar. Since then the so-called Syrian Church in south-west India has had a continuous life. Except in its infancy this Church (or rather these Churches or the Syrian Christians are now divided into four communions) has displayed little of the missionary spirit until quite recent times. Western Christianity was first introduced into India by the Portuguese, who established their hierarchy throughout their sphere of influence, Goa being the metropolitan see of the Indies. St. Francis Xavier, a Spaniard by race, took full advantage of the Portuguese power in Western India to carry on his Christian propaganda. His almost super-human zeal was rewarded with much success, but many of the fruits of his labour were lost with the shrinkage of the Portuguese Empire. It is really to the work of the missionaries of the Propaganda in the 17th century that the Papacy owes its large and powerful following in India to-day. The Roman Catholics in India number 2,763,598. The total of "Syrian" Christians (exclusive of those who while using the Syrian liturgy, are of the Roman obedience) is 517,227, as against 367,000 in 1901. Protestant Christians (the term throughout this article includes Anglicans) number 3,002,558, an increase of 547,000 since 1911. Thus, the total number of Christians of all denominations in India is now over six millions.

British India was opened to Missions by the Government of India Act of 1813, and the work of the Protestant missions, previously confined to Dutch and Danish India and a few Indian States, may be regarded as having begun to assume its present scale from that date. The statistical results are given above. It is now, however, generally recognized that Christian missions are producing indirect effects in India which lend themselves only incompletely to any sort of tabulation. The main agency of this more diffusive influence of Christianity is the missionary school and college. The Protestant missions fill a considerable part in the elementary education of the country. According to the 1923 *Report of the National Christian Council for India* they are teaching 420,255 children in 12,699 elementary schools, mostly situated in villages. The majority (243,897) of children in these schools are non-Christians. The same is true also of the secondary schools and in a still greater degree of the colleges. The former number 523 with 70,254 male and 25,303 female pupils. There are 40 colleges affiliated to Universities, containing 20,062 male and 1,309 female students. Of these as many as 14,148 are non-Christians. From the standpoint of missionary policy much importance is attached to these agencies for the indirect propagation of the Christian faith. The statesman and the publicist are chiefly interested in the excellent moral effect produced by these institutions amongst the educated

classes, and the higher educational ideals maintained by their staffs. The principal University colleges under Protestant auspices are the Madras Christian College; the Duff College, Calcutta; the Wilson College, Bombay; the Forman College, Lahore, and three women's colleges—the Women's Christian College at Madras, the Isabella Thoburn College at Lucknow, and the Women's Christian Medical College at Ludhiana. The Roman Catholics have a large number of educational institutions, ranging from small village schools to great colleges preparing students for University degrees. But the proportion of Christian students in their institutions is very much larger than in those of the Protestant bodies. The proportion of literates amongst native Roman Catholics is probably lower than amongst the Protestant converts, but compared with Hindus and Mahomedans it is conspicuously higher. The Roman Catholics have some 3,000 elementary schools in which 98,000 boys and 41,000 girls are receiving instruction. In middle and high schools they have 143,000 boys and 73,000 girls and in University colleges about 5,000 students of both sexes. These figures, however, include a large proportion of Europeans and Eurasians, who are an almost negligible quantity in Protestant mission schools and colleges.

More recent, but producing even more wider spread results, is the **philanthropic work** of Christian missions. Before the great famine of 1878, missionaries confined themselves almost exclusively to evangelistic and educational activity. The famine threw crowds of destitute people and orphan children upon their hands. Orphanages and industrial schools became an urgent necessity. But the philanthropic spirit is never satisfied with one kind of organisation or method. A great stimulus was also given to medical missions. **Hospitals and dispensaries** have sprung up in all parts of the mission field; and leper asylums are almost a monopoly of Christian missionary effort. In 1911 the total number of medical missionaries working under Protestant societies in India was 118 men and 217 women, the majority of the former being also ordained ministers of religion. There are 184 industrial institutions in which 59 different arts and crafts are taught, ranging from agriculture to type-writing. In this department the **Salvation Army** hold a prominent place; and the confidence of Government in their methods has been shown by their being officially entrusted with the difficult work of winning over certain criminal tribes to a life of industry. The indirect effect of all this philanthropic activity under missionary auspices has been most marked. It has awakened the social conscience of the non-Christian public, and such movements as "The Servants of India" and the mission to the Depressed Classes are merely the outward and visible sign of a great stirring of the philanthropic spirit far beyond the sphere of Christian missionary operations.

Reunion.—For very many years Indian Christians have shown that they felt much more acutely than Europeans the scandal and disadvantage of the divisions of Christen-

dom. These divisions are due to a very much greater extent than is always recognized to political causes, and in the political conflicts of the sixteenth and seventeenth centuries, when they became crystallised, India had no part. Even those differences amongst Christians which have a purely religious origin and foundation seem to be of very little account to Indian converts. For them the great dividing line is that between Christ and Mahomed or Shiva and Vishnu. Standing before a background of paganism they are conscious of a real fundamental unity in Christ. Compared with the greatness of the gulf which separates Christian from non-Christian, the differences of "confession" and "order" which separate Christian from Christian seem to be wholly artificial and negligible. In consequence the reunion movement, which is noticeable all over the world, is nowhere so strong as in India. In South India it has already resulted in the formation of the South India United Church, which is a group union of five of the principal Protestant communions, and as these bodies are in communion individually with all, or almost all, the other Protestant bodies at work in India the Union may be regarded as a Pan-Protestant Union. The S.I.U.C. is at present negotiating with the Anglican Church. If as seems probable the negotiations are successful the result will amount to a union of all the Christian bodies in South India, except the Roman Catholics, on the basis of the last Lambeth encyclical. This will mean that a real National Indian Church will come into being. Although it will be tolerant of almost every expression of Evangelical opinion and will retain the freedom of development characteristic of Protestantism, by its acceptance of the Catholic creeds and the Historic Episcopate, it will be linked up with the Catholic tradition of the Anglican Church.

Anglican Missionary Societies.

The Church Missionary Society carries on work in India in seven different missions—the United Provinces, South India, Travancore and Cochin, Bengal, Western India, Punjab and Sind and the Central Provinces and Rajputana. The names are in order of seniority. Work was begun in what are now called the United Provinces in 1813, in Bombay in 1820, in the Punjab in 1851, and in the Central Provinces in 1854. The Society has always kept Evangelistic work well to the fore; but it also has important medical missions, especially on the N.-W. Frontier, and many schools of the Primary, Middle and High standards. The Church of England Zenana Missionary Society is an offshoot of the C. M. S. controlling the work of 162 missionary ladies. The number of ordained European missionaries of the C. M. S. in India and Ceylon is 166, European laymen 30 and European laywomen 258. The Society claims a Christian community of 2,21,359 of whom 63,655 are adult communicants.

Society for the propagation of the Gospel.—Statistics of the work of this Society are not easily ascertained, as much of it is done through Diocesan institutions, which, while financed and in many cases manned by the S. P. G., are

entirely controlled by the Diocesan authorities. The best known of the S. P. G. missions is that at Delhi, commonly called the Cambridge Mission to Delhi, carrying on educational work at St. Stephen's College and School. At the College there are about 200 students under instruction, and at the High School 800. The College hostels accommodate 100 students. Missions to the depressed classes exist in Burma, in the Ahmednagar District and in several parts of South India, especially in the Diocese of Tinnevely-Madura. The S. P. G. also maintains an important Criminal Tribes Settlement at Hubli, in the Bombay Carnatic. There are 116,000 Indian Christians under the aegis of the S. P. G.; 90 ordained European missionaries and 98 European lady workers.

Other Anglican Societies.—The Oxford Mission to Calcutta was started in 1880. It works in the poorest parts of Calcutta and also at Barisal. There are 11 mission priests of this Society, and 16 Sisters. In addition to its work amongst the poor, the Oxford Mission addresses itself to the educated classes in Bengal and issues a periodical called *Epiphany*, which is known all over India.

The Society of St. John the Evangelist (commonly known as the Cowley Fathers) has houses at Bombay and Poona, and small stations in the Bombay Konkan. In Bombay its missionary work centres upon the Church of Holy Cross Umakhadi, where there is a school and a dispensary. The Christians are chiefly drawn from the very poorest classes of the Bombay population. At Poona the Society co-operates with the Wantage Sisters and in Bombay with the All-Saints' Sisters. Other Anglican sisterhoods represented in India are the Clewer Sisters at Calcutta and the Sisters of the Church (Kilburn) at Madras. The St. Hilda's Deaconesses' Association of Lahore carries an important educational work (chiefly amongst the domiciled community) in the Punjab. The mission of

the Scottish Episcopal Church at Nagpur, the Dublin University Mission at Hazaribagh, and the Mission of the Church of England in Canada working at Kangra and Palampur (Punjab) should also be mentioned under the head of Anglican Missions.

The Bible Churchmen's Missionary Society carries on work in India in three missions—the Central Provinces, the United Provinces, and Burma. Work was begun in all of these Provinces in 1924. The work of the Society is primarily Evangelistic and this work is carried on by means of Hospitals, Dispensaries, Schools and Camps. The Society has 17 principal Stations of which 5 have Hospitals and 7 Schools, the latter including the School for the Deaf in Rangoon. The number of Ordained European missionaries of the B C M S. in India and Burma is 11, Doctors 4, European laymen 11 and European laywomen 61. There are 54 Indigenous workers including 3 Doctors. Statistics of the Christian community from all Stations are not available.

An interesting development has lately taken place in the Anglican communion. In 1922 the foundations were laid of a new Religious community called the Christa Seva Sangh or the Society of the Servants of Christ. The aim of its members is to enable Indians and Europeans to live together a common life based upon the three-fold vows of poverty, chastity and obedience and by living together to develop the Religious life along lines peculiarly suited to India. Indians appreciate fully the value of "renunciation." The Sangh hopes to commend Christianity to India by presenting it with a concrete illustration of Christian asceticism. The first Ashram of the Brotherhood was consecrated by Dr. Palmer, Bishop of Bombay, in 1925. It is situated in Poona and it contained at the time of consecration 13 Brothers, of whom 6 were Indians and 7 Europeans. It shows every sign of life and growth.

Bengal Ecclesiastical Department.

Westcott, Most Rev. Foss, D.D. Lord Bishop of Calcutta and Metropolitan India, Burma and Ceylon.

SENIOR CHAPLAINS

Birch, Ven'ble Ormonde Winstanley, M.C.	Archdeacon of Calcutta.
Williams, Rev. Henry Frank Fulford, M.A.	(On leave).
Wilkinson, Rev. Ernest Roland, M.A.	(On leave).

THE ROMAN CATHOLIC CHURCH.

With regard to numbers, the *Catholic Directory of India* gives the following tables—

	1911	1921	1935
1. <i>British India and Indian States—</i>			
(a) Latin Rite .. .	1,614,620	1,851,408	2,142,980
(b) Syriac Rites.. .	364,666	440,488	669,234
2. <i>French India</i> .. .	25,918	25,480	27,401
3. <i>Portuguese India</i>	296,148	288,741	590,990
Total, India	2,301,346	2,606,117	3,430,605
4. <i>Ceylon</i>	322,163	353,986	423,973
Total, India and Ceylon ..	2,623,509	2,970,103	3,854,578

NOTE (1):—In 1860, the total for India and Ceylon was 1,170,854. In 1889 it had risen to 1,610,265 and in 1900 to 2,201,674.

NOTE (2):—In 1860 there were 1,504 priests. In 1921 there were 3,158. In 1931 there were 3,625, and in 1935 there were 4,438.

The Catholic community as thus existing is composed of the following elements:—

- (1) The "Syrian" Christians of the Malabar Coast, traditionally said to have been converted by the Apostle St. Thomas. They were brought under allegiance to the Pope by the Portuguese in 1599, and placed first under Jesuit bishops and then under Carmelite Vicar-Apostolics. They are at present ruled by an Archbishop and three suffragan Bishops of their own Syrian rite.
- (2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the peninsula and up the west coast, Ceylon, Bengal, etc.
- (3) European immigrants at all times, including British troops.
- (4) Modern converts from Hinduism and Animism in recent mission centres.
- (5) Recent converts from the Jacobite community in Malabar, of which 2 Bishops, 71 priests and some 28,000 laity have been received into the Catholic Church.

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline. To meet this decline fresh missionaries were sent out by the Congregation *de propaganda fide*, till by the middle of the 19th century the whole country was divided out among them except such portions as were occupied by the Goa clergy. Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the "Padroado" or royal patronage, and the *propaganda* clergy. This conflict was set at rest by the Concordat of 1886 (amended by the Agreement of 1928, abolishing "double jurisdiction"). At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows:—

Under the Sacred Congregation of Extraordinary Ecclesiastical Affairs:—

The archbishopric of Goa and Damaun (having some extension into British territory) with suffragan bishoprics at Cochim and Mylapore (both in British territory)

Under the Sacred Congregation of Oriental Churches:—

The archbishopric of Ernakulam, with suffragan bishoprics of Changanacherry, Kottayam and Trichur.

The archbishopric of Trivandrum, with suffragan bishopric of Tiruvella.

Under the Sacred Congregation of Propaganda Fide:—

The archbishopric of Agra, with suffragan bishoprics of Allahabad and Ajmere.

The archbishopric of Bombay, with suffragan bishoprics of Poona, Mangalore, Calcutta, Trichinopoly and Tuticorin, and the Missions of Ahmedabad and Karachi.

The archbishopric of Calcutta, with suffragan bishoprics of Ranchi, Dacca, Chittagong, Krishnagar, Dinajpur, Patna and Shillong and the Prefecture Apostolic of Sikkim.

The archbishopric of Madras, with suffragan bishoprics of Nellore, Hyderabad, Vizagapatnam and Nagpur, the Prefecture-Apostolic of Jubbulpore, and the Missions of Cuttack, Bezwada and Bellary

The archbishopric of Pondicherry (French), with suffragan bishoprics of Mysore, Coimbatore, Kumbakonam, Salem and Malacca.

The archbishopric of Simla, with suffragan bishopric of Lahore and the Prefecture-Apostolic of Kashmere.

The archbishopric of Verapoly, with suffragan bishoprics of Quilon, Kottar and Vijayapuram.

The archbishopric of Colombo (Ceylon), with suffragan bishoprics at Kandy, Galle, Jaffna and Trincomalee.

Three Vicariates Apostolic and one Prefecture Apostolic of Burma.

The European clergy engaged in India almost all belong to religious orders, congregation or mission seminaries, and in the great majority are either French, Belgian, Dutch, Swiss, Spanish or Italian by nationality. They number over 2,000 besides which there is a body of secular clergy, mostly Indian, etc., numbering about 2,400 and probably about 2,000 nuns. The first work of the clergy is parochial ministrations to existing Christians, including railway people and British troops. Second comes education, which is not confined to their own people: their schools being frequented by large numbers of Hindus, Mahomedans, Parsis, etc. Among the most important institutions are St. Xavier's College, Calcutta, St. Peter's College, Agra, St. Xavier's College, Bombay, St. Joseph's College, Trichinopoly, St. Aloysius College, Mangalore, Loyola College, Madras, teaching university courses: besides a large number of high schools and elementary schools. The education of girls is supplied for by numerous convent schools worked by religious congregations of nuns to say nothing of orphanages and other charitable institutions. The total number under education amounted in 1904 to 143,051 boys and 73,164 girls, later figures being unavailable. As to missionary work proper, the country is covered with numerous modern mission centres, among which those in the Punjab, Chota-Nagpur, Krishnagar, Gujerat, the Ahmednagar District and the Telugu coasts may be mentioned. (Full particulars on all points will be found in the Catholic Directory already quoted.) The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few military and railway chaplaincies are derived mainly from Europe, that is, from the collections of the Society for the Pro-

pagation of the Faith and of the Holy Childhood, helped out by private or other donations secured from home by the different local missionaries. In mission work the fathers count as enrolled only those who are baptised and persevering as Christians, and no baptism, except for infants or at point of death, is administered except after careful instruction

and probation. This, while keeping down the record, has the advantage of guaranteeing solid results.

The Holy See is represented by a Delegate Apostolic of the East Indies who resides at Bangalore. At present this post is occupied by the Most Rev. Archbishop Kierkels, D. D., appointed in 1931.

THE CHURCH OF SCOTLAND.

The Church of Scotland and the United Free Church have become one. The Union, effected in October 1929, has already exerted a profound influence upon the life of the Church of Scotland in India. The Chaplaincy work of the Church of Scotland dates from 1814, when the Rev. Dr. Bryce landed in Calcutta, and organised a congregation of his Scottish fellow countrymen. The centenary of the churches in the three Presidency towns was celebrated: Calcutta, 1914; Bombay, 1919; Madras, 1921. Since 1903 there have been eighteen chaplains on the staff, of whom nine belong to the Bengal Presidency, five to Bombay, and four to Madras. These minister both to the Scottish troops and to the civil population of the towns where they are stationed, but when there is a Scottish regiment the chaplain is attached to the regiment, instead of being posted to the station where the regiment happens to be placed and as a rule moves with the regiment. There are three Presidency senior Chaplains in charge of Bengal, Bombay, and Madras respectively. There are churches in the chief towns of the Presidencies, and churches have also been built, in all considerable military stations, e.g., Chakrata, Lucknow, Peshawar, Ramkhet, Rawalpindi, Sialkot, Umballa and Jubulpore. In addition to the regular establishment there are a number of acting Chaplains sent out by the Colonial Committee of the Church of Scotland, and these are serving in such stations as Rawalpindi, Lahore, Cawnpore, Meerut, Mhow and Quetta. The Additional Clergy Societies in India contribute towards the cost of this additional establishment. In other places such as Sialkot, Murree, Dalhousie, and Darjeeling, regular services are provided by Scottish Missionaries. Simla has a minister of its own sent out from Scotland.

The Mission work of the Church of Scotland dates from 1829, when Alexander Duff, one of the greatest of modern missionaries, was sent to Calcutta. He was the first to open schools where English was made the medium for instruction, and where religious teaching was given daily. Similar educational missions were soon afterwards started in Bombay and Madras. Educational work is still an important branch of the mission work of the Church, but the Bombay College was closed in 1819 and in 1907 the College in Calcutta was united with the College of the United Free Church of Scotland, to form the Scottish Churches College. In the Punjab Evangelistic work is being carried on from eight centres under seventeen missionaries. The baptised Chris-

tian community now numbers over 14,000. Work commenced in Darjeeling in 1870 is now carried on throughout the whole Eastern Himalayan district, and there is a Christian community there of over 8,000. In the five mission districts of Calcutta, the Eastern Himalayas, Madras, Poona, and the Punjab there were at the end of 1919 over 24,787 baptised Indian Christians. In connection with these missions the Women's Association of Foreign Missions does invaluable service in school, medical and zenana work, having in India 41 European missionaries; 163 teachers, over 50 schools, three hospitals and six dispensaries.

The Church of Scotland has also done much to provide education for European children in India. Its two Churches in Bombay have six representatives on the governing body of the Anglo-Scottish Education Society, and the two churches exercise pastoral supervision over the Bombay Scottish Orphanage. In Bangalore there is the St. Andrew's High School, and both in Bangalore and in Madras the local congregation supports the school for poor children. The Ayrcliff Girls' Boarding and High School is under the care of the Kirk-Session of St. Andrew's Church, Simla. The now well-known St. Andrew's Colonial Homes at Kalimpong, Bengal, though not directly part of the work of the Church of Scotland, were initiated by and are being locally managed by missionaries of that Church. The homes exist for the benefit of the domiciled European Community, and are doing magnificent work. There are now twenty cottages, and about 600 children in residence. Further information may be found in "Reports of the Schemes of the Church of Scotland," Blackwood & Sons; "The Church of Scotland Year Book" and "The Handbook of the Church of Scotland in India and Ceylon."

Though the former Churches of the United Free Church now belong to the Church of Scotland they remain independent of the establishment recognised by Government. They have only three purely European congregations in India, two in Calcutta, and one in Bombay.

The Church carries on Mission work in seven different areas. They are Bengal (Calcutta, Kama and Chinsura); the Santal Parganas, with five stations; Western India (Bombay, Poona and Alibag); Hyderabad, State (Jalna, Bethel and Parbhani); Madras (Madras City, Chingleput, Srirampudur and Conjeevaram); the Central Provinces (Nagpur,

Bhandara, Wardha, and Amraoti); Rajputana, where the extensive work instituted by the United Presbyterian Church in 1860 is now carried on from eleven centres.

The work falls into three main divisions, evangelistic, medical, and educational. The Christian community has been organised in all the chief centres into congregations which form part of the Indian Presbyterian Church, and this Church is seeking to take an increasing share in the work of evangelism. There are nineteen Mission Hospitals, among which are four excellently equipped and staffed Women's

Hospitals, in Madras, Nagpur, Ajmer, and Jaipur. From the days of Duff in Calcutta and Wilson in Bombay the Mission has given a prominent place to education. It has many schools in all parts of its field and it has also made a large contribution to the work of higher education through four Christian Colleges. The Scottish Churches College, Calcutta, is well known. The Madras Christian College, which owes so much to the work of Dr. William Miller, is now under the direction of a Board representing several Missionary Societies. Other Colleges are Wilson College, Bombay, and Hislop College, Nagpur.

BAPTIST SOCIETIES.

THE BAPTIST MISSIONARY SOCIETY OF GREAT BRITAIN.—Formed in 1792, largely through the efforts of Dr. Wm. Carey, operates mainly in Bengal, Bihar and Orissa, the United Provinces, the Punjab and Ceylon. The Baptist Zenana Mission and the Bible Translation Society have been united with this Society. The staff of the united Mission in India and Ceylon numbers 206 missionaries and about 978 Indian and Singhalese workers. Connected with the Society are 376 Indian and Singhalese Churches, 209 Primary Day Schools, 20 Middle and High Schools, and 1 Theological Training College. The Church membership at the close of 1933 stood at 23,245 and the Christian community at 59,812. The membership during the past ten years has increased by about 63 per cent. and the community by 50 per cent. in the same period. Amongst the non-caste people great progress has been made in recent years, and many of the Churches formed from amongst these peoples are self-supporting.

Special work amongst students is carried on in Calcutta, Dacca, Cuttack, Patna and Delhi where hostels have been erected for the prosecution of this form of work.

EDUCATIONAL WORK.—Ranges from Primary School to Colleges. Serampore College with its Royal Charter granted by His Danish Majesty in 1827, confirmed by the British Government in the Treaty of Purchase of the Settlement of Serampore in 1845, and placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary Educational operations, in Arts and Theology. It was affiliated in 1857 to the newly-formed Calcutta University; reorganised in 1910 on the lines of its original foundation with the appointment of a qualified Theological Staff on an Inter-denominational basis for the granting of Theological Degrees to qualified students of all Churches.

In Arts and Science the College prepares for the Calcutta Examinations. *Principal.* Rev. G. H. C. Angus, M.A., B.D.

There is a vernacular institute also at Cuttack for the training of Indian preachers and Bible schools in several centres.

There are 9 or 10 purely English Baptist Churches connected with the Society, but English services are carried on in many of the stations. Medical work connected with the Society is carried on in 7 Hospitals, and 12 Dispensaries. Two large Printing Presses for both English and Vernacular work are conducted at Calcutta and Cuttack. The Secretary of the Mission is the Rev. D. Scott Wells, 44, Lower Circular Road, Calcutta.

The Headquarters of the Mission are at 19, Furnival Street, Holborn, London. The total expenditure of the Society for 1934 amounted to £172,034 of which £90690 was expended in India & Ceylon.

THE CANADIAN BAPTIST MISSION.—Was commenced in 1873, and is located in the Telugu Country to the north of Madras, in the Kistna, Godavari, Vizagapatam and Ganjam Districts. There are 22 stations and 632 outstations with a staff of 101 missionaries including 7 qualified physicians, and 1,407 Indian workers, with Gospel preaching in 1,659 villages. Organised Churches number 126, communicants 28,236 and adherents 26,719 for the past year. Forty-six Churches are entirely self-supporting. In the Educational department are 558 village day schools, with 19,993 children, 12 boarding schools, 2 High schools, 2 Normal Training schools, a Bible Training School for Women, a Theological Seminary providing in all for 1,000 pupils, and an Industrial school. There are 6 Hospitals, two leper asylums and an Orphanage. The Mission publishes a Telugu newspaper Village Evangelisation is the central feature of the Mission, and stress is laid upon the work amongst women and children. During the last decade membership has increased by 65 per cent., the Christian community by 20 per cent., and scholars by 105 per cent. Indian Secretary is the Rev. A. Arthur Scott, Tum, East Godavari.

AMERICAN BAPTIST FOREIGN MISSION SOCIETY, organized in 1814, has Missions in Burma begun 1813; Assam 1836; Bengal and Orissa 1836; South India 1840. It owes its rise to the celebrated Adoniram Judson. Until 1910 the Society was known as the American Baptist Missionary Union. There are 32 main stations in Burma, 13 in Assam, 10 in Bengal-Orissa 29 in South India, besides many outstations. All forms of missionary enterprise come within the scope of the Society.

The great work of the Mission continues to be evangelistic and the training of the native preachers and Bible-Women, and extends to many races and languages, the most important of which, in Burma, has been the practical transformation of the Karens, whose language has been reduced to writing by the Mission. The work in Assam embraces 9 different languages and large efforts are made amongst the employees of the tea plantations. The Mission Press at Rangoon is the largest and finest in Burma.

In the year 1932 the field staff numbered 387 missionaries, 6,876 indigenous workers. There were 2,732 organised Churches of which 1,979 were self-supporting. Church members numbered 2,80,964. In the 2,414 Sunday Schools were enrolled 95,949 pupils. The Mission conducted 2,739 schools of all grades, one of which being Judson College, Rangoon, with 97,422 students enrolled. 13 hospitals and 33 dispensaries treated 8,389 inpatients and 1,22,254 outpatients. Christians of all communities among whom the Mission works contributed over Rs. 6,75,055 or this religious and benevolent work during the year.

THE AMERICAN BAPTIST ASSAM MISSION, was opened in 1836, and has 12 main stations staffed by about 64 missionaries. There are 854 native workers, 923 organised churches, 53,544 baptised members, 443 schools of all grades including 2 High, 2 Normal, 3 Bible and 14 station schools. 4 Hospitals and 6 Dispensaries treated 1,852 in-patients and 27,221 outpatients during the year. Mission work is carried out in 10 different languages.

Treasurer and Corresponding Secretary Miss Marion G. Burnham, Gauhati, Assam.

AMERICAN BAPTIST, BENGAL-ORISSA MISSION commenced in 1836. Area of operation: Midnapore district of Lower Bengal, Balasore district of Orissa and Jamshedpur Mission staff 36, Indian workers 310. Two English Churches and 32 Vernacular Churches, Christian Community 2,686. Educational Two Boys' High Schools and two Girls' High Schools and 115 Elementary Schools, pupils 4,220. One Industrial School, known as Balasore Technical School,

for carpentering, iron work and motor mechanics. The Vernacular Press of this mission printed the first literature in the Santali language.

Secretary—Mr. W. S. Dunn, Bhudrak, Orissa.

THE AMERICAN BAPTIST TELUGU MISSION—Was commenced in the year 1836, and covers large parts of Nellore, Guntur, Kistna, and Kurnool Districts, parts of the Deccan and an important work in Madras and the surrounding vicinity. Its main work is evangelism, but there are also Educational and Medical Institutions of importance. Industrial departments are maintained also in connection with the Mission. High Schools at Nellore, Ongole and Kurnool. Organized Telugu Churches number 356, with 111,717 baptised communicants. There are 71 missionaries, and 2,748 Indian workers. The mission maintains a Theological Seminary at Ramapatnam for the training of Indian preachers. A Bible Training School for the training of Telugu women is located in Nellore. A total of 37,162 receive instruction in 1,406 primary schools, 16 secondary schools and 4 high schools. In Medical work 5 Hospitals and 9 Dispensaries report 30,367 patients, and 1,553 Operations during 1934.

Secretary—Rev. T. Wathne, Ongole, Guntur District.

THE AUSTRALIAN BAPTIST FOREIGN MISSION—(Incorporated) Embracing the societies representing the Baptist Churches of the States of the Australian Commonwealth. The field of operations is in East Bengal. The staff numbers 35 Australian workers. There are 3,168 communicants and a Christian community of 6,000.

Secretary, Field Council: The Rev. W. G. Crofts, B.A., Biri Sri Mission House, P. O. Hatshibganj, Dist. Mymensingh.

THE STRICT BAPTIST MISSION—Has 22 European Missionaries, and 241 Indian workers in Madras, Chingleput, Salem, Ramnad and Tinnevely Districts. Communicants number 1,532, organised churches 56; elementary schools 85, with 3,205 pupils.

Treasurer and Secretary—Rev. D. Morling, Kovilpatti, Tinnevely District.

PRESBYTERIAN SOCIETIES.

THE IRISH PRESBYTERIAN CHURCH MISSION—Operates in Gujarat and Kathiawar with a staff of 36 Missionaries, of whom 13 are clerical, 14 Educationalists, 6 are Doctors and 2 Nurses. The Indian staff numbers 524, of whom 15 are Pastors, 87 Evangelists, 4 Colporteurs, 41 Bible-women, and 348 are Teachers. There are 19 Organised Churches, a communicant roll of 2,358, and a Christian Community of 7,739. In Medical work there are 4 Hospitals and several dispensaries, with 1,714 in-patients, 17,377 new cases, and a total attendance of 67,819. The Mission conducts 3 High Schools, 1 Anglo-Vernacular School, 1 Preparatory School at Parantiy and 131 Vernacular schools affording tuition for 6,724 pupils; also 1 crèche, 4 Orphanages, an Industrial School at Borsad, a Teachers' Training College for Women at Borsad,

a Divinity College at Ahmedabad, and a Mission Press at Surat. The Mission has made a speciality of Farm Colonies, of which there are about a score in connection with it, most of them thriving.

The Jungle Tribes Mission with 7 Missionaries is a branch of the activities of the above, working in the Panch Mahals and Itawa Kantha districts, with Farm Colonies attached.

Secretary: Rev. George Wilson, B.A., Ahmedabad.

THE UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA—The Sialkot Mission of this Church was established at Sialkot in the Punjab, in 1855. It is now carrying on work in ten civil districts in the Punjab and two in the

Punjab. Its missionaries number 84. Its educational work composes one Theological Seminary, one College, four High Schools, one Industrial school, seven Middle schools and 181 Primary schools. The enrolment in all schools in 1930 was 10,003. Medical work is carried on through five Hospitals and four Dispensaries. The communicant membership of the Church which has been established is 48,482 and the total Christian community 99,018.

General Secretary: Rev. H. C. Chambers, D.D., Gordon College, Rawalpindi.

THE AMERICAN PRESBYTERIAN MISSION operates in three main sections known as the Punjab, North India and Western India Missions. The American staff, including women, numbers 229, and the Indian staff 1,033. There are thirty-four main stations and 217 out-stations. Organised churches number 103, of which thirty-five are self-supporting. There are 14,653 communicants and a total baptized community of 27,964.

Educational work as follows:—Two men's colleges and an interest in the Isabella Thoburn and Kinnaird Colleges for Women, students about 1,820; one Theological College, students thirty-four; two Training Schools for Village Workers, students about 180, Thirteen High Schools, students about 3,400, two Industrial Schools; three Agricultural Demonstration Farms; four Teachers' Training Departments, The Miraj Medical School and an interest in the Ludhiana Medical College for Women, students about 170; 132 Elementary Schools; 173 Schools of all grades, pupils about 11,925.

Medical Work—Eight Hospitals; twenty-three Dispensaries.

Evangelistic Work—345 Sunday Schools, with an attendance of 9,531 pupils. Contributions for church and evangelistic work, on the part of the Indian church, Rs. 63,019.

The Hospital at Miraj, founded by the late Sir William J. Wanless and under the care of C. E. Vail, is well-known throughout the whole of S.W. India, and the Forman Christian College at Lahore, under the principalship of Dr. S. K. Datta, is equally well-known and valued in the Punjab. The Ewing Christian College (Dr. C. H. Rice, Principal) and Allahabad Agricultural Institute (Dr. S. Higginbottom, Principal) have grown rapidly in numbers and influence.

Secretary of Council of A. P. Missions in India:—Rev. J. I. Dodds, D.D., "Lowiston", Dehra Dun, U. P.

Secretary, North India Mission—Rev. W. L. Allison, B.A., B.D., Gwalior, C. I.

Secretary, Punjab Mission—Rev. J. B. Weir, M.A., Ph.D., D.D., 6, Napier Road, Lahore.

Secretary, Western India Mission—Rev. H. K. Wright, M.A., B.D., Union Training College, Ahmadnagar.

THE NEW ZEALAND PRESBYTERIAN MISSION—Commenced as recently as 1910 at Jagadhri, Punjab.

Secretary: Miss B. J. Hardie, Jagadhri, Dist Amballa.

THE UNITED CHURCH OF CANADA MISSION.—Commenced in 1877 has 14 main stations in Indore, Gwalior, Rutlam, Dhar, Jaora, Sitamau, Bhopal and Banswara States. The Mission staff numbers 80, Indian workers 200. This Mission works in conjunction with the Malwa Church-Council of the United Church of Northern India, which reports for this part of its territory:—Organised churches 22; Unorganised churches 8; Communicants 2,241; Baptised non-communicants 5,836; Unbaptised adherents 821; Total Christian Community 8,898.

Educational work comprises Elementary and Middle Schools for boys and girls; a High School for girls, an Arts College for students of both sexes (The Indore Christian College), a Normal School for girls, and the Malwa Theological Seminary. Women's industrial work is carried on in Mhow and Rutlam, and Vocational Training for boys is a feature of the Rasulpur Boys' School, where training is provided in printing, tailoring, carpentry and motor mechanics.

The Medical work is large. There are three General Hospitals, where both men and women are treated, and five Women's Hospitals, and also a number of dispensaries in central and out-stations.

General Secretary of Mission—Rev. A. A. Scott, M.A., B.D., B. Paed, Indore, C. I.

Associate Secretary of Mission—Miss F. E. Clearihue, Kharua, C. I. (Via Mehdpur Rd Station)

Secretary of Malwa Church-Council—Rev. F. H. Russell, M.A., B.D., Rutlam, C. I.

The Canadian Presbyterian Mission operates in two sections, the Northern Section with headquarters at Jhansi in the U.P., and the Central India Section, known as the Southern Bhil Field.

In Central India the five central stations are located in the States of Alirajpur and Jobat and Barwani, but the Mission comprises within its area the States of Jhabua and Kathiawar, also part of Chhota Udaipur in the Bombay Presidency and parts of Dhar, Indore and Gwalior States bordering on the Jobat-Barwani Road. The Staff in Central India consists of 20 missionaries and 42 Indian workers. There are several elementary schools in the area and a central and vernacular School for boys and girls at Amkhat and Alirajpur States. At Amkhat also there is a Children's Nursery Home and dispensary and a General Hospital for the area is located at Jobat. In the district there are five organised and 3 unorganised churches with 273 communicant members and a baptised community of over 1,300.

Secretary—Thomas Draper, M.R.C.S. (Lond), M.R.C.P. (Ed), Jobat, Via Dohad, Central India.

The Jhansi Section formerly known as the Gwalior Mission was founded by the late Dr. J. Wilkie in 1905. There is now a staff of twelve missionaries and twenty-five Indian workers who are engaged in Jhansi city, Esagarh, Baragson and the surrounding villages.

Activities include Anglo-vernacular middle schools for both boys and girls and hostels for Christian pupils in each. There are also an orphanage for children under school age, a

dispensary and an industrial school for boys. There is an agricultural settlement at Esagarh where the Mission has a farm of 1,200 acres.

There are two organised churches having a communicant membership of 150.

Secretary.—The Rev. A. A. Lowther, M.A., B.D.

THE WELSH CALVINISTIC METHODIST (PRESBYTERIAN) MISSION established in 1840 with a staff of 40 Missionaries, 950 Indian workers, occupies stations in Assam in the Khassia and Jaintia Hills, the Lushai Hills and at Sylhet and Cachar. The Khassia language has been reduced to writing, the Bible translated, and many books published in that language by the Mission. A large amount of literature has also been produced in the Lushai language. Communicants number 35,396; the total Christian community 92,923; organised Churches 721. Elementary schools number 678, Scholars 20,243. In addition to Industrial Schools and Training Institutions 3 Theological Seminaries, Sunday Schools 822 and Scholars 54,047. Four Hospitals and several Dispensaries provide annually for more than 10,000 patients.

Secretary: Rev. F. J. Sandy, Durtiang, Aijal.

THE ARCOT MISSION OF THE REFORMED CHURCH—In America organised in 1853 occupies most of the North and South Arcot and Chittoor districts in S. India with a staff of 55 Missionaries and 801 Indian workers. Churches number 16, Communicants 7,452; Total Christian Community 26,442; Boarding Schools 17, Scholars 1,129; Theological School 1, students 31; Voorhees College, Vellore, students 137, High Schools 4, Scholars 1,887; Training Schools 2, students 120; Industrial Schools 2, Agricultural Farm and School 1, total pupils 280; Elementary schools 225, Scholars 9,716. Two Hospitals and 4 Dispensaries with a staff of 68 provided for 2,617 in-patients and 29,571 out-patients excluding the Union Medical College Hospitals and Dispensaries, Vellore.

The Union Mission Medical College for South India and a Union Mission Training School are located at Vellore, the headquarters of the Mission. The Union Mission Tuberculosis Sanitarium for S. India is near Madanapalle. Arogiavaram, P O, Chittoor District.

Secretary.—Rev. W. H. Farrar, Arni, S. India.

CONGREGATIONAL SOCIETIES.

THE AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS—The American Board of Commissioners for Foreign Missions has two large missions, the American Marathi Mission and the Madura Mission. The Marathi Mission covers a considerable portion of Bombay Presidency with centres at Bombay, Ahmednagar, Rahim, Vadala, Sirur, Sholapur, Satara and Wai. It was commenced in 1813, the first American Mission in India. Its activities are large and varied. The staff for 1934 included 38 missionaries and 432 Indian workers operating in 9 stations and 109 outstations. There are 67 churches with 6,464 communicants. The educational work includes 10 secondary and training schools with 993 pupils. There are 55 primary schools and 8 kindergartens with a total of 4,237 pupils. A school for the blind is conducted in Bombay and industrial schools are carried on in three centres. In the hospitals and dispensaries during the year, were treated a total of 73,771 patients. The mission has six major social service centres under its charge including the Nagpada Neighbourhood House in Bombay. At Sholapur a settlement for criminal tribes is carried on by the mission under the supervision of Government. *Secretary*: W. Q. Swart, Ahmednagar.

MADURA MISSION.—The Madura Mission celebrated its centenary in January, 1934, and at that time turned over administration of work under its control to the Madura Mission Sangam. The Mission still exists to deal with certain matters relating to the maintenance of missionaries. The Secretary is Rev. W. W. Wallace, Madura.

MADURA CHURCH COUNCIL.—The Madura Church Council is a branch of the South India United Church, and is in charge of the Christian community that has developed through the work of the Madura Mission. The Madura Church

Council is in charge of 33 pastorates, about 222 village schools and five large Elementary Higher Grade Co-educational Boarding Schools. The Secretary of this organization is Rev. Paul Raj Thomas, Pasumalai.

MADURA MISSION SANGAM.—The Madura Mission Sangam was formed in January, 1934, to take over work in the Madura and Ramnad Districts which had hitherto been under the control of the Madura Mission. This work consists of a Hospital for men and a Hospital for women and a large High School and Training School for Girls in Madura a school for girls at Rachanyapuram three miles from Madura; a High School, Training School, Trade School and Theological Seminary at Pasumalai, together with some responsibility for the village work under the immediate control of the Madura Church Council.

The Madura Mission Sangam consists of a little over forty members more than half of whom must by constitution be Indians. The Secretary of the Madura Mission Sangam is Rev. R. A. Dudley, Tirumangalam.

THE AMERICAN COLLEGE, MADURA.—The American College, then located at Pasumalai, was affiliated with the University of Madras as a second Grade College in 1881. In 1904 the College Department was removed to Madura where for five years it was accommodated in what is now the Union Christian High School building. In 1909 the College was removed to its present site in Tallakulam on the north side of the Vaigai river. It was affiliated as a First Grade College in 1913.

In 1934 at the time of the centenary of the Mission, the American College became organically independent under its own Governing Council. In the same year it was granted affiliation as an Honours College.

The present College site comprises about forty acres. On the College grounds are located the Main College Hall, the Ellen S. James Hall of Science, Binghamton Hall, the Chapel, Daniel Poor Memorial Library, Main Hostel, Zumbro Memorial Hostel, Dining Halls, Principal's residence, Warden's Lodge, four additional bungalows, and athletic fields.

THE SCANDINAVIAN ALLIANCE MISSION OF NORTH AMERICA.—The mission staff in Khandesh is represented by sixteen missionaries, and 35 Indian workers. There are 330 church members in good standing with 805 in Sunday Schools. 11 Elementary Schools provide for 305 pupils.

Secretary—Miss Olga E. Norcross Amalner, East Khandesh.

THE SWEDISH ALLIANCE MISSION—Working among Bhils, Hindus and Muhammedans in West Khandesh, has 19 missionaries and 72 Indian workers. There are 8 congregations with a total membership of 1,070 of whom 491 are communicants. There are 13 Elementary Schools, 2 Training Schools and 5 School Homes. The pupils in all schools are 624.

Secretary—The Rev. Simon A. R. Johansson, Mandulwar, Dhadgaon, West Khandesh.

FREE CHURCH OF FINLAND MISSION—Total Mission staff is represented by 6 Missionaries, 1 native pastor, 2 Catechists, 3 teachers. There are about 118 communicants and total community 200. Three day schools, 1 evening school, 3 dispensaries and weaving industry.

Secretary—Rev. E. A. Ollila, Ghum, D. II Railway.

THE LONDON MISSIONARY SOCIETY.—Commenced work in India in 1798 and occupies 3 centres in N. India, 12 in S. India and 7 in Travancore. The Mission engages in every form of Missionary activity.

The European staff numbers 83, Indian workers 2,408, Organised Churches 520; Communicants 28,647 and Christian Community 195,616. There are 1 Christian College, students 159; 2 Theological Institutions, students 70; 4 Training Institutions, pupils 114; 12 high schools, pupils 4,849. 25 Boarding schools, scholars, 1,167 and 862 Elementary schools with 46,371 scholars. In medical work Hospitals number 6, Nurses 7 Europeans and 33 Assistants, 14 qualified doctors, 9 Europeans and 62 Assistants and 10,413 in-patients and 206,276 out-patients for the year.

The main centres of the Mission in N. India are at Calcutta and Murshidabad District, Bengal; L.M.S. work in the United Provinces has been closed but a Union Mission of the W. M. S., C. M. S. and L. M. S. has been opened in Benares City with the Rev. J. C. Jackson of the L. M. S. as Superintendent. This Mission concentrates especially on work amongst pilgrims and students. Special efforts are made amongst the Nama Sudras. The S. India district and Travancore are divided into the Kanarese, Telugu, Tamil and Malayalam fields with 19 stations and 959 outstations. At Nagercoil (Travancore) is the Scott Christian College and High School with 985 students, a Church and congregation said to be the largest in India and a Printing Press, the centre of the S. Travancore Tract Society.

Bengal Secretary—Rev. Vaughan Rees, 16, Elgin Road, Calcutta.

South India—Secretary and Treasurer—Rev. George Parker, M.A., B.D., 18, Lavelle Road, Bangalore.

Benares Superintendent—Rev. J. C. Jackson-Ramkatora, Benares Cantonment U. P.

ALL-INDIA MISSIONS.

THE CHRISTIAN AND MISSIONARY ALLIANCE.—Dates from the year 1893 under the name of the International Missionary Alliance, but in number of its missionaries were at work Berar Province much earlier. Work is carried on in the Provinces of Berar, Khandesh and Gujarat. There is a staff of 50 missionaries and 80 Indian workers. The number of mission stations is 16 with additional outstations. There is a Christian community of 2,088 adults. There are 4 Boarding Schools, 2 for boys and 2 for girls. 1 Training School for Indian workers and 1 English congregation at Bhusawal.

Executive Secretary—Rev. K. D. Garrison, Akola, Berar, C.P.

THE CHURCH OF THE BRETHREN (AMERICAN)—Opened work in 1895, and operates in Broach, Surat and Thana Districts, also in Baroda and Rajpalia States. Its staff number 40 foreign workers including missionaries' wives, and 195 Indian workers. The Baptized (immersed) membership stands at 5,283. Education is carried on in 7 Girls' Boarding Schools, 7 Boarding Schools for Boys, and 131 Village Day Schools. Females under instruction number 874, males 3,258, total under instruction 4,132. There are 110 Sunday Schools having 200 teachers and a total enrolment of 4,908. There were 43,831 calls at mission dispensaries in 1934. The foreign medical

staff consists of 3 doctors, 3 nurses. Industrial work is carried on in eight of the Boarding Schools. A vocational school, including teachers' training, village trades and agriculture for boys and a school of practical arts for girls are conducted at Anklesvar. Evangelistic, Temperance and Publication work receive due emphasis.

Secretary—L. A. Bhckenstaff, 82, Esplanade Road, Bombay.

THE POONA AND INDIAN VILLAGE MISSION—Founded in 1893. Mission Stations—Khed Shivapur, Poona District; Nasapur (Poh State), Poona District; Ionand, M.S.M. Iy, Satara District; Phaltan, (Paltan State), Satara District; Pandharpur, Sholapur District; Nateputa, Sholapur District, Akluz, Sholapur District, Shirwal, Poona District and Poona, 44, Sassoon Road.

The Staff consists of 48 European and 48 Indian workers, with a community of about 85 Indian Christians and their families. The main work is evangelising in the villages, women's zenana work, and primary education. Medical work is conducted at each station, with a hospital at Pandharpur. Headquarters: 44, Sassoon Road, Poona.

Secretary—J. W. Stothard.

THE AMERICAN CHURCHES OF GOD MISSION—Has four missionaries at Bogra, one at Khanjanpur, Bogra District, Bengal, and two at Ulubaria, Howrah District.

Executive Secretary—Rev. H. W. Cover, M.A., Bogra, E.B.R.

Recording Secretary—Rev. A. E. Myers, B.A., Ulubaria, Howrah Dist.

THE INDIA CHRISTIAN MISSION.—Founded in 1897, has 41 Organised Churches, 17 Missionaries, 53 stations and out-stations, 1,759 Communicants, 51 Primary schools and one Industrial School and Bible School in the Ellore District, also Station at Doddballapur, near Bangalore, S India, also Colony for young people of mixed parentage, Champawat, via Almora, U P. stations also in Nuwara Eliya, Mulpotha, Uva Province and Polgahawella, Ceylon; Girls' Orphanage at Nuwara Eliya, Industrial Homes for children of mixed parentage, Nuwara Eliya. Directors—Rev. Arnold Paynter, Champawat, Almora, U P. and Mrs. A. L. Paynter, Nuwara Eliya, Ceylon.

THE CHURCH OF THE NAZARENE MISSION—Has its headquarters for India at Buldana, Berar, where it has a Boys' Boarding School. In Chikhli, 14 miles from Buldana there is a Girls' Boarding School. At Basim, Berar, 85 miles from Buldana, (recently taken over from another mission) there is a Day School, also a Bible Training School. At present there are seven missionaries in India and a force of 38 Indian Preachers, Teachers and Bible women.

District Superintendent—Rev. P. L. Beals, Buldana, Berar.

THE HEPHIZBALE FAITH MISSIONARY ASSOCIATION—Has two missionaries in India. They are Rev. S. V. Christense, Adra, B. N. Rly., and Miss E. K. Landis at Raghunathpur, Manbhum District.

THE TIBETAN MISSION—Has 3 Missions with headquarters at Darjeeling and Tibet as its objective. *Secretary*—Miss J. Ferguson, Darjeeling.

THE INDIAN MISSIONARY SOCIETY OF TINNEVELLY (DORNAKAL MISSION)—Opened in 1903 operates in the Warangal District of the Nizam's Dominions as well as among the hill tribes called Paliars in the British and Travancore Hills. It is the missionary effort of the Tamil Christians of Tinnevely. There are now nearly 8,020 Telugu Christians in 135 villages and 416 Paliyar Christians in the hills. The Society publishes monthly *The Missionary Intelligence* containing information about the Society's work in both the fields. *Secretary*—Rev. D. S. David, Palamcottah.

THE MISSION TO LEPERS—Founded in 1874, is an Interdenominational and International Society for the establishment and maintenance of Homes and Institutions for Lepers and of their untainted children working in 20 countries but largely in India, China, Korea and Japan. Its

work in India is carried on through co-operation with 30 Missionary Societies. In India alone the Mission now has 36 Asylums of its own with upwards of 6,500 inmates and is aiding or has some connection with work for lepers at 22 other places in India. Altogether in India over 8,005 lepers are being helped.

The Mission also provides for the segregation of the healthy children of lepers from their diseased parents. More than 800 children are thus being saved from becoming lepers.

An important feature of the work of the Mission is the measure of successful medical treatment whereby early cases both adults and children are now benefiting.

Most of the Mission's income is received from voluntary contributions. Some funds are raised in India, but the bulk of the money expended by the Mission in India is received from Britain, although the provincial Government give regular maintenance grants.

There is an Indian Auxiliary of the Mission to Lepers, of which H. E. Lady Brasbourne, who represents the Bombay Presidency, is a Vice-President.

Hon. Treasurer—P. B. Morris, Esq., P. O. Box 164, 6, Church Lane, Calcutta.

Hon. Treasurer, Bombay—R. C. Lowndes, Esq., C/o Messrs. Killick, Nixon & Co., Bombay.

The General Secretary of the Mission is Mr. W. H. P. Anderson, 7, Bloomsbury Square, London, W. C. 1. The Secretary for India is Mr. A. Donald Miller, Purulia, Bihar.

THE REGIONS BEYOND MISSIONARY UNION—An inter-denominational Society commenced work at Mothihari, Bihar, in 1900, and now occupies 6 stations and 9 out-stations in the Champaran and Saran Districts, with a staff of 17 European and 2 Indian Missionaries and 40 other Indian workers. The Mission maintains 1 Hospital, 1 Girls' Orphanage, 1 Boys' Orphanage and Boarding School with Carpenter industrial department, 1 M. E. School with 200 pupils. Communicants number 80. *Secretary*—George McCalder, Lankaria Hospital, Bagaha P. O., Champaran District.

THE RAXAUL MEDICAL MISSION, affiliated with the Regions beyond Missionary Union has 1 Hospital at Raxaul, Champaran District, with 1 married European Doctor, 2 European Nursing Sisters and 7 Indian workers.

Secretary—Dr H. C. Duncan.

THE NATIONAL MISSIONARY SOCIETY OF INDIA—Established 1905, started, financed and managed by Indian Christians, has a staff of 28 Missionaries and 100 helpers and voluntary workers, operates in Montgomery District (the Punjab), Sirathu and Khaga (U.P.), Halaughat, Mymensingh District (Bengal), Jharsuguda (B. & O.), Murwahi (C.P.), North Kanara, Mirajgaon and Karnada Talukas (Bombay), Parkal Taluk (Nizam's Dominions) and Tirupattur Taluk (N. Arcot). Thirty-four Elementary Schools and one High School with hostel, one First grade College, one printing press, three dispensaries and two Hospitals. Annual expen-

diture Rs. 50,000 excluding self-supporting institutions. *The National Missionary Intelligence* (a monthly journal in English sold at Re. 1 per year post free), *Qasid* (a monthly journal in Persian-Urdu) at Rs 2-8-0, *Deepakat* (a monthly journal in Tamil and Kanarese) at 8 annas per year, post free.

Address:—N. M. S. Building, Royapettah, Madras

President:—The Rt. Rev. John S C Banerjee.

General Secretary:—Rai Bahadur A. C. Marikerji, B.A. **Associate Secretary:** Thos. David, B.A. B.D.

THE SEVENTH-DAY ADVENTIST MISSION.—The Seventh-day Adventists commenced mission work in India in 1893, and now employ a staff of five hundred and seventy-seven workers, European and Indian, including one hundred and seventy ordained and licensed ministers. Evangelistic and educational work is conducted in sixteen vernaculars, beside work for English-speaking peoples in the large cities. For administrative purposes, there are five branch organizations located as follows:—

Seventh-day Adventist Mission—Western India (J. S. James, Superintendent.) **Office Address:** Salisbury Park, Poona.

Seventh-day Adventist Mission—Burma (J. L. Christian, Superintendent.) **Office Address:** 30 Vayle Road, Rangoon Cantonment, Rangoon

Seventh-day Adventist Mission—Northeast India. (G. G. Lowry, Superintendent.) **Office Address:** 17, Abbott Road, Lucknow

Seventh-day Adventist Mission—Northwest India (G. G. Lowry, Superintendent.) **Office Address:** 17, Abbott Road, Lucknow.

Seventh-day Adventist Mission—South India (E. M. Meleen, Superintendent.) **Office Address:** 10, Cunningham Road, Bangalore.

The general headquarters for India and Burma is located at Salisbury Park, Poona. N C Wilson, President; C. L. Torrey, Secretary and Treasurer (**Office Address:** Post Box 15, Poona). On the same estate is an up-to-date publishing house devoted to the printing of health, temperance, evangelical and associated literature (**Address:** Oriental Watchman Publishing House, Post Box 35, Poona).

A large number of day and boarding vernacular and Anglo-vernacular schools are conducted in different parts of the country, and at Vincent Hill School, Mussoorie, European education is provided, a regular high school course, with more advanced work for commercial and other special students, being available. In all the denominational boarding schools increasing emphasis is being laid on vocational work the students being required to share in the domestic work of the institution, and in many cases, to engage in some trades or other work.

Eight physicians, one maternity worker, (C.M.B.) and a number of qualified nurses are employed, regular medical work being conducted at thirty-two stations.

The baptized membership (adult) is 4,776 organized into 102 churches, and in addition a substantial community of enquirers is receiving systematic instruction 317 Sabbath Schools are conducted with an enrolled membership of about 10,399.

The Bombay address is "Guzder House," Garden Road, Colaba, Bombay.

THE AMERICAN MENNONITE MISSION.—Established 1899, works in the C. Provinces, Mission staff numbers 37, Indian workers 55, Church members 1,400, adherents 717, Industrial Training Institutions 2, Academy including High School, Normal School and Bible School—Anglo-Vernacular Schools 2, Elementary Schools 11, Orphanages 2, Widows' Home 1, Hospital 1, Dispensaries 7, Leper Home 1, Home for untainted children of leprosy 2, Leper Clinic 5.

Secretary: A. C. Brunk, Dhamtar, C. P.

THE GENERAL CONFERENCE—MENNONITE MISSION.—Started in 1901 in the C. Provinces. Workers number 23; Leper, Medical Orphan, Zenana, Evangelistic and Educational work carried on. **Secretary:** Rev. P. W. Penner, Janjgir, C. P.

THE KURKU AND CENTRAL INDIA HILL MISSION.—Established 1890 in the C. P. and Berar, has a mission staff of 15, Indian workers 20, Churches 8, Communicants 327; Christian Community 560; 2 Boarding Schools with 62 boarders and 2 elementary schools.

Secretary.—Rev. Carl Wyder, Ellichpur, Berar, C. P.

THE CEYLON AND INDIA GENERAL MISSION.—Established 1892, occupies stations in Mysore State, in the Coimbatore and Anantapur Districts and also stations in Horana, Ceylon Mission staff 31; Indian workers 94; Churches 13; Communicants 876; Christian community 2,936; Orphanages 4; Elementary Schools 23; Pupils 940.

Secretary.—A. Scott, Kadiri, Anantapur District.

THE BOYS' CHRISTIAN HOME MISSION.—It owes its existence to a period of famine, was commenced in 1899. Mission staff about 10, Indian workers about 125. There are elementary schools with three orphanages, one for boys and two for girls, industrial training being given in all three.

There are three main stations—At Dhond in the Poona District and at Orai and Benares in United Provinces. At Benares there is an Industrial Training Institution for learning Motor, Electrical and Carpentry trades. It is for Indian young men but a few English, or European, young men have received training also. There are some out-stations. Director Rev. John E Norton, Dhond, Poona District. Rev. W. K. Norton, who opened the North India work and who was Secretary of the Mission, died while on a visit to America. His work goes on under his widow, Mrs. W. K. Norton.

Ladies' Societies.

ZENANA BIBLE AND MEDICAL MISSION.—This is an inter-denominational society, with headquarters, 33, Surrey Street, London, working among women and girls in 5 stations in the Bombay Presidency, 7 in United Provinces, and 4 in the Punjab. There are 75 European Missionary ladies on the staff and 32 Assistant Missionaries, 235 Indian teachers and nurses and 52 Bible women. During 1933 there were 5,119 in-patients in the three hospitals supported by the Society (Nasik, Lucknow and Patna). There were 23,515 out-patients, 88,609 attendances at the Dispensaries. In their 30 schools were 3,129 pupils and there is a University Department at Lahore. The evangelistic side of the work is largely done by house to house visitations and teaching the women in Zenanas, 1,256 women were regularly taught. Total expenditure in India £44,535.

Hon. Treasurer. The Lord Meston of Dunottar

President.—The Lady Kinnaird.

Secretaries.—Rev. E. S. Carr, M. A. (Hon.) Rev. L. B. Butcher, Miss E. Marriner and Miss Liesching.

WOMEN'S CHRISTIAN MEDICAL COLLEGE, WITH WHICH IS INCORPORATED THE PUNJAB MEDICAL SCHOOL FOR WOMEN.—In 1894 the North India School of Medicine for Christian Women was opened in Ludhiana in order to give a Medical Education under Christian influences to Indian Women. Doctor Edith Brown, D.B.E., M.A. M.D., was its Founder and Principal. The School was inter-denominational, and trained students for various Missionary Societies.

Clinical work was at first given at the Charlotte Hospital which belonged to the Ludhiana Zenana and Medical Mission. The Memorial Hospital was opened in 1900, and has now 220 beds. In 1913 non-Christian Students were also admitted for training, and the name was modified to its present title given above.

In 41 years 286 medical students qualified as doctors, besides 144 as compounders, 187 as nurses and 549 as dais and midwives.

At present 275 are in training—140 medical students, 17 compounders, 60 as nurses and 70 as nurse dais.

New laboratories have been built for Clinical Pathology, for Physiology, and for Chemistry and Physics. New quarters for Sisters, Nurses, Assistant staff and also a new Babies' Ward. The new Dispensary for out-patients has now become very popular.

THE MISSIONARY SETTLEMENT FOR UNIVERSITY WOMEN was founded in Bombay in 1896. Its work is religious, social and educational. The Settlement supplies a hostel for University students of all nationalities and a few Indian professional women. Classes for educated girls are provided and teaching is also given in pupils' homes. The Settlement staff take part in many of the organised activities for women's work in the city. The Social Training Centre

for women is now an integral part of the work of the Settlement. The course, lasting a year, includes both theoretical and practical work.

Warden.—Miss R. Navalkar, B.A., Reynold's Road, Byculla, Bombay.

THE RAMABAI MUKTI MISSION (affiliated with the Christian and Missionary Alliance Mission in 1925) the well-known work of the late Pandita Ramabai, shelters about 600 deserted wives, widows and orphans, educating and fitting them to earn their living. The Mission is worked on Indian lines and carried on by Indian and European workers. Evangelistic work is carried on in the surrounding villages of Kedgaon, Poona District.

Miss Eunice Wells, *Secretary-Treasurer.*

Disciple Societies.

The India Mission Disciples of Christ, under the United Christian Missionary Society, Indianapolis, Indiana, U.S.A., began work in India in 1882. It works in the Central Provinces and South United Provinces. There are 60 missionaries, including missionaries' wives, and 266 Indian workers. There are 17 organized churches with the membership of 2,524. There is a Christian community of 5,000. There are 6 hospitals and 9 dispensaries, in which 2,298 in-patients, and 31,289 out-patients were treated last year, with a total of 1,34,414 treatments. There is an orphanage for children under 8 years of age, with the older orphans provided for in the boarding schools and hostels. Three boarding schools for girls and one for boys, with 1 hostel for boys show 644 inmates. There is one Leper Asylum with 120 inmates. A Tuberculosis Sanatorium admitted 120 patients during the year. An Industrial School is conducted at Damoh in connection with which a 400 acre farm is used for practical work. The Mission Press at Jubbulpore printed last year about 3,000,000 pages of Christian Literature. 1 Normal, 2 Industrial Schools, 2 High Schools, 5 Middle Schools and 15 Primary Schools, with about 2,330 under instruction.

The Australian Branch has 3 Mission Stations in the Poona District. The Great Britain and Ireland Branch in Mirzapur District of U.P. and Palamau District in Orissa. These two have no organised connection with the India Mission Disciples of Christ.

Secretary and Treasurer. D. A. McGavran, Ph.D., Jubbulpore, C.P.

Inter-denominational Missions.

THE CENTRAL ASIAN MISSION Founded 1895. Head Office 53 Victoria Street, London, S.W.1; base on the N.W. Frontier at Mardan; advance stations at Malakand Pass, Chakdara, Baramula, Bandapur, Gurez, Karul, Shyra and Khapalu. Protestant, Evangelical, inter-denominational. Ten European Missionaries Acting Chairman of Committee, Colonel G. Wingate, C.I.E.

THE FRIENDS' SERVICE COUNCIL.—The Friends' Service Council works in five stations of the

Hoshangabad District and in two stations in Central India. A College for Hostel and High School boys is supported in Nagpur.

The Church, which is composed of 6 Monthly Meetings united in the Mid India Yearly Meeting, is largely organised on the lines of the Society of Friends in England.

There are 13 missionaries, 11 on the field and 2 on furlough also 3 retired missionaries living in the district.

The principal activities are a hospital with dispensary and a Primary School and an Anglo-Vernacular Middle school at Itarsi. A Boarding school for Girls with Primary and Anglo-Vernacular Middle Departments at Sohagpur. A Home for older girls in Sohagpur where toys are made for sale. A Boys' Hostel at Hoshangabad for boys attending Primary, Middle and High schools there. Two villages in the Seoni Tahsil of the Hoshangabad district in one of which, Makoriya, there is a dispensary and a Primary School.

In 1935 an Ashram was opened near Itarsi by Miss Hilda Cashmore Late Warden of the University Settlement, Ancoats, Manchester. The work there will be of an educational and social nature.

There is also a Weavers Colony at Khera, Itarsi, where hand loom cloth is made.

There are 169 members and 1,332 adherents. Mission Secretary: Miss M. Finch, Sohagpur. C. P. Church Secretary: Dhian Singh, Friends' Mission, Sohagpur, C. P.

THE AMERICAN FRIENDS' MISSION—With Missionaries is working in Bundelkhand, with Hospital for Women and Children at Chhatapur, with Dispensary and Boys' school at Harpalpur, Orphanage, evangelistic and industrial work at Nowgong.

Secretary: Miss E. E. Baird, Nowgong, C. I.

THE OLD CHURCH HEBREW MISSION was established in 1858, in Calcutta, and is said to be the only Hebrew Christian Agency in India. *Hon. Secretary:* E. C. Jackson, Esq., 11, Mission Row, Calcutta.

THE OPEN BRETHREN—Occupy 46 stations in the U. Provinces, Bengal, S. Mahratta, Godavari, Delta, Kanarese, Tinnevely, Malabar Coast, Coimbatore and Nilgiri Districts. They hold an annual Conference at Bangalore.

Lutheran Societies.

THE INDIA MISSION OF THE UNITED LUTHERAN CHURCH IN AMERICA—Commonly known as the United Lutheran Church Mission. Methodist Church.

THE METHODIST MISSIONARY SOCIETY commenced work in India, in 1817. The Mission in India apart from Ceylon is organised into 7 Districts with their separate District Synods working under 2 Provincial Synods in connection with these Synods there is a large English work with 22 ministers giving their whole time to Military and English work

The Districts occupied include 149 Circuits in Bengal, Madras, Mysore, Bombay, Punjab, North West Frontier Provinces, Baluchistan, Central Provinces, United Provinces and Nizam's Dominions. The European staff numbers 130 with 74 Indian ministers and 903 Catechists There are 349 Churches with a Christian community of 151,296 and 26,133 Communicants There are a number of Circuits with their Churches thoroughly organised and self supporting Educational work comprises 3 Christian Colleges with 89 teachers and 1,763 students, 5 Theological Institutes with 42 teachers and 373 students, 9 High Schools with 206 teachers and 4,539 students, 6 Industrial Institutes with 29 teachers and 26 students, 7 Boarding Schools with 103 teachers and 1,856 scholars, 1,141 Elementary Schools with 1,982 teachers and 38,282 Scholars.

Medical work is represented by 12 Medical Institutions with 6 European and 10 Indian doctors, 3,090 In patients and 139,567 Out-patients.

The Women's Department of the Society also carry on an extensive Work in the places occupied by the Methodist Missionary Society There are 104 Women Workers, including 16 doctors and 181 Bible Women, 115 Girl Day Schools with 473 teachers and 12,095 scholars, while there are 45 Boarding Schools and Training Institutions with 190 teachers and 2,505 boarders. The Women's Department is responsible for a very extensive Medical Work and have 15 Hospitals and 16 Dispensaries with 12,695 In-patients and 393,702 Out-patients.

THE METHODIST EPISCOPAL CHURCH is the organization in the United States of America which grew out of the Wesleyan revival in England and her American colonies during the latter part of the eighteenth century. This Church began its work in India in 1856, at first confining its activities to what is now the United Provinces. From that centre it spread until the outposts of its work were found in Baluchistan, Burma, Malaysia, Netherlands Indies and the Philippine Islands. In 1920 a rearrangement of the mission field of the Church separated India, Burma and Baluchistan into what is now known as the Southern Asia division. Within this present field the Church now has a total baptized Christian community of 525,668.

The major task of the Church has been the uplift of the depressed classes, and its work has been largely among that class. As a matter of fact, however, it has large numbers who came from the Mohammedans and the caste Hindus, and among such its influence is extending.

The educational work of the Church is extensive, it having in this area a total of 1,100 schools of all grades, including three colleges, twenty-two high schools, and numerous normal training and theological institutions. The registered attendants in these schools number 40,000.

Special effort is made for the instruction and development of the young people of the Church, there now being 336 chapters of the Epworth League with 13,394 enrolled members, and 4,021 organized Sunday Schools with an enrolment of 139,422.

The publishing interests of the Church are represented by the Lucknow Publishing House at Lucknow doing work in English, Urdu, Hindi and other Vernaculars. The periodicals issued cover the interests of both the evangelistic and the educational field, the Indian Witness, the Junior Methodist and Christian Education being in English, while the *Kaukab-i-Hind*, and other periodicals are issued in several of the vernaculars.

The governing body of the Church is the General Conference held quadrennially in America in which the eleven conferences now existing in India are represented by twenty-four delegates. The policy of the Church in India looks forward to complete independence under the general governing body, there at present being but about two hundred American men and women as compared to 600 ordained and 4,000 unordained Indian and Burmese workers. At present the area is divided into seventy-two districts each in charge of a superintendent and among whom are many Indians. The work is supervised by three Bishops, elected by the General Conference, and resident as follows: Bishop John W. Robinson, Delhi; Bishop Brenton T. Badley, Bombay and Bishop Jashwant Rao Chitambar, Jubbulpore.

THE AMERICAN WESLEYAN METHODIST MISSION, Sanjan, Thana District Headquarters. Stations with Missionaries, Dandi Maroli, *via* Nargole, District Thana. Pardi, District Surat. Eight Missionaries on field. Two on furlough. Four main stations. Two Boarding schools. One Industrial school. One Bible School. One village farm project. Eight village schools. Chairman of Field Committee, Rev. P. D. Doty, Sanjan, District Thana.

THE METHODIST PROTESTANT MISSION began work in India in 1919, has a staff of four missionaries. The work is confined to Dhulia Taluka, with one Main station, Dhulia. There are two hostels for orphan children, evangelistic work and a hospital. *Secretary*. Mrs. Paul Cassen, Dhulia, West Khandesh.

THE FREE METHODIST MISSION of North America—Established at Yeotmal, 1893, operates in Berar with a staff of 11 Missionaries and 40 Indian workers. Organised churches 5, 1 Theological school, 1 Girls' Boarding School, 1 Vernacular Middle school, 8 Elementary Schools, 1 Dispensary and 5 centres for Clinical and village health work.

Secretary: PERCIS M. PHELPS, Yeotmal, Berar.

THE SALVATION ARMY.

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker, and was for many years under his control, with Headquarters in India. For some time now, the areas occupied have been divided for administrative purposes into 6 Territories, each under a Territorial Commander; and one smaller Command.

Northern Territory, with Headquarters at Lahore.

Western Territory, with Headquarters at Bombay.

Madras and Telugu Territory, with Headquarters at Madras.

Southern Territory, with Headquarters at Trivandrum, in Travancore State.

Ceylon Territory, with Headquarters at Colombo.

Eastern Territory, with Headquarters at Calcutta.

Burmah Command, with Headquarters at Rangoon.

The Commanders are directly responsible to the International Headquarters in London.

Northern Territory.—The area in this Territory is the Salvation Army work in the Punjab, Delhi and United Provinces. The Territory is controlled from Lahore.

Evangelistic work, especially among the "depressed classes," is extensively carried on, both in the Punjab and the U. P.

A number of Settlements for the reformation of "Criminal Tribes" are under the control of the Salvation Army in the United Provinces (where this important reformatory work was

commenced), A special Settlement has also been opened in the Andamans during the last few years.

A land colony 2,000 acres in extent is in existence in the Multan District, where a population of 1,800 has been settled. The land will ultimately become the property of the holders.

Medical work is carried on in two Hospitals, one of which is in the Punjab and the other in the United Provinces; and also in one dispensary.

Other institutions include, Day and Boarding Schools, Weaving Schools, Agricultural Colonies, a Hospital for British Military Soldiers, and Civilians at Delhi.

Village centres at which the S. A	
Works	1,908
Officers and Employees	675
Social Institutions	19

Territorial Headquarters: Ferozepur Road, Lahore, Punjab.

Territorial Commander: Commissioner N. Muthiah.

Chief Secretary: Lt.-Colonel W. D. Pennick

Western Territory—The Western Territory comprises Bombay, Gujarat, Panch Mahals and the Maharashtra.

Territorial Headquarters The Salvation Army, Morland Road, Byculla, Bombay.

Territorial Commander Colonel Gnana Dasen (Alfred H. Barnett).

Corp. 287; Outposts 485; Societies 473; Social Institutions 16.

Besides the distinctly evangelistic operations, there are established a large General Hospital—Emery Memorial, Anand—and several Dispensaries; 220 Day Schools, 4 Boarding Schools; a Home for Juvenile Criminals, Industrial and Rescue Home for Women, conditionally Released Prisoners' Home, the management of the Bombay Helpless Beggars' Camp, Weaving Schools, Factory for the making of Weaving, Warping and Reeling Machines, and a Land Colony having a population of about 375 Salvationists.

Madras and Telugu Territory.—This Territory comprises the city of Madras and work situated in the Nellore, Guntur, Kistna and West Godavari Districts of the Northern Circars of the Madras Presidency.

There are the following agencies at work, viz., places in which work is systematically done, both evangelic and education and social:—307 Corps and Outposts; 132 village primary schools; 1 Criminal Tribes Settlement; 2 institutions for the training of Officers; 1 Leper Colony at Bapatla taken over by us in 1928; 1 Hospital for women and children at Nidrobrulu, Guntur District a Women's Industrial Home in Madras; a Boarding Schools for girls, and another for boys of the Salvation Army.

Territorial Headquarters: The Salvation Army, Broadway, Madras. G.P.O. Box 206.

Territorial Commander: Colonel Herbert B. Colledge.

General Secretary: Brigadier Edward Walker.

The South India Territory.—The main portion of our work in the Southern (India) Territory is within the geographical boundaries of the Native State of Travancore, called in Malayalam Thiruvitamkur.

Travancore is the most southern of the Indian States and occupies the south-west portion of the Indian Peninsula. It is bounded on the north by the State of Cochin and the British District of Coimbatore. The British District of Madura, Rannad and Tinnevely constitute its eastern boundary and in the west and south lie the Arabian sea and the Indian ocean. Travancore has an area of 7,625 square miles, its extreme length from north to south being 174 miles and its extreme width 75 miles. The population of the State according to the last census is 5,095,973.

Aggressive measures have carried our flag in the north, over into the Native State of Cochin and in the East into the British District of Tinnevely. The Gospel is preached in English, Tamil and Malayalam.

The outstanding feature of our operations is the Evangelical or Field Work, which is divided into twelve Divisions with 513 Corps, 819 Outposts 54 Societies. With the exception of about twenty centres where Envoys are employed, Field Officers are in command of Corps and regular programme of meetings is carried through. At suitable seasons special campaigns are organised, and without exception these always result in the winning of new people. That is to say whole families steeped in superstition, darkest heathenism and idol worship, renounce their old life with its bad ways, and come over to us. They attend our meetings, and under sound teaching, and by the Holy Ghost are led to Christ and Salvation. In companies of ten, twenty, fifty and one-hundred at a time, they come and are received under the Flag as New People. It is a thrilling experience to witness such a ceremony. News reaches us that the Officers and Soldiers of one Corps visited a nearby village where all the people were heathen. After the first Meeting fifty people decided to come over on the side of Christ. Every Sunday since a Soldier of the Corps has visited that place instructing these babes in Christ.

Overcoming temptation is a safe test, revealing of the tempted one has entered into a real spiritual experience. Our people do stand true to Christ even under severe persecution. 'Unless you renounce you Christ I will not employ you or pay you the wages due' said an employer to one of our Soldiers. 'Christ is more to me than wages' replied the Soldier, and although pressed, hard on every side, he stood firm, and gives a radiant testimony, telling how by grace he conquered.

The women Officers are making splendid progress and many take part in all Meetings. 'Move on, you cannot hold a Meeting here,' said a burly policeman to a tiny slip of a Lieutenant, who with a few Comrades was holding an Open-air Meeting in the market place. The

crowd expected to see the Official promptly obeyed, but this little woman looking up at him said 'where is your authority to stop a religious Meeting?' The Policeman beat a hasty retreat and the Meeting continued.

Our young People are mostly keen on obtaining good education, but parents are poor and fees comparatively high. In many villages there are Day Schools in which Primary Education is given and in Trivandrum and Nagercoil, there are Schools, where the pupils are taken a little higher in their studies.

The Boarding Schools in Trivandrum and Nagercoil continue to prove most useful. There is one for girls and two for boys.

In many villages it is impossible for Officers and Soldiers to get for their children any education beyond the early primer classes and so they are admitted to our Boarding Schools. In addition there are always Orphans—more than we can take - to be cared for.

The Catherine Booth Hospital with its Branches continues to do splendid service, the value of which it is quite impossible to calculate. Rich and poor find at their disposal an efficient organization of which they readily avail themselves.

There is every indication that the Government of Cochin is well pleased with our Management of the State Leper Colony. Certainly a spirit

of brotherhood and contentment exists amongst the patients, and a Christlike atmosphere pervades the whole place.

A new Leper Colony, the land and buildings of which are Salvation Army Property, is almost ready for opening. Scores of Lepers are waiting in the District so that they will be on the spot when the buildings are ready for occupation.

In March seventy Cadets were commissioned as Officers and many of these graduated from the ranks of Junior Soldiership. One Young woman, whose grandfather was an early day warrior gave a stirring testimony.

The Salvation Army Doctrines have been published in Tamil, and the Malayalam Book is now in the hands of the Book Binders.

In a quiet, unobtrusive manner the prison men and women are regularly visited by our Officers. We rejoice in the many evidences to hand indicating that the prisoners recognise our Officers as their friends.

Territorial Headquarters S A Kuravancanam, Trivandrum, Travancore State.

Territorial Commander Lieut. Commissioner Pujya (Mis. Tronice).

Chief Secretary Brigadier Daya Ratanm (Maslin).

COPYRIGHT.

There is no provision of law in British India for the registration of Copyright. Protection for Copyright accrues under the Indian Copyright Act under which there is now no registration of rights, but the printer has to supply copies of these works as stated in that Act and in the Printing Presses and Books Act XXV of 1867. The Indian Copyright Act made such modifications in the Imperial Copyright Act of 1911 as appeared to be desirable for adapting its provisions to the circumstances of India. The Imperial Act of 1911 was brought into force in India by proclamation in the *Gazette of India* on October 30, 1912. Under s. 27 of that Act there is limited power for the legislature of British possessions to modify or add to the provisions of the Act in its application to the possession, and it is under this power that the Indian Act of 1914 was passed. The portions of the Imperial Act applicable to British are scheduled to the Indian Act. The Act to which these provisions are scheduled makes some formal adaptations of them to Indian law and procedure, and some material

modifications of them in their applications translations and musical compositions. In the case of works first published in British India the sole right to produce, reproduce, perform or publish a translation is, subject to an important proviso, to subsist only for ten years from the first publication of the work. The provisions of the Act as to mechanical instruments for producing musical sounds were found unsuitable to Indian conditions. "The majority of Indian melodies," it was explained in Council, "have not been published, *i.e.*, written in staff notation, except through the medium of the phonograph. It is impossible in many cases to identify the original composer or author, and the melodies are subject to great variety of notation and tune. To meet these conditions s. 5 of the Indian Act follows the English Musical Copyright Act of 1902 by defining **musical work** as meaning any combination of melody and harmony, or either of them, printed, reduced to writing, or otherwise graphically produced or reproduced.

Laws and the Administration of Justice.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Mahomedan. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. At first the tendency of the English was to make their law public and territorial, and on the establishment of the Supreme Court at Calcutta in 1773 and the advent of English lawyers as judges, they proceeded to apply it to Europeans and Indians alike. This error was rectified by the Declaratory Act of 1780, by which Parliament declared that as against a Hindu the Hindu law and usage, and as against a Mahomedan the laws and customs of Islam should be applied. The rules of the Shastras and the Koran have been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829; the Indian Slavery Act, 1843; the Caste Disabilities Removal Act of 1850; the Hindu Widows' Remarriage Act, 1856; and other Acts and Codes. To quote the Imperial Gazetteer, "A certain number of the older English statutes and the English common law are to a limited extent still in force in the Presidency Towns as applicable to Europeans, while much of the old Hindu and Mahomedan law is everywhere personal to their native fellow subjects; but apart from these, and from the customary law, which is as far as possible recognised by the Courts, the law of British India is the creation of statutory enactments made for it either at Westminster or by the authorities in India to whom the necessary law-giving functions have from time to time been delegated."

Codification.

Before the transfer of India to the Crown the law was in a state of great confusion. Sir Henry Cunningham described it as "hopelessly unwieldy, entangled and confusing." The first steps toward general codification were taken in 1833, when a Commission was appointed, of which Lord Macaulay was the moving spirit, to prepare a penal code. Twenty-two years elapsed before it became law, during which period it underwent revision from his successors in the Law Membership, and especially by Sir Barnes Peacock, the last Chief Justice of the Supreme Court of Calcutta. The Penal Code, which became law in 1860 was followed in 1861 by a Code of Criminal Procedure. Substantially the whole criminal law of British India is contained in these two Codes. One of the most eminent lawyers who ever came to India, Sir James Stephen, said "The Indian penal code may be described as the criminal law of England freed from all technicalities and superfluities, systematically arranged and modified in some few particulars (they are surprisingly few) to suit the circumstances of British India. It is practically impossible to misunderstand the code." The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Indian Penal Code has from time to time been amended. The Code of Civil Procedure was remodelled

in 1908 and the Code of criminal Procedure in 1898. These Codes as amended from time to time are now in force.

Statute Law Revision.

In October, 1921, a committee was appointed under the presidency of the Hon. Mr. A. F. Muddiman, I.C.S., to deal with the question of statute law revision. The functions of the Committee are to prepare for the consideration of Government such measures of consolidation and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of India. In several branches of the law consolidation has long been overdue, and it is suggested that the preparation of a Bill consolidating the existing law relating to merchant shipping, with such amendments therein as are necessitated or rendered desirable by the enactment of the English statutes since 1894 on the same subject should form the first duty undertaken by the Committee. Under the conditions resulting from the establishment of the reformed Constitution, increasing importance will attach hereafter to the periodical examination and revision of the Statute Book and the Government of India hope that the Committee will take its place as a permanent feature of the legislative machinery of the country.

European British Subjects.

Whilst the substantive criminal law is the same for all classes, certain distinctions of procedure have always been maintained in regard to criminal charges against European British subjects. Until 1872 European British subjects could only be tried or punished by one of the High Courts. It was then enacted that European British subjects should be liable to be tried for any offences by magistrates of the highest class, who were also Justices of the peace, and by judges of the Sessions Courts; but it was necessary in both cases that the magistrate or judge should himself be a European British subject. In 1883 the Government of India announced that they had decided "to settle the question of jurisdiction over European subjects in such a way as to remove from the code at once and completely every judicial disqualification which is based merely on race distinctions." This decision, embodied in the Ilbert Bill, aroused a storm of indignation which is still remembered. The controversy which is a compromise which is thus summarised by Sir John Strachey ("India"). "The controversy ended with the virtual, though not avowed, abandonment of the measure proposed by the Government. Act III of 1884, by which the law previously in force was amended, cannot be said to have diminished the privileges of European British subjects charged with offences, and it left their position as exceptional as before. The general disqualification of native judges and magistrates remains, but if a native of India be appointed to the post of district magistrate or sessions judge, his powers in regard to jurisdiction over European British subjects are the same as those of an Englishman holding the same office. This

provision however is subject to the condition that every European British subject brought for trial before the district magistrate or sessions judge has the right, however trivial be the charge, to claim to be tried by a jury of which not less than half the number shall be Europeans or Americans. . . . Whilst this change was made in the powers of district magistrates, the law in regard to other magistrates remained unaltered." Since 1836 no distinctions of race have been recognised in the civil courts throughout India.

After a discussion on this subject in the Legislative Assembly in September 1921, the following motion was adopted:—"That in order to remove all racial distinctions between Indians and Europeans in the matter of their trial and punishment for offences, a committee be appointed to consider what amendments should be made in the provisions of the Code of Criminal Procedure, 1898, which differentiate between Indians and European British subjects and American and Europeans who are not British subjects in criminal trials and proceedings and to report on the best methods of giving effect to their proposals" As a result of the recommendations of the Racial Distinctions Committee the law on the subject was further modified, and by the Criminal Law Amendment Act XII of 1923 in place of the old Chapter XXXIII (sections 443-463) the new Chapter XXXIII (sections 443-449) with certain supplementary provisions were substituted. This has in some measure reduced the differences between the trials of Europeans and of Indians under the Code.

The Federal Court

Under the Government of India Act, 1935, a Federal Court for India is to be established as being an essential element in a Federal Constitution. It is at once the interpreter and guardian of the Constitution and a tribunal for the determination of disputes between the constituent units of the Federation. The Court is to consist of a Chief Justice of India and not more than six judges in the first instance. The judges are to be appointed by His Majesty and to hold office during good behaviour until they attain the age of 65. The Court is to sit at Delhi or such other place or places as may be appointed. The Federal Court shall have one exclusive original jurisdiction in any dispute between the Federation and the Federal units of the nature described in section 204 of the Act. It has also appellate jurisdiction over any final decision of a High Court in British India or in Federal state in cases involving a substantial question of law as to the interpretation of this Act or any Order in Council made thereunder, as stated in secs. 205-20 of the Act. Provision is made for an appeal to His Majesty in Council from any judgment of the Federal Court in certain specified cases.

High Courts.

High Courts of Judicature were constituted by the Indian High Courts Act of 1861 for Bengal, Bombay and Madras, and later for the United Provinces and the Punjab superseding the old supreme and Sudder Courts. More recently High Courts have been constituted for Patna and Rangoon as well. The Judges

are appointed by the Crown; they hold office during the pleasure of the Sovereign; at least one-third of their number are barristers, one-third are recruited from the judicial branch of the Indian Civil Service, the remaining places being available for persons who have held certain Judicial Offices in India or lawyers qualified in India. Thus fixed proportion of Barrister and Civilian judges has now been abolished by Government of India Act 1935. Trial by jury is the rule in original criminal cases before the High Courts, but juries are never employed in civil suits in India.

For other parts of India High Courts have been formed under other names. The chief difference being that they derive their authority from the Government of India, not from Parliament. In Sindh, N. W. F. Province and the Central Provinces and Berar the principal legal tribunal is known as the Court of the Judicial Commissioner. Quite recently the Secretary of State for India has approved the proposal for the establishment of a High Court in the Central Provinces and Berar and Sindh, and a High Court has since January 1936 been established at Nagpur.

The High Courts are the Courts of appeal from the superior courts in the districts, criminal and civil, and their decisions are final, except in cases in which an appeal lies to His Majesty in Council and is heard by the Judicial Committee of the Privy Council in England. The High Courts exercise supervision over all the subordinate courts. Returns are regularly sent to them at short intervals and the High Courts are able, by examining the returns, by sending for proceedings, and by calling for explanations, as well as from the cases that come before them in appeal, to keep themselves to some extent acquainted with the manner in which the courts generally are discharging their duties.

Lower Courts.

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magistrates. Every province, outside the Presidency towns, is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions judge, with assistants if need be. These stationary sessions courts take the place of the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the province. Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates; in the Presidency towns Presidency magistrates deal with magisterial cases and benches of Justices of the Peace or honorary magistrates dispose of the less important cases.

Trials before courts of session are either with assessors or juries. Assessors assist, but do not bind the judge by their opinions; on juries the opinion of the majority prevails if accepted by the presiding Judge. The Indian law allows considerable latitude of appeal.

But there is no Court of Criminal Appeal, and as the Judicial Committee of the Privy Council has repeatedly disclaimed all Jurisdiction as a Court of Criminal Appeal, there is no adequate machinery for appeal or revision available to persons convicted of serious and even capital offences and sentenced by the High Courts in their original or appellate Criminal Jurisdictions. The prerogative of mercy is exercised by the Governor-General-in-Council and the Local Government concerned without prejudice to the superior power of the Crown.

The constitution and jurisdiction of the inferior civil courts varies. Broadly speaking one district and sessions judge is appointed for each district: as District Judge he presides in its principal civil court of original jurisdiction, his functions as Sessions Judge have been described. For these posts members of the Indian Civil Service are mainly selected though some appointments are made from the Provincial Service. Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of India. The civil courts, below the grade of District Judge, are almost invariably presided over by Indians. There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs. 500. In the Presidency Towns, where the Chartered High Courts have original jurisdiction, Small Cause Courts dispose of money suits up to Rs. 2,000. As Insolvency Courts the chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers were conferred on the District Courts by the Insolvency Act of 1908.

Coroners are appointed only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers aided by jurors.

Legal Practitioners.

Legal practitioners in India are divided into Barristers-at-Law, Advocates of the High Court, Vakils and Attorneys (Solicitors) of High Courts, and Pleaders, Mukhtars and revenue agents. Barristers and Advocates are admitted by each High Court to practise in it and its subordinate courts; and they alone are admitted to practise on the original side of some of the chartered High Courts. Vakils are persons duly qualified who are admitted to practise on the appellate side of the chartered High Courts and in the Courts subordinate to the High Courts. Attorneys are required to qualify before admission to practise in much the same way as in England. The rule that a solicitor must instruct counsel prevails only on the original side of the Bombay

and Calcutta High Courts. Pleaders practise in the subordinate courts in accordance with rules framed by the High Courts.

Law Officers.

The Government of India has its own law colleague in the Legal Member of Council. All Government measures are drafted in this department. Outside the Council the principal law officer of the Government of India is the Advocate-General of Bengal, who is appointed by the Crown, is the leader of the local Bar, and is always nominated a member of the Provincial Legislative Council. In Calcutta he is assisted by the Standing Counsel and the Government Solicitor. There are Advocates-General appointed by the Crown and Government Solicitors for Bombay and Madras, and in Bombay there is attached to the Secretariat a Legal Remembrancer and an Assistant Legal Remembrancer, drawn from the Judicial Branch of the Indian Civil Service. The Government of Bengal consults the Bengal Advocate-General, the Standing Counsel and the Government Solicitor, and has besides a Legal Remembrancer (a Civil Servant) and a Deputy Legal Remembrancer (a practising barrister); the United Provinces are equipped with a civilian Legal Remembrancer and professional lawyers as Government Advocate and Assistant Government Advocate; the Punjab has a Legal Remembrancer, Government Advocate and a Junior Government Advocate; and Burma a Government Advocate, besides a Secretary to the Local Legislative Council. Under the Government of India Act 1935 is proposed to appoint an Advocate-General for each of the more important provinces.

Sheriffs are attached to the High Courts of Calcutta, Madras and Bombay. They are appointed by Government, selected from non-officials of standing, the detailed work being done by deputy sheriffs, who are officers of the Court.

Law Reports.

The Indian Law Reports are now published in seven series—Calcutta, Madras, Bombay, Allahabad, Patna, Lahore and Rangoon under the authority of the Governor-General-in-Council. They contain cases determined by the High Court and by the Judicial Committee on appeal from the particular High Court. These appeals raise questions of very great importance, and the Council of Law Reporting for England and Wales show their appreciation by printing the Indian Appeals in a separate volume, and have also compiled a digest of Indian Appeals covering the period 1874-1893. The other Provinces and States have series of reports issued under the authority either of the Judiciary or the State.

Bengal Judicial Department.

Derbyshire, The Hon'ble Sir Harold, Kt., K.C., M.C., Bar-at-Law.	Chief Justice. (On leave.)
Mukharji, The Hon'ble Mr. Justice Manmatha Nath, Kt., M.A., B.L.	Puisne Judge.
Costello, The Hon'ble Mr. Justice Leonard Wilfred James, M.A., LL.B., Bar-at-Law.	Do. Acting Chief Justice.

THE INDIAN POLICE.

Origins.—Cornwallis was the first Indian administrator to take the burden of policing the country off the zemindars and to place it on Government. He ordered the District Judges of Bengal in 1793 to open a Thana (Police Station) for every 400 square miles of their jurisdiction, and to appoint stipendiary Thanadars (Police Station Officers) and subordinates.

In Madras in 1816, Sir Thomas Munro took superintendence of police out of the hands of the sedentary judges and placed it in the hands of the peripatetic Collector, who had the indigenous village police system already under his control. In this way the Revenue Department controlled the police of the districts and still to some extent does so, especially in Bombay Presidency.

In Khandesh from 1826-36 Outram of Mutiny fame showed how a whole time military commandant could turn incorrigible marauders into excellent police; and Sir George Clerk, Governor of Bombay in 1848, applied the lesson by appointing full-time European Superintendents of Police in many Districts.

Madras had a torture scandal in 1853 which showed that 3 Collectors had no time for real police superintendence; in 1859 the principle of full-time European superintendence was introduced in a Madras Act of that year and the control of the Collector was removed.

The Mutiny led to general police overhaul and retrenchment and the Madras Act was mainly followed in India Act V of 1861, "An Act for the Regulation of Police", which still governs police working everywhere in India except Madras and Bombay, which has its own Police Act (IV of 1890).

Working.—Strictly speaking there is no Indian Police. With the doubtful exceptions of the Delhi Imperial Area Police, and the advisory staff of the Intelligence Bureau attached to the Home Department, the Government of India has not a single police officer directly under its control. The police provided for by the 1861 Act is a provincialised police, administered by the Local Government concerned, subject only "to the general control" of the Governor-General.

Within the Local Government area the police are enrolled and organised in District forces, at the head of each of which is a District Superintendent of Police with powers of enlistment and dismissal of constabulary; and Police Station Officers may also be dismissed by the D.S.P.

The D. S. P. is subject to dual control. The force he commands is placed at the disposal of the District Magistrate for the enforcement of law and the maintenance of order in the District. But the departmental working and efficiency of the force is governed by a departmental hierarchy of Deputy Inspector-General of Police, Inspector-General of Police, and Home Department. Generally speaking, the D. S. P. has to correspond with his District Magistrate on judicial and magisterial topics, and with his departmental chiefs on internal working of his force.

The C. I. D.—The Curzon Police Commission of 1902-3 modernised police working by providing for the direct enlistment and training of Educated Indians as Police Station Officers, and by creating specialised police agencies under each Local Government for the investigation of specialist and professional crime. These agencies are known as **Criminal Investigation Departments** and work under a Deputy Inspector-General. They collate information about crime, edit the *Crime Gazette*, take over from the District Police crimes with ramifications into several jurisdictions, and they control the working of such scientific police developments as the Finger Print Identification Bureaux.

Headquarters and Armed Police.—At the chief town of each District the D. S. P. has his office and also his Headquarter Police Lines and parade ground. This is the main centre for accumulation and distribution to the Police Stations and Outposts of the District of clothing, arms, ammunition, and accoutrements. Here are the Stores and the Armoury. Here also constabulary recruits enlisted by the D. S. P. are taught drill, deportment, and duties and are turned out to fill vacancies. The Headquarter Lines also contain the two hundred or so armed police who mount guard on Treasuries in the District, and also provide prisoner and treasure escort. Actually they form a small and mobile local army equipped with muskets (single loading) and bayonets. The most highly trained section of them go through a musketry course and are armed with 303 service rifles. At most head-quarters, but by no means all, there is also a reserve of mounted and armed police.

Thanas and Thanadars—Almost throughout India the popular terms for Police Station and Police Station Officer are "Thana" and "Thanadar." It is at the Police Station that the public are most in touch with the police and the police with the public. Whether it be in a large city or in a mofussil hamlet, the Thana is the place where people come with their troubles and their grievances against their neighbours or against a person or persons unknown. In dealing with such callers, the Thanadar, who like police of all ranks, is supposed to be always on duty, is chiefly guided by the Fourteenth Chapter of the Code of Criminal Procedure, and the Second Schedule at the end of that Code. This schedule shows nearly all penal offences and states whether or not they are "cognisable by the police." The fourteenth Chapter lays down that a cognisable complaint must then and there be recorded, visited, and investigated. A non-cognisable complaint is merely noted in a separate book and the complainant is told to go to court.

Police Prosecutors.—The complainant in a cognisable case not only has his complaint recorded but investigated without payment of fee. If the Thanadar succeeds in establishing a *prima facie* case against the accused, the prosecution in court is conducted free of charge by a police prosecutor, who is generally a junior pleader, engaged by Government to conduct police cases in the lower courts. Cases committed

to the Sessions are conducted by the Public Prosecutor or one of his Assistants, and the reports of these officers and the comments of the judge are a means for the D. S. P. to know whether his Thanadars are doing their work properly.

Out Posts.—When the Police Commission of 1860 devised the plan of police that still holds the field, they laid down two criteria of the numbers required. One was one policeman per square mile; the other was one per thousand of population. In towns it is well enough to have the available police concentrated at the police station. But in the mofussil the Thana is very often fifty miles distant from portions of its jurisdiction. It is in such cases profitable to detach a portion of the police station strength under a head constable to man an outpost where complaints can be received and investigation begun without the injured party having to undertake a long journey to the distant Thana. The secret of good mofussil police working in normal times is dispersion. A single policeman, however junior, represents the rule of law and is an agent of Government.

The Chain of Promotion.—Ordinarily the constable may aspire to become a jamadar, or with ability and luck, a Police Station Officer or even Inspector. The directly recruited matriculate who comes in through the Police Training School as a Thanadar may ordinarily become an Inspector or a Deputy Superintendent, or exceptionally a Superintendent. The direct Deputy, an office reserved for Indians, has a good chance of becoming Superintendent, and perhaps Deputy Inspector-General. The direct Assistant Superintendent, whether from England, or from India, is sure of a Superintendentship, and has chances of D. I. G. after 25 years' service. The period of service for all ranks for full pension is thirty years, and if an officer dies in the process of earning full pension his pension dies with him and all his dependents get his provident fund.

Presidency Police.—In the Presidency Towns there is unified police control for the Police Commissioner is responsible for both law and order and for departmental training and efficiency.

The Commissioner of Police of a Presidency Town is not the subordinate of the Provincial Inspector-General of Police and he deals direct with Government, just as the Presidency Magistrates deal directly with the High Court. The Criminal Procedure Code of India is superseded in the Presidency Towns by special police Acts which prescribe police procedure. Justice in criminal cases in Presidency Towns is somewhat rough and ready, not only from this cause, but also because Presidency Magistrates can give upto six months or Rs. 200 fine summarily, *i.e.*, without formal record of proceedings; and if only whipping or fine up to Rs. 200 is inflicted there need be not even any statement of reasons for the conviction.

Round Figures.—The process of reorganisation and retrenchment goes on ceaselessly, annual administration reports for the ten major provinces and four minor administrations appeared tardily, and there are no unified statistics for the police of India and Burma. The following figures are therefore merely to be regarded as approximations, giving a general idea of the numbers of police and the volume of work put through yearly.—There are about 25,000 Military Police, chiefly in Burma, Assam, and Bengal, and these cost about one crore. The maintenance of them is a departure from the principles laid down by the 1860 Commission and the 1861 Act.

Provincial Police including Burma total about 200,000 and cost eleven and a half crores or an average of over one crore per major Province.

There are about 10,000 Thanads or Police Stations which annually investigate from five to six thousand murders, four thousand dacoities, twenty-five thousand cattle thefts, one hundred and seventy thousand ordinary thefts and as many burglaries. They place on trial every year about three-quarters of a million persons, of whom about half a million or more are convicted. The jail population of India, which is over a hundred thousand, consists of many habituals who on release proceed to prey on the public until such time as the police again secure their conviction and incarceration.

STATISTICS OF POLICE WORK.

The undesirability of attaching undue importance to statistical results as a test of the merits of police work was a point upon which considerable stress was laid by the Indian Police Commission, who referred to the evils likely to result from the prevalence among subordinate officers of an impression that the advancement of an officer would depend upon his being able to show a high ratio of convictions, both to cases and by persons arrested, and a low ratio of crime. The objection applies more particularly to the use of statistics for small areas; but they cannot properly be used as a basis of comparison even for larger areas without taking into account the differences in the conditions under which the police work; and, it may be added, they can at the best indicate only very imperfectly the degree of success with which the police carry out that important branch of their duties, which consists in the prevention of crime. These considerations have been emphasized in recent orders of the Government of India. Subject to these observations, the figures below may be given as some indication of the volume of work falling upon the police, and of the wide differences between the conditions and the statistical results in different provinces. They are statistics of cognizable crime —

Administrations.	Number pending from previous year.	Number reported in the year.	Number of persons tried.	Number convicted.	Number acquitted or discharged.	Number in custody pending trial or investigation or on bail at end of year.

* Includes figures "for cattle theft."

JAILS.

Jail administration in India is regulated generally by the Prisons Act of 1894, and by rules issued under it by the Government of India and the local governments. The punishments authorised by the Indian Penal Code for convicted offenders include transportation, penal servitude, rigorous imprisonment (which may include short periods of solitary confinement), and simple imprisonment. Accommodation has also to be provided in the jails for civil and under-trial prisoners.

The origin of all jail improvements in India in recent years was the Jail Commission of 1889. The report of the Commission, which consisted of only two members, both officials serving under the Government of India, is extremely long, and reviews the whole question of jail organization and administration in the minutest detail. In most matters the Commission's recommendations have been accepted and adopted by Local Governments, but in various matters, mainly of a minor character, their proposals have either been rejected *ad initio* as unsuited to local conditions, abandoned as unworkable after careful experiment or accepted in principle but postponed for the present as impossible.

The most important of all the recommendations of the Commission, the one that might in fact be described as the corner stone of their report, is that there should be in each Presidency three classes of jails: in the first place, large central jails for convicts sentenced to more than one year's imprisonment; secondly, district jails at the headquarters of districts; and, thirdly, subsidiary jails and "lock-ups" for under-trial prisoners and convicts sentenced to short terms of imprisonment. The jail department in each province is under the control of an Inspector-General; he is generally an officer of the Indian Medical Service with jail experience, and the Superintendents of certain jails are usually recruited from the same service. The district jail is under the charge of the civil surgeon, and is frequently inspected by the district magistrate. The staff under the Superintendent includes, in large central jails, a Deputy Superintendent to supervise the jail manufactures, and in all central and district jails one or more subordinate medical officers. The executive staff consists of jailors and warders, and convict petty officers are employed in all central and district jails, the prospect of promotion to one of these posts being a strong inducement to good behaviour. A Press Note issued by the Bombay Government in October, 1915, says:—"The emoluments of all ranks from Warden to Superintendent have been repeatedly revised and altered in recent years. But the Department is not at all attractive in its lower grades. The two weak spots in the jail administration at the moment are the insufficiency of Central Prisons and the difficulty of obtaining good and sufficient warders."

The Jails Committee.—Since the introduction of the reformed constitution the maintenance of the Indian Prisons falls within the sphere of provincial Governments and is subject

to all India legislation. The obvious advisability of proceeding along certain general lines of uniform application led lately to the appointment of a Jails' Committee, which conducted the first comprehensive survey of Indian prison administration which had been made for thirty years. Stress was laid by the Committee upon the necessity of improving and increasing existing jail accommodation, of recruiting a better class of warders; of providing education for prisoners, and of developing prison industries so as to meet the needs of the consuming Departments of Government. Other important recommendations included the separation of civil from criminal offenders, the adoption of the English system of release on license in the case of adolescents, and the creation of children's courts. The Committee found that the reformatory side of the Indian system needed particular attention. They recommended the segregation of habituals from ordinary prisoners, the provision of separate accommodation for prisoners under trial, the institution of the star-class system; and the abolition of certain practices which are liable to harden or degrade the prison population.

Employment of Prisoners.—The work on which convicts are employed is mostly carried on within the jail walls, but extramural employment on a large scale is sometimes allowed, as, for example, when a large number of convicts were employed in excavating the Jhelum Canal in the Punjab. Within the walls prisoners are employed on jail service and repairs, and in workshops. The main principle laid down with regard to jail manufactures is that the work must be penal and industrial. The industries are on a large scale, multifarious employment being condemned, while care is taken that the jail shall not compete with local traders. As far as possible industries are adapted to the requirements of the consuming public departments, and printing, tent-making, and the manufacture of clothing are among the commonest employments. Schooling is confined to juveniles; the experiment of teaching adults has been tried, but literary instruction is unsuitable for the class of persons who fill an Indian jail.

The conduct of convicts in jail is generally good, and the number of desperate characters among them is small. Failure to perform the allotted task is by far the most common offence. In a large majority of cases the punishment inflicted is one of those classed as "minor." Among the "major" punishments fetters take the first place. Corporal punishment is inflicted in relatively few cases, and the number is steadily falling. Punishments were revised as the result of the Commission of 1889. Two notable punishments then abolished were shaving the heads of female prisoners and the stocks. The latter, which was apparently much practised in Bombay, was described by the Commission as inflicting exquisite torture. Punishments are now scheduled and graded into major and minor. The most difficult of all jail problems is the internal maintenance of order among the prisoners, for which purpose paid

warders and convict warders are employed. With this is bound up the question of a special class of well-behaved prisoners which was tried from 1905 onwards in the Thana Jail.

Juvenile Prisoners.—As regards "youthful offenders"—i.e., those below the age of 15—the law provides alternatives to imprisonment, and it is strictly enjoined that boys shall not be sent to jail when they can be dealt with otherwise. The alternatives are detention in a reformatory school for a period of from three to seven years, but not beyond the age of 18; discharge after admonition; delivery to the parent or guardian on the latter executing a bond to be responsible for the good behaviour of the culprit; and whipping by way of school discipline.

The question of the treatment of "young adult" prisoners has in recent years received much attention. Under the Prisons Act, prisoners below the age of 18 must be kept separate from older prisoners, but the recognition of the principle that an ordinary jail is not a fitting place for adolescents (other than youthful habituals) who are over 15, and therefore ineligible for admission to the reformatory school, has led Local Governments to consider schemes for going beyond this by treating young adults on the lines followed at Borstal, and considerable progress has been made in this direction. In 1905, a special class for selected juveniles and young adults was established at the Dharwar jail in Bombay; in 1908 a special juvenile jail was opened at Alipore in Bengal; in 1909 the Melkita jail in Burma and the Tanjore jail in Madras were set aside for adolescents, and a new jail for juvenile and "juvenile adult" convicts was opened at Bareilly in the United Provinces; and in 1910 it was decided to concentrate adolescents in the Punjab at the Lahore District jail, which is now worked on Borstal lines. Other measures had previously been taken in some cases; a special reformatory system for "juvenile adults" had, for example, been in force in two central jails in the Punjab since the early years of the decade, and "Borstal enclosures" had been established in some jails in Bengal. But the public is slow to appreciate that it has a duty towards prisoners, and but little progress has been made in the formation of Prisoners' Aid Societies except in Bombay and Calcutta, though even in those cities much remains to be done.

Reformatory Schools.—These schools have been administered since 1899 by the Education department, and the authorities are directed to improve the industrial education of the inmates, to help the boys to obtain employment on leaving school, and as far as possible to keep a watch on their careers.

Transportation.—Transportation is an old punishment of the British Indian criminal law, and a number of places were formerly appointed for the reception of Indian transported convicts. The only penal settlement at the present time is Port Blair in the Andaman Islands.

Commission of Enquiry, 1919.—A committee was appointed to investigate the whole system of prison administration in India with special reference to recent legislation and experience in Western countries. Its report, published in 1921, was summarised in the

Indian Year Book, 1922 (pages 670-671). A number of reforms were advocated but, owing to financial stringency, it has not yet been possible to introduce some of the more important of them.

Fines and Short Sentences.—Those sections of the Indian Penal Code, under which imprisonment must be awarded when a conviction occurs, should be amended so as to give discretion to the court. Sentences of imprisonment for less than twenty-eight days should be prohibited.

The Indeterminate Sentences.—The sentence of every long-term prisoner should be brought under revision, as soon as the prisoner has served half the sentence in the case of the non-habitual, and two-thirds of the sentence in the case of the habitual, remission earned being counted in each case. The revision should be carried out by a Revising Board, composed of the Inspector-General of Prisons, the Sessions Judge and a non-official. In all cases, the release of a prisoner on parole should be made subject to conditions, breach of which would render him liable to be remanded to undergo the full original sentence. The duty of seeing that a prisoner fulfils the conditions on which he was released should not be imposed upon the police or upon the village headman, but special officers, to be termed parole officers, should be appointed for the purpose. These parole officers should possess a good standard of education, though not necessarily a university degree, and should both protect and advise the released prisoner and report breaches of the conditions of release.

Transportation and the Andamans.—The future of the penal settlement of Port Blair was continually under the consideration of the Government of India from the time of the publication of the Jails Commission report, but it was not till 1926 that a definite decision was reached. It was then decided that henceforth only those convicts should normally be sent to the Andamans who volunteered to come, that the old restrictions on life in the settlement should be sensibly relaxed, that convicts should be encouraged to settle on the land, that in certain conditions they should be entitled to release to obtain occupancy rights over the land which they had cultivated, and that the importation of wives and families should be encouraged. The object of these changes was to promote the development of a free colony of persons, who would, after the terms of their sentences had expired, make the Andamans their permanent home. The effect up to date has been to introduce a completely new outlook on life into the settlement, but it is still too soon to appreciate its potentialities. It has recently been found necessary to send to the Andamans certain convicts either sentenced to transportation for life or to long terms of rigorous imprisonment for permanent incarceration in the Cellular Jail. Such prisoners will not be released and allowed to go into the settlement, and its development will in no way be affected by their presence.

Criminal Tribes.—The first essential of success in dealing with the criminal tribes is the provision of a reasonable degree of economic

comfort for the people. It is therefore of paramount importance to locate settlements where sufficient work at remunerative rates is available. Large numbers of fresh settlers should never be sent to a settlement without first as-

certaining whether there is work for them. Commitment to settlements should, as far as possible, be by gangs not by individuals. It is desirable to utilise both Government and private agency for the control of settlements.

The variations of the jail population in British India during the five years ending 1933 are shown in the following table:—

—	1933	1932	1931	1930	1929
Jail population of all classes on 1st January	165,778	154,871	163,298	137,129	140,142
Admissions during the year	756,344	896,876	739,840	771,187	598,568
Aggregate	922,122	1,051,747	903,138	908,316	738,710
Discharged during the year from all causes	765,369	885,949	748,266	744,946	601,581
Jail population on 31st December	156,753	165,798	154,872	163,370	137,129
Convict population on 1st January	139,705	126,580	136,552	116,184	118,970
Admissions during the year	225,100	267,239	207,568	223,538	167,697
Aggregate	364,805	393,819	344,120	339,722	286,667
Released during the year	226,175	247,648	216,807	196,996	163,796
Transported beyond seas	1,342	1,492	1,685	1,599	1,821
Casualties, &c.	2,592	2,395	2,503	2,541	2,514
Convict population on 31st December,	131,981	139,708	126,580	136,552	116,187

More than one-half of the total number of convicts received in jails during 1933 came from the classes engaged in agriculture and cattle tending, over 178,000 out of 225,000 were returned as illiterate.

The percentage of previously convicted prisoners rose from 12 to 14, while the number of youthful offenders fell from 1,024 to 382. The following table shows the nature and length of sentences of convicts admitted to jails in 1931 to 1933 —

Nature and Length of Sentence.	1933	1932	1931
Not exceeding one month	45,954	43,196	39,284
Above one month and not exceeding six months.	93,007	120,656	89,647
" six months one year ..	44,020	54,253	39,373
" one year five years ..	31,121	38,373	30,584
" five years ten	5,087	5,598	4,740
Exceeding ten years	463	705	575
Transportation beyond seas—			
(a) for life	1,929	2,348	1,933
(b) for a term	96	94	100
Sentenced to death	1,415	1,648	1,331

The total daily average population for 1933 was 133,750, the total offences dealt with by criminal courts was 227, and by Superintendents 126,719. The corresponding figures for 1932 were 144,004, 310 and 147,736, respectively.

The total number of corporal punishments increased from 190 to 267. The total number of cases in which penal diet (with and without cellular confinement) was prescribed was 4,153 as compared with 4,669 in the preceding year.

Total expenditure decreased from Rs. 1,77,91,718 to Rs. 1,70,37,505 and total cash earnings from Rs. 24,01,285 to Rs. 20,16,245; there was consequently a decrease of Rs. 3,69,173 in the net cost to Government.

The death rate increased from 10.19 per mille in 1932 to 10.80 in 1933. The admissions to hospital were lower, and the ratio of daily average number of sick per mille of average strength fell from 23.12 to 21.57.

The Laws of 1935

BY

RATANLAL RANCHHODDAS, *Advocate, High Court, Bombay.*

AND

MANHAR R. VAKIL, *Barrister-at-Law.*

1. The Indian Naturalization (Amendment) Act—This Act relates to the national status of married women and gives effect to the Articles of a Convention on matters relating to the Conflict of Nationality Laws which was concluded under the auspices of the League of Nations in 1930. Under section 2 a married woman whose husband acquires British Indian Nationality during marriage can acquire such nationality if within a certain period she makes a declaration to the Local Government of her desire to do so. S 4 protects such a woman from loss of British Indian Nationality as a consequence of the loss of such nationality by her husband unless by reason of the acquisition of a new nationality she also has acquired that nationality.

2. The Indian Tariff (Amendment) Act—This Act reduces the import duty on wheat from Rs. 2 to Re 1-8-0 per cwt and restores the former equality in the levels of the duties on wheat and wheat flour. An import duty at the rate of twelve annas per maund of 82 2/7 lbs avoirdupois is imposed on imports of broken rice of foreign origin.

3. The Indian Tea Cess (Amendment) Act—This Act raises the maximum rate of the cess levied on exports of tea from India by sea from annas eight per hundred pounds to annas twelve per hundred pounds.

4. The Salt Additional Import Duty (Extending) Act—This Act extends the life of the Salt (Additional Import Duty) Act, 1931, for a further period of twelve months.

5. The Indian Mines (Amendment) Act—Following recommendations made by the Select Committee of the Legislative Assembly on the Indian Mines (Amendment) Bill of 1928 and by the Royal Commission on Labour, both Houses of the Legislature, in dealing with a Draft Convention relating to hours in coal mines, adopted in 1932, a resolution recommending the examination of the possibility of reducing the statutory limits of hours in mines. In pursuance of this resolution, the question was examined by the Government of India in consultation with the Local Governments and the interests concerned. The present Act reduces the statutory limits of hours in mines. S. 2 raises the minimum age for employment in a mine from 13 to 15 years. S. 4 provides for the maintenance of statistics of minor accidents. Under s. 6 the hours of work above ground are reduced to 54 hours weekly and 10 hours daily and the hours of work below ground are reduced to 9 hours daily.

The Indian Finance Act—The Act continues for a further period of one year certain duties and taxes imposed under the Indian Finance Act, 1934; reduces the income-tax on incomes

of Rs 1,000 or upwards but less than Rs 2,000; reduces the surcharges on income-tax and super-tax; reduces the import and excise duties on silver; and abolishes the export duty on raw skins. S 2 and 4 provide for the continuance for a further period of one year of the existing provisions regarding salt duty and inland postage rates. The duty of Rs 1-4-0 per maund on salt remains liable to the additional duty imposed under s 5 of the Indian Finance (Supplementary and Extending) Act, 1931. S 3 provides for the reduction of the import duty on silver from five annas per ounce to two annas per ounce and for the abolition of the export duty on raw skins. S 5 continues for a further period of one year of the existing rates of income-tax and super-tax with the following alterations—(a) The rate of income-tax when the total income is Rs. 1,000 or upwards but is less than Rs. 1,500 is reduced from two pias to 1½ pias; (b) The rate of income-tax when the total income is Rs 1,500 or upwards, but less than Rs 2,000 is reduced from four pias to 2½ pias; and (c) the surcharges on income-tax and super-tax are reduced from one-fourth to one-sixth. S 6 provides for the reduction of the excise duty on silver corresponding to the reduction in import duty.

6 The Aligarh Muslim University (Amendment) Act—Under s 16 of the Aligarh Muslim University Act, 1920, the appointment of a Pro-Vice-Chancellor is obligatory. The present amendment to the original Act makes the appointment of a Pro-Vice-Chancellor permissive and not obligatory.

7. The Indian Army (Amendment) Act.—S. 50 of the Indian Army Act, 1911, sets out all the penal deductions which may be made from the pay and allowances of a person subject to the Act, but sub-s (2) thereof makes no reference to the forfeiture of such pay as corps or working pay which can be awarded as a minor punishment by an officer exercising authority under s. 20. S 2 of the present Act rectifies this omission and omits from s 50 the reference to suspension from pay, which owing to the deletion of clause (c) of s. 43 by the Indian Army (Amendment) Act, 1934, is no longer a punishment which can be awarded by a Court-martial. S 3, by amending s. 73 of the original Act, empowers a District Court-martial to award a warrant officer the sentences of forfeiture of seniority of rank, reprimand and severe reprimand on the analogy of s. 182 of the Army Act (44 & 45 vict. c. 58). S. 103 A of the original Act empowers the Governor-General in Council to order the detention of persons who, when brought to trial by a Court-martial, are found to be of unsound mind and therefore incapable of making their defence, or are found to be "guilty but insane." S. 4 of this Act provides for the release of such

persons on the report of a Medical Officer or on a certificate from any of the authorities empowered to grant a certificate under s 473 of the Code of Criminal Procedure, 1898, or on the application of a relative or friend.

8. The Central Provinces Court Supplementary Act.—This Act makes certain necessary amendments of a formal nature in the following enactments consequent on the establishment of the High Court of Judicature at Nagpur: The Indian Divorce Act, 1869, The Central Provinces Laws Act 1875, The Code of Criminal Procedure, 1898, The Indian Stamp Act, 1899, The Indian Limitation Act, 1908, and The Sindh Courts (Supplementary) Act, 1926.

9. The Provincial Small Cause Courts (Amendment) Act.—This act removes certain doubts which have arisen in the interpretation of the proviso to sub-s (1) of s 17 of the Provincial Small Cause Courts Act, 1887, by making it clear that the preliminary application to ascertain what security will satisfy the Court must be made and decided before the substantive application for the order to set aside the decree, and that it is always open to the applicant to adopt the alternative course of depositing the total decretal amount.

10. The Provincial Insolvency (Amendment) Act.—There is judicial authority for the proposition that a composition under s 39 of the Provincial Insolvency Act, 1920, releases the insolvent only from debts entered in the schedule, but not from a debt in respect of which the creditor has not taken part in the insolvency proceedings, whereas s 30 of the Presidency-Towns Insolvency Act, 1909, releases the insolvent from all debts provable in insolvency. This Act assimilates the terms of s 39 of the former act to those of s 30 of the latter act.

11. The Factories (Amendment) Act.—The Factories Act, 1934, prohibits, save in very exceptional circumstances, the employment of women during the night hours; but women managers or supervisors or women employed in confidential capacities may be exempted by rule from this prohibition. The present Act removes this power of exemption and brings the law into line with the International Labour Conventions relating to the employment of women during the night.

12. The Repealing and Amending Act.—This Act makes necessary amendments of a formal nature in certain enactments and repeals certain unnecessary and spent enactments.

13. The Jabulpore and Chhattisgarh Divisions (Divorce Proceedings Validation) Act.—Within the Jabulpore and Chhattisgarh Divisions in the Central Provinces, the jurisdiction of a High Court under the Indian Divorce Act, 1869, was, by the Government of India, Home Department, Notification dated September 1, 1923, and by sub-s (2) of s 2 of the Criminal Law Amendment Act, 1923, transferred from the Allahabad High Court to the Court of the Judicial Commissioner of the Central Provinces. The Allahabad High Court has, in point of fact, continued to exercise this jurisdiction in these divisions up to the present. This Act reaffirms the jurisdiction of the Court of the Judicial Commissioner of the Central Provinces, as from September 1, 1923, and validates all proceedings taken in the Allahabad High Court

during the period from that date up to the commencement of the present validating Act.

14. The Indian Coffee Cess Act.—The coffee growing interests in South India pressed upon the Government of India the desirability of imposing a cess on exports of coffee with a view to providing funds for the improvement and development of the Indian coffee industry. The present Act imposes on coffee exported from British India a cess to provide for the creation of a fund to be expended by a Committee specially constituted in this behalf for the promotion of the cultivation, manufacture and sale of Indian Coffee. S 1 (2) excludes Burma from the operation of this Act in view of the approaching separation of Burma from India. S 3 provides for the imposition of coffee cess on all coffee produced in India and taken by sea or by land to any place beyond the limits of British India or to Burma at the rate of one rupee per hundred weight. S 4 empowers the Governor General in Council to constitute a Committee, known as the Indian Coffee Cess Committee, consisting of the following members to receive and expend the proceeds of the coffee cess—(1) five persons representing respectively the agricultural departments of the Local Governments of Madras and Coorg and of the Governments of the States of Mysore, Travancore and Cochin, (2) eleven persons representing the coffee growing industry, namely, three persons nominated by the Government of the Mysore State, two persons nominated by the Local Governments of Madras and Coorg, respectively, three persons nominated by the United Planters' Association of Southern India, and three persons nominated by the Coffee Growers' Association, (3) three persons representing trade interests nominated by the Governor General in Council, and (4) one person representing the Imperial Council of Agricultural Research nominated by the Governor General in Council. S 7 empowers the Committee to elect a Chairman from amongst its members and provides for the appointment of sub-committees and executive officers for the efficient performance of the duties imposed by this Act. S 8 provides for the application of proceeds of coffee cess to meet the expenses of the Committee and the cost of measures as the Committee may consider advisable to undertake for promoting the sale and increasing the consumption in India and elsewhere of coffee produced in India and also for promoting agricultural and technological research in the interest of the coffee industry in India. Under s 9 the Central Board of Revenue constituted under the Central Board of Revenue Act, 1924, is authorised to make rules providing for (a) the refund of the coffee cess levied where coffee is exported by land and subsequently imported in India, and (b) the export by land, without payment of the coffee cess, of coffee which is subsequently to be imported into India. S 11 empowers the Governor General in Council to dissolve the Committee. Under s 12 the Governor General in Council may, after consulting the Committee, by notification in the Gazette of India, make rules to carry out the purposes of this Act. S 13 authorises the Committee, with the previous sanction of the Governor General in Council, to make bye-laws consistent with this Act and with the rules made thereunder.

India and the League of Nations.

India is a Founder-Member of the League of Nations and enjoys in it equal rights with other Member-States, a position which she mainly owes to the goodwill shown towards her advancement and aspirations by Great Britain and the Self-Governing Dominions of the British Empire. The League of Nations was established under the terms of the Peace Treaty which was signed in Paris in 1919 after the conclusion of the Great War. Great Britain and the Self-Governing Dominions in 1917 passed a resolution which set India upon the road that led to the high international platform on which she stepped.

India was represented at the Imperial War Conference of 1918, at the Imperial Conferences held in London in 1921, 1923, and 1926, and at the Imperial Economic Conference held in London in 1930. The report of the Inter-Imperial Relations Committee of the Imperial Conference, which was adopted by the Conference of 1926, stated the position of Great Britain and the Dominions to be "autonomous communities, equal in status, in no way subordinate to one another in any respect of their domestic or external affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations. India is not yet a Self-Governing Dominion to the extent indicated in this formula. The first stage in the direction of establishing Responsible Government in India was prescribed by the Government of India Act, 1919, but the Governor-General of India does not yet (to quote again from the Inter-Imperial Relations Committee) hold "in all essential respects the same position in relation to the administration of public affairs" in India as is held by His Majesty the King-Emperor in Great Britain. And there are certain other respects in which India's Constitutional position in the Empire is not the same as that of the Self-Governing Dominions. India, for example, is not entitled to accredit a Minister Plenipotentiary to the Heads of Foreign States.

The position enjoyed by India in the Empire governed the position which she entered when, as one of the States of the Empire, she joined in the Paris Peace Negotiations in 1918-19. India's membership of the League of Nations places her in a unique position among all non-self-governing States, Dominions, or Colonies throughout the world. She is an original member of the League by virtue of para 1 of article I of the Covenant by which the League was established and which states that any fully self-governing State, Dominion or Colony not named in the Annexes may become a member of the League. She is the only original member which is not self-governing, and in virtue of the restriction under para 11 of article I, on the admission of members other than original members, she will, so long as the present constitution of the League endures, remain the only member which is not self-governing. As a member of the League, India was for the first time brought into direct and formal contact with the outside world as a separate entity.

She was treated as if she had attained to the same kind of separate nationhood as that enjoyed by the Dominions.

India's Attitude.

On questions coming before the League, India has exactly the same rights as any other Member-State. The Secretary of State for India in His Majesty's Government is ultimately responsible for the appointment of Indian delegates and for their instruction, but in practice, he and the Government of India act jointly in consultation and agreement with one another. Partly as a result of her membership of the League and partly owing to resolution No. IX adopted by the Imperial War Conference in 1917, recommending *inter alia* recognition of the right of the Dominions and of India to an adequate voice in British foreign policy and foreign relations, India has been given the same representation as the Dominions at all international conferences at which the British Empire is represented by a combined Empire Delegation. On many occasions in fact she has taken the lead in forming world opinion towards the achievement of the League's aims. In particular in the international Labour organisation she has been successful in bringing Empire policy into line with her own on more than one occasion. In many of those conferences, particularly those of the League, Indian delegations have taken an independent line of action, sometimes directly opposed to the attitude of other parts of the British Commonwealth. One interesting case occurred in 1920 at the Genoa Maritime Conference when Indian delegates in the face of opposition from the Empire managed to secure a mandate for special treatment for Indian sailors in British shipping although there was a concerted move from the Empire delegation to get Indian lascars driven off British ships.

India's New Status.

It will be observed that the situation created by India's stepping from the Imperial Conference into the Paris Peace Conference and League of Nations in the manner in which she did was in certain respects highly anomalous and one impossible to harmonize with her constitutional position as defined in the Government of India Act. Nevertheless, as the Secretary of State, in a Memorandum presented to the Indian Statutory Commission by the India Office in 1929, showed, "It has been the deliberate object of the Secretary of State to make India's new status a reality for practical purposes within widest possible limits." It was not legally possible for the Secretary of State to relinquish his constitutional power of control, nor, consistently with responsibility to Parliament, could he delegate it: "But it has been his constant endeavour to restrict its exercise to a minimum, to keep even its existence as far as possible in the background, and to allow to the Indian Government the greatest possible freedom of action under the influence of their Legislature and of public opinion."

There are available many illustrations of these principles being followed in practice. India is given scope to pursue in the League of Nations an independent line of action within very wide limits, even though, as has occurred in some instances, it brings her into conflict with His Majesty's Government. In 1925, for example, at the conference on Opium and Drugs India so acted that the British delegation had to obtain fresh instructions from H. M.'s Government which resulted in India settling the question of Indian hemp to her own liking. In the event of such conflict within those limits, the Secretary of State acts, if he acts at all, as head of the Government of India rather than as a member of His Majesty's Government. He does not use his power to impose on the Indian Delegation an artificial solidarity with British Delegates, but, rather, with the consent of his colleagues of His Majesty's Government, he stands aside and allows representatives of India the same freedom as Dominion Delegates would enjoy in controversy with the Delegates of Great Britain. India has participated in all the Assemblies of the League, in the annual session of the International Labour Conference where because of her individual importance she plays a very predominant part, and in numerous Conferences on special subjects held under the auspices of the League as well as in some important non-

League, International Conferences, including the Washington Conference on Naval Armament in 1921, in Genoa Economic Conference in 1922, and the International Naval Conference held in London in 1930. India is also represented on several permanent League bodies, e.g., the governing body of the International Labour Office, the Advisory Committee on Opium and Drugs, the Economic Committee, the Health Committee and the Committee of Intellectual Co-operation. It is interesting to note that since 1921 Sir Atul Chatterjee has been acting as Deputy Commissioner of the Governing Body of the International Labour Office and this position was preliminary to his being elected Chairman in 1932.

The year 1932 saw the opening of a League of Nations **Bureau in Bombay** in response to the demands of successive delegations to Geneva. Its purpose is to keep in touch with representative Indian opinion so that Geneva and India may be brought closer together. The Bureau is maintained by the League of Nations without any contribution by the Government of India.

In the Report of the Indian Delegation in 1933, a recommendation was made for the appointment of a permanent Indian Delegate at Geneva, but Government have not yet seen their way to adopt the suggestion.

Labour in India.

GROWTH OF THE LABOUR PROBLEM.

India is and always has been a predominantly agricultural country and over sixty-five per cent. of her working population are dependant on the soil for their principal means of livelihood. Agriculture by itself, however, does not always afford, either to the agriculturist or to the agricultural labourer, the wherewithal for keeping body and soul together. Much the greater part of the land is divided up into small holdings which are in the hands of cultivating owners or of cultivating tenants who work on the fields themselves with as many members of their families as are able to do so. Little outside labour is employed and then only during busy spells such as at transplanting and harvesting. For the purely agricultural labourer, employment on the land is casual and spasmodic and, normally, the cash wages earned by him are remarkably low, for the contract of hiring often includes a mid-day meal. Even for the members of the families of the cultivating owners and tenants, employment on the land is seldom perennial and is mostly seasonal. It is necessary, therefore, for both the smaller cultivators and the agricultural labourers to migrate frequently to the towns and cities in search of additional work in order to keep the wolf from the door, but, the migration is generally always of a temporary character, and the agriculturist's contact with his land is seldom, if ever, permanently broken. It is this pool—cultivating owners and tenants, members of their families and the landless agricultural labourers—from which the manufacturing, transport, mining and other industries of India draw the bulk of the labour which they require. Unlike the West where large congregations of workpeople have been completely divorced from the land and are permanently settled in industrial towns and cities, the proportion of permanent town dwellers in India, as compared with the total population, is exceedingly small, and, as has already been pointed out above, the majority of Indian industrial workers return to and maintain their contact with the land. This point cannot be overemphasized because it is the most important factor for the proper appreciation and understanding of the several problems connected with Indian industrial labour.

It is no doubt true that in many instances it is the spirit of adventure or the lure of city life which draws the agriculturist from his land to the towns. In most cases, however, the migration is due to the efforts of the jobber or a recruiting agent to secure the labour which his employer requires. Many must be the stories that are told to the illiterate and ignorant peasant of the attractions of employment in city industries—stories the telling of which in almost

all cases is followed by severe disillusionment—but still, where needs must the devil drives, and so the stream continues to flow. The duration of the stay in a town or city would depend on the extent of the need for cash. It may last only for a few weeks or it may extend to a few months. In many cases, a member of an agriculturist's family may be required to work in a town or city for years in order to send home such remittances as he can from his meagre wages, but even then there are always frequent returns home either for some festive occasion such as a marriage or for partaking in the obsequies and religious rites associated with a death in the family or for short spells of work on the soil during the busy season. Such workers become semi-permanent town dwellers, and, as a result of the experience which they have gained, are able to secure employment in skilled jobs and to command higher wages and better conditions of work.

THE EARLIER FACTORY ACTS.

Up to almost the end of the nineteenth century there was no State control over conditions of employment in any industry in India. Employers were free to do what they liked with the result that Indian labour was exploited to the fullest extent possible. Hours of labour were inordinately excessive, rates of wages unduly low and other conditions of employment as bad as they possibly could be. There was no regulation of the age at which children could be employed, there were no periodical or weekly holidays, and there was no legislation to safeguard factory workers from injury through accidents caused by entanglement with unfenced machinery in motion. Employers thought only in terms of *l s d*, and forgetting the human factor in the labour which they employed considered their workpeople as a speechless and silent part of their factory plants to be worked to the limit of the endurance not of the workers but of the machinery. With the growth of factory organisation in India and the rapid development of her industries, the minds of certain men, notably the late Mr Sorabjee Shapurjee Bengali, C.I.E., however, began to be awakened to the existence of evils which by the standards of to-day would be considered intolerable, and unceasing efforts at securing some improvement in conditions of work in factories resulted, notwithstanding strenuous and universal opposition at the time from all employers, in the passing of the first Indian Factories Act of 1881. This Act gave a limited measure of protection to children—firstly, by prohibiting their employment in factories if they were under seven years

of age and also in two separate factories on the same day, secondly, by restricting their hours of employment to nine per day; and thirdly, by requiring that they should be granted four holidays in a month and also rest intervals in accordance with rules to be framed by local governments. The lower and upper age limits of "children" were fixed at seven and twelve respectively but the scope of the measure was greatly restricted by fixing the number of operatives necessary to constitute a factory at 100, by excluding from the operation of the Act those factories which did not work for more than four months in a year, and also by excluding all establishments which did not use mechanical power: this last exclusion remaining absolute until 1922. The burden of proving that an employed person was over seven or twelve years of age as the case might be was placed on the person accused of employing anyone contrary to the law. The Act contained no restrictions in connection with the employment of adult labour but provision was made for the fencing of such parts of machinery as would be dangerous if left unfenced and for the reporting of accidents. The appointment of inspectors and certifying surgeons was left to the discretion of local governments, and the work of inspection, like most other duties at that time, was thrown at once on the district officers in all provinces. District officers had neither the time nor the necessary technical knowledge for the adequate inspection of factories and it was not long before the 1881 Act became almost a dead letter in most provinces.

Early in 1882, the Coroner of Bombay reported an incident where a boy of 15, after working 14 hours in a mill, including the whole night, was killed by being entangled in a cog-wheel. Of all the provincial governments in India, the Government of Bombay has always taken a progressive lead in matters connected with labour, and, following the Coroner of Bombay's report, the Bombay Government obtained the services of an English Inspector of Factories, Mr. Meade King, for a period of six months to study and make a report on the working of the 1881 Act. His recommendations included the alteration in the age limits of children from seven to 12 to eight to 13, the limitation of their hours of work to six per day, the restriction of the hours of work for females to day light; the creation of a "young persons" class to include all up to 16 and the limitation of their hours of labour; and the abolition of the clause limiting the definition of "factories" to works employing at least 100 persons. Mr. Meade King's report was followed up by a Factories Commission appointed by the Government of Bombay in 1884 to consider whether any further legislative measures were necessary. "The evidence taken by the Commission confirmed the view that conditions were worst in the smaller factories, and particularly in upcountry spinning factories. Many of these factories employed less than 100 persons, and the clause excluding factories which did not work for more than four months had been expressly introduced with the object of exempting them all from the operation of the Act. The work was carried on mainly by women, and evidence given by all the witnesses

familiar with the conditions—nearly all men engaged in the management of factories—was described by the Commission as 'a sad tale of great want on the one side and cruel cupidity on the other'. Women were employed for long periods for 23 hours a day, two or three hours being the longest time for which they could be absent. They were kept at work continuously till they were exhausted (and they were said to die frequently as a result of overwork) and were then replaced by fresh women, if they could be found. In the busiest season the hands worked for several days and nights without stopping. There was no other work available, and the wage was 3 to 4 annas for a day of 16 hours with, at times, half an anna as bonus for longer hours. The factories were nearly all ill-ventilated, and they were covered by corrugated iron roofs in many cases, while the machinery was generally unfenced.*" The mentality of the time may be judged from the fact that the Commission with their professed desire to be 'moderate' in their findings, urged that in factories working for less than six months in a year, women and children should be employed daily for *only* 16 hours with two hours' rest!

The stout opposition put up by employers all over India at the time against further advance in legislation for the control of working conditions in factories made it very difficult for Government to proceed as expeditiously as they could have wished in the matter; but, at the same time, Government were not unmindful of the need for securing as much evidence as possible of prevailing conditions in order to complete their case for greater regulation. Large meetings of textile mill workers were organised in Bombay City by persons interested in labour welfare and memorials praying for better conditions of work in factories were submitted to Government. One such memorial submitted in 1884 demanded (1) a complete day of rest every Sunday, (2) a recess of half an hour, (3) the limitation of hours of work from 6-30 a.m. to sunset, (4) compensation for injuries and disablement, and (5) the payment of wages not later than the 15th of the month following that in which they were earned. It is significant that periods of forty and more than fifty years had to elapse before the fourth and the fifth of these very elementary demands of factory workers in India were granted by the State.

A landmark in the history of factory legislation in India was a memorandum on conditions of work in factories in the Bombay Presidency which was submitted to Her Majesty's Chief Inspector of Factories in England in 1886 by Mr. James Jones, an English Factory Inspector who was appointed by the Government of Bombay in 1883 as the first permanent special Inspector of Factories in India. Mr. Jones' memorandum was incorporated by the British Chief Inspector of Factories in his report for 1886-87 and it makes harrowing reading. Most factories worked from daybreak to sunset, Sundays were usually working days and, if they were holidays, they had to be used for cleaning the frames. There were no proper intervals for rest or meals. Both women and children were worked for excessively long hours. Ventila-

* "Indian Factory Legislation" by A. G. Clow, M.A., C.S.I., C.I.E., F.S.S., I.C.S.

lation in most factories was extremely bad and sanitation left much to be desired. Mr Jones urged that pressure on the Government of India from the Home Government was necessary. In March 1889, the Government of India, after consulting local Governments, forwarded to the Secretary of State for India, definite proposals for the modification of the 1881 Act. The main amendments suggested were (1) the reduction of the number of workers necessary to constitute a factory to 20, (2) the raising of the lower age of children to nine; and (3) the restriction in the hours of work for women to 11. At the suggestion of the Bengal Chamber of Commerce and the Indian Jute Manufacturers' Association, another Factories Commission was appointed in 1890 to enquire into factory conditions in Bengal, Bombay, the North West Provinces and Oudh. On this occasion, female operatives were strongly opposed to any limitation of their hours of work if a similar limitation were not made for the hours of male operatives, and the Commission therefore recommended that the Government should have power to exempt any or all women from the clause limiting their hours to 11 daily.

THE FACTORIES ACT OF 1891.

It is not necessary for the purposes of this note to trace the various stages leading up to the passing of the 1891 Amending Act and it will be sufficient to state that, as finally passed, it represented a bugaboo on the Act of ten years before. The main features of the new Act were (1) the reduction in the number of persons necessary to constitute a factory from 100 to 50 and the grant of the power to local Governments to notify concerns employing 20 or more persons as factories, (2) a compulsory stoppage of work for half an hour between noon and 2 p.m. for all operatives except those employed in factories working on the basis of approved shifts, (3) provision for weekly holidays, (4) the fixation of the lower and upper limits of the age of "children" at nine and 14, the limitation of their daily hours of work to seven and to day light, and the prohibition of their employment in dangerous work, and (5) the limitation of the daily hours of work of women to 11, the restriction of their employment during 8 p.m. and 5 a.m., and the provision that if women were worked for the full eleven hours permitted by the Act they should be given rest intervals amounting in the aggregate to at least an hour and a half per day. Government accepted the recommendation of the Commission of 1890 for the exemption of any or all women from the operation of the regulation of their daily hours of work and a wide exempting clause was added in the 1891 Amending Act. The Act was regarded generally as the final word on the question of factories and His Excellency Lord Landsdowne speaking in the Legislative Council at the time said, "We believe that the effect of our measure will be to place factory labour in India on a proper footing and our Bill will be accepted here and at home not as a mere prelude to still further restrictions but a settlement as final as any settlement of such a question can be."

Apart from the mass meetings of workmen which were organised in the 'eighties by humanitarian social reformers for the purpose of memorialising Government for improvement of conditions of work in factories, Indian factory labour was almost up to the beginning of the twentieth century, a silent and unorganised factor in the huge industrial organisation that was rapidly coming into being in India. Trade unionism was non-existent and there was no channel through which the Indian workman could ventilate his grievances and ask for their redress. The strike as a weapon of defence against oppressive conditions was almost unknown and such industrial disputes as did occur soon terminated in favour of the employer owing to the unlettered power which he enjoyed of replacing all men who downed tools with black-leg labour.

INTRODUCTION OF ELECTRICITY AND THE GREAT PLAGUE.

The last decade of the nineteenth century saw the advent of two new factors in the field of industrial labour in India which were destined, for the time being at any rate, to worsen conditions in Indian factories. The first was the introduction of electricity for purposes of factory lighting and the second was the widespread epidemic of plague. By 1900, the majority of the cotton textile mills in Bombay City and almost all the jute mills in Bengal were lit by electricity, and by the end of that year the ravages of the great epidemic of plague, which first broke out in Bombay City in 1896 and soon spread to other centres in India, resulted in the reduction of the labour force in most centres to a third to a half of its normal strength. The immediate effect of these two events was a considerable increase in working hours. Many of the larger textile mills resorted to day and night working and evidence is not wanting that some mills worked their operatives continuously for stretches of fifteen to twenty hours per day. In Bombay City there were actually auctions for labourers at street corners. The weaker of both the cotton and the jute mills, however, began to be alarmed at the competition from the mills which worked day and night and many of the millowners were not unwilling that Government should step in and prohibit night working altogether. Factory industries were, however, saved from further restrictive measures owing to serious slumps which occurred in both the cotton and the jute trades at the beginning of the twentieth century. The problem of limiting hours of work of adult workers appeared to have solved itself and Government decided that no immediate action was necessary. The result was that an urgently needed reform was postponed by a decade.

The ravages caused by the plague were, however, not entirely devoid of some good effects. The heavy mortality caused by it had thinned the ranks of agricultural workers, and the inequality between the demand for and the supply of labour naturally led to a considerable improvement in agricultural wages. Both cultivators and agricultural labourers felt that

there was little need to search for additional work by migrating to the towns from where reports were continually forthcoming of excessive hours of work in factories which were lit by electricity. Such industrial workers as remained in the towns therefore began to feel more independent than they did before, and the beginning of the twentieth century saw the first awakenings of a sense of class consciousness among industrial workmen. They were less ready to submit to the old conditions, and wherever employers tried to force those conditions upon their workmen they were met by opposition. Black-leg labour was not available to the same extent as before and a few stray strikes met with instantaneous success. These early successes led to disputes of a more widespread and concerted character—disputes which resulted in a general all-round improvement in wages. Employers began to find that a spirit of bargaining was slowly but surely replacing the old tacit acceptance by the workers of such rates and conditions as they chose to offer during the earlier decades of the growth of Indian industrialism.

There was no further advance in factory legislation in India for twenty years after 1891. The period 1891-1911 was one of changing conditions and of investigation. It was also marked by intense industrial activity in the country. There was a rapid expansion in road and railway construction with a collateral activity in building, engineering and mining. The number of factories rose from 656 in 1892 to 2,403 in 1911 and the average daily number of persons employed in these factories increased from 316,816 to 791,044 over the same period. The cotton and the jute industries showed top figures in this expansion and the demand for labour began to get more and more acute as years rolled on. A greater number of factories began to be lit by electricity and night working was quite a common feature in all branches of the textile industry. Most of the cotton and the jute mills, however, did not work on the basis of shifts as they do to-day and the same batch of workpeople who entered a mill in the early hours of the morning were expected to continue working through the day and the evening into the late hours of the night. Hours of work in cotton mills in Bombay averaged fourteen and a half and in the jute mills in Bengal fifteen per day, and when one thinks in terms of averages one must not forget that in averaging there must be several units in frequencies higher than the average. "The result of the scarcity of labour was to increase the interest of the employers in making conditions more attractive. The raising of wages was one step, the provision of houses was another. Inside the factory less was done to make industrial labour attractive... It was an axiom with a number of employers that labour did not object to long hours in the factory, and that the actual hours of work were not considered excessive by those who worked." The Inspector of Factories in Bengal, however, considered that the large number of strikes which were occurring in that province in the first decade of the present century were directly attributable to long hours. Criticising the belief that the Indian labourer "preferred to do a little work over a long period

than to work hard for a short period" he remarked that "the latter system never appears to have been tried so that this opinion may be taken as mere supposition," and in his reports he pointed out on more than one occasion that in workshops, where hours had always been shorter than in textile factories, there was not the same difficulty in obtaining the labour required. In a few individual cases, the managements of some mills admitted that they had increased both their output and their profits substantially as a result of reductions in hours but it was to be at a much later date that these solitary instances were to receive more general confirmation.

As far as the hours of work of women factory workers were concerned, the 1891 Act had restricted them to eleven per day, but owing to a fairly general demand from women for hours coincident with those for men local Governments had granted several exemptions to individual factories and groups of factories permitting the employment of women during hours parallel with those for men. The restrictive provisions of that Act as far as the employment of women was concerned were therefore partially ineffective. It was hoped, however, that the reduction which the Act had made in the hours of work of children to seven per day would result in a diminution in the demand for child labour—a hope that was not fulfilled, both on account of the acute shortage of adult male labour and the higher wages that were demanded by able bodied men. The annual statistics of the average daily numbers of persons employed in factories show that whereas the numbers of men employed rose by a little over 147 per cent in 1911 as compared with 1892, similar increases in the numbers of women and children employed amounted to 164 and more than 175 per cent, respectively. But over and above the employment of a comparatively larger proportion of children, there were flagrant evasions of the provisions of the Act both by the employment of under-aged children and by compelling them to work for considerably longer than the permissible hours. Both the 1881 and the 1891 Acts had provided for certification but this was not compulsory and the burden of proving that a child whose illegal employment was complained of was not under the prescribed age rested with the accused. Convictions were difficult to obtain because both then as now there is much room for honest differences of opinion regarding the ages of Indian children. No certificates of fitness were necessary before children could be employed and employers were consequently left in a position to do much as they liked.

It is noteworthy that the lead in the matter of a statutory reduction in the hours of work of adult workers was given by the Bombay mill-owners.

The agitation against "Sweated labour" conditions started by two of the leading newspapers and periodicals in India was soon taken up by the operatives and at a large meeting of mill workers held in Bombay City on the 24th September 1905 a demand was made for a twelve-hour day. Frightened at the prospect of being faced with a general strike in the cotton

mills in the city, the majority of the Bombay mills agreed to work a twelve-hour day up to the 1st December and a thirteen-hour day thereafter. The Government of India drew up a draft Bill and sent it to local Governments for opinion and this was soon followed by the appointment of a Committee (the Freer-Smith Committee) to make a preliminary survey of the hours and conditions of works of persons of all ages and sexes employed in factories. The Committee recommended the restriction of the hours of adult workers to twelve per day; and, following the Berne Convention of 1906, also recommended that night work for women should be prohibited.

APPOINTMENT OF FACTORY LABOUR COMMISSION OF 1907.

The findings of the Freer-Smith Committee made the appointment of a Commission inevitable and the Home Government in October 1907 announced the appointment of a Factory Labour Commission with seven members under the chairmanship of the Hon'ble Mr. (afterwards Sir) W. T. Morrison, I.C.S. The terms of reference were "to investigate, in respect of all factories in India, the questions referred to Sir Hamilton Freer-Smith's Committee, and the various suggestions and recommendations which that Committee has made." The Commission made a complete survey of factory conditions in India, and their report, which was published in 1908 gives a comprehensive account of conditions at the time and of the defects of the existing legislation.

The Commission endorsed the abuses and the evasions of the 1881 and 1891 Acts in connection with the employment of children. They found that in Calcutta, the headquarters of a factory inspector, from 30 to 40 per cent. of the children employed half-time in jute factories were under the legal age of nine years and that 25 per cent. of the young full-timers were under the legal age of fourteen years. In 17 out of 29 cotton mills visited outside the Bombay Presidency, all the children under 14 years of age were regularly worked the same hours as adults. In many factories the provisions of the Act with regard to the weekly holiday and the daily rest interval were more or less ignored. Factory inspectors admitted that they knew of the existence of these evils and also that they took no steps to stop them. The Commission stated that inspections of large factories by District Magistrates or Civil Surgeons was a useless formality so far as the administration of the factory law was concerned and they recommended that it should be abandoned.

As far as the findings of the Commission with regard to the question of the hours of work of adult males is concerned, it must be admitted, that looked at from the point of view of opinions held on the subject to-day, they must appear to have been of a rather halting character. The Commission were unanimously of opinion that one limitation was essential but the majority are opposed to any direct limitation. Their arguments were—(1) that no case had been made out in favour of applying a principle which

had not been accepted elsewhere, (2) that direct limitation involved a restriction of the working hours in all factories whereas such restriction was only necessary in textile factories, (3) that it would not be possible to enforce such a restriction owing to the necessarily small cadre of the inspecting staff, (4) that most capitalists were opposed to it, and (5) that if the working hours of adult males were limited to 12 or 13 per day, attempts would be made in the future to restrict these hours still further. As far as women's hours were concerned, they actually proposed that the statutory maximum should be increased from 11 to 12. It is noteworthy that only one member (Dr. Nair) dissented from the Commission's findings in the matter of adult hours. Dr. Nair recommended a limitation in the hours of adult male workers to twelve per day and a continuation of the 11-hour day for women with less power to local Governments to grant exemptions. The findings of the Commission were circulated to all provincial Governments for opinions, and, in the light of criticisms received, the Government of India drew up a fresh Bill "to consolidate and amend the law regulating labour in factories." This Bill was introduced in the Governor-General's Legislative Council in July 1909. In drafting the Bill, the Government of India followed the proposals made by Dr. Nair rather than by the majority of the Commission.

THE FACTORIES ACT OF 1911.

Want of space prevents us from recounting the various stages through which the Bill had to go before it was finally passed on the 21st March 1911. It naturally evoked considerable opposition from all quarters but this was not so strong as that which met the proposals of Government in the 'eighties and the 'nineties. It is interesting, however, to observe that one association which submitted a last minute memorial to the Select Committee of the Legislative Council to whom the Bill had been referred, after alluding to "the protest which in point of unanimity and emphasis has seldom if ever been equalled in the case of Indian legislative projects", prayed that "even at this eleventh hour it is earnestly hoped that the revolutionary, dangerous and unnecessary legislation contemplated should not be persisted in."

The 1881 Act endeavoured to place a limitation on the hours of work of children employed in factories. The 1891 Act introduced a further limitation in children's hours and, for the first time, placed a limitation on the hours of work of women. The 1911 Act sought to make a beginning in the restriction of the hours of work of adult males by prescribing that men's hours in textile factories should not exceed twelve per day. It was not considered necessary to limit men's hours in other types of factories because it was believed that excessive hours were only to be found in the textile industry. Endeavours were made to prevent circumventions of the Act firstly by providing that mechanical power should not be used in textile factories for more than twelve hours per day, and, secondly, by prescribing that no persons should be employed in any factory except between the hours of

five-thirty in the morning and seven in the evening. In both cases Local Governments were vested with powers to grant relaxations in cases where factories worked on approved systems of shifts. The provisions of the 1891 Act in connection with women's hours were maintained but with the difference that the rest interval of an hour and a half prescribed for women who were made to work for the full permissible hours was reduced. This was done in order to limit the spreadover. Children's hours in textile factories were reduced to six per day and more stringent measures were provided for inspection and certification. A compulsory rest interval of half an hour in the middle of the day was provided for all operatives except for those employed in continuous process factories. A number of provisions were made for the health and safety of the operatives and several changes designed to make inspection more effective and to both prevent and punish breaches of the Act were incorporated, but, at the same time, wide powers were given to local Governments to grant exemptions.

The 1911 Act was brought into force with effect from the 1st of July 1912. The administration of the new legislation did not prove to be as difficult as was anticipated partly because textile employers in particular were beginning to realise that longer hours with the same sets of operatives did not necessarily mean greater production and that reductions in hours of work wherever they had been brought into effect had not reduced efficiency. Substantial increases in the provincial factory inspection staffs did much to prevent evasions of the Act but the abuse of the employment of children in two separate factories on the same day began to assume more serious proportions after the passing of the 1911 Act. "The reduction in children's hours in textile factories, coupled with the exclusion of many children owing to stricter certification, led to a serious restriction in the supply of child labour, and in some centres many a child worked a full day under two names and with two certificates."

THE ADVENT OF THE GREAT WAR.

Matters in connection with the administration of the Factories Act of 1911 had hardly begun to be regularised when the whole world was convulsed by the outbreak of the Great War of 1914-1918. Metaphorically, the whole world was in the melting pot and Indian labour went into it too. The large contingents of Indian troops which were sent overseas had to be supplied with clothing, rations and the munitions of war. Imports of manufactured articles into India were restricted owing to the bulk of the available British tonnage in ships having been commandeered for transport of men and material to the various seats of war. Heavy demands were also being made by both belligerent and other countries for raw products. Here was the opportunity for which India had been waiting for generations and she was not slow in seizing it with both hands. Much of her available arable land was put under cultivation, and there was an immediate and rapid expansion in every sphere of her industrial activity. Factories

sprang up everywhere like mushrooms; and all available means of transport were requisitioned for the carriage of men, beasts and goods to the ports and to the seats of manufacture. Indian labour was consequently faced with a more than capacity demand for its services. Local Governments were besieged by employers with requests for relaxations of existing restrictions in hours and conditions in factories. The ranks of the factory inspectorate were thinned as a result of some inspectors having joined the fighting forces and the duties of factory inspection were entrusted to officers already overburdened with other work. All the good preparatory work which had been done during the two years following the coming into effect of the 1911 Act appeared to be going by the board—but only temporarily, because Indian labour was no longer that dumb and inarticulate part of factory plants which it used to be during the years preceding the outbreak of the war. If workers were asked to work for longer hours they demanded and secured higher rates of wages. They were also not blind to the fact that employers were making better profits than before. Prices of all commodities were, moreover, rising and Indian operatives, like others, began to feel that they were not able to make both ends meet on prevalent rates. There were, therefore, frequent demands for increases in wage rates—demands which were not always granted without strikes, but the few strikes which occurred were mostly of an unorganised character and were short-lived because employers rather than allow production to suffer by prolonged stoppages of work reached compromises with their workmen by doing out small increases in wage rates at frequent intervals. Apprehensive, however, of their workpeople demanding a continuation of the higher rates after the war had ended, many employers all over India and particularly in the textile industry in the Bombay Presidency resorted to the device of granting wage increases in the form of war or dearness allowances over the basic rates of 1914—a practice which cotton millowners in the cities of Bombay, Ahmedabad and Sholapur and in several other centres are adhering to even to-day. In extenuation of their action in this matter employers referred to the sliding scale allowances dependent on cost of living indexes which were introduced in munition and other factories and establishments in Great Britain and many Western countries towards the end of the war.

One of the most vexed questions in Indian industry is that of wages and Indian employers will not grant increases in rates unless they are forced to do so. Wages in 1916-17 were undoubtedly higher than what they were in 1914, but at the same time, real wages (earnings expressed in terms of sufficiency in relation to the cost of living) were in many centres and cases lower than in the pre-war year; and consequently, industrial workers were very little better off than they were before the war. At the same time, however, the foundations for a better standard of life were being laid. Excessive hours of work, however, still continued to be the feature in all branches of industry and conditions inside the factories had worsened. Owing to the influx of large bodies of persons into the towns, housing became hopelessly inadequate and rents soared to heights which

forced several local Governments to pass legislation to control them. Temporary *bastees* (collections of improvised huts and shelters) sprang up everywhere and these were a standing menace to the maintenance of the good health of town and city populations. Many of the new factories which had been erected during the war to meet the demand for munitions and army clothing were just mere shelters with roofs and sides built of corrugated metal. Conditions in such factories during the summer and the wet seasons were extremely oppressive. Little attempt had been made to study the questions of proper ventilation in the older factories or of the manner in which the ill effects of excessive humidification in weaving sheds could be mitigated. Employers still continued to think in terms of dividends and it would not be incorrect to say that greater care was taken of the machinery than of the human element in front of it. Gaps in muster rolls caused by the serious illness or death of numbers of operatives could always be filled without expense, or at the worst, at the cost of a few rupees paid to a jobber or a recruiting agent, but, replacements of uncared for and neglected machinery would considerably reduce available profits and agency commissions.

Agency commissions are a peculiar feature of Indian industry. Unlike the West where large industrial enterprises are controlled by managing directors who receive fixed salaries, many company flotations in India are directed by what are known as agency firms. Oftener than not the persons comprising these firms have little or no experience in the various branches of the technique of manufacture and they receive their remuneration generally on the basis of a percentage on quantities manufactured irrespective of sales or profits. Most agencies are hereditary and go down from father to son, again irrespective of the fact whether the sons have the necessary qualifications or not to conduct the huge enterprises entrusted to their care. Agency firms are naturally interested mainly in the speeding up of production and they have no time for anything except calculations of their profits both from percentages on production and commissions on purchases of plant and raw material. This should not, however, be taken as indicating that there were no humanitarian employers in India. Most of the larger engineering workshops were controlled by Englishmen and foreigners, many of whom had had actual experience of work in foreign factories before they became industrial entrepreneurs in India, and, in many of these concerns, hours of work were reasonable and the welfare of the labour employed was given a fair measure of studious consideration. Indian employers were also not lacking in pioneer work in the field of industrial welfare and the late Sir Currimbhoy Ebrahim, the late Mr. Nowrojee Wadia, the late Mr. Morarjee Goeladas and the late Mr. Bomonjee Petit did much to provide decent housing and proper medical facilities for the workers employed in the many large cotton mills which they controlled in the cities of Bombay and Sholapur. But taking all industries as a whole, very little was done for the welfare of labour and humanitarian employers were like the proverbial needles in a haystack.

THE AFTERMATH OF THE WAR.

The victorious and successful emergence of Great Britain, her dominions and her allies from the World War of 1914-1918 led the people of the British Empire, and particularly of India, to believe that the dawn of an utopia had at last arrived. Everybody expected that prices would fall, that there would be an ample scope of employment for all and that the end of the war would see the beginning of a long stretch of continuous prosperity for industry, trade and commerce. All these hopes were, however, destined to be blasted sooner than the worst pessimists could have foreseen. The end of the war saw an unprecedented epidemic in the form of influenza sweep over the face of practically the whole world. The ravages wrought by this new 'plague' were probably the worst in India and it was responsible for a total death roll of over eight million persons. Contrary to the expectations of the masses and also of many who should have known better, prices instead of falling rose more sharply than ever before—due, in a large measure, to the unprecedented depreciation in the currencies of most European countries. Merchants and manufacturers all over the world had made phenomenal profits during the period of the war—thirteen large jute mills in Bengal alone paid dividends of 200 per cent and over for the year 1918—and with the gradual closing down of munitions works and factories engaged in the manufacture of war materials, these merchants and manufacturers were looking for new fields for investment. Property valuations increased five-fold and more. The huge reconstruction loans raised by the victorious nations were subscribed several times over within a few hours of the lists being opened. Prices of industrial securities rocketed and there were still large amounts of liquid funds available for further investment. Industrialists therefore got together and floated big companies for transport services by rail, road, sea and air, for the construction of new mills and factories and for the exploitation of mineral resources. The most tempting prospectuses were issued and both the gullibles and the wiseacres hastened in a mad rush to get allotments in the portions of the share capital which were available for subscription by the public. The prices of the shares of several of these new companies doubled or tripled even before the share certificates had been issued. Hectic building activity was evident everywhere and this was naturally followed by heavy demands for all types and kinds of labour.

Similar to the chance which Indian industrialists had secured at the outbreak of the war was the one which Indian labour secured at the end of it. The great influenza epidemic had left large gaps in the ranks of available labour especially as the age groups between 20 and 40 had suffered most heavily and a situation very similar to that which followed the great plague of the nineties was created; but on this occasion there were no auctions of mill workers at street corners because as the result of a country wide expansion in transport services labour had become much more mobile. Notwithstanding this, fancy rates of wages were demanded and were, in many cases, paid. Wages

in the more organised industries, however, lagged far behind the rapid rise in prices and real wages began to become appallingly low. The beginning of the year 1919 therefore saw the outbreak of industrial strife on a scale previously unknown. Although sporadic strikes had occurred prior to and during the war, the power of the strike as an economic weapon for securing redress of grievances had not been generally recognised by Indian labour. "The workers, who were for the most part villagers endeavouring to improve their position by a temporary allegiance to industry, were submissive and unorganised, and if conditions became too distasteful, the natural remedy was not the strike but the abandonment of the mill or of industry generally." As has already been pointed out above, a number of industries were making phenomenal profits and the employers could, by concerted action on the part of labour, have been forced to pay phenomenal wages, but strikes on any organised scale up to then were rare and the employers, as has already been pointed out, were not giving anything away unless they were absolutely forced to do so. Prices, however, were still rising and it was literally becoming almost impossible for the workers to meet even their most necessary expenditure on the existing rates of wages. Had employers then exercised greater vision and been a little more farsighted than what they were in the matter of granting adequate increases in wages themselves without being forced to do so, the history of the labour movement in India during the last eighteen years, so far at least as industrial disputes are concerned, might have been entirely different. Employers, however, were deaf to the approaching roars of thunder and they had to pay the eventual penalty for their short-sightedness in this matter.

The war had done much to educate Indian labour in the conditions of work prevalent and the methods of agitation adopted in other countries. Conditions, particularly as regards working hours, which had formerly been accepted as inevitable, were no longer regarded as tolerable, and while trade unions, as they are understood in the West, were still almost unknown, the value of concerted action was being rapidly realised. A number of strike committees were formed and many large strikes of a fairly concerted character met with almost instantaneous success in several industrial centres in India. The idea of organisation for the purpose of securing concessions received a substantial measure of recognition everywhere and it was not long before some of the earlier strike committees formed themselves into trade unions similar to those which had been formed in the previous century in most European countries. These earlier unions were formed with two main objects in view: (1) increases in wages, and (2) reductions in hours of work. The first was an imperative economic necessity. The second had received considerable support from the Indian Industrial Commission which had been set up by the Government of India in 1916 to examine and report upon the possibilities of further industrial development in India and to make recommendations with particular reference to new openings and to assistance by Government. In their report which was published in 1918,

the Commission noted a growing opinion in India in favour of a ten hours day and they recommended that the possibility of reducing the existing statutory maximum hours should receive further examination. There was a recurrence of the influenza epidemic of 1918-19 in the winter of 1919-1920 and although it was not of such severity as the earlier one it was nevertheless severe enough to be responsible for a total mortality in India of considerably over a million. The acute shortage which had been created in the supply of available labour by the earlier epidemic was accentuated by the later one. This gave added strength to the labour organisations that were coming into being as the result of the successes which had been gained by the earlier strike committees in the matter of wage increases and reductions in hours.

The allied problems of excessive hours and the shortage of labour, were, however, to be temporarily solved by factors the operation of which nobody had foreseen. The gradual demobilisation of the armies of the war and the closing up of the various munitions works had disbanded tens of thousands of both men and women who in anticipation of re-employment in the great industrial enterprises which were being floated everywhere had spent the savings which they had secured during the war. Pre-war industries in the belligerent countries could not, moreover, be re-organised at once. It was suddenly realised that resources would have to be husbanded and there was a perceptible decline in the purchase of commodities and the demand for manufactured goods. Production had necessarily to be eased off for stocks were accumulating. The spectre of unemployment loomed large. But, employers had learnt their lesson *re*, the difficulty of securing workmen during periods of acute shortage of labour and they were not prepared to disband large bodies of their work-people. They were, therefore, unwilling to consider reductions in hours of work. Some employers who had already reduced hours found that production far from having fallen off had actually improved. A new angle of vision came into being and the trail was laid for reforms of a world wide and far reaching character which were to be introduced in all countries as the result of the formation of the International Labour Organisation.

THE INFLUENCE OF THE INTERNATIONAL LABOUR ORGANISATION.

The Preamble to Part XIII of the Treaty of Versailles refers to the fact that "the failure of any nation to adopt humane conditions is an obstacle in the way of other nations which desire to improve conditions in their own countries". In order to establish universal peace based on social justice, the Peace Treaty not only laid down general principles in regard to questions affecting labour which were recognised by the High Contracting Parties to be "of special and urgent importance" but also brought into being the International Labour Organisation which was entrusted with the task of securing, as far as practicable, the observance

of these principles. The duties of this organisation which was to be controlled by a Governing Body consisting of members representing Governments, employers and labour from all countries of chief industrial importance, and from other countries by rotation, were to collect all possible information regarding conditions of employment in all countries and to present reports of such enquiries to the International Labour Conference, which was to meet periodically. Each subject was to be discussed at first at one and later at two sessions. After a first preliminary discussion, the view of various Member States were to be invited on tentative proposals. The International Labour Office would then re-examine these proposals in the light of the criticisms and opinions received and submit a final Report with a Draft Convention or Recommendation to the next Conference for a final discussion and decision. It was laid down that it would be obligatory on all Member States to introduce legislation in their respective countries to deal with matters covered by a Draft Convention but that it would be optional for a Member State to adopt a Recommendation

the recommendations made in the matter by the Industrial Commission, had circulated all local Governments in June 1919 on the subject. After referring to the possibility that shorter hours might mean greater production, the Government of India, in their circular letter, said that they believed that there was a considerable body of opinion among the more enlightened factory owners that the hours of labour might well be reduced without injurious effects on the output of the Indian Mills. The replies showed a general consensus of opinion in favour of a ten-hour day or a sixty-hour week. The subsequent endorsement of a sixty-hour week for India by the Washington Conference received further support from the workmen themselves in the winter of 1919-20 which saw the recrudescence of industrial strife of a greater intensity than that of the year before. The principal cause again was the fact that cash wages were lagging far behind the continued rise in prices and that real wages were again falling. On this occasion, however, the workmen did not limit their demands to increases in wage rates alone and their leaders everywhere demanded both increases in wages and reductions in hours of work. Concerted strikes in the cotton Mills of Bombay, Ahmedabad and Cawnpore resulted in the employers conceding a ten-hour day in addition to the granting of higher wages. In March 1920, the Millowners' Association of Bombay presented a memorial to the Viceroy asking for a statutory reduction of hours of work in all textile factories in India from twelve to ten. The rapid sequence of events in favour of a ten-hour day broke the back of all opposition to reduced hours of work in Indian factories and an easy passage for the necessary legislation was assured.

THE WASHINGTON CONFERENCE.

In accordance with a provision in the Treaty of Versailles, the first International Labour Conference met at Washington on the 29th October 1919 and sat for a month. India, as an original member of the League of Nations, was among the 39 countries represented. The Indian delegates were Sir Louis Keirshaw and Sir Atul Chatterjee representing the Government of India, Sir Alexander Murray representing Indian employers and Mr. N. M. Joshi representing Indian labour. The Conference was asked to consider proposals relating to a number of subjects including the eight hours day, unemployment, the night work of women and young persons, the employment of children, maternity benefits and industrial diseases. The Conference met in an atmosphere of optimism which later experience has shown to be unjustified and thus, the inadequate time allowed for the examination of the immense agenda made it difficult for it to examine critically the various proposals in detail. It is not surprising therefore that, while the deliberations of the Conference had a wide influence, and none of their decisions failed to produce its effect in legislation, difficulties which became apparent later have so far prevented many countries from translating into law the conclusions embodied in the more important Conventions adopted. The Washington Conference adopted the Hours Convention, but as far as India was concerned, her delegates were able to impress the Conference that the adoption of an 8-hour day would be too revolutionary a change for the country and would never be accepted by Indian employers. The Conference therefore agreed to grant a special relaxation in the case of India and it was decided that a beginning should be made by the introduction of a 60-hour week in factories subject to the Indian Factories Act.

The ground for a reduction in factory hour had, however, already been partially prepared by the Government of India who, acting on

CREATION OF GOVERNMENT LABOUR DEPARTMENTS.

In this short historical sketch of the growth of the labour problem in India references have frequently been made to the circularisation to local Governments by the Government of India of the proposals in connection with factory legislation and also to the independent action taken by the Government of Bombay in appointing Committees of Enquiry to examine certain phases connected with the conditions of work in factories in the Bombay Presidency. But apart from these and the examination of certain questions connected with labour by the Factories Commission of 1907 and the Industries Commission of 1916, there was little co-ordination between the Centre and the Provinces in matters connected with labour, and there were no provincial or all-India enquiries of a general character into industrial wages or conditions of employment in industrial establishments. It is true that certain provinces had conducted quinquennial enquiries into agricultural wages but the results of these enquiries were of a very meagre and limited character. The participation of India in international conferences and the increasing interest taken by the Indian public in questions connected with labour made it necessary both

for the Government of India and the Governments of the more industrialised provinces not only to consider the question of the representation of labour in the central and provincial legislatures but also to allocate to special departments or offices the administration of labour questions.

Under the Devolution Rules (Schedule I, Part 2, Rule 26) framed under the Government of India Act, 1919, industrial matters included under the heads "factories" and "welfare of labour" fell within the scope of the provincial legislatures, and the heads "regulation of mines" and "inter-provincial migration" were central subjects. The Government of India established a Labour Bureau in the year 1920 and the Governments of Bengal and Madras created special appointments of labour officers in the same year. The Labour Bureau of the Government of India published a series of bulletins on certain phases of factory work but before its utility could be established the office was abolished in March 1923 on the recommendation of the Indian Retrenchment Committee. The lead in the matter of the creation of a proper and stable department of Government with investigators and an adequate statistical staff to deal with all questions connected with labour was taken by the Government of Bombay who created a Labour Office in 1921. Further details in connection with this office and other matters dealing with Government administration of labour subjects will be found in a special section towards the end of this note.

THE FACTORIES ACT OF 1922.

A Bill to amend the Factories Act of 1911 was introduced by the Government of India in the Legislative Assembly in March 1921 and was passed into law in January 1922. The Amended Act was brought into effect from 1st July 1922. The main provisions of the new law as it now stood were as follows —

1. The definition of the term 'factory' was improved so as to bring within its scope all concerns using power and employing not less than 20 persons. At the same time, local Governments were invested with powers to declare as factories any concerns which were engaged in a manufacturing process and which employed less than 10 persons whether power was used or not. The exemption hitherto enjoyed by indigo, coffee and tea factories was removed; and the clause contained in the 1911 Act permitting an abrogation of the restrictions relating to hours of work, holidays, etc., in respect of persons working in a place within the precincts of a factory where no power was used or where power was used for the purpose of moving or working any appliance in connection with the bringing or taking of any goods into or out of the factory was omitted.

2. Effect was given to the Washington Convention re minimum age of children employed in factories by raising the lower limit of the age of a child from 9 to 12 and by raising the upper limit from 14 to 15. The restriction of

children's hours in textile factories to six per day which was imposed by the 1911 Act was made universally applicable to all factories. The provisions relating to the certificates of age of children were improved by prescribing that only those children who were within the specified age limits and who were fit for employment should receive certificates and that the certificates granted to children who were subsequently found to be unfit could be revoked. No child was to be worked for more than four hours without a rest interval of at least half an hour, and no child could be employed in two factories on the same day. For employing a child in two factories on the same day a parent or a guardian could be fined to the extent of Rs. 20.

3. Both the 1891 and the 1911 Acts restricted women's hours to eleven per day but both Acts permitted relaxations in respect of prohibition of night work and the limitation of daily hours of women employed in cotton gins and presses. The 1922 Act restricted women's hours to eleven per day and to sixty per week and totally prohibited their employment at night between the hours of 7 p.m. and 5-30 a.m. except in seasonal factories in the fish curing and canning industries.

4. The 1911 Act had restricted men's hours to twelve per day in textile factories alone. The 1922 Act restricted men's hours in all factories to eleven per day and to sixty per week. The further restrictions imposed by the earlier Act on the working of textile factories were removed.

5. All operatives were to be given a compulsory weekly holiday subject to the limitation that no worker would be made to work for more than ten consecutive days without a holiday. Provision was also made for the grant of a compulsory rest interval of one hour to all adult workers after every period of six hours' work or, at the request of the employees concerned, of two half-hour periods after five hours' work in factories working for 8½ or less hours a day. The grant of an interval of half an hour was permissible subject to the consent of the operatives and the sanction of Government.

6. Exemptions on defined principles were to be permitted in respect of the restrictions re the weekly holiday, rest intervals and daily and weekly limitation of hours of work of adult males employed in continuous process factories or in occupations connected with power and maintenance plants or in the case of *force majeure*.

7. Provision was made for controlling excessive artificial humidification when injurious to the health of the operatives. (In this connection the Government of India appointed Mr. T. Maloney, a textile expert from Lancashire to make an enquiry into and to make recommendations on the use of artificial humidification in cotton mills in India. Mr. Maloney's report was published early in 1922 and most of his recommendations were adopted by all textile mills without further legislation on the subject.

at the time) Various other provisions dealing with the health and safety of the operatives were also incorporated in the new Act.

8. The rule making powers of local Governments were extended to meet the additional requirements of the new legislation, and the Governor General was in addition, empowered to make rules for the adequate disinfection of wool used in factories in order to prevent infection from anthrax.

9. The limit of maximum fine for single offences against the Act was raised from Rs. 200 to Rs. 500, and a new principle was introduced by providing that a court imposing a fine in respect of an offence (causing bodily injury or death could pay the whole or part of the fine recovered as compensation to the injured or in the case of a workman's death to his legal representatives.

Subsequent amending Acts were passed in 1923, 1926 and 1931 but the changes affected by these were designed rather to meet administrative difficulties which had been experienced in the working of the main Act or for making improvements of a minor character and not for altering any of the main principles laid down in 1922. Factory staffs were adequately expanded in all provinces by recruiting as Inspectors men who had the necessary technical experience and district and other officers who had hitherto been entrusted with considerable factory inspectional duties were completely divested of them although all district collectors were appointed ex-officio Inspectors of Factories. This was done in order to provide for an early inspection of a factory in the absence of a proper Inspector if a report was received of an alleged breach of the Act.

PROPOSALS FOR FURTHER LABOUR LAWS.

Indian labour was jubilant at the success which it had gained as a result of the passing of the Factories Amendment Act of 1922. Further legislative proposals in connection with the grant of workmen's compensation in the case of accidents, for the regulation of working conditions in mines and for the registration of trade unions were under the consideration of the Government of India who were consulting local Governments on the proposals which they had formulated. Proposals to safeguard employees against strikes which were, as has been seen, becoming most disturbing to industry were also under consideration and the Government of Bombay, acting on the recommendations of the Provincial Legislative Council, appointed an Industrial Disputes Committee in 1922 under the chairmanship of Mr. Stanley Reed, editor-in-chief of *The Times of India* "to consider and report on the practicability or otherwise of creating machinery for the prevention and early settlement of industrial disputes." In their report, the Committee, after setting down their views on various schemes of welfare which employers might adopt to improve the conditions of employment and

of the life of their workpeople so as to make them more contented and less amenable to the influence of outside agitators, recommended that a statutory tribunal on the lines of the Industrial Court created by the United Kingdom Act of 1919 should be set up in the Bombay Presidency and that all strikes which could not be settled without Government intervention should be referred to this Court. The Government of Bombay, acting on the recommendations of this Committee, drew up a Bill on the subject which was introduced in the local Legislative Council in 1923-24. In the meanwhile, however, the Government of India informed the Government of Bombay that they themselves were proceeding with similar legislation of an all India character and they requested the local Government to abandon their own measure. The Workmen's Compensation and the Mines Acts were passed in 1923 and the Trade Unions Act was passed in 1926 but the all India Trade Disputes Act was not passed till 1929. The main features of these several pieces of labour legislation will be described in the special sections dealing with these subjects.

THE TURNING OF THE TIDE.

Unfortunately for Indian labour, a period of acute depression set in in all industries towards the end of the year 1922. Some of the first tasks to which the Labour Office created by the Government of Bombay in 1921 had set itself was to compile a cost of living index for working classes in Bombay City, to make an enquiry into their standard of life by the collection of family budgets for representative working class families and to make an enquiry into wages and hours of work in the cotton mill industry in the Bombay Presidency. The cost of living index compiled by that office—the first of its kind in India—showed that except for a slight fall during the earlier months of the year 1920, prices had been steadily rising after the end of the war for the next two years. The peak was reached in October 1920. The annual average of the monthly index numbers (1914=100) for that year was 183. A gradual decline, however, set in from the beginning of the following year and the annual average for the year 1921 registered a fall of ten points on the figure for 1920. A further fall of nine points was registered in the annual average for the year 1922. The year 1923 opened with a sharp decline to 156, but for the next five years—that is, up to the end of the year 1927, the optimum monthly variation was within eleven points between 150 and 161. The Report of the Family Budget Enquiry conducted by the Bombay Labour Office showed the standards of earnings and expenditure of some two thousand representative working class families and single men during the years 1921 and 1922 but no comparable figures were available for any other year. The report of the cotton mills' wages enquiry which was published early in 1923 showed that the real wages of cotton mill workers in Ahmedabad were thirty-three per cent higher in 1921 than in 1914. Later investigations conducted by the Bombay Labour Office have shown that the figures, especially those for 1914 on which this deduction of real wages had been based were very defective but

this was not known at the time that the report was published, and the Ahmedabad Millowners' Association made the first organised post-war move in India for wholesale reductions in wages by announcing that the wages of all workmen in the Ahmedabad cotton mills would be reduced by 20 per cent. with effect from the 1st April 1923. The strike of the Ahmedabad cotton mill workers which followed this announcement was by far the largest and the most disastrous that has ever occurred in that city. It affected 56 out of 61 working mills, involved nearly 45,000 workpeople and resulted in a total time loss of nearly two and a half million man-days. It began on the 1st April and lasted till the 4th June. On that date a compromise was arrived at by the terms of which wages were to be reduced by 15½ per cent. instead of by 20 per cent. Labour received a rude shock and it was felt that the turning of the tide had set in.

There can be no doubt that as compared with the standards of wage rates and prices which were prevalent during the peak period of 1920, real wages continuously improved with the steady decline in the level of prices which first set in in the month of November of that year. The point, however, is whether the wage rates of 1914 and 1920 were sufficient to maintain a decent standard of life. Studying the question from such fragments of statistical information as are available, the answer must be definitely in the negative. Contemporary observers of those periods give harrowing descriptions of insufficiently clad, half starved and unkempt men, women and children rising from street pavements in the cities in the early hours of the morning and dragging their bodies to their factories and places of employment to earn pittance of an average of six to eight annas (six to eight pence) a day for work lasting for anything between twelve to fifteen or more hours per day, and although this description could not apply to all industrial workers in India, it did apply to fairly large proportions of them, and the remainder were not very much better off. Judging the standards of life of Indian workers in 1914 from the standards which labour in all the industrialised countries of the world are endeavouring to maintain to-day, they must be considered as appallingly low and one can well sympathise with Indian labour for attempting to clothe and feed itself and to live as human beings ought to be able to do.

In an earlier paragraph it was stated that in granting increases in wages during the period of high prices between 1917 and 1920 cotton mill owners had resorted to the device of giving the increases in the form of percentage additions to war or dearness allowances over the basic rates of 1914 or of some other year between 1914 and 1917. In the case of the cotton mills in Bombay City these allowances had amounted to 80 per cent. over basic rates for weavers and to 70 per cent. for spinners and women. In 1918-1919 when cotton mills were making phenomenal profits, the Bombay Millowners' Association met demands for a participation in these profits by sanctioning an annual bonus of one month's pay for all cotton mill workers in

Bombay City provided a full year's service had been put in during the year for which the bonus was paid. Proportionate bonuses were to be paid to those who had served for lesser periods. This bonus was paid annually for five years between 1919 and 1923, but as the beginning of the year 1924, the Association decided that the profits made during the previous year would not justify the payment of the annual bonus. This bonus had come to be regarded by the workers as a definite part of their wage contract and when it was not paid in the middle of January with the wages for December as it usually was, the workers of all textile mills in Bombay City went out on strike. The Government of Bombay appointed a Committee under the chairmanship of Sir Norman Macleod, Chief Justice of the High Court of Judicature of Bombay, as a fact-finding body "to consider the nature and basis of the bonus which had been granted to the employees in the cotton mills of Bombay since 1919 and to declare whether the employees had established any enforceable claim, customary, legal or equitable" to the payment of such a bonus. The Committee were also requested to enquire into the profits made by the Bombay mills between 1919 and 1923 and to report on the contention of the millowners that the profits of 1923 did not justify the payment of the annual bonus. The report of the Committee was entirely in favour of the employers and the strike was broken immediately after its publication but not before the industry had lost nearly eight million working days. The strike was greater in proportion than any previous strike which had occurred in the country. It would be interesting to observe that as far as the question of the equity of the bonus was concerned, the Committee held that "the millworkers had not established any enforceable claim, customary, legal or equitable to the payment annually of a bonus, by which we mean that in our opinion such a claim would not be upheld in a court of law."

ABOLITION OF THE EXCISE DUTY ON COTTON MANUFACTURES.

The next big concerted attack by employers on wage rates in India was made in 1925 by the millowners in Bombay City. The cost of living index remained more or less stationary but the cotton mill industry was passing through a period of severe and unprecedented depression and the Millowners' Association, Bombay, decided to reduce the dearness allowances by 20 per cent with effect from the 1st September 1925. This decision, if it had been accepted by the workers would have meant an all round average cut of about 12 per cent. in their earnings. They were not likely to take it lying down but as is usual with strikes in India, no warning was given of the threatened strike. On the 15th September 1925, 33,249 workers from 15 mills suddenly downed tools and by the 6th of October there was a complete stoppage of work in all the textile mills in the city and island of Bombay. The Government of Bombay held several conferences with the representatives of both sides and several proposals and counter-proposals were considered but neither of the parties appeared likely to give in. On this
